The Armstrong Commercial Corlon® Flooring System.
A new concept that's been proved in use for over 20 years.

Sandovel, newest of the Vinyl Corlon
is a styling breakthrough in resilient flooring.
It offers the expensive look of terrazzo
at a sheet vinyl flooring price.
THE RECORD REPORTS

21 Editorial
   The manufacturers and suppliers: Let’s not forget their role—and risk

INTRODUCTION

Products represented in this year's Product Reports issue signify the continuing research that all manufacturers are conducting, as well as design trends through the 1970s. The intimate relationship between manufacturers and architects and engineers is obvious—with innovative product design leading to new architectural applications; and vice versa, innovative architectural designs leading to manufacturers developing new or refining older products.

Design trends through the 1970s (as are all design trends regardless of period) are reflected in the upsurge of specifying certain building products. These trends are represented in one way or another throughout this issue, and deserve special notice here.

Restoration, rehabilitation, renovation, preservation and conservation require the revival of special products and the need for artisans to carry out special techniques in order to reproduce the best design characteristics of any project. These once called "lost arts" are not lost, as exemplified by one artisan with a highly specialized type of work that has been singled out as a case history on page 14.

There has also been a refocusing on interior design, and therefore a tremendous diversity of interior-oriented products have flourished. Of particular note in this issue is information and photographs of Finishes (UCI 9) including new designs for wallcoverings, carpeting, flooring and tile, and Furnishings (UCI 12) stressing new furniture designs and artwork. A case history in newly-devised processes for graphics on page 12 complements this interior products presentation.

Energy conservation is, of course, another "hot" topic that has influenced design through the 1970s, and it will be one of the prime determinants of design in the 1980s. A wide range of products affect energy consumption, including those in product divisions of Mechanical (UCI 15), Electrical (UCI 16), Thermal and moisture protection (UCI 7) and Doors and windows (UCI 8). Of special interest is the development of solar energy products and lighting (with task/ambient lighting research, testing and product design escalating).

Use of computers is continuing to grow in all areas of design, represented in this issue in Office supplies (UCI 1), and in the Architectural Business section which deals with one firm's positive reaction to word processing.

Design and construction through the 1970s have been tremendously influenced by a high level of technology, following increased efforts to explore outer space. While construction has been only one area affected, it is certainly one of the most noticeable. This often called "high tech" design approach means more than sleek aluminum and reflective glass facades and colorless, stark and geometric interior spaces; the modern technology has influenced product development in other ways as explored in the Architectural Engineering case history on page 16 with an application of fiberglass reinforced concrete exterior panels on a high-rise building in San Francisco.

One of the best ways in which to keep tabs on innovative design and design trends is to follow product development. This annual issue does this homework for you, and now introduces the thrust in product development for the 1980s. —Janet Nairn
NEW FORMS AND MATERIALS CREATE GRAPHICS AND ART

Ornament may have seemed crime to early Modernists, but graphics as art for both interior and exterior use has remained a critical design element. Examples shown here particularly represent newly-devised processes that create graphics from existing materials.

One company lithographs large photomurals on synthetic paper, and “Dunes” (3) is an example of a variety of landscapes offered. Modern techniques in weaving and cutting carpet led to sculptured tapestries at Cleveland’s Hopkins International Airport (2) where architect Michael Benjamin designed a 420-foot-long avian tapestry. It is not only an unexpected exciting design, but the birds’ flight path guides pedestrians through this section, and acoustically aids in deadening sound. For a concave wall at the American College of Cardiology in Bethesda, Maryland, interior designer Emily Malino installed a wool tapestry (4) woven with sharply defined levels to create shadows. In another example, French ceramics student Roger Capron uses tile for custom corporate logos (1). A Permagraphics process enlarges photographs or drawings (5) for porcelain enamel panels. Colorful banners continue to flourish, here defining space while acting as sunshades (8). As exterior graphics, trash baskets (6) sport mini-murals with special messages or logos. And while the tension fabric structure shown (7) is experimental research for “environmental structures” by Alexander Messinger and his students at the University of Pennsylvania, it could be used as unusual and dramatic sculpture.
ORNAMENTAL PLASTER FOR RESTORATION AND MODERN DESIGNS AVAILABLE THROUGH SPECIAL PROCESS

In these days of widespread restoration, rehabilitation, and preservation there is a lack of artisans who are qualified to renew varying aspects of decayed buildings. One company that has specialized in casting ornamental plaster is Dovetail, Inc., of Sudbury, Massachusetts.

In restoration of the Worcester, Massachusetts, Mechanics Hall (above), architects Anderson-Nolter & Finegold hired Dovetail to recreate plaster brackets and special details like the Greek face shown.

In another handsome restoration, the Connecticut State Capitol in Hartford, Connecticut, originally designed by Richard Mitchell Upjohn and now under restoration direction of architect Dominic Cimino, the House Chamber (left) was returned to its 1879 status. The interiors represent some of the finest examples of the high Victorian Gothic style with vaulted ceilings, stained glass skylights, Venetian palazzo-styled court, rows of tiered columns, decorative painted stencils and sculptured hardware. Dovetail was one of 27 firms hired for restoration duties for the exterior and interior. Dovetail recreated a variety of plaster work including the cornices, and refurbished 15 original oak entrance doors and frames.

The process for recreating plaster ornamentation involves stripping and repairing the original piece to be reproduced, constructing forms to cradle the new molds, laborious preparation of the molds and eventually the pouring and setting of plaster. In addition to this type of work, the firm has perfected a patent-pending process of treating plaster with color so that the color is an integral part of the plaster. In conjunction with this approach, they are also preparing contemporary designs (such as the one shown far left) as interior art work made of plaster. Exterior plaster decoration is also possible.
Though the unusual undulating facade of the 19-story Pacific Mutual Building in San Francisco echoes tradition of the area, it is constructed of a most modern material—fiberglass reinforced concrete. The lightweight FRC panels, which are only about 3/8-in.-thick, cut costs through savings in supporting steel, construction time, erection labor and fabrication time. Another noteworthy feature of the building exterior is the operable windows provided by architect Pereira to take advantage of the area's mild year-round climate for potential energy savings.
ULTRA-THIN CONCRETE PANELS ACHIEVE REQUISITE STRENGTH WITH SPECIALLY DEVELOPED GLASS-FIBER REINFORCEMENT

Thin-skinned panels of concrete—an apparent contradiction in terms—have become a reality through the use of alkali-resistant glass fibers in place of conventional steel reinforcement. Glass fibers spread throughout a mix of sand and portland cement give fiberglass reinforced concrete (FRC) tensile and flexural strengths that permit thin walls and intricate surface details not ordinarily possible.

The inherent advantages of these panels—light weight, moldability, speed of fabrication and ease of erection—were exploited in the manufacture and installation of intaglio-patterned balcony panels and alternating vertical panels for the Pacific Mutual Building in San Francisco, shown here, designed by William L. Pereira Associates.

In use in this country for only a few years, mainly in low-rise buildings, FRC panels are now finding application in tall buildings because of the material’s potentialities for both cost savings and architectural expression. Dillingham Construction Co., builder of the Pacific Mutual Building, estimates a saving of 25-30 per cent on the wall system compared with a typical precast design. In addition, the weight of perimeter steel could be reduced by 5 per cent.

Following on the heels of FRC panels for this 19-story high rise in San Francisco will be applications in a 23-story Hyatt Regency hotel in Minneapolis and a 30-story office tower in Dallas. Weight savings was a major factor in the selection of FRC panels for the 30-story Southland Center Tower in Dallas designed by Harwood K. Smith & Partners, Inc. The tower is being built atop a low-rise structure that is part of a 20-year-old hotel-office complex, and the new construction will be supported by foundations already in place.

The special fiberglass reinforcement used in the panels for the Pacific Mutual Building was manufactured by Owens-Corning Fiberglas Corporation and the panels were fabricated by Basalt Rock Company.
WATER-DIVERTING PRODUCT HELPS SEEPAGE PROBLEMS OF FOUNDATION WALLS

A new solution to underground water seepage and damage due to pressure of moisture buildup in soil resting against a basement or retaining wall is a water-diverting product called Enkadrain. The material is an open nylon mesh backed with a polyester filter fabric (middle left). Arriving sheet-rolled, the material is installed flat with the nylon mesh against a foundation wall. Its design relieves hydrostatic pressure against underground walls by creating an escape route for the water before it contacts waterproofing membranes, providing a channel down and away from the wall. It is intended to be a replacement for gravel, stone or aggregates, and is used in place of protective boards or film to protect waterproofing membranes from damage during backfilling and can also provide filtration for underground drainage pipes and systems.

Two applications are shown—being installed (photos above) in the new Akzona Inc. headquarters office building in Asheville, North Carolina, designed by I.M. Pei & Partners; and in-place (bottom left) in the solar and underground Remington residence, also in Asheville, designed by Richard Webster. Certain sections of the house are completely wrapped for protection. Installation is efficient at a rate of 30 to 40 square meters per hour, and the material can conform to design details wherever necessary.

One major obstacle for underground structures is, of course, water seepage—often requiring elaborate waterproofing measures and special site drainage systems. The manufacturer claims that wrapping underground sections which have been conventionally waterproofed sheds moisture effectively, as has been demonstrated in European applications.

The practical depth below grade at which Enkadrain can be used is 30 feet. In the Remington house, the material is used 10 feet below grade, and in the Akzona Inc. office building it runs 20 feet below grade.
Word processing has a positive impact on one firm’s production

In typical architectural practice, each set of drawings is accompanied by a written document specifying a number of items including equipment, types of finish, and construction materials. These project manuals are generally prepared from a master data base that is developed over a period of years, and from which paragraphs are drawn, as needed. This is our approach to preparing specifications. Because every project is new, each requires writing a portion of the text from scratch. It is the nature of the business that clients or architects change the scope of the project frequently. As a result, specifications and reports must be rewritten through many edits, and the same 500 pages may be typed as many as four times from initial implementation to final bid documents.

by Mark J. Kalin RA, CSI

To reduce the endless retyping, we used to keep papers in handwritten form until the very last moment. It was cut and paste, producing a document with four layers of tape and four layers of staples. By straining everyone’s patience to the hilt, we were able to produce 500 pages a month with this manual system.

When work flow is heavy and you are living with a cumbersome system, there is really no choice but to automate. Our first step in this direction was time-sharing—it seemed clean and easy. All that was required was a terminal in our office and the problems of production were handed over to someone else. We transmitted text to a mainframe computer in New York where it was processed and flown back to us by air courier. Text entered one day was generally on our hands before 9:00 A.M. the next day.

While this arrangement proved far from ideal in the long run, it worked—there is no question that it worked. It showed us what could be done with automated word processing.

The New York service provided very sophisticated programs and competent analysts willing to help us. In our office, we added two operators and a pair of terminals. Together, the operators could perform the work that three or four of our people had been doing manually, and the output nearly doubled. But—pleased as we were—there were still problems with this arrangement. Cost was high; cost per page for computer time never went much below $1.50. In essence, we were paying $1.50 per page to have the machine manipulate text—$1.50 on top of operator expenses. (In total, this arrangement cost $5,000 per month.)

In my opinion, however, the major problem was that it took our operators four months to thoroughly learn the entry codes needed to access and manipulate a document. Each paragraph, for example, would begin with a specific code, unique to the system.

Decisions on a project frequently will be postponed to the last minute for one reason or another but, when they are finally made, everything has to happen almost simultaneously. We purposely delay writing most specifications until project drawings are 80 per cent complete to allow time for selection of equipment and materials. At this point, no more than 30 per cent of the documentation will have been written, yet both drawings and specifications must be bound together in the bid package. It’s not hard to see that there is always pressure on the people preparing documentation, and more often than not we find ourselves in a time bind. In view of this, it was critical when the courier’s plane failed to arrive in Boston before lunch.

At any rate, the high cost, the difficulty of training operators, and the occasional delays in receiving text from New York, finally added up in our minds to the need for a captive system here in our office. So we set out to find the optimum one for us.

Information storage capacity and expansion potential counted in equipment selection

For more than six months before we placed an order, we looked into various types of word processing equipment. We examined literature from approximately 25 manufacturers and attended seven demonstrations but found that most units did not offer sufficient on-line storage capacity. Our needs mandated efficient handling of documents containing as many as 150 pages. In addition, we had to be able to work on several of these documents simultaneously, so we were seeking a 500-page disk.

Based on our experience with the time-sharing system, we realized that we had to have a video-display screen. With the time-sharing system we had used, it was difficult and expensive to see what text was being entered. When the finished document came back from New York, it wasn’t always what we thought we had sent. With a screen, the operator would be immediately aware of what was being typed. We also saw the need for increasing hard disk storage and software updating, without bringing in new hardware. Furthermore, we wanted the capability for additional workstations without necessitating that we add other components such as printers. Therefore, the cost of expansion was to be simply that of a workstation alone, and not a workstation, processor, and printer.

We purchased a Wang Laboratories System 25, Model 1, with 500 pages on hard disk and telecommunications, math, and sort capabilities. To this we added three workstations and two printers—a 40 character-second (cps) unit and a high-speed 200-cps matrix printer. Since the Model 1 can accept up to six remote stations, we still have future expansion capabilities. The total cost of this package was equal to eight months of time-sharing costs, including the extra stations and printers, plus such options as telecommunications. (A basic system could be purchased for approximately $12,000.) Considering what we were spending per month for the former time-sharing service, the payback on this in-house system was rather fast. (Editor’s note—Brown, Daltas and Associates has about $8 billion worth of projects in the firm at this time. Projects are often international, large, and may require as many as 12,000 drawings. The Cambridge office writes some 3,000 pages of specifications and other contract documents per month.)

continued on page 20
System virtually eliminates time problems of revising specs throughout design

Preparation of a specification generally begins with a pre-edited document. Having been in business for over two decades—most of the copy we need has been written in one form or another for a previous project. An architect edits a master specification—perhaps adding new paragraphs—and submits the marked-up copy to one of our operators. The operator retrieves the base copy—reading it from one of our 150 storage diskettes onto the system’s active disk—then modifies it, producing a brand-new document. The new form is printed and returned to the architect, who may make additional revisions or append data that have developed since the specification was last revised. This procedure is repeated as many times as necessary to produce a final document. On the average, we edit three times, but there have been instances of 12 or 15 rewrites to incorporate late-breaking changes. It is standard practice to make a hard copy of each edited version, and the 200-cps printer pays for itself in fast turnaround, alone.

An operator can move or copy paragraphs from one document into another, or move a paragraph from location to location within a document. Another feature, which is extremely helpful, is a glossary of programs which eliminate many repetitive keyboarding operations. For example, for a client’s review, we were able to sift through pages of interior specifications on a project for just the changes. Otherwise the client would have had to re-read the entire set of specifications to pick out the relevant information.

It is also possible to make changes throughout a text with our system. Last year, before the System 25 was installed, we had a 200-page document with the words “contracting officer” used throughout, and a change to “engineer” was made. The new words did not fit the old space, so many lines were retyped. Then “engineer” was altered to “architect,” again a space off, and more retyping was needed. Today with the “search and replace” feature, we can automatically find all the occurrences of any item or phrase in the document and re-format and change it to the correct term throughout, saving both time and tempers.

Besides speeding spec editing, the system can research outside data

While preparing contract documents is our single most important word processing application, it is not the only application. Occasionally we use our system to telecommunicate to New York for recovery of text from our old time-sharing service. In another role, the system provides us access to a variety of data bases throughout the country, such as those at the Library of Congress or the National Technical Information Service (NTIS). We went to the NTIS, for example, to locate sources of colored aggregate in Saudi Arabia, and to the Library of Congress to search for published information on laser cutting of materials. Our staff uses these data bases to keep abreast to technological advances—a must for state-of-the-art firms. It’s true that connect time runs $35 to $60 an hour for these services, but we believe the cost is economical compared to that of sending a professional staff member to the library or hiring a consultant. For $14, and in three minutes, we located all current architectural grants and their filing requirements, for the students working in our office.

The math features allow us to give the various disciplines within our office a report on the time it takes to complete work and make revisions. And using the sort system, we inventory alphabetical and numerical master lists of furniture and equipment to ensure, for example, that a specific chair is purchased and eventually installed in its specific space, coordinated with all other installations and accountability requirements.

Since the firm may have $50,000 riding on each document page, accuracy counts

We can produce 3,000 specification pages per month with our new system, compared to the 900 that could be handled through time-sharing, and just 500 pages when we were producing everything manually. Work time per page has decreased markedly. Documents that used to take three weeks to complete—even with the aid of time-sharing—can now be generated in one.

Next to time savings, our system’s biggest contribution is accuracy. Last-minute cost-saving information and adjustments can be efficiently entered into the text. Cost differences between gages of metals and assemblies can be very significant on large projects. Before we automated in-house, if we found an error in a final document, we would have a typist change the hard copy. The time-sharing version was often still in error, and we’d have to remember this when we used it again. Now, when we make a last-minute change, it is a simple matter to revise the master document so that it is always current. We can now print a page or a whole specification and be certain that the final and stored copies are identical.

