AWARD WINNERS

SNAP AWARD WINNERS

SNAP is a leading print and digital magazine featuring new building products and related trends for architects and building designers.

AWARD CRITERIA

Full-page advertisers seen in *SNAP* in the January/February 2015 issue qualified for the competition. The jury was comprised of architects representing the breadth of the profession—firms of all sizes working on projects from large-scale commercial to residential and interiors.

Azon Saves Energy

Daylighting systems produced with Azon structural thermal barrier technology—the AZOP® or Dual-Cavity—on aluminum windows and high performance glazing components for insulating glass, will yield a fenestration system capable of outperforming the highest efficiency and sustainability standards.

4 Azon's window with triple insulating panes for the best source of energy efficiency performance.

• AZOP® structural barrier panes and dual cavity insulating fenestration systems yield the most demanding thermal and condensation requirements for high speed, industry professionals. They are designed to maintain consistent and uniform.

• AZOP® structural barrier panes are applied in multiple steps.

Epro's Fully Integrated Field Installed Composite Waterproofing System Provides the Most Protection, Fastest Installation, Lowest Cost and Best Warranty in the Industry Today!

Four New Field Installed Systems Available...

- System in CRK Concrete / CMU Wall Waterproofing
- System in CRK Roof / Deck Waterproofing
- System in CRK Masonry / Gas Boiler
- System in CRK Staircase / Waterproofing / Gas Boiler

Excellent Strength and Chemical Resistance - the most durable field installed composite system design utilizing CRK.

Self-Healing - The high modulus epoxy or resin applied membrane forms a monolithic layer.

Exceptional Adhesion - The arrival of heat causes membrane bonds to reflow, re-bonding to concrete or masonry substrate.

Self-Healing - The membrane expands on any penetration of the system.

Relaxation Protection - Multiple waterproofing protection allows for drainage plane.