The additional bonus of the word processing system is the way in which the professionals in the office and the operators find new applications. Terminals may be placed remotely from the word processor master unit, and many operators are self-taught because the system is highly human-engineered. As the office evolves, so does the system.
The manufacturers and suppliers: Let's not forget their role—and risk

The hero of most issues of RECORD is you readers—architects and engineers. But we are reminded, in the months when this Product Reports issue is being researched and produced, of the enormous infusion of new products and materials—and as important, of new ideas—that are offered to design professionals by the manufacturers. And this year, in developing the Round Table on Risk-Taking in Architecture which appeared in our mid-August Engineering for Architecture issue, we were also reminded of the commitments and risks that the manufacturers—like the design professionals—are required to make in the cause of architecture. For they too not only hope for profit and the satisfaction of a job well done, but are subject to the same enormous and growing risks of liability. As was pointed out at the Round Table, it is of course true that the manufacturers involved are drawn almost immediately into any suit involved in a building failure—not just the much-publicized collapses, but the everyday ordinary "troubles" that misjudgments in product application or field installation can cause.

It is also true, as attorney Arthur Kornblut pointed out at the Round Table, that "product liability is far different from the design professional's liability... and in many respects it is much more severe." While a professional is liable only if he is held negligent, "if there is any injury or loss suffered as a result of a defect in the manufacture of a product, the manufacturer is going to bear it." And now we are beginning to see some cases that are analyzing the notion of liability for a design defect in a manufactured product. Manufacturers may even be liable for failure to "warn of danger or instruct as to use."

And finally, it is true, as the counsel for one manufacturer pointed out at the Round Table, that "when our products spew out of our plants, we have no idea where they are being used—and this means risk is imposed on us that we don't even know about. . . ."

What almost everyone at the Round Table agreed on was that there was risk involved for everyone on any building project—and that honest disclosure on all sides is probably the best way to avoid problems. "It is not so much a problem of hanging together," said Albert Bartosic of Rohm & Haas, "it is a matter of working together with the best available information."

This issue is one form of that working together. It cannot and does not offer detailed technical information—but it does show you the new products and materials that have just or will soon come on the market. And technical information is available at the mailing of a Reader Service Inquiry Card.

How to use this issue
This year, Product Reports is organized as usual on the 16-division UCI format. The page number for each division can be found in the Table of Contents, page 3, and more information on any product or service in this issue can be easily obtained by using the Reader Service Inquiry Cards on pages 9 and 10. There are circle numbers for more information on the products in any advertisement, and for more information on any product or literature item in the editorial pages you simply need write in the number of the item in boxes provided on the Reader Service Cards. An index to manufacturers whose products appear editorially may be found on page 5, while advertisers in this issue are indexed on page 4.

May you find in this issue 100 solutions to your problems and 100 fresh ideas you can use. . . .

—Walter F. Wagner, Jr.
Press-on letters are now obsolete.

No waiting or processing. KroyType lettering is ready for use by simply removing the firm backing.

The adhesive backed tape is incredibly easy to position. And reposition. Sticks to any surface.

The KroyType 80™ Automatic Lettering Machine.

It's the technological breakthrough that's actually making press-on letters obsolete.

It's easy to use. Just spin the typedisc and photoready letters are automatically and precisely printed. Alignment and spacing are always perfect. And KroyType™ lettering is produced on a transparent tape that is adhesive backed for easy positioning. And, repositioning.

The KroyType 80 Lettering Machine. Five times faster than press-on letters. Saves time. Saves money. Makes press-on letters obsolete. For more information... or, for the machine itself, (only $645) call Toll Free: (800) 328-1306

KroyType™ and KroyType® are trademarks of Kroy Industries Inc. for the incredible new lettering system that makes press-on letters obsolete.
COMPUTERS

1 COMPUTER GRAPHICS / The CS-2000 software for the company’s AD/380 automated design and drafting system provides architects and engineers with a wide range of geometric design capabilities. / AutoTrol Technology Corp.

2 DESKTOP COMPUTER / New developments in the HP System 45 Desktop Computer include an increase in maximum main memory, a reduction in cost of adding memory, changes in the operating system to speed and simplify use, and new availability of “nationalized” keyboards. / Hewlett-Packard Co.

INFORMATION SYSTEMS

3 VISUAL DISPLAYS / The Abodia Visual Series is designed to view slide collections, but locking plexiglass doors prevent damage to masters. One model holds 3,000 slides per drawer; drawers can be ordered as needed to fit into pre-drilled holes in the base. The base will hold up to 65,000 slides. / Elden Enterprises, Inc.

4 DRAWING TEMPLATE / Specifically designed drawing template for wheelchair maneuverability offers three plan views in three different scales. Printed on clear plastic, the 4-by 6-in. template can be placed over drawings to check the space clearance. / Bobrick Washroom Equipment, Inc. GB*

5 STOCK SLIDES / A Stock Caption Slide Library is available to assist the audiovisual communicator in presenting a variety of graphic work. A total of 510 captions contains key words, numbers and phrases of business, promotion, training and education. / Wilson/Lund

MAINTENANCE/OPERATIONAL EQUIPMENT

6 REAR PROJECTION / The three screens of the Space Scan 3000 accommodate both carousel-type slide and Super 8 projectors. Synchronization of program is possible with combined film footage soundtrack and slides; built-in stereo speakers are also included. / Rappaport Exhibits, Inc.

7 PLOTTING SYSTEM / A remote electrostatic plotting system with job entry capabilities is called the Remote Spooling Vector Processor. It offers a plot compression algorithm that reduces data communications time. / Versatec, A Xerox Co.

8 PROJECTION SCREEN / A permanent or semi-permanent installation of a wall-mounted front or rear projection screen has been simplified. The frames are custom built of 1/8-in. square, hard alloy structural aluminum tubing; all hardware is concealed. / Da-Lite Screen Co. Inc.

9 CALCULATORS / Eleven new calculators were recently introduced. The PW-80 Pocket Watch shown is an eight-digit, four-function LCD horizontal card-type calculator. It features an independent memory, a per cent key, a timer with two alarms and a stop-watch. / Casio.
OFFICE MACHINES

12 PIN-DRAFTING / Pin Registered Overlay Drafting—an applied method of producing a variety of architectural drawings with a minimum of repetition through the use of specific graphics and photo reproduction is available with a full range of equipment. / Keuffel & Esser Co.

10 ROTATING DRAWING BOARD / The Rotobord II Drawing Board has a rotating board so that drawing is always in the horizontal plane without shadows. A special space mechanism features a micrometer for scaling off precise distances. / Zr-Tech Division, Aiken Corp.

11 SWINGING PANELS / Large maps, charts or drawings can be stored conveniently, yet remain handy, for reference and viewing at eye level. The Multiplex units are available with 10 or 20 panels. / Multiplex Display Fixture Co.

13 SPECIAL PRINTER / The Xerox 2080 Printer is a large document printer featuring a zoom lens optical system to create prints directly from original engineering drawings in any image sizes ranging from less than half of the original size to nearly 50 per cent larger. / Xerox Corp. E*

14 OVERLAY DRAFTING / A line of exposing units for overlay drafting are self-contained with metal halide light source in the base and vacuum frame top. The Flip/Top configuration allows as many as six overlays and exposure of all simultaneously. / nuArc Company, Inc.

OFFICE SUPPLIES

15 MEASURING INSTRUMENT / The Opto-Scale Precision Glass Measuring Instrument is specially designed for use in a wide range of linear scaling and measuring applications, from PC art-works and boards to photogrammetry. / Bishop Graphics.

16 METRIC REFERENCE / The Metric Cube was designed by an engineer for those who need ready reference to the Standard International Metric of Units. A desk-top, plastic cube one liter in volume provides metric data on thermal properties, angle, torque, energy, linear measurement, etc. Price: $4.50 each, post paid. / MetriCube.

17 PHANTOGRAM CHARTS / Phantogram Perspective Charts guide the construction of three-dimensionally perceivable desk-top images. A variety of sets are available. / GraphiCraft.

18 DRAWING AID / The expanded line of drawing aids includes three French curves. This is fabricated of heavy-gauge clear plastic and guaranteed flat. / The C-Thru Ruler Co.

REPRODUCTION EQUIPMENT

19 DRAFTING SUPPLIES / A large variety of regularly used drafting supplies is available. A catalog is also offered. / Saga, Division of Dade, Inc.

20 PAPER COPIER / The new A.B. Dick 980 copier is a compact-sized plain paper copier that is operated by a micro-computer chip. The machine weighs 100 lb. and can turn out 8½ by 11-in. copies at the rate of 11 per minute. / A.B. Dick Co.

21 DRAWING AID / Four types of polyester films, called Silkybak, are available, onto which black ink drawing or lettering can be applied and then reproduced on any copier to save time redrawing standard or common features. / Saga, Division of Dade, Inc.
FENCES & GATES

34 VINYL COATED FENCE / Offered on both security and recreational diamond mesh fence products, the PermaGreen process deposits a 7-mil coating of pvc, applied by the fusion method, over a core of zinc galvanized steel wire. Coating colors are "Woodland Green" or black. / Anchor Fence Div., Anchor Post Products Inc. GB, ICX*

IRRIGATION SYSTEMS

35 IRRIGATION CONTROLLER / Available in 12- and 24-station models, the "KCS" keyboard irrigation controller uses solid-state microprocessor technology to provide numerous timing, scheduling and reliability features. / Johns-Manville Buckner Irrigation Systems.

LANDSCAPING

36 TREE GRATES / Decorative cast-iron grates protect trees in landscaped paved areas and street applications. There are over 60 standard shapes, sizes and designs; custom grates may be ordered. / Neenah Foundry Co.

37 STEEL GUARD / For use in conjunction with gates, tree guards add protection for the tree as well as being decorative. Five standard styles are offered in fabricated steel; custom designs are available. / Neenah Foundry Co.

38 CEMENT PAVERS / Formed from a special concrete mix, Kodl-Stone pavers are sand-set with hand-tight joints to produce an authentic cobblestone surface for pedestrian and vehicular traffic areas. Each stone weighs about 25 lb, and has a grooved texture that forms a pattern of nine equidistant squares. Gray, red, black and brown colors are offered in the 12- by 12- by 2 1/4-in. pavers. / Wausau Tile.

SITE FURNISHINGS

39 CONTROUURED BENCH / The Corbel bench has a contoured seat for comfort; constructed of solid wood rails fastened to steel plates. Redwood version of the bench is suitable for both indoor and outdoor use. / Landscape Forms, Inc. GB, ICX*

40 PLANT TUBS / "RO-Kay" planters hold 4-, 6- or 7-gal containers; a ridge molded into the bottom supports smaller pots and allows for drainage. Reinforced fiberglass tubs measure 14 1/2-in. high; exterior is textured to simulate clay and comes in six colors. Unit price: $13.00. / Molded Fiber Glass Tray Co.

41 LITTER RECEPTACLES / Solid stock red oak is used to center the design of the "Promenade" fiberglass receptacle. Two opposing openings are set in the side of the 28-in. high unit; removable top allows easy access to galvanized steel liners for emptying. / Landscape Forms, Inc. GB, ICX*

42 SITE FURNITURE / Promenade tables and seats are available in redwood for exterior use and oak for interior applications. Inserts are fiberglass in any of 12 colors and two textures; a slatted wood top is also offered. Table measures 30-in. high by 51-in. sq.; seats are 17-in. high by 23-in. sq. / Landscape Forms, Inc. GB, ICX*
15,000 DESIGNS

Neenah’s iron construction castings serve the industry with over 15,000 design variations, meeting many local, state and federal standards.

A 10,000 ton inventory is available at Neenah and 7 distribution centers.

Time-proven construction castings backed by reliable technical information and continuing research has earned Neenah a reputation for excellent quality and product reliability.

Neenah is...more than a foundry.

CEMENTITIOUS DECKS

55 INSULATED PANELS / New thicknesses have been added to the Petri-Cal Urthane line of insulated roof deck panels. The structural cement fiber substrate is bonded to a urethane foam core to provide a roof deck with a U-factor as low as .05. The deck is topped with a textured asphalitic felt surface. / Cornell Corp. GB*

CONCRETE ACCESSORIES

56 CONCRETE BLOCK DEVICE / A new way to finish a concrete block wall has been designed that uses a patented plastic trapezoidal strip placed into any standard size concrete block available from a local block manufacturer. / Redy-Fund Systems. GB*

57 CONCRETE EMBOSSES / Lightweight (10-15 lb) aluminum stamping tools enable one workman to emboss 2,000 sq ft of concrete a day. Interlocking system makes the tool easy to handle and align patterns for drives, walkways, patios, etc. Tile, brick and cobblestone patterns are available. / International Design Systems Ltd.

58 CONCRETE SEALER / Formulated for use on concrete driveways, and walls, sealer prevents surface water penetration and protects concrete from salt, calcium chloride and other snow melters. It also helps prevent flaking of surfaces from freeze-thaw action and minimizes dusting of concrete. / E.A. Thompson Co., Inc.

CONCRETE FORMWORK

59 LEAVE-IN-PLACE FORMS / Constructed of two skins of metal lath separated by an epoxy truss system, RedForm one-use concrete forms allow easy installation of re-bar, sleeves, conduit and electric boxes. RedForm units are pre-fabricated for haunches, brick ledges and keyways, in 2-ft widths up to 40 ft in length. / Titan Inc.

60 ONE-USE METAL FORMS / The Sure-Form column and beam system is a labor-saving method for installing reinforced concrete framing. Shop-fabricated leave-on metal forms, reinforcing steel and other inserts are made to order, requiring only erection, bracing and concreting on job site. / Dayton Sure-Form, Inc.

61 COLUMN FORMS / One-piece, molded fiberglass round column forms require minimal handling and set-up time, and are said to provide excellent finish appearance in the concrete. Forms, for rent or sale, are offered in sizes 12'- to 63'-in, in diameter by any desired length. / Molded Fiber Glass Concrete Forms Co.

CONCRETE MATERIALS

62 CONCRETE FLOORS / A full line of concrete products for industrial flooring systems includes monolithic Anvil-Top 200 heavy-duty metallic floor surface and several dry application natural aggregate hardeners for lighter-use applications such as schools, malls and sidewalks. / Master Builders. GB*

63 EPOXY GROUT / Especially formulated for high impact and loading requirements, Por-Rok epoxy grout is suitable for most general applications, including engines, compressors, columns, anchor bolts, base plates, etc. The grout is chemical-, solvent- and oil-resistant. / Halvemite. IC, E*

*In 1980 Sweet's Catalog File (s): General Building (GB); Light Residential Construction (LR); Engineering (E); Interiors (I); Industrial Construction & Renovation (ICR).
**SIMULATED MASONRY**

**76 STUCCO-LOOK SIDING** / Said to have an authentic, etched stucco texture, "Adobe" hardboard panel siding comes in 4'-by-8' and 4'-by-9'-1/2 panels with shiplap edge. Colors are primed or prefinished solid ivory white and prefinished ivory shadowtone. / Weyerhaeuser Co.

**STONE**

**77 STONE PANELS** / While used primarily for exterior walls, natural stone panels can be used on interior applications as in this ceiling of regular Monterey Sand panels offering a textured pattern. / Sanspray Corp.

**78 GLAZED MASONRY** / A new facing, Spectra-Glaze incorporates blends of ceramic particles to create a satiny texture in earth-tone hues and natural colors. / The Burns & Russell Company.

**UNIT MASONRY**

**79 WALL BRICK** / A German-made product for interiors, these "Handform" brick units are actual fired brick in two colors and textures. They have a handmade look because they are made in hand type molds. / Roben Tile.

**80 FACE BRICK** / Northampton 3004 face brick is made in standard size as well as oversize for large commercial and residential projects. / Triangle Brick.

**81 PRE-FINISHED STONE SIDING** / The stone, offered in nine natural colors, is bonded to plywood or mineral fiber board substrates. "Regular" panels weigh 1.8 lb per sq ft. / Sanspray Corp.

**82 MATCHING STONE BATTENS** / Stone coated battens are now available, called Sanbatts. They are made from beveled 1/2 by 3-in. exterior plywood, and designed for efficient installation and to enhance appearance at the joint, hiding nailheads and caulk bead. / Sanspray Corp.

**83 STONE COATED BOARD** / Stone coated mineral 1/4-in. mineral fiber board is shown here on dorms. The pre-finished panels are also available with plywood substrates in nine colors and four textures. / Sanspray Corp.

**84 REINFORCED BRICK PANELS** / Often used in restorations, these brick panels are made from 60 per cent crushed stone and reinforced with fiberglass. They can be nailed over most regular surfaces; and are washable. / Marlite Division, Masonite Corp.

ARCHITECTURAL RECORD Mid-October 1979
FASTENERS & SUPPORTS

97 LARGE FASTENERS / New large nuts and bolts for presses, metalworking machinery, injection molding presses, pumps, compressors, generators and turbines are forged for maximum strength and service life. / Jos. Dyson & Sons Inc.

METAL DECKING

98 ROOF DECKS / This company's Types B and F roof decks are now fabricated in 36-in. and 30-in. widths. The advantages of these wider sections are greater coverage, faster installation, fewer sheets to handle and fewer attachments. / Epic Metals Corp. GB*

99 COMPOSITE FLOOR DECK / The Epicore Composite Floor Deck allowed the construction of an additional story between existing floors during renovation of the loft-type building shown. Epicore dovetail-ribbed configuration requires thinner slabs for any given loading so floors could be added while maintaining necessary ceiling heights. / Epic Metals Corp. GB*

METALS & ALLOYS

100 ETCHED METAL PANELS / Hand-etched panels are available in almost any size, laminated to a substrate or un laminated. Etched brass and pewter has a cigarette-burn and alcohol-proof coating; panels are suitable for wall paneling, counter tops, trim, and such decorative uses as the elevator enclosure shown above. / Harry Luntstead Designs.

STRUCTURAL METAL FRAMING

101 SPACE FRAME / The "Space-Truss" is a computerized modular system designed to span areas up to 100 feet without columnar support. All linear members are round aluminum tubes; any finish may be specified. / Roper IBG International. GB*

102 TRIANGULAR SPACE FRAME / A new 5-ft triangular module has been added to the company's existing 4-ft and 5-ft square modules. / Powersstrut, Van Huffel Tube Corp. GB*

103 VERTICAL SPACE FRAMES / Two vertical "Moduspan" space-frames are shown in an unusual architectural application, the remodeled Indiana Bell Telephone Exchange Building. Both space frames are 35 feet high, one is 115 feet long and the other is 130 feet long. In addition to their decorative function, they serve as supports for climbing plants, which will shade the facades of the building. / Unistrut Corp. GB*

104 BRASS-PLATED SPACE FRAME / The "Meroform" space frame is shown in a clothing department of a shopping center store. The space frame supports four speakers and a sign as well as providing an interesting interior design. The space frame uses standardized pre-engineered construction elements, but permits variability in composition according to available space. / Unistrut Corp. GB*

105 SPACE FRAME / An interior space frame serves as a roof support, and an exterior frame provides a sun screen over a courtyard in this office/laboratory building. The "Mero" frame was pre-engineered and assembled in place. / Unistrut Corp. GB*
ARCHITECTURAL WOODWORK

118 HARDWOODS / Offered are 1/4-in. thick, UL-fire retardant plywood panels in three classes, using 51 different kinds of woods. / Algoma Hardwoods Inc.

LAMINATED & PROCESSED SHEETS

119 PLASTIC LAMINATE / The existing line of decorative high-pressure laminates has been expanded to include “Vessel Oak.” It is a rift cut, straight grained oak laminate. / Neva-mar Corp.

120 DECORATIVE LAMINATES / For use in kitchens and baths, lighter wood hues so popular today are combined with a resistant surface. / Ralph Wilson Plastics Co.

121 METALLIC LAMINATES / Mettine Mica is a decorative surface material which offers the look of solid metal with anodized aluminum finishes for durability. It can be cut, routed, drilled and machined with standard metalworking equipment. / The October Co., Inc. GB, 1*

PLASTIC FABRICATIONS

122 HONEYCOMB / Called NorCore this plastic honeycomb material can be used in transparent ceilings, walls, partitions, skylights and geodesic domes. Its features are light weight and strength. / Norfield Corp.

PLASTIC LAMINATES

123 LAMINATE DESIGNS / One of nine new natural reproductions from Series II-Naturals, called Woven Grass, has a pattern and color of texture of natural material. / Formica Corp. GB*

124 REINFORCED PLASTIC / Key-Lite is a multi-purpose reinforced plastic film for use in cold frame construction; plant, shrub and tree protection; and protective covering for greenhouses and storage buildings. / Keystone Group.

WOOD TREATMENT

125 COATED PARTICLEBOARD / A hot melt polymer coated particleboard reduces moisture absorption and may be applied to underlayment or industrial board for various uses. It also prevents “creeping” or dimensional change in high humidity conditions. / Duratine Division, Wilmette Industries, Inc.

126 FIRE RATED LUMBER / Recognized by national, state and local codes for use in interior or exterior construction, NCX lumber has been treated with monomeric resin and cured: fire-retardant properties are unaffected by outdoor weather exposure or high humidity. / Koppers Co., Inc.
3022 WIRE MESH GRIPS / An expanded 16-page, 2-color catalog on Flexible Wire Mesh Holding Grips for cable support, cable pulling and strain relief for flexible cord cable and liquid-tight conduit. Combined catalog, comparison list and trade price schedule contains information on codes and how to select the proper grip. Also featured is the new packaging concept, "Bin Storage Boxes," for easy storage and use. / Slater Electric Inc.

3023 ALUMINUM SYSTEM / Technal of America's new color mini-catalog has information needed to specify Secural Railing and the Universal Aluminum System. Includes illustrated instructions covering simple assembly. Photos show a wide range of applications including partitions, shelving, shopfronts, framing, displays, furniture, showcases, and more. / Technal of America.

3024 TURNABLE BEARINGS / Product information is available on a new line of space-saving, lightweight turntable bearings which offer substantial capacity/weight and capacity/cost ratios, optimum space utilization and available integral gearing. The "K" series bearings are designed for light- and medium-duty applications in small cranes, excavators, and in non-precision industrial equipment where rotation is intermittent and at relatively low velocity. / Keene Corporation.

3025 TAMPER-PROOF FASTENING / A four-page catalog details the "Guard-Nut" fastening system. Explains the basic concept, types, applications, and removal of the system; which is available in nut, bolt, and screw configurations. / Guard Nut.

3026 WHITE BRONZE ALLOY / Data sheet on a proprietary copper base alloy developed for jewelry and art casters to whom it is of particular interest due to its low melting range, and white color. Contains information on casting, stress relieving, soldering and brazing, and forms available. / Belmont Metals Inc.

3027 PEBS GUIDEBOOK / The PEBS Guidebook is a 20-page, color brochure providing information on the facilities and capabilities of Johns-Manville, as well as their line of metal building products. A description, recommended uses, installation, and technical data is supplied for each product. / Johns-Manville Corporation.

3028 STEEL FLOOR DECKS / Epic Metals Corporation has published a 24-page brochure on steel composite floor decks. New technical material includes a stud value chart for composite beam design, a concrete volume chart, a design example, and loading diagrams for bending moments and deflections. Technical tables have been revised. / Epic Metals Corporation.

WOOD AND PLASTICS:
3029 PRESSURE-TREATED WOOD / A colorful booklet which contains information on the value of pressure-treated woods. Includes data on types of pressure treatment, uses, advantages, limitations, and the location of 24 facilities that produce and store this company's products. / Koppers Company, Inc.

3030 KITCHEN LAMINATES / Entitled "1979's Most Appealing Kitchens," this colorful 16-page booklet depicts six architectural renderings and floor plan ideas for kitchens using Wilsonart Brand high-pressure laminated plastic. / Wilsonart.

CUMBERLAND WOODCRAFT CO., INC.

Your one source for Solid Wood Victorian Millwork

Take advantage of the rebirth in Victorian elegance with our complete line of interior and exterior designs. Now you can carry the graceful Victorian look throughout your building. New exterior patterns in brackets and spandrels are ideal for entrances, marquees, and under soffits. Inside, select from:

- Brackets
- Medallions
- Grilles
- Privacy Panels
- Fretwork
- Beaded Grilles
- Turnings & Raised Panel Posts
- Wainscoting

All items are available in whatever quantity you need to suit the application. We faithfully reproduce Victorian patterns, some dating back to the turn of the century. Each piece is made from premium grade, solid hardwood. Our factory direct prices are within most remodeling or new building budgets.

For complete catalog and price list, send $2.00 to: Cumberland Woodcraft Co., Inc., R.D. 5, Box 452, Carlisle, PA 17013 Phone (717) 243-0063. For information, use inquiry card.

NEW from Masonite Corporation

An embossed prefinished door facing that has the look of oak, the feel of oak, without the cost of oak.

OakCountry™

A sensationally faithful reproduction of flawless rotary-cut oak, OakCountry has to be seen to be believed. The deep-grained texture is embossed into durable hardboard, making OakCountry 50% denser than natural wood...structurally stronger...dimensionally more stable. Prefinished in light or dark tones on a mar-resistant surface, it won't crack, split, check or splinter. OakCountry will awaken your senses. Even the economic ones! Send for a free OakCountry sample and a list of door manufacturers using OakCountry door facings. Write, Masonite Corporation, Door Product Manager, 29 North Wacker Drive, Chicago, Illinois 60606.

Circle 1015 on inquiry card

Masonite is a registered trademark of Masonite Corporation.
They had no reservations.

When evaluating structural systems for Ramada Inns, specifiers across the country found one they could recommend without reservation: Trus Joist.

They selected wood and steel open-web TJL joists for the Inn at Grand Island, Nebraska, and all-wood TJII joists for the Inn at Breezewood, Pennsylvania.

In both cases, Trus Joist systems met or exceeded all criteria for engineering, cost and design.

Trus Joist is the most economical in-place structural system available. And it lends itself to any design from the routine to the innovative. You can select from a series of eight open-web and TJII joists in many profiles, lengths, depths and load-carrying capacities.

Call or write us today. From design to on-site technical assistance, our 150 field technical representatives are at your service. Unreservedly.

CLADDING/SIDING

139 INSULATING FINISHING / Photo illustrates the components of the non-flammable Sto system: Portland cement/concrete compound; insulating panel; fiberglass mesh; and final StofIt synthetic resin plaster finish. Applied over a block wall, the system has a R-20 insulating value. Elastic qualities of the adhesive and insulation absorb minor substrate movements. / Sto Energy Conservation Inc. GB*

140 EMBOSSED SIDING / The textured, natural look of wood shingles is available in easy-care Shingl-Wood aluminum siding, offered in a choice of colors. / Alcan Building Products.

141 CLAPBOARD SIDING / Said to duplicate the appearance of traditional clapboard, smooth "Deluxe" aluminum siding comes in a choice of colors, and is backed by a 30-year warranty. / Alcan Building Products.

142 REDWOOD PLYWOOD / An economical grade of redwood plywood, knot and sapwood textured siding is shown here on a residence designed by architects Ron Gladder & Associates. Siding has the high fire and weather resistance of redwood with the strength of plywood. Water repellent can be applied to retain the siding's fresh appearance. / California Redwood Assn.

143 OVERLAI D SIDING / Structural "Stucco 316" is a durable, lightweight overlaid plywood with a realistic embossed texture. Finish is a natural cream color or pre-finished "Ic White" acrylic latex stain. "Stucco 316" can be applied directly to studs, and meets building code requirements for racking strength without sheathing. / Simpson Timber Co. LR*

144 BEADED SIDING / "Jamestown" aluminum siding reproduces the groove and beaded drip edge used on wide wood siding of the Colonial era to reduce warping. Standard colors are white, ivory, mist blue, creme, and moss; matching accent trim such as gutters, soffit and fascia are available in "Jamestown" colors. / Reynolds Metals.

145 EXTERIOR CLADDING / Inorganic Glasweld panels are offered with accessory and trim packages, facilitating use of this non-metallic enamel coated product in complete exterior cladding and interior finish systems. Glasweld components are available in 21 durable colors; prices start at $1.50/sq ft. / Glasweld Products Div., Gil Corp. GB*

146 STONE-LIKE CLADDING / The thin-section design of Qasal architectural cladding panels facilitates its use as a rain screen in curtain wall applications. Available up to 5-ft wide by 10-ft long, Qasal can be pre-fabricated into large framed wall sections to further reduce costs, which start at $1.50/sq ft. / Glasweld Products, Div. of Gil Corp. GB*

147 VENEER CLADDING / Panels and accessories in standard widths to 5-ft offer the color permanence of porcelain enamel on steel in economically-installed cladding systems. New colors include light, intermediate and dark bronze; panels in this extended color range are available in stock lengths to 12-ft; prices start at $2.50/sq ft. / Miraval Products Div., Gil Corp. GB*
148 MOBILE HOME SIDING / For application on single- and double-wide mobile and modular homes, "Wood-\n
hewn" aluminum siding has the appearance of weathered barnwood. / Reynolds Metals Co.

149 TROWELED-STUCCO / Tudor \n
Inn hardboard panel siding has the look of genuine stucco in 4’-by-8’ and 4’-by-\n
9’ panels with fitted shiplap edges. Pattern registers panel-to-panel, for use alone, or it may be installed with trim as shown. Siding comes pre-primed or finished in white acrylic. / Boise Cascade.

150 HARDBOARD SIDING / Embossed Sawtooth Lath siding has the weathered look of barnboard in horizontal lapboards. Weather-drip edges are reversible; boards measure 9/16’ by 16’-thick. "Sawtooth Lath" comes in three rustic colors of brown, tan and gray, as well as primed. / Boise Cascade.

151 INSULATING SIDING / "Climatic" aluminum siding is insulated with a sprayed-on polyurethane foam that hardens to form a rigid bond to the back of the panel. Siding is available in smooth or woodgrain finish in 12 colors. / Hunter Douglas Inc.

152 SHIPLAP CLADDING / Aggregate coated building panels have a shiplap joint, a thin line between panels, which eliminates the need for moldings or battens and minimizes the use of sealant. One-half-in. plywood substrate allows for 24-in. stud spacing. Shiplap Samspray comes in 4’-by-8’ and 4’-by-\n
10’ panels, in any of 10 colors. / Samspray Corp. GB, LR

153 AGGREGATE PANELS / Insulation up to four-in. thick may be laminated to Samspray natural stone panels for use as window sash panels, incase panels, and wall sections. Standard substrates are fiber-reinforced cement or plywood; insulating cores may be styrofoam, polystyrene, urethane or perlite. Ten colors and four textures are available. / Samspray Corp. GB, LR*

154 COMPOSITE BUILDING PANELS

154 FASCIA PANELS / Pre-formed panels are 10’-long and are available in three widths and batten placements. Standard finish choices are dark and medium bronze, black and white acrylic. Panels, heads and sills are pre-punched with nailing slots and weep holes. / W.P. Hickman Co. GB, LR*

155 FRP BUILDING PANEL / The Tedlar PVF film finish on Glassboard building panels protects them from damaging ultraviolet rays and weathering, making possible a wide variety of exterior architectural applications. The lightweight panels are impact-resistant; graffiti and other soils are easy to remove. / Kemlite Corp. GB*

156 INSULATED CLADDING / Miral\n
wal panels combine the color stability of porcelain enamel with high-grade substrates and a choice of insulating cores. Panels are available for direct glazing or for architectural cladding applications. Color options now include light, medium and dark bronze; prices start at $4.00/ sq. ft. / Miralwal Products Div., Gill Corp. GB*

157 INSULATED CONCRETE / Ma\n
chine sculptured finishes in a choice of textures are offered for Corewall insulated concrete panels. Various insulating cores provide certified U values as low as .07. / Butler Mfg. Co. ICR*

158 TRANSLUCENT PANELS / Ab\n
yte-Structoglass fiberglass reinforced panels have excellent light transmission values, providing diffused glare-free natural light through windows, sidewalls and monitor sections. Panels resist breakage, impact, vibration and twist. / Reichhold Chemicals, Inc.

FLASHING

159 ROOF FLASHING / The Seal Lock fascia and flashing is a complete system including outside and inside corners, a scupper unit, foam seal, Ony-Guard flashing, fascia clip nails and water dam joint tape. The fascia clip and cover plate are made of extruded aluminum, and the water dam is a pre-formed cant strip. / Johns-Manville.
160 ROOFING REPAIRS / A neoprene sheet system is now available from this company for repair of defective flashings, gutter linings, and other areas subject to movement and water infiltration. Called "Permaflash," it effects a permanent, watertight seal and is not damaged by exposure to natural elements. / Republic Powdered Metals, Inc.

161 SHEET METAL FLASHING / "Econo-zinc" weathers naturally as solution for gravel stops, flashing, gutters and downspouts. / Ball Metal and Chemical Division. GB*

162 ROOF INSULATION / Water-resistant, insulating Styrofoam boards may be laid directly over single-ply sheet membrane roofing. A ballasting layer of crushed stone is placed on top. The Styrofoam will protect the membrane from damage caused by ultraviolet light, temperature cycling and physical abuse. / Dow Chemical, U.S.A.

163 PLATE/SILL GASKET / Installed over anchor bolts in sill or masonry wall construction, cellulose fiber blanket is sandwiched between layers of polyethylene. When compressed between masonry and framing at sill or plate, it stops drafts, air leakage and heat loss. "Sil Sealer" also reduces noise transmission when used to seal voids at top, bottom and edges of partition walls. / Conwed Corp.

164 POLYSTYRENE INSULATION / A high-performance (R-19) thermal product, Foamular panels can be used for sheathing exterior walls in cavity wall, perimeter and "Z-furring" applications. Water-resistant, panels have tongue-and-groove edges to reduce air infiltration. Foamlar panels should be installed with 1/2-in. thick gypsum board on the interior side of the wall. / UC Industries.

165 EXTERIOR INSULATION / The Setting exterior wall insulation and finish system is offered in a wide variety of textures and 114 colors. Installations consist of flexible polystyrene insulation board, reinforcing fabric, primer/adhesive, and a waterproof synthetic finish coat. / Compo Industries, Inc. GB, ICR*

166 METAL ROOF INSULATION / A complete interior roof and ceiling insulation/finish system for metal buildings, the Money Clip is a supporting extrusion clipped to the bottom flange of the roof rafter, held in place by spring action. This carries an insulating batt, and a composite board that acts as vapor barrier and finished ceiling. / Johns-Manville Corp.

167 RE-ROOF BOARD / A homogeneous board formed of expanded perlite particles, Fesco thermal roof insulation covers an existing roof, and acts as a leveling course for the new built-up roof. Board needs no backing, and has UL fire hazard classification as a roofing material with reference to internal and external fire exposure. / Johns-Manville. GB, ICR, E*

168 MEMBRANE ROOFING / Especially suitable for roofs where the slope is too steep to use aggregate surfacing, Aluminum KM4 five-layer laminate membrane has a heavy, embossed aluminum top sheet. Field-applied coatings are available in 14 colors. / Koppers Co., Inc. GB*

169 STANDING SEAM ROOF / For regular construction and re-roofing applications, the MR-24 metal roof features a roll-formed double-lock seam with concealed purlin attachments, good insulating properties, provisions to accept heat-cold cycle movement, and a UL Class 90 wind uplift rating. / Butler Mfg. Co., ICR*

170 METAL ROOFING / Galvanized steel or aluminum exterior metal roofing, siding, fascia and wall panels are available precoated in "Weathering Copper": pure ground copper particle liquefied in an acrylic carrier. Coating weathers from new-penny bright to the distinctive copper patina. / Architectural Engineering Products Co. GB*

171 METAL ROOFING / Prefabricated Microzinc-70 roofing systems are guaranteed against corrosion-induced leaks for 20 years. Pre-weathered natural patina will not rust or produce runoff stains; scratches or other damage to the surface are self-healing. Metal roof meets FS QQZ100A. / Ball Metal & Chemical Div. GB*
PREFORMED WALL & ROOF PANELS

172 TRANSLUCENT PANELS / Woven-mesh fiberglass cloth provides an extra margin of safety in Stronglight sunlight roofing panels for metal buildings. Though not designed for foot traffic, 10 jumps by a 215-lb man produced only the minimal damage shown in photo. / Lasco Industries, GB, LR*

173 INSULATING FINISH / Available in four surface textures, including natural aggregate, and 14 standard colors, Dryvit Outsulation is an inherently crack-resistant, insulating wall system. / Dryvit System, Inc. GB*

ROOF ACCESSORIES

174 FASCIA/FLASHING / Easy-to-install, Seal Lock fascia and flashing provides roof protection and finished edge trim in one system. Installation consists of a water dam, foam seal, On-Guard flashing, fascia clips and nails, cover plates, outside and inside corners, scuppers and water dam joint tape. / Johns-Manville Corp. GB*

175 ROOF EDGING / The two-part Econosnap edge consists of a galvanized spring clip and snap-on fascia, which hold the single-ply roofing membrane firmly in place. Roof accessory comes in three standard sizes with field-formed corners and eight colors. / W. P. Hickman Co.

176 BUILD-UP ROOFING / A non-woven fiber glass mat coated with an asphalt emulsion, GlassThane provides a moisture-resistant facing for urethane insulations used in built-up roofing applications. The lightweight mat is said to maintain exceptional dimensional stability. / Johns-Manville.

177 SEALANTS

177 LOW MODULUS SEALANT / A versatile elastomeric silicone, "795" sealant adheres to most common construction materials without the use of a primer. Its low modulus, high elongation properties allow its use in joints and glazing systems that experience plus/minus 50 per cent movement. / Dow Corning Corp. GB, LR*

178 ROOF REPAIR / Roofing materials supplied in the Wet Surface Roof Repair Kit adhere to wet surfaces at any temperature. Kit contains Shield-Tite coating and cement, reinforcing membrane, trowels and brushes. / Randustrial Corp.

179 BUTYL SEALANT / Formulated for non-stringy gumminess with excellent slump resistance, "757" butyl sealant will not harden or lose flexibility, adhesion, or cohesion after prolonged exposure to high or low temperatures and ultraviolet light. Standard colors are white, gray, black, bronze and natural. / Protective Treatments, Inc.

180 CONSTRUCTION SEALANTS / Now manufactured in the U.S., the Bostik line includes elastomeric sealants for vertical and horizontal construction; "Polyurethane-plus," one- and two-part types; polysulfide and silicone sealants. One-part compounds are offered in cartridge, pour, and gun-grade formulations. / Bostik Chemical Group.

181 CORRUGATED ASPHALT / Onyclic corrugated asphalt sheet can be curved lengthwise to a 15-ft radius to conform to the shape of the structure in roofing and siding applications. Panels meet major codes, and are impact-, chemical- and weather-resistant. NFPA Class C rating. / Onyclic USA, Inc. GB*

182 INSULATION COATING / Scotch-Clad polyurethane foam roof coating is designed for application over sprayed-in-place urethane foam insulation, protecting it from weather and moisture. With the addition of roofing granules, the coating system meets UL 790 Class A requirement. / 3M.

183 MEMBRANE CLAMP / Special fittings are designed for the long-term sealing of pipe or conduit penetrations through waterproofing membranes. The basic cast-bronze-stainless steel unit is for the sealing of surface of sub-surface membranes exposed to standing water. / Pem Fountain Co.
Energy-Efficient, Performance-Proven. The Zonolite Roof Deck is system-engineered to conserve energy by providing maximum insulation value while serving as an ideal substrate for the roofing membrane. This Zonolite Roof Deck System combines Zonolite Insulating Concrete, Insulperm Insulation Board and the Zonolite Base Ply Fastener. Designed to take advantage of the best characteristics of each of its components, Zonolite Roof Insulation Systems provide optimum in-place benefits to the user. The new Grace Built-up Roofing Warranty provides 10 years of roof top protection with no dollar limit and single source responsibility when a Zonolite Roof Deck is the base for an Approved Built-up Roofing Membrane installed by a Grace approved BUR contractor. The strength, wind and fire protection, economy and durability of the easy-to-install Zonolite Roof Deck has been demonstrated by years of efficient performance. Contact your local Zonolite Representative or Construction Products Division, W. R. Grace & Co., Cambridge, MA 02140. In Canada: 294 Clements Rd. West, Ajax, Ontario L1S 3C6. GRACE

the Heirloom roof...

ColorKlad

elegance, quality, durability far beyond conventional roofs!

Wise architects, discriminating homeowners and buyers are recognizing the unique, lasting values of a roof sheathed in the beauty and permanence of ColorKlad.

A HOME MORE BEAUTIFUL WITH ColorKlad

ColorKlad prepainted sheeting has earned a solid reputation for handsome appearance, strength, durability, ease of installation and maintenance as roof and fascia on commercial structures. Now, these same qualities, plus some additional ones, are being recognized by architects, contractors and owners for new roofs on new homes or as replacement on prestigious older homes.

Whatever the climate (rain — snow — ice — wind — sun — fire hazards), ColorKlad roofs offer protection from perils of nature that used to plague designers and homeowners using conventional roofing materials.

No wonder ColorKlad is being specified for more and more new and replacement roofs on homes being constructed by and for those who really care about lasting beauty.

ColorKlad is available in nine exciting colors, two textures. A written 20 year warranty assures color integrity. Write for our free brochure and color samples.

ColorKlad — the heirloom roof, uniqueness for generation after generation!"
3031 WOODEBOOK / The WoodBook 79 is a hard cover reference manual containing almost 300 pages of the latest information on a wide range of wood products. Packed with current design and specification data, The WoodBook is a valuable source of information for anyone involved with the use of wood products in residential or commercial construction. Copies are available for $10, from the WoodBook, 3516 Sacramento St., San Francisco, California 94118.

3032 FLOOR JOIST / A new brochure describing the residential TJI floor joist is available. Includes information on uniformity, quality, installation, and geometry of the "T" shape all wood TJI floor joist. / Trus Joist Corporation.

3033 HARDWOOD FLOORS / A new sample case of wood floor samples is now available from the makers of hardwood floor products. Each kit contains a package of sales literature, mounted panels of four plank floor styles, two parquet floors, and both smooth-surfaced and distressed strip floors. Designed for use by field salesmen, the kit contains display panels of eight ChasEvak floor designs. The floor sample kit is available for $16.00 from Memphis Hardwood Flooring Co., P.O. Box 7253, Memphis, Tennessee 38117.

3034 WOOD BUYER'S GUIDE / A directory of the major hardwood plywood and veneer manufacturers in the U.S. is now available. Listed in the brochure are 79 manufacturers and prefashers of hardwood plywood, 54 manufacturers of fine face and commercial veneer, and veneer sales agents. Information on each company plant includes complete address, maximum and preferred sizes manufactured, and interior and exterior glue type. / Hardwood Plywood Manufacturers Association.

3036 PLYWOOD SIDING / Technical characteristics, product description, acceptance, and pattern illustrations are provided for California clear grade plywood siding in a full color product information sheet. / Simpson Timber Company.

3037 RED CEDAR ROOFS / A new color brochure from Shakertown shows how patented 8-foot siding strips of red cedar barn shakes or textured shingles can be used for mansard rooflines, with savings in labor and waste that make real cedar shakes or shingles economically possible. / Shakertown.

3038 PLYWOOD WALL SYSTEMS / A 20-page pamphlet providing detailed information on plywood use in siding and paneling, the APA Sturd-i-Wall combination siding and sheathing, wall sheathing, shear walls, and special wall systems. Charts of the proper grades and thicknesses to use in specific situations and a photographic guide to different types of siding are also included. / American Plywood Association.

3039 FIRE CODE REQUIREMENTS / A 32-page guide to fire code and insurance requirements for wood and plywood systems. Fire protection, roof and wall systems, sample specifications, case histories, background information on codes, and tips on how to save on insurance are all included. / American Plywood Association.

3040 DECORATIVE LAMINATES / New literature showing the 83 offerings of DuralBeauty decorative laminates is available. Full color pamphlets are separated into woodgrains, marbles and slates, patterns, and solids. Complete specifications are included along with new 1979 products. /Consol Weld Corporation.

3041 UPDATED AWFF DETAILS / Thirty-six page illustrated booklet cites the current regulatory and underwriting agency acceptances along with new testimonials from builders and buyers. Specifications for treated plywood and lumber, instructions on gravel fills, caution compounds and the 6-mil polyethylene film used to control moisture on below-grade walls are all discussed. / American Plywood Association.

more literature on page 88
ENTRANCES & STOREFRONTS

196 WEATHERING SYSTEM / The Sealair Weathering System for alumi-
num entrances seals out drafts of cold air, thereby reducing heating costs. A
flexible, polymeric strip forms a posi-
tive seal in the frame. / Kawneer Archi-
 tectural Products. GB*

197 INTRUDER PROTECTION / Al-
uminum entrances, called Entara-XD,
feature interlocking door stiles with
removable mullion between double
doors. / Kawneer Architectural Prod-
ucts. GB*

GLAZING

198 SHOWERGUARD / Several plas-
tic layers form a special shower door
for custom-size replacement of show-
er doors and tub enclosures. / AFG
Industries. GB*

199 SKYLIGHTS / A triple-domed
earthone-colored skylight, recently in-
 troduced by Kennedy Sky-Lites, is
made of LEXAN plastic, providing insu-
lation properties plus impact strength.
The material is rated Class 1, and is
listed as "burglary resistant" by UL. / Material manufactured by General
Electric Plastics Division; product manu-
factured by Kennedy Sky-Lites Inc.

200 INSULATED WINDOW / A dou-
ble-glazed thermal-break window is
made of LEXAN polycarbonate sheet
plastic for thermal insulation and dura-
bility. / Amcor Industries, Inc.

201 DISPLAY DOORS / Swing display
doors are used in this retail refrigerated
application for product visibility. The
"Vista Multi-Doors" feature a slim gold
anodized aluminum frame. / Nor-Lake
Inc. GB, E*

202 GLAZED BUS SHELTER / This bus
shelter is designed with LEXAN MR-
4000 sheet plastic because of the
material's impact resistance. A 4.1-
in.-thick, bronze polycarbonate sheet
was specified for the best balance of
properties in bus shelter glazing. / General Electric Co., Plastics Division.

203 GLAZING / This panel of "Lucite"
is shown installed in a heavy traffic area
in an office building. It combines abra-
sion resistance with light weight. / DuPont Co. GB, ICR, E*

204 SPANDREL GLASS / This glass,
called "Col-R-Span," is heat-strength-
ened 1/4-in. thick float glass with a
colored ceramic frit applied to the
inside surface. Available in 10 standard
colors, plus reflective coatings. / Envi-
ronmental Glass Products. GB, ICR*
205 SLOPE WALL / Called the "Slew/Wall," this slope-wall system features secondary drainage, low horizontal profile, clean interior tubular appearance and accommodates insulated glass units. / The Alumiline Corp.

206 WINDOW INSULATION / "Reflecto-Shield" is a transparent, reflective window insulation for the control of solar radiation. It consists of a precision-controlled vacuum-deposited thickness of aluminum sandwiched within a polyester laminate. / Madico, division of Van Leer USA, Inc.

HARDWARE & SPECIALTIES

207 UNIVERSAL CLOSER / Available in both hold-open and non-hold-open configurations, "90 Series" door closers are not handed, and can be mounted for regular, top-jamb and parallel-arm applications. The cast aluminum case needs no cover. All closers are UL-listed; non-hold-open units have a reversible power-adjustment arm bracket. / Russwin.

208 POWER ASSIST CLOSER / The Equalizer closer has a built-in power assist, activated by the individual approaching the door, which reduces opening forces as much as 75 per cent. The heavy-duty, ASTM-T and UL-listed units provide barrier-free passage for disabled or elderly persons. / LCN Closers.

209 GLASS DOOR KNOBS / These glass knobs are made of LEXAN resin for shatter-resistance while giving the appearance of crystal glass. / Taylor Lock Co.

210 EXIT DEVICE / A mortise exit device for hollow metal or wood doors, with an extruded aluminum push bar, conforms to door and jamb preparation dimensions per ANSI A115.1. Mounting uses through-the-door binder posts; long lip and electric-strike are options for "Series 8300" exits. / Adams Rite Mfg. Co.

211 HANDICAPPED AID / An air-operated system to aid the handicapped in opening doors, the Series 1010 is surface-applied, requiring only eight screws and an air line. It is activated by a touch-button / Reading Door Closer Corp. GB, CC+

212 ELECTRIC LOCK / The Keyless Entry, available in both 24-volt commercial and 8-volt residential models, provides controlled access using a preset five-digit master combination. Keyboard is weatherproof stainless steel; system comes complete with electronic door strike and standby, rechargeable power supply. / Essex Transducers Corp.

213 DOOR HARDWARE / Series 2600 folding door hardware incorporates using the same hardware at either jamb, thus reducing installation time and increasing efficiency. / Grant Hardware Co.

214 BRASS DOOR PULLS / Solid brass door pulls are the newest additions to this company's line of hardware. Available in polished chrome, satin chrome, and oil-rubbed bronze. / Forms & Surfaces.

215 GARAGE DOOR OPENERS / The "Touch 'N Go" model 200 garage-door opener is designed to open all sectional upward acting doors. The system comprises an opener and radio control / Overhead Door Corp.

216 DOOR CLOSERS / The bracket may be mounted to supply normal closing power or reversed to supply a minimum of 15 per cent greater closing power. / Russwin, Emhart Industries, Inc.
217 SLIDING DOOR HARDWARE / For heavy, solid-core and pressure-laminated doors, this hardware features "finger touch" action, four-wheel "wide-track" ball bearing hangers and jump-proof V-groove aluminum track. / Stanley Hardware, Division of The Stanley Works. GB. LRC.*

218 HARDWARE / A series of basic shapes chosen for purity of form are used for metal cabinets. Finishes are polished and stained chrome, polished brass, and dark oil-rubbed bronze. / The Ironmonger, Inc.

219 DEADBOLT LOCK / The D-11 Series high-security deadbolt lock is designed to complement the appearance of a door while maintaining anti-picking apparatus. Available in brass and chrome finishes. / Medeco Security Locks Inc.

220 FLUSH BOLTS / A new series of door bolts from the Modric range of fittings made in the U.K. will replace older items in the company's range of 500 items. The standard finish is satin anodized aluminum. / The Ironmonger, Inc.

221 SECURITY LOCKS / A customized security system includes various locking hardware in its "Masterkeyed" line. / Best Lock Corp.

222 HANDICAPPED EASE / The "Rollatch" provides two-way positive latching for easy operation by the handicapped. Designed to meet the need for simple operation, it is operated by pushing or pulling the knobs instead of turning. / Schlage Lock Co. GB. LRC.*

223 ENTRY DOOR / The Avanti A-600 Series insulated entry door has deep embossed designs, and can accommodate optional decorative "life" inserts. / Peachtree Doors, Inc.

224 SAFETY DOOR / An up-dated version of the Safetyline Door maintains safety and security features while presenting a handsome appearance. The deluxe style shown is available in a choice of textured panels. / Marlite Anaconda Aluminum Co.

225 GARAGE DOOR / The Crawford Commercial Sectional Steel Garage Door features a tongue-and-groove joint configuration that creates a weather seal. It can also be insulated with plastic foam. / Jim Walter Doors. GB.*

226 SLIDING GLASS DOOR / This thermal sliding glass door combines 1-in. insulating glass with thermally isolated metal framing members. Series 4500 is available in two- or three-panel configurations. / Howmet Aluminum Corp.

227 STEEL DOOR / The "Fredericksburg" insulated steel entrance door is the newest model in the Benchmark system. It is an up-dated Colonial six-panel door with deep-sculptured design. / General Products Co.

228 SLIDER WINDOW / Model 133 horizontal sliding window has dual sets of sashes and a new sill design for maximum water- and air-tightness. Available in residential and commercial versions. / Season-All Industries, Inc. GB.*
229 BARRIER DOOR / The all-weather barrier door manufactured by Pease Co., Ever-Strait Division, was designed with LXAN to provide added strength and durability, and shear resistance, low water absorption, balance of lubricity and friction with adjacent materials. / General Electric Co., Plastics Division.

230 STORM DOOR / The insulated Sheltergard storm door comes in three designs—scalloped, Colonial and diamond. It has foam insulation and a thermal-break to reduce loss of heat of conditioned air. / Alcan Building Products.

231 STORM DOOR / Self-storing feature of this 1 1/4-in. storm door allows inserts to stay in the door year-round. All inserts are interchangeable; screen may be used in either top or bottom position. Aluminum door is available in mill, white or bronze finish. / Alcan Building Products.

232 INSULATED DOOR / The Centurion insulated steel entry door system features an injected core of expanded polyurethane foam. Flush and embossed door designs are available. / Jim Walter Doors.

233 METAL WINDOWS / Series 2000T steel thermal-break custom windows can be constructed in casement-, projected- and fixed-frame configurations. Each window has compression-molded weather stripping. / Hope's Windows. GB*

234 RETROFIT WINDOW / This retrofit insulating window can be added to existing storefronts and other low-rise and high-rise wall and window systems. "RetroSash" creates an air space between the existing glass and new window. / Kawneer Architectural Products. GB*

235 DOUBLE HUNG WINDOW / A double hung window available with an aluminum-clad frame combines the insulating qualities of wood with the protective advantages of acrylic-coated aluminum. / Marvin Windows.

236 ACCESS DOOR / "Model 682" steel door provides easy access to attic areas; its R19 insulation value and weather-seal gasket help maintain the integrity of attic insulation. The door weighs about 9 lb; four sizes range from 20 by 24 in. to 22 by 30 in. / Leight Products.

237 SPECIAL DOORS / The Pendador line utilizes a new hardware system that makes it easy to vary the overlap of individual strips within a single door, to accommodate quickly different types of traffic and changing weather patterns. / W.B. Mcguire Co. GB, ICR*

238 AUTOMATED DOOR / The "Easy Access" door operator is designed to provide low-cost automation of new and existing swinging doors for barrier-free entry. It requires only a 115AC power source. / Horton Automatics.

239 STORM DOORS / The "Aristocrat" line of extruded aluminum storm doors shown is 1 1/4-in. thick. Each is easily installed, pre-hung and fully weather-stripped. / Norandex Aluminum Building Products.

240 STRIP DOOR / A temperature-, sound- and dirt-barrier door can also be seen through and reached through. Made with soft, flexible overlapping vinyl strips, the door has segmented partitions that surround, control, isolate, absorb and dampen sound. / Overhead Door Corporation. GB, ICR*
241 PANIC DOOR / The Nightwatch concealed rotary astragal panic door uses a “turnstile” action and an independent free-wheeling rotor to avoid problems of burglary. / Howmet Aluminum Corp. GB*

242 AUTOMATIC DOOR / For swinging doors, the Magic-Swing automatic door operator is an electromechanical unit which converts electrical energy into mechanical motion. Designed for low-cost operation, its control box has no moving parts. / Stanley Magic-Door, Division of The Stanley Works. GB*

243 STORM/SCREEN DOOR / The “Ultima” self-storing aluminum combination storm/screen door, with all hollow frame extrusions and patented corner gusset, offers strength and trouble-free service. / Season-All Industries, Inc. GB*

244 RADIATION DOOR / A nearly 50-ton radiation shielding door contains primary and secondary radiation in the Lawrence Livermore Laboratory, California, shown. Only 50 lbs of push or pull is required for manual operation. / Keene Corporation.

245 TRAFFIC DOOR / The “Mata-Door” is a rigid, transparent traffic door with heavy-duty Swedish-designed hinges. Suggested applications include retail service doors, shipping dock doors and interior thermal barriers. / Chase Industries Inc. ICR*

246 Vinyl LINER / The Model 834 aluminum combination storm/screen window features an extruded vinyl liner that provides smooth, easy operation. There is also a bottom expander that automatically compensates for out-of-level sill conditions. / Season-All Industries, Inc. GB*

247 STAINED GLASS / Design elements, windows and skylights constructed to architectural specifications are made from stained and clear, leaded zinc and copper foil glass. Available nationwide, products also include etched, sandblasted and painted screens, dividers and windows; lampshades; and domes. / Fylyan Stained Glass Co.

248 BUBBLE WINDOW / Called the “R” series skylights, this bubble window can also be installed vertically in a wall as shown. Custom designs are available. / T-M Corp. GB, LRC*

249 ROOF WINDOWS / The Velux roof windows are designed for residential attic expansions as well as new construction. The window lends a contemporary look while providing better lighting. / Velux-America Inc.

250 INSULATED SKYLIGHTS / These skylights insulate against thermal heat loss in winter and solar heat gain in summer. The single, joint-free, plastic unit consists of 1/2-in-thick sandwich panel, forming a dead-air insulation space. / Solartron Corp. GB, LRC*

251 SKYDOME / The “Solar Energy Skydome” is specifically designed for industrial, commercial and institutional installations. It has a thermal-break aluminum curb plus a high-performance gasket and butyl seals which control condensation. / Wasco Products Inc. GB*

252 SKYWINDOW / For residential use, the “Skywindow” line contains bubble or round windows, as well as a dormer-shaped window. All are available as fixed position or vented models. / Wasco Products, Inc.
253 RIBBON WINDOWS / The Versa Vent window integrates perimeter frame members and vertical Mullions so that the ventilators are indistinguishable from the fixed panes. Weather stripping impinges directly against glass, creating low and uniform sight lines in fixed and ventilating units. Integral blinds available. / Flour City Architectural Metals.

254 TWO-IN-ONE WINDOW / The "Versa Vent" series 85AL window has a single handle which operates concealed locks and hinges for a top opening vent position and side opening cleaning position. / Flour City Architectural Metals. GB*

255 WINDOW SYSTEM / An aluminum system has been designed to reduce labor costs of replacing old windows with new windows in low-rise and high-rise buildings. The Sealair Paneling System members cover the old window, eliminating the need to remove existing sash, masonry or trim. / Kawneer Architectural Products.

256 GLASS RIBBON / Giving the appearance of a continuous glass ribbon, this glazing system EFG 502 allows architects to accent the sweeping lines of low-rise commercial buildings. The system includes glass, metal frames and other glazing components. / PPG Industries, Inc. GB*

257 ENVELOPING SYSTEMS / The "Thermal Barrier Enveloping Systems" are thermally improved, internally framed, unitized wall systems providing finishes and thermal resistance. The envelope can "float" independently of the structural frame. / GB Corporation. GB*

258 THERMAL DOORS / Wood frame of these French-style doors with insulated glass helps with heat control and minimizes moisture condensation. While suggested for residential use, they can also be used in special store and professional building entries. / E.A. Nord Co. LRC*

259 STAINED GLASS DOOR / Named "Byzantine", this addition to the "Voyager" line is available with eight different decorative panel or glass inserts. / E.A. Nord Co. LRC*

260 ORNAMENTAL DOOR / The "Georgian" door is highlighted by a semi-arched window of cut glass. The door is crafted of hemlock wood with extra-wide stiles to accommodate a range of door hardware. / Simpson Timber Co. GB, LRC*

261 FIRE DOORS / A fireproof door is now available in wood and plastic. A high-density inner stile of fireproof material improves the screw-holding power for mortised hinge attachment. UL approved. / Algoma Hardwoods Inc. GB*

262 SOLID WOOD DOOR / The "Colonial" model in the Designer Series of solid wood doors is a multiple panel, carved door, eliciting an "old world" appearance. / Simpson Timber Co. GB, LRC*

263 CASEMENT WINDOW / The Thermacore Casement Wood Window has natural wood inside and a low maintenance vinyl covering. Features include a double-pane insulating glass, and a recessed sash. / Malta Division, Phillips Industries, Inc. LRC*

264 VINYL-FRAMES / Rigid vinyl double-hung residential windows, sliders and patio doors feature fusion-welded master frames and multi-chambered profiles. This process creates a continuous solid frame with no joints to seal. / Dynamit Nobel of America, Inc. GB*
The Von Duprin Futuristic 33 exit device adds a touch of class and efficiency to your high traffic areas. The 33 touch bar eliminates traditional lever arms and crossbars. The latch is actuated with only slight pressure at any point along the reversible touch bar. As an added safety feature, the large area of the touch bar keeps hands away from glass.

One-point positive dogging for push-pull operation requires only one-eighth turn of a dog key. One-point cylinder dogging is optional for use with any standard diameter mortise cylinder.

The 33 devices are available in rim, surface or concealed vertical rod models, and can be equipped for electronic actuation of the latch bolt on doors from 2'6" to 4' wide with stiles as narrow as 1¾".

Find out how the Von Duprin 33 can give you an elegant, efficient solution to the ins and outs of your exit hardware problems. Request Bulletin 774.

No-cost finish options include anodized aluminum with stainless steel touch bar surface . . . bronze anodized aluminum with bronze touch bar surface . . . duranodic dark bronze aluminum with black or walnut-grained vinyl-covered touch bar.

3044 PLYWOOD ROOF SYSTEMS / A 12-page, full-color booklet provides design and application details as well as installation methods for plywood used in various residential and commercial roof systems. Included are such subjects as plywood roof sheathing, bonded roofs, preframed roofs, long-span systems, roof diaphragms, and special roof systems. / American Plywood Association.

3045 METAL ROOFS / The advantages and merits of continuous single-skin, metal roof systems are discussed in a brochure from this manufacturer of Widespan, Landmark, Landmark two-story, and Triodetic metal roof systems. Product information and installation instructions are included along with accessory list, adaptability data, energy savings, and maintenance features. / Butler Manufacturing Company.

3046 FIBER GLASS SHINGLES / A small brochure and news release listing the major benefits of Elk fiber glass shingles as increased durability, resistance to fire, and greater dimensional stability. Includes information on color assortment, product quality, and company warranty. / Elk Corporation. LRC*

3047 HOME INSULATION / This brochure contains information for residing homes with Fome-Cor underlay- ment board. This insulation is listed as reducing air infiltration, deadening noise, adding moisture protection, and providing a firm surface over old siding. / Monsanto Company.

3048 MOBILE HOME INSULATION / A small booklet outlining the energy-saving value of Fome-Cor Sheathing Board, used along with fibrous insulation in mobile homes. Contains test results and data on the comfort, quality, efficiency, cost, and potential savings with Fome-Cor. / Monsanto Company.

3049 ROOF TILES / A product brochure and nine specific product sheets are being offered for clay roof tiles. The material includes all information pertaining to typical applications, dimensions, finishes, and other specification data. / Ludowici-Celadon Company. GB*

3050 ROOFING PANELS / Application instructions covering 13 common installation procedures are being offered for use with red cedar shakes. Diagrams along with step-by-step details are included. / Shake & Shingle Panels Inc.

3051 WATERPROOFING / A color brochure and news release outline the advantages of Duramen—a cold, liquid-applied one-part membrane for waterproofing structural concrete above and below grade. Includes product description, basic use, application data, coverage, and limitations. / Pecora Corporation. GB, ICR*

3052 INSULATION / A news release from the makers of Styrofoam brand insulation is offered along with a product brochure. Contains new product information on an extra-strength damage-resistant Styrofoam; installed on frame walls to insulate studs, corner posts, headers, sill plates, and other wood surfaces. / Dow Chemical. U.S.A. GB, ICR*

3053 CLADDING / Product information from the makers of Alucobond, an aluminum-polyethylene composite material used in exterior cladding, spandrels, soffits, fascia, and interiors. Describes the concept, flexibility, product choices, and functions. / Consolidated Aluminum.

3054 INVERTED ROOF / A brochure from the manufacturer of the Protected Roof Membrane (PRM) System. Offers information on the inverted roof concept, including insulation data, design considerations, installation advantages, and recommended specifications. / Uniroyl, Ltd. GB*

3055 SILO SEALER / A technical bulletin offering information on a cement-base coating for application to the interior of concrete silos. Contains data on surface preparation, application procedures, coverage, packaging, and the manufacturer’s guarantee. / Standard Dry Wall Products. ICR*

3056 ASTROTURF / The economy and adaptability of synthetic turf are outlined in this colorful brochure. Contains important product information and cites specific collegiate examples where this low-maintenance alternative playing surface has been successfully used. / Monsanto Company.

3057 REDWOOD PLYWOOD / A flyer on California Clear Grade Siding includes product description, panel characteristics, national acceptance, and data on the economy, performance, and weatherability of Redwood Plywood. / Simpson Timber Company. LRC*

3058 LAMINATED GLASS / A 20-page brochure describing the advantages of laminated glass is available from the producers of Saflex, the bonding material used in lamination. Case histories and effective applications are included, along with examples of product benefits such as safety, sound control, solar control, and security. / Monsanto Company.
No maintenance, window beauty, highest known energy savings

Now you can deliver all three with Special Formula PVC windows from Poly Co. American.

No other window unit being manufactured today offers the energy and money saving features that are standard with windows from Poly Co. American: triple insulated glass, virtually indestructible frames and sash, weather tightness that far exceeds all current standards, and freedom from maintenance.

Two different independent testing laboratories have tested and provided documentation* that Poly Co. windows far exceed standards for air and water infiltration, thermal conductivity and structural strength. Total unit “U” values as low as .26 and total unit “R” values as high as 3.85.

Poly Co. American builds a wide variety of window units: casements, picture, awnings, combinations, etc. in standard sizes. Non-standard sizes and shapes are available on special order. See our catalog in Sweet's or write our Marketing Dept. for more information.

*available on request

1. Unique chambered construction provides strength, rigidity
2. Dead air locked in chamber guards against temperature fluctuations
3. Double weather stripping and glazing spline are resilient acoustical material.
4. Snap-in glazing spline allows dry glazing without removing sash
5. Triple insulated, 3 mil glass with full 1/2" dead air space between lites
6. Heavy duty aluminum bronze hardware
7. PVC frame and sash are virtually indestructible, cannot rot, corrode or weather

THIS IS AN EXIT DEVICE?
THIS IS AN EXIT DEVICE!

Why have exit devices always been ugly, expensive, bulky, pipe-rack monstrosities? Darned if we know. We (Adams Rite Manufacturing Co.) believe that simplicity, not complexity, is the ultimate sophistication. We designed our exit device to complement the clean lines of narrow stile glass doors (and fit easily and securely into the same standard mortise cut-out as our M.S.® deadlock). We also designed it to release at a mere 8 lb. touch anywhere on the bar, which moves only one inch. This one inch is in the exit direction too, not the conventional but unnatural downward arc. Load the door up to the code-required 250 lbs. and release pressure still stays well under 50 lbs. anywhere on the bar. Yes, it’s an exit device. It’s also an exciting device. Some architects have indicated they’re specifying it even where exit devices are not required by law. It’s simply the neatest way to open a door they’ve seen. Who are we to argue? For details of the 8400 mortise device (shown) and its twin, the 8500 concealed vertical rod for paired doors, write:

3065 PIPE INSULATION / A way of saving warehouse and truck space and handling time and labor for firms installing industrial insulation is described in a new brochure. The brochure contains a table from which can be calculated how much pipe insulation of a given size can be put in a given carload. / Johns-Manville.

3066 INSULATING SYSTEM / A color brochure outlines the Roll Runner insulating system for buildings designed with standard purlin spacings found in pre-engineered metal building systems. Outlines equipment such as a traveling OSHA-approved platform operable by a single worker and includes data on speed, economy, and appearance with the Roll Runner. / Butler Manufacturing Co. ICR®

3067 STUCCO / Color photographs highlight a new brochure depicting applications of Stucco 316 in both residential and commercial projects. Detailed descriptions are provided along with sizes and finishing instructions. / Simpson Timber Company.

3068 POND LINERS / A comprehensive brochure providing updated information on flexible membranes for pond and reservoir liners and covers is available. The 24-page brochure includes data charts listing comparative properties and chemical resistance for the membranes along with a list of suppliers for the liners and covers. / E.I. du Pont de Nemours & Co.
The first place to look for the last word in garage doors...

Raynor gives you choices only a full-line garage door manufacturer can offer. Over one hundred styles, types and sizes to fit any decor and most any special requirement. When you do select a Raynor door, there are certain things that don't require a choice. Like Quality... in design and construction. Raynor uses only the best material for springs, rollers, hinges, locks and other hardware. And the best grade lumber available. All put together by dedicated people... not machines. And Service... like undamaged delivery by our own truck fleet. Plus professional installation by our factory-trained distributors located throughout the country. They pledge prompt follow-up service for parts and repairs if ever needed. In the end, the last word you get from us is—satisfaction! For a copy of our catalog write Raynor Manufacturing Company, Dixon, IL 61021. Or call a Raynor Distributor near you. You'll find his number in the Yellow Pages under "Doors".

ACOUSTICAL TREATMENT

277 CEILING TILE / A random eroded pattern with a NRC range of .55-65. “Aurora” ceiling tile is offered in 12-by 12-in. concealed edge and 24- by 24-in. reveal versions. Reveal edge tile is available in both standard and fire-rated products. / Conwed Corp. GB*

278 ACOUSTICAL WALLS / Sound-absorptive mineral fiberboard panels adapt to all types of walls, with aluminum splines that attach quickly to drywall, plaster, brick, block, steel studs and steel partitions. Covered with polyester fabric, panels have a Class 25 Flame Spread Rating. / Conwed Corp. GB*

279 SUSPENDED CEILING / The acoustical performance of the Planar aluminum panel ceiling system can be improved by covering the spaces between panels with a one-in. fiberglass blanket, or closing the space with recessed filler strips to soak up excess sound. / Alcan Building Products.

280 ACOUSTICAL PANELS / Sound-soak 85 panels will absorb 85 per cent of the sound striking them, and will also improve the STC of most walls by 10 per cent. The one-in.-thick mineral fiberboard panels are covered with modacrylic fabric and have a Class 25 flame spread. / Armstrong Cork Co./GB,*I

ADHESIVES

281 ACRYLIC ADHESIVES / A second-generation acrylic system, “Reactive Adhesive RA001B” facilitated construction of these TruWood decorative beams. Neither adhesive nor activator require careful metering or mixing; offering a long open time, the adhesive sets and cures rapidly once in contact. / Du Pont Co.

282 PIPE SEALANT / Perma-Lok “LH-150” anaerobic pipe sealant with Teflon provides controlled metal bonding for a variety of applications. An economical alternative to tape, the sealant forms a permanent corrosive-resistant seal, while allowing for adjustments up to 24 hours after assembly. / PermaBond International Corp. GB, ICW, LR,*

CARPETING

283 HEAVY DUTY CARPET / A 26 oz level loop carpet of Zeflon nylon, “Millburn” is suitable for extra heavy commercial traffic. Yarn has anti-static properties, and is available in 11 colors. / Stratton Industries, Inc.

284 TEXTURED CARPET / Alternating rows of cut and loop pile give “Affirmative” Anso nylon carpet a random texture. Natural luster yarn and subtle flecks of Berber coloring provide a wool-like look. Available in 15 heather and accent colors, “Affirmative” retails for $14.50 per sq yard / Bigelow-Sanford Inc. GB, I*

285 TUFTED CUT LOOP / Zeflon 500 nylon yarn used in “Dignitary” carpeting has been solution dyed, and is said to assure good color matching lengthwise and crosswise in the fabric and between successive rolls. Carpet is offered in 10 colors, certified for Class II heavy commercial traffic. / Commercial Carpet Corp.
286 CUT-PILE VELVET / Antron III nylon with a pinpoint finish. Bigelow's "Westminster" contract and residential carpeting is available in 24 colors. / DuPont Co. p

287 CHECK ON CHECK / Solution-dyed heather colorations are woven in a check pattern in "Chessmaster" Zeflon nylon carpeting. Carrying a five-year wear warranty, "Chessmaster" carpets have a special soil repellent finish. / Karastan Rug Mills.

289 WILTON BLEND / Contract carpet has a two-toned octagonal design spaced to form a pin-dot pattern. Wilton constructed from Zeflon blend of acrylic and nylon yarns. Carpet is certified for heavy commercial traffic, and is available in 9- and 12-ft widths. / Langhorne Carpet Co.

290 INSTITUTIONAL CARPET / The use of Zeflon 300 yarns in "Commercial 3600Z" carpeting means that stubborn stains may, if necessary, be bleached out without affecting the color values. Offered in natural heather colors, the carpet has a five-year wear warranty. / J & J Industries.

291 URETHANE CUSHION / "Sea Foam" is a luxury prime urethane carpet cushion with firm hand, high resistance to compression, and good tear and tensile strength. Available in thicknesses of ⅛", ⅜", and ⅜"-lin. / Ludlow Carpet Cushion.

292 CARPET SQUARES / All Heuga carpet squares have a dimensionally-stable backing that prevents buckling. New additions to this interchangeable contract carpet line include Ultral nylon "Jet" squares, and "575 Plus" cut pile carpet in a specially-designed Architect/Designer Series. / Heuga U.S.A., Inc.

293 GRASS-TYPE CARPET / A fibrilated polypropylene yarn, Patlon Plus produces a grass-type carpet with greater resiliency, a softer hand, and a bouncy feel not found in other artificial turfs. Carpets using the yarn may be specified in any of 13 colors and many tweed combinations. / Amoco Fabrics Co.

294 NYLON BERBER / "Starting Time," a level loop featuring Berber spacing, is yarn-dyed in 11 colorations plus coordinated "Hisque" and "Russet" random stripes. / Wellco Carpet Corp.

295 SAXONY PLUSH / Constructed with densely packed nylon face yarns, "Classical Grace" carpeting is offered in 30 solid colors treated with Scotchgard carpet protector and static control. / Cabin Crafts Carpets, WestPoint Pepperell Carpet & Rug Div.

296 CUT-AND-LOOP / The three-dimensional flow of colors in "Inspiration" carpeting is made possible by the Dyemensions 95 dyeing technique. Soil-repellent carpet meets FHA requirements, and is offered in 15 colorations. / Pepperell Carpets, WestPoint Pepperell Carpet and Rug Div.

297 EMBOSSED CARPET / Pattern-dyed carpets for such severe traffic installations as stores, restaurants, and hotels. The Acadia pattern has a curve-linear design to blend with the rounded edges often used in contemporary office furnishings. / Armstrong Cork Co.
298 CARPET BACKING / Pressure-sensitive release adhesives used in the Cortlok EA backing system allow the direct glue-down carpet to be pulled back easily at service trenches in concrete subfloors for access to under-floor electrical systems, outlets, etc. / Armstrong Cork Co.

299 BONDED FLOORING / The Interface fusion bonded carpet system is available in a number of new styles. Included is the variegated stripe pattern “Lineations,” used here in the Dallas City Hall. Colors in stock prints and international communication symbols are also offered. / Interface Flooring Systems.

300 EMBOSSED CARPETING / Part of The Engraver’s mark collection of pattern-dyed carpets, “Merion” has a small-scale hollow-square pattern particularly suitable for use in large open spaces or corridors. Five colorways offered range from tone-on-tone brown and tan to brighter combinations like brown-blue-orange. / Armstrong Cork Co.

301 LOW LUSTER NYLON / For heavy commercial applications, “Chancellor” cut pile carpet is offered in six color combinations with a pin-dot pattern effect. The 40 oz carpet is made of Zeflon subdued luster nylon. / Porter Carpet Mills.

302 CEILING SUSPENSION SYSTEMS

303 METAL CEILINGS / Two-ft sq panels in polished brass, chrome and copper finish are supported by inverted T-bar grid capped in a matching finish. This three-dimensional mirrored ceiling is non-combustible, and can accept most recessed and surface-mounted lighting fixtures. / Integrated Ceilings, Inc.

304 WOOD CEILINGS / Ceiling systems using standard T-bar suspension methods are offered with egg-crate grids, wood grilles, and detailed metal and wood surfaces. / Forms & Surfaces.

305 ACoustiC CeilEnG / Installed in Europe for more than 30 years, the Daempa sound absorbing ceiling is now manufactured in this country. Direct or suspended ceilings use perforated or plain metal-faced panels to satisfy a variety of noise reduction and service requirements. / Levolor Lorenzzen, Inc. GB*

306 SUSPENDED CEILING / The aluminum Plenum Mask visually screens ductwork, wiring and piping in the plenum area, and allows effective diffused lighting. The space is not fully enclosed, and requires no extra costs for special air diffusers, lighting or sprinkler fixtures. / Acan Building Products. ICR*

307 CEILING PANELS / Pictured is “Sahara,” one of the Registrator ceilings said to combine the look of tile with the economics of two-by-four-ft lay-in panels. The bi-directional textured design and recessed regular edges disguise the exposed grid system, providing a unified appearance with full accessibility. UL-listed Registrator ceilings have a 0-25 flame spread and meet ASTM E-84. / Armstrong Cork Co. CB, L.*

308 FISSURED PANEL / Another Registrator tile, “Travertine” lay-in ceiling tile has a grid-disguising fissured pattern. UL-listed ceiling has a Flame Spread of 25 under ASTM E-84, and a NRC Specification range of .50-60. / Armstrong Cork Co. GB*

309 SOFT FABRIC CEILING / Fire-resistant Soft Look mineral fiberboard ceiling panels are covered with non-glare modacrylic fabric in six natural and six accent colors. Installed on an exposed-grid, the two-ft-sq panels absorb 60 of the sound that strikes their surface and provide a degree of thermal insulation to the overhead construction. / Armstrong Cork Co. CB, L.*
310 Accent Ceiling / A two-by-two-ft. regular panel in the "Antique Glass" mirrored ceiling pattern allows a wide range of bold design options.

311 Vaulted Ceiling / A recessed troffer ceiling system, the Quadratlon 441 Luminaria provides high-quality, energy-efficient lighting in an economical lay-in ceiling. The 48-in.-sq module can be located anywhere within a 2-by-4-ft. exposed grid system for precise task lighting. / Armstrong Cork Co. GB, L.*

312 High-Strength Colors / Newly-formulated product bases and high-strength colorants are used in this paint system. Coatings have improved drying and hiding properties, better sheen control and color acceptance, and a wider range of colors in latex products, epoxies, floor paints and stains. / Pratt & Lambert, Inc.

313 Latex Stain / Said to offer excellent color retention and superior adhesion, "All Acrylic" solid color latex stains also offer the advantages of a water-base product: fast drying, early re-paintability, low pollution, and soap and water clean-up. / Samuel Cabot Inc. GB, LR*

314 Vinyl-Faced Gypsum / Textone gypsum wall panels have a vinyl surface 6- to 8-mil thick, available in four woodgrain patterns and "Sand Stripe" sand texture in two colors. / United States Gypsum Co. GB, LR*

315 Electrified Panels / The "Current Line" panel offered with Private Space offices has a raceway across the top of the panel, providing easy access for electrifying task and ambient lighting. Two 20-amp circuits deliver current where it is needed for machines, lights, etc., including three outlets at the base of the panel. / Rosemount Office Systems Inc.

316 Freestanding Screens / Fully upholstered acoustical screens and office dividers are finished with a double welt trim; hardwood or metal edges are also available. Acoustical Screens are made with an open or closed base, straight or curved, in heights to 72-in. Panel connecting assembly also allows for component attachment. / Acoustical Screens Corp.

317 Carved Wood Panels / "Panelcarved 760-770" is a new product in this line of carved wood panels and grilles for walls, doors and furniture. Panels feature a tongue-and-groove edge detail that permits easy assembly without surface nailing. / Forms & Surfaces.

318 Oak Veneer Panels / "Freight Oak" real wood veneer combines a mellow, warm finish with a distinct grain pattern. Panels are ¼-in. thick, available in 4-by-8-ft sheets. / Georgia-Pacific Corp. L*

319 Inlaid Wood Designs / Lightweight real wood wall covering, Decowood 12- by 12-by ¾-in. tiles have redwood strips in various patterns mounted on a pliable backing. / Decowood.

320 Bonded Bronze / Formerly offered only in flat panels, "Bonded Bronze" lightweight castings are now available in preformed sections for use on curvatures, corners and columns. Shaped sections install with panel adhesive over ply-sheathed areas. Textures and metals include aluminum, copper and nickel silver, as well as the bronze. / Forms & Surfaces.

321 Metal Graphics / Stainless steel panels are arranged to form a related design theme, or may be embossed with company logos and trademarks for a custom installation. The "2000 Series" shown here consists of eight related designs in modular panels 44-in.-wide by 96- or 115-in.-long. / Forms & Surfaces.
322 CARVED REDWOOD / “3300 Series” are 9- by 36-in. vertical grain redwood or mahogany panels carved in designs based on natural forms. Panels can be combined in various arrangements to produce interesting doors, walls, furniture and architectural accents. / Forms & Surfaces.

323 PREFINISHED PLYWOOD / A real cedar face veneer in a rich fruitwood color, “Fire-light Cedar” paneling has a durable, low-maintenance finish. Suitable for both residential and commercial interiors, paneling comes in 1/8-thick, 4-by 8-ft sheets. / Georgia-Pacific Corp. I*

324 METAL TAMBOUR / Able to bend easily around inside and outside curves, architectural tambour is now offered in four metal finishes: satin aluminum, satin bronze, bright aluminum and bright gold. / Forms & Surfaces.

325 WOODFIBER PLANKS / A prefinished wood-fiber material, Monoplank comes in 6- by 96- by 1/8-in. planks, which can applied with shiplap joints in any number of designs and patterns. Available in oak and cedar wood-grain designs, Monoplank has a dent- and abrasion-resistant melamine finish. / Masonite Corp.

326 DURABLE FINISH / Glaswelld high-performance interior panels are now offered in an expanded range of colors. The tile-like finish panel is abrasion-resistant, and is USDA-approved for food plants. Panels are non-combustible; prices start at $1.50 per sq ft. / Glaswelld Products Div., Oil Corp. GB*

327 RESILIENT FLOORING

328 NO-WAX VINYL / A no-wax sheet vinyl, “Landen Wood” reproduces the graining and wood lines of a parquet floor. Pecan, Golden Oak and Mahogany patterns are available, in 6- and 12-ft widths. “Landen Wood” is priced to retail at about $11.95 per sq yd. / GAF Corp. GB, ICR, LR, I*

329 COMPOSITION VINYL / “Camino Real” is vinyl composition floor tile embossed with a Mediterranean paver design. Offered in terracotta, white, umber and beige colorways, “Camino Real” can be installed on, above, or below grade over concrete or wood subfloors. / Azrock Floor Products. GB*

330 BRICK PATTERN / For heavy-duty commercial installations such as stores and schools, “Lorbrick” embossed sheet vinyl flooring has a reinforced fiberglass backing for stability. Flooring is 100-mils thick, available in Brink Red and Antique White colors. / Longseal, Inc. GB*

331 INLAND VINYL / An 090 gauge commercial sheet that can be installed with chemically-welded seams for a seamless floor. “Sandoval” vinyl has the appearance of terrazzo, with “mortar” surrounding multi-hued vinyl chips. For heavy commercial applications, UL-Listed “Sandoval” meets NBS smoke chamber and ASTM E-84 requirements. Installed cost is about $1.05 per sq ft. / Armstrong Cork Co. GB, ICR, LR, I*

332 TERRAZZO VINYL / “Chipstone” reinforced vinyl tile features large and small translucent vinyl chips overlaid on a matrix of smaller chips. Each smooth-surfaced tile is 1/8-in. thick, available in regular and self-adhering backs. Kentile Floors. GB, ICR, LR, I*

333 MOORISH TILE / A Gaflar 6700 floor with a “Super Vinyl Surface” wearlayer, “Caracas” pattern features two medallion motifs of different sizes. Sheet flooring comes in five colorations; 6- and 12-ft widths allow for seamless installation in most rooms. / GAF Corp. GB, ICR, LR, I*
334 FLOOR TILE / "Octad" solid vinyl has the look of hand-set Belgian quarry tile, offered in four colors: tan, charcoal, brown and adobe. Each 12- by 12-in. tile is 3/8-in. thick. / Kentile Floors, GB, IC, LR, I*  

335 MODERATE PRICE / For residential and commercial installation, solid vinyl "Woodhaven" floor tile has the color, grain and texture of wood banquet. Twelve-inch tiles come in Cherry, Black Walnut, and Oak colors. / Kentile Floors, GB, IC, LR, I*  

336 RESILIENT SHEET / For commercial installations of wide-width resilient sheet flooring, "Barley Mills" has a textured over-all pattern of flagstone and pebbles in natural shades of white, gray, green, burnt orange, beige and brown. / Mannington Mills, GB*  

337 PORCELAIN ENAMEL / Miraval hypo-allergenic surfaces, porcelain enamel on steel laminated to a choice of substrates, will not support the growth of bacteria, making them especially suitable for use in hospitals and food plants. Prices for the vitreous interior finish start at $2.25 per sq ft. / Miraval Products Div., Gil Corp, GB*  

338 SURFACE PROTECTANT / A clear, water-based polymer, Global Guard coatings protect walls, sculpture vehicles, tunnels, etc., from permanent defacement by graffiti or airborne pollution. Markings will not penetrate the coating, which can be removed using Global Guard solvent. Area must then be re-coated. / Laclede Research Laboratories  

339 WRITE-ON SURFACES / "Markerboard" and "Chalkboard" finished wall panels are now available in full wall sections and a wide range of colors. Low maintenance walls will also accommodate magnetic accessories and fasteners. / Miraval Products Div., Gil Corp, GB*  

340 WOOD/BRICK FLOORING / Manufactured as 12-in. sq, 1/2-in. thick tongue-and-groove panels, "Brick Parquet" combines oak flooring and kiln-fired clay brick in intricate patterns. Squares weigh two lb each, and may be installed with heavy-duty adhesive over wood or concrete sub-floors. / Towne Brick Corp.  

341 CERAMIC SQUARES / "Pacific" ceramic tile comes in 14 "South Sea" colors; the three-in-squares are furnished mounted on mesh-backed 12-in. sheets for fast installation. "Pacific" tile's commercial glaze is graffiti-resistant. / Gall International Corp. GB, IC, LR  

342 ENAMELLED TILE / Created by Roger Capron, "Sauvage" enamelled tile is available in two versions: with or without an intense pattern of wild plants, trees, and leaves. Offered in white or hazelnut colors, tiles may be used indoors or out. / Hastings TILE, GB, I*  

343 MARBLE TILE / Resin-impregnated "Zeta" marble and onyx tiles have a horizontal or vertical strip design, providing many pattern possibilities for floors, walls and furniture. Units measure 6 by 12 by 3/4-in, and are installed with an adhesive like ceramic tile. / Hastings TILE, GB, I*  

344 KITCHEN TILE / The fruit designs offered in "Series Graphis" ceramic tiles may be combined with the other stripes, checks and border designs in the collection to produce a distinctive kitchen floor or wall graphic. / Hastings TILE, GB, I*  

345 CERAMIC TILE / Handcrafted unglazed pavers and glazed tiles are offered in colors and sizes to meet contemporary architectural requirements. Sizes range from 3 by 6-in. to 12-in. squares; a 6 by 6-in. radius corner tile is available. / Forms & Surfaces.
365 BRICK-PAVERS / Ironrock high-density pavers combine the natural rustic tones and durability of brick with the convenience and lower cost of tile for commercial and residential applications. Non-glazed surface texture provides natural slip-resistance; eight color blends are offered. / Metropolitan Ceramics, Inc.

356 FABRIC LAMINATES / "Natural Hessian" Dillercloth high-pressure laminate is real linen fabric protected with melamine to retain the texture of the material. For vertical and horizontal interior applications, "Natural Hessian" resists abrasion, alcohol and heat. / The Diller Corp. GB, I*  

357 BORDER EFFECT / Diverse textures are combined in "Ibis" pattern vinyl wallcovering: "twisted-rope" accents form a vertical border against an over-all abstract basketry design. Class A fire-rated, "Ibis" comes in 54-in. widths and 20 colorways. / L.E. Carpenter and Co.
358 WALLCOVERINGS / A variety of wallcoverings are offered for interior applications. Included are soft, muted color backgrounds, and patterned wallcoverings / Birge Wallcoverings.

359 SOLAR WALL FINISH / A high heat transmission factor makes the Flexi-Wall wallcovering system suitable for use on the thermal mass walls of passive solar heating installations. / Flexi-Wall Systems. GB*

360 REDWOOD PANELING / Sapwood and heartwood clear grades of redwood are used for this 1- by 6-ft tongue-and-groove pattern. Redwood insulates against heat, cold and noise, and is inherently flame-resistant. / California Redwood Assn.

361 RATED WALLCOVERING / One of the Vicortex line of wallcoverings. "Rimini" textured vinyl is said to be virtually impervious to scuffs, stains and mildew. Class A fire-safety rated. "Rimini" comes in a 54-in. width and 25 colorways. / L. E. Carpenter and Co.

362 FIGURED VELVET / Available as both fabric and wallcovering, "Soigné" is a soft, figured cotton velveteen. Pattern is offered in dark green and celadon. / Abraham-Zumsteeg.

363 STRING LAMINATES / Natural color "Novaram" wallcoverings take design elements from the vertical effect created by strings laminated to paper. Durable material has a Class A flamespread rating, and is offered in 22 patterns for contract applications. / DesignTex Fabrics, Inc.

364 RATED WALLCOVERING / A deeply textured pattern, "Jarvis" is an addition to the Vicortex line of contract wall-coverings. Class A rated with a fire hazard classification of 200-0-45. The fabric-backed vinyl resists tears and stains; it is offered in 21 colors and a 54-in. width. / L. E. Carpenter & Co. GB*

365 SMALL-SCALE PRINTS / The Miniatures vinyl wallcovering collection contains 118 small-scale designs of florals, prints geometrics and stripes, many with harmonizing fabrics. Pattern illustrated is "Square and Square." / Stauffer Chemical Co. GB, I*

366 ETCHED METAL / Hand-etched brass and pewter, treated with a burn- and scratch-resistant coating, is suitable for wall paneling, counter tops, decorative inserts, trim pieces, etc. Panels are available in almost any size, either laminated, or bonded to any specified substrate. / Lunstead Designs.

367 STRING WALLCOVERING / The "Kind Regards" string wallcovering collection consists of ten vertical yarn variations and five overprint patterns; pictured is "On Walden Pond." Wallcoverings come in 28- and 30-in. widths. / Gilford Inc.

368 TEXTURED VINYL / Fire-rated "Guard" vinyl wallcoverings are offered in two new patterns: "Santa Fe," a grainless leather look; and "El Dorado," a cored texture. Both come in 28-in-widths, in 16 colors including browns, rust, green and navy. / Columbus Coated Fabrics, Borden Chemical. GB, I*

369 WALL FABRICS / This Indian cotton with distinctive texture is part of an extensive collection of natural fabric wall-coverings. Linen, wool weaves and wool knits are included in the line, all in patterns and textures for multi-wall coverage. / L. E. Carpenter and Co. GB*
370 WALLCOVERING / The "Eden" warp yarn wallcovering is equally suitable for residential and contract installations. It is composed of 71 percent of Belgian Linen and 29 percent rayon. / DesignTex Fabrics, Inc.

371 FABRIC WALLCOVERINGS / Available either as warp-lays or woven in a nubby texture, linen wallcoverings have inherent noise-reducing, flame-resistant properties. The all-linen paper-backed products shown here are priced up to $18.70 per yard retail. / Cliftord Inc.

372 CONTRACT WALLCOVERING / A 36-oz Type II wallcovering, "LaKosta" reproduces the hand-troweled appearance of adobe in a textured vinyl pattern. Offered in 30-yard rolls 54-in. wide, "LaKosta" comes in 17 colors. / B. F. Goodrich Co. 1

373 MYLAR STRIPES / Designed by Angelo Donghia, "Impressions" wallcovering has an Art-Deco look with colored stripes of various widths. Four colorways include ombre and white stripes on silver Mylar and ombre, grey and cream on soft brown Kraft paper. / James Seeman Studios.

374 LINEN WALLCOVERINGS / Coarse, natural Belgian linen fibers provide directional pattern and surface interest to Vinyl paper-backed fabric wallcoverings. These "Natural Classics" resist tears and abrasion; linen fabric wallcoverings also supply acoustical and insulation qualities. / L. E. Carpenter & Co. GB

375 CONTRACT DESIGNS / Motifs used in the "Interpretations" collection range from the stone-look of "Olympus," pictured, to literal representations of birds in flight. The 24 wallcovering designs are available in 96 colorways on Tessitura, Mylar, vinyl and Kraft paper grounds. / James Seeman Studios.

376 WOOD FLOORING

377 OAK FLOORING / Mixed red and white oak with prominent grain characteristics is used for "Windsor" 1/4-in., plank floors. Nail-down oak planks are 3- and 5-in. wide, factory-finished for minimum maintenance. / Bruce Hardwood Floors. GB, LR, 1

378 HARDWOOD FLOOR / "Sherwood Plank" solid oak flooring combines the traditional look of wood pegs with a contemporary use of 3- and 5-in. alternate width planks. Floor is factory-stained and wax-finished in a gunstock brown shade. / Bruce Hardwood Floors. GB, LR, 1

379 BLOCK FLOORING / A three-dimensional arrangement of solid ash, black walnut, white oak or red oak, the "chaucer" pattern is the most recent addition to the Bandwood parquet flooring line. Panels measure 3 1/8-in. square with mitered cuts; flooring is offered ready to finish. / Harris Mfg. Co. GB

380 RANDOM WIDTH FLOOR / Featuring unpegged 3-, 4- and 6-in.-wide planks, "Cambridge Plank" flooring pattern is 1/4-in.-thick solid oak. Smooth-sanded floor is available in "Toast" and "Gunstock Brown" finishes. / Bruce Hardwood Floors. GB, LR, 1

381 WIDE PLANK FLOORS / "Stratford Plank" solid oak is 1/4-in., offered in 5-in-widths for use on both floors and walls. Prefinished in "Gunstock Brown" shade. / Bruce Hardwood Floors. GB,LR, 1

382 PEGGED OAK / Factory-installed walnut pegs give "Country Oak" plank flooring a Colonial look. Pattern uses 3-, 4- and 6-in. oak planks in a rustic brown shade; low-maintenance floor has a baked-on factory finish. / Bruce Hardwood Floors. GB, LR, 1

About mailing lists... an important notice to our subscribers.

In recent years we have made the list of subscribers to McGraw-Hill publications (names and mailing addresses only) available to carefully screened companies whose products or services might be of interest to you. These companies enter into an agreement that permits them to mail information to you without placing you under any obligation.

We have always considered such direct marketing activities to be legitimate and important in the American system of free trade—and we’re confident that the majority of subscribers share this position.

However, we respect the interests of those who for some reason may wish to have their names restricted from such use by companies either affiliated or not affiliated with McGraw-Hill, Inc.

If you wish to delete your name from lists we make available to other firms, please fill in the information requested below exactly as it appears on your mailing label on the cover of this issue. Or, if you prefer, attach the label itself to the coupon and return.

3074 COATING FOR METAL WALLS
A full-color brochure describes the multilayered coating system and displays a representative group of installations. Test results from a 10-year study in Scandinavia and a performance standard chart are included. / H.H. Robertson.

3075 INTERIOR WALL PANELS
A 4-page color brochure details new interior wall panels and includes a description of panel features, plus technical data on acoustical and fire performance and color selection. Also included are diagrams detailing the wall panels’ composition. / Owens-Corning Fiber-glas.

3076 INSULATION GUIDE
A new booklet to help contractors and engineers comply with ASHRAE 90-75 insulation standards for piping, equipment and air handling systems is available. The 12-page guide spells out the specific ASHRAE standard in each construction category and describes products that meet or exceed those specifications. / Owens-Corning Fiber-glas Corporation.

3077 URETHANE FOAM INSULATION
An 8-page illustrated brochure is now available to architects, contractors, and applicators using urethane foam insulation. The brochure contains energy-saving applications for building pipe, tank insulation, and includes comprehensive architectural roofing specifications with details. / Chemtists Systems, Inc. GB, ICR, LRC*.

3078 ROOFING PANELS

3079 PLYWOOD FLOOR SYSTEMS
A 16-page pamphlet providing detailed explanations of plywood use in commercial subfloor-underlayment, the APA Cloud, Floor System, special floor systems, and traditional subflooring and underlayment. A guide to the proper grades and thicknesses of plywood to use in each application is also included. / American Plywood Association.

3080 ROOFING/WATERPROOFING
A 48-page roofing specification manual provides technical information and up-to-date installation and warranty data on a full line of roofing and waterproofing systems. Included are coal tar roofing, built-up roofs, the KWM membrane system, and liquid and mastic applied waterproofing and dampproofing products. / Koppers Co.

FIREPLACES

394 FIREPLACE FURNACE / A wood-burning forced air fireplace, the "Queen Air" is capable of heating a 10-room home. Units consist of an enclosed combustion chamber, two 500 cfm squirrel cage fans, and a heat exchanger installed in a masonry surround. A 36-in.-wide "Queen Air" excluding glass doors, lists for $950.00. / George Mayer Mfg. Inc.

395 MASONRY FIREPLACE / The Brick-O-Lator fireplace is constructed with brick heat-exchange chambers, through which air is circulated and redistributed into the room. Glass doors enclose and control the fire. / Triangle Brick.

396 FIREPLACE TESTING / A testing laboratory at the School of Engineering, Auburn University, provides architects, contractors and consumers with performance data on the heat output and efficiency of manufactured, wood-burning heating products. Part of the test facility, an insulated typical home-sized room, is shown in this cutaway drawing. / Fireplaces Institute.

397 CORNER FIREPLACE / Said to be easy to install, the Readybuilt cast quar- rystone fireplace with wood book shelves measures 4½' across. This precast fireplace is suitable for use with electric or gas logs. / Readybuilt Products Co.

398 BOILER FIREPLACE / Italian-made CAT/unit has a steel water chamber at the top of a fireplace which acts as a heat exchanger. Water within the chamber's tubes is heated directly by the fire and hot exhaust gases, and piped into a system for primary space heating with baseboard radiation; back-up for a forced-air unit; domestic hot water service, etc. / Youngstown Design Center.

399 SECURITY GRILLE / Constructed of aluminum covered steel rods and continuous strips of transparent, break-resistant polycarbonate, the Lex-A-Lite rolling grille provides for shopping mall security while permitting "window shopping" display of merchandise. The grille can be fabricated in virtually any size. / Jim Walter Doors / North American. CB, ICR.

400 ARCHITECTURAL IRON / Handcrafted with traditional blacksmithing techniques, custom-designed architectural ironwork is available executed by Joel A. Schwartz. These items include window grilles, spiral stairways, gates, railings and screens. / Schwartz' Forge & Metalworks.

401 ROLLING GRILLES / Straight lattice, continuous chain grilles provide security as well as ventilation and visibility to the area being protected. Interlocking aluminum or steel links form a network of vertical and horizontal lines. Counterbalanced rolling grilles are available with electric, chain hoist, crank and manual operation / Overhead Door Corp.

402 ORNAMENTAL FENCING / Marketed for residential and public swimming pool enclosures, this security fencing is structured of 11/2' by 1/8" rail channels and 1/4" sq. steel tubing pickets; cast iron top ornaments complete the installation. Black baked-on finish resists rust and corrosion. / Fencote Inc.
403 TRAFFIC CONTROL GATES / Compact and easy to operate. Acorn folding gates are designed for use as traffic control units in school corridors, institutions and commercial buildings. Adaptable to fit most conditions, the gates provide ventilation without loss of security. / Acorn Wire and Iron Works. GB, ICR*

IDENTIFYING DEVICES

404 INTERIOR SIGNAGE / The Omni-Set subsurface graphics system offers interior signage design, layout, laminating and mounting. The dry transfer technique used allows custom letter spacing options; integrated identification components provide a consistent message throughout a facility. / Scott Machine Development Corp. GB*

405 LOGO WALLCOVERING / Corporate symbol or other identification can be woven into all-wool wall hangings, tapestry, area rug or carpet. Sizes range from a 2- by 2-ft rug to quantities of carpet for installation throughout a building. / Logo Looms. GB*

406 DIECUT VINYL LETTERS / Offering a modern lettering style for use on desk nameplates, signs and directories, Quik-Align/2 pressure sensitive letters come mounted on strips of 10 characters. Alignment bars die-cut to the bottom of each section speed installation. / W.H. Brady Co.

407 DIMENSIONAL LETTERING / Mirror letters in both clear and tints of blue, green, amber, yellow and bronze are available in 24 stock styles. Offered with polystyrene backing in thicknesses from ¼-in. to 4-in., letters may also be beveled for window and counter display. / Polyplastic Forms, Inc.

408 BRAILE SIGNAGE / This touch system for the non-sighted or visually handicapped is a series of raised dots set into plastic that can be applicable for any public or private facility. Each braille character has a corresponding English alphabet character molded on the reverse side so it can be hung for multi-purpose use. / Scott Plastics Co.

409 SAFETY BARRIER / Avert-A-Hurt barricade tapes are intended to replace ropes, wooden barriers or signs in temporary dangerous or restricted areas around construction sites, high voltage stations, etc. Colorful tapes come in convenient carry-and-dispense rolls. / Banner Guard, Div. Reef Industries, Inc.

410 EXTERIOR SIGNAGE / Tough and transparent, Lexan sheet may be used for both illuminated and non-illuminated signs. Facade signs are available in lengths to 59-ft, set in extruded aluminum housings. Lexan signage is weather- and impact-resistant. / Plastics Div., General Electric Co.

411 TRANSFER LETTERING / A new sheet size is available in this dry transfer line: the “Demi-Better Letter” measuring 8- by 12-in. Letters are offered in 25 different type styles plus arrows, dots and borders. List price per sheet is $2.00. / C-Thru Graphics.

412 WHOLE HOUSE / A ventilation system for the entire house, Kool-O-Matic fans install in joint or truss areas of a centrally located hallway ceiling. Air flow is directed by opening and closing windows. A solid-state speed control and timer operates the ventilator automatically. / Kool-O-Matic Corp.

413 STATIC ROOF VENT / Made of ABS plastic covered with an acrylic finish in either black or brown, static roof vents are FHA-approved and wind tested over 100 mph. Screened to keep insects out, the vent’s low profile blends with most residential roof lines. / Leigh Products.

414 AIR HANDLING LOUVERS / Industrial and commercial louvers provide high free areas with low water penetration test results. A new addition to this air handling line are drainage blade louvers; dual gutter design directs water to the jambs or mullion drains, preventing both cascading water and air borne droplets from penetrating the louver. / Construction Specialties, Inc.
PARTITIONS

415 OFFICE PARTITIONS / Design Option full-height partitions are completely pre-fabricated, easily installed with non-marring ceiling and floor channels. Portable walls feature radius corners; finish options include baked enamel and genuine wood species. / The E. F. Hauserman Co.

416 PRIVACY SCREENS / Double-thick divider screens provide three levels of office or work station enclosure: 4'-by-6'-ft standing privacy; 4'-by-4'-ft seated privacy; and a 4'-by-3'-ft screen for area definition. Freestanding dividers are framed in walnut-stained hardwood. / Ghet Mfg. Inc.

417 DEMOUNTABLE WALLS / Designed for economical installation and maintenance, the Dimension Wall "B" interface system can accommodate modular furniture units, attaching and leveling them on the wall surface itself. / Roblin Building Products. GB*

418 FOLDOUT ROOMS / Foldaroos panels, complete with doors and windows, fold easily from the wall of a gymnasium or other open space to create self-contained offices, classrooms, etc. Standard sizes range from 8'-by-12'-16'-by-12'-ft; one room has an automatic fold-down ceiling for sound control. / Won-Door Corp.

419 SHADE STRUCTURE / To control sunlight in outdoor areas, custom aluminum patio covers can be built to conform to shape and dimensions of rectangular, oval and circular areas. The patio covers meet local load requirements. / Alcan Building Products. ICR*

420 ALUMINUM CANOPY / Window-shading canopy system deflects sun's rays as well as provides shelter from snow and rain at doorways. Aluminum panels have a polyester finish for low maintenance. / Alcan Building Products. ICR*

421 WALKWAY CEILING / Shown here installed as the weather-resistant ceiling in a covered walkway, the Planar system provides an open plenum area above for running wiring, piping and hvac ducts between buildings without the expense of underground installation. / Alcan Building Products. ICR*

422 SOLAR DRAPE LINER / Heat-reflective/heat radiant reversible silver/white liners attach to the back of existing drapery, using the same hardware and hooks. Silver-side-out in summer reflects solar heat towards the room side in winter, it re-radiates furnace heat into the room. Pleated panels are 95-in.-long; double face adhesive joins panels to create liners of any width. / Wind-N-Sun Shield, Inc.

423 TELEPHONE ENCLOSURES

424 TELEPHONE DOME / Engineered to efficiently reduce the external noise surrounding public telephone areas, the British-made Phonedom is available in clear or bronze-tinted acrylic. Unit is easy to fit with wall-mounted or coin-box phones; back-board is filled with sound absorbing insulation. / Alegra International Ltd.

425 LOTION CLEANSER / For high-traffic institutional and restaurant washrooms, the Luron lotion "Model 21" dispenser provides more than 1,700 handwashings before refilling. Constructed of high-impact plastic, drip-resistant unit has a key-lock to discourage vandalism. / U. S. Borax.

426 TOWEL BARS / Accessories made of brass tubing are coated with a colorful enamel or finished in polished chrome. The towel bars shown are part of an extensive line manufactured by Be Bro S.R.L. of Italy; prices range from $10.00 to $30.00. / Fearless Faucets.
427 TOWEL RAILS / Radiator rails keep towels or clothes warm. The unit works on domestic hot water supply or hot water heating system; an oil-filled electric model needs no plumbing. Said to be easy to install, towel rails come in chrome, copper or gold finishes. / Myson Inc.

428 GRAB BARS / "600 Series" stainless steel grab bars have 1½-in. wall clearance, which conforms with Federal regulations. Bars are offered in 1½- and 1½-in. dia, with either a satin finish or non-slip gripping area. Straight lengths are standard; special application designs may be ordered. / The Charles Parker Co. GB*

429 BATH SHELVES / Shelving from the "Tubotondo" series of bathroom accessories is formed of curved Plexiglas with brass tubing brackets. Finishes include polished chrome, brass, gold, and baked enamel in six colors. Prices for the Italian accessory line range from $15.00 to $60.00. / Fearless Faucets.

430 HAND/HAIR DRYERS / UL-listed units have a sealed timer mechanism, set for either a 30-sec hand or 3-minute hair-drying cycle. Brushless motor is housed in a vandal-resistant cast cover, finished in either bright chrome or chip-proof white epoxy. / Excel Dryer Corp. GB*

431 ELECTRIC SHOWER / Compact unit produces hot water automatically as cold water faucet is opened. Water flow regulates the water temperature. Manufactured in Brazil to IEC and CE standards, electric water heater retails for $89.95. / Orlando Enterprises.

432 TOWELS / Suitable for the executive or corporate guest washroom, custom towels can be ordered with logo or other identifying symbol woven into the fabric. / Dundee Mills.

433 ACCESSIBLE VANITIES / Three different cabinet configurations, for corner, alcove or freestanding installation, are offered to meet the requirements of the physically handicapped. Vanities combine laminate countertop with backsplash, skirt and locking cabinet and a stainless steel paper towel dispenser and waste receptacle. / Bobrick Washroom Equipment, Inc. GB*

434 TOILET ACCESSORY / Partition-mounted seat cover/toilet tissue dispenser specially for use in public facilities designed for the handicapped. One side of the combination unit mounts flush with the panel to allow a grab bar to cross over in front. The other side serves the adjoining compartment. / Bobrick Washroom Equipment, Inc. GB*

435 COMBINATION UNIT / A compact paper towel dispenser and waste receptacle "B-369" fixtures are suitable for low traffic public or executive washrooms with limited space. Stainless steel unit is offered in versions for recessed or surface mounting. / Bobrick Washroom Equipment, Inc. GB*

436 WATER-SAVING SHOWER / Limiting water flow to a steady 2.75 gpm per minute at water pressures between 20 and 80 psi, this water saving shower head still delivers an effective full cone spray. Showers meet California Energy Commission standards. / Ondine, Div. Interbath, Inc. GB, IC, IT*

437 BATH STORAGE / The "Bath Hutch" mounts on the wall above the toilet, storing towels and supplies behind cabinet doors in the top section. The lower section has adjustable shelf standards and a drawer and facial tissue dispenser unit. Unit available in several styles and a choice of wood finishes. / Quaker Maid.

438 MEDICINE CABINET / This acrylic cabinet, designed by Yolanda Quiltman, won a 1979 ASID Award. Optional lighting feature takes three 60-Watt bulbs; convenience outlets are standard. Cabinet measures 30- by 30- by 4½-in.-deep, and can be recessed- or surface-mounted.; 13 color choices. / Hastings II Bagno Collection.
3081 TRANSPARENT PLASTICS / Technical data, ad reprints, and a brochure entitled "News in Transparent Plastics" are being offered to cover a complete product line of transparent plastics. Construction applications, typical properties, and the product line are outlined. / Cyro Industries, GB, ICR

3082 SKYLIGHTS / A new concept in energy-saving skylight design, featuring an outer dome of Protect-A-Glaze sheet and an inner diffuser panel of expanded sheet, is outlined in a news release from the manufacturer. Includes data on thermal insulation properties, condensation performance, and skylight sizes and finishes. / Fulk-Miller Plastics.

3083 FIRE DOORS / A fact sheet on UL-labeled sliding fire doors with pedestrian pass doors is available from the manufacturer. Includes complete specifications, hardware information, and complete Underwriters' Laboratories fire test data. / F.L. Saino Manufacturing Company.

3084 SKYLIGHTS / A fact sheet is available from the makers of a new "venting skylight" that releases warm and stale air while drawing in clean air. Contains price list, available sizes and models, and delivery information. / Naturalite, Inc. LRC

3085 METAL DOORS / A complete product line catalog is being offered from the manufacturers of frames and steel doors with a stye core for special insulating value. Includes color chart, life-cycle costing data, and specifications. / Amveld Building Products. GB

3086 GARAGE DOORS / Styles, materials, and textures to blend with any style of building design are outlined in this brochure on custom residential garage doors. Contains information on available textures, panel designs, and models. / Windsor Door Company.

3087 SECTIONAL DOORS / Information and specifications on a full line of upward-acting sectional doors, for commercial and industrial applications, are available from the manufacturer of insulated steel doors, combination steel/thermoplastic doors, pedestrian pass doors, and special designs with removable posts for clear span applications in airport hangars and other multiple door insulations. / Windsor Door Company.

3088 ROLLING DOORS / Information and specifications on metal rolling doors for service entrances in plants, warehouses, and terminals are contained in a catalog. The product line includes full-weatherstripped doors, UL-labeled fire doors, rolling grilles and shutters, and electric operators. / Windsor Door Company. GB

3089 STEEL DOORS / A full line of steel side-hinged doors, steel frames, and door hardware are featured in this company's catalog. Includes information on flush doors, narrow stile doors, UL fire doors, and the types and sizes for commercial, industrial, institutional, and multi-unit residential buildings. Color options and guide to selecting the most efficient door are also included. / The Ceco Corporation. GB

3090 REPLACEMENT WINDOWS / A brochure illustrates and describes the features of a new line of thermalized custom-fit replacement windows. The brochure details thermal insulation in master and sash frames as well as insulating glass of these replacement windows designed for maximum energy efficiency without condensation. / Season-all Industries. GB

3091 REPLACEMENT WINDOWS / A 6-page color brochure describes and illustrates the features of thermally insulated aluminum replacement windows, which are designed for maximum thermal efficiency and condensation resistance. Includes color options and energy conservation data. / Season-all Industries. GB

3092 REPLACEMENT WINDOWS / A 16-page catalog explains the installation economy of custom-fit replacement windows, defines the causes of window energy problems and explains specific solutions for each. In addition, it presents detailed, cross-sectional drawings, specifications, and features of a complete line of replacement windows. Also illustrates optional accessories such as head, sill and jambs covers and a variety of locks and latches. / Season-all Industries, Inc. GB

3093 PATIO DOORS / Colorful brochure displays benefits of insulated patio door systems which combine practicality with design considerations. Specification details and model options for the traditional and modern two- and three-door units are included. / General Products Company.

THIS IS THE MOST TESTED SIGN IN HISTORY

AMERICAN ATOMICS CORPORATION
425 S. Plumer Ave., Tucson, Ariz. 85719 Or give us a call at (602) 822-4681

Circle 1048 on inquiry card
And that's only a small fraction of our entire line.

We manufacture over 358 different models of refrigerated cabinets. We have reach-in refrigerators and freezers ... (recently we introduced a completely new line of 60 models) ... ice and beverage equipment as well as biological, dairy, bakery and floral refrigeration.

Plus, we offer an almost endless number of models and styles of walk-in coolers and freezers, both standard and custom (including packaged and pre-wired remote refrigeration systems).

To make the Nor-Lake picture even more inviting, we stock over 3000 units. That means you can get the unit that best fits your needs—and you can get it fast. Doesn’t buying a Nor-Lake make a whole lot of sense ... as it has to thousands of our customers since 1947

See your local dealer or WRITE Nor-Lake, Inc., Second & Elm, Hudson, WI 54016, or call 715/386-2323.

NOR-LAKE PUTS YOU FIRST IN REFRIGERATION

BANK & VAULT EQUIPMENT

451 BANK BRANCH MONITORING / The BRM-2 is a two-way branch monitoring system. It features multiplexing (reduction in the use of telephone lines) and high security. / The Mosler Safe Co. GB*

452 BANK TV / The Trans-Vista III/TV for drive-up banking offers new options: "Identifkey" for positive customer identification, and automatic carrier storage-and-send that makes teller service easier with one-button operation. / The Mosler Safe Co. GB*

453 CUSTOMER ID / A simple way of identifying financial institution customers, this system speeds up transaction time by eliminating multiple identification requirements. The customers select their own code, either number or name. / The Mosler Safe Co. GB*

454 BANK SAFE / Compact enough to fit almost anywhere, this American Bank Safe has separately locked doors for limited safe-deposit box services, plus bulk cash storage for internal operations. / The Mosler Safe Co. GB*

455 VAULT ORGANIZATION / The American Locker System is a new way to organize any vault with interchangeable B-width design for bank, teller and cash vaults. Twelve colors are available. / The Mosler Safe Co. GB*

456 SECURITY CAMERA / A One Frame Suspicion Capability is a special feature of the LC-11 35mm camera for wide business application. Operated by button control, an individual can take a single photo of a customer. / Dressen-Barnes Electronics, a division of American Electronics, Inc.

DARKROOM EQUIPMENT

457 ENLARGER / For formats up to 5-by-7-in. the L57 laboratory enlarger offers six different light systems, including dichroic, point light and pulsed Xenon. Lens range from 50-240 mm / Leedal Inc.

458 TRAY LADDERS / Space-conserving photographic trays are now available in a 3-stack model. Two open-span shelves locks into triangulated, vertical supports. / Leedal Inc.

DETENTION EQUIPMENT

459 LOCKSET / The KAM-LOC Model 1050 is a mortise lockset with deadlocking latch function. A remote knob lock feature can lock or unlock electrically. / Brink's Locking Systems, Inc.
ELECTRIC BOLT / For high security locations, the KAM-LOK Model 20 can be remotely controlled for entrances and interior doors. An integral switch activated by a door position sensor serves to hold the bolt in the retracted position when the door is open. / Brink's Locking Systems Inc.

RABBIT LOCK / The KAM-LOK model 3020 is a mortise deadlocking latch designed for installation in the rabbet of a door frame. It operates by push-button, card reader or digital access control. / Brink's Locking Systems, Inc.

FOOD SERVICE EQUIPMENT

STEAM COOKER / The Convectec Steamer is applicable for restaurants, schools, hotels, hospitals and other kinds of large-volume food service operations. / Cleveland Range Co.

REFRIGERATED WORKTABLE / The undercounter/countertop worktable Model RC24B is a self-contained refrigerated worktable. It is mobile and has 24 cu ft of storage area. / Nor-Lake, Inc. GB, E*

REFRIGERATOR / Reach-in refrigerators and storage freezers come in one-, two- and three-door models. Each has a Power Saver Switch, which reduces electrical consumption by shutting off condensate heaters when not required. / Glenco Refrigeration Co.

MILK DISPENSER / With foam insulation, the Trimline Dispenser has a dripless valve system designed for easy view dispensing and avoiding milk overflow. An interior container platform prevents spillage. / Nor-Lake, Inc.

LABORATORY EQUIPMENT

WASHER / A high-pressure washer is designed to clean vehicles as large as off-road equipment. The PW-1200 features a full time gun control at 1200 psi pressure spray. / Jenny Division, Homestead Industries.

DENTAL BENCH / This dental technician's bench has adjustable vacuum positions, dust collector with push-button compressed air cleaning, and in-bench storage for air guns / St. Charles Manufacturing Co.

FLAME HOOD / These fume hoods offer auxiliary air pumped into the handling capability in air-conditioned laboratories. Up to 70 percent of the total air exhaust can be non-tempered / St. Charles Manufacturing Co.

LAB FREEZER / A 3-cu-ft laboratory chest freezer has an ultra-low temperature range of -75C. Features of the Model 8332 include low-profile design, stainless steel interior construction, urethane insulation and built-in battery. / Forma Scientific.

SCIENCE STATION / A portable science station is specifically designed for barrier-free work for handicapped students. The unit is self-contained with one side designed for biology lab work, the other for chemistry/social work. / Conco Industries, Inc.

STORAGE CABINET / Combustible materials can be safely stored in this undercounter storage unit. An all-steel cabinet contains an inside fire or protects chemicals from an outside fire. / Fisher Scientific/Contempra Furniture Division. GB, ICR, T*
472 BLOOD BANK STORAGE / A new line of undercounter refrigerators and freezers for blood bank and general laboratory use are designed for +4°C whole blood storage and −35°C plasma storage. / Forma Scientific.

473 LAB FREEZER / A giant capacity blood storage refrigerator is a 48 cu ft unit that protects up to 660 plastic bags of whole blood at a precise +4°C temperature. (Also available in 300 and 586 bag models.) / Forma Scientific.

474 VINYL EXTRUSION / High performance vinyl profile extrusion compounds can be made, with a wide range of indoor or outdoor applicable colors. New dark colors reflect sunlight. / Crane Plastics.

475 GLASSWARE WASHER / For laboratory use, this new glassware washer scrubs plasticware as well as glassware. It has solid state, push-button control panel. / Labconco Corp.

476 BACTERIA INCUBATOR / The Model 149 Bacterial Incubator is a dry bath specifically designed for determining total and fecal coliform bacteria in water/wastewater samples. It has a two-switch-selectable, factory-set operation temperatures. / Fisher Scientific Co.

477 STERILIZERS / The Eagle 2000 series sterilizer combines a sterilizer with a microcomputer. The memory unit carries sequential instructions for every operation in each cycle. / AVESCO/American Sterilizer Co.

478 CHECK VALVES / These gas valves for laboratory use have integral check valves that automatically close if a hose is connected simultaneously with a water valve, preventing water from entering the gas lines. / Royal Brass Mfg. Co.

479 LAUNDRY EQUIPMENT

480 LINT COLLECTOR / The Mistair Lint Collector AL Series has a new adjustable baffle system, permitting fine tuning in the field. With a redesigned hopper, there is a better air flow and saturation of lint. / Eastern Cyclone Industries, Inc.

481 LAUNDRY CART WASHER / This laundry cart washer features adjustable cycle times permitting the washer to handle various soiled conditions at minimum detergent and utility costs. / Eastern Cyclone Industries, Inc.

482 WASHER-EXTRACTORS / A new liquid supply system is now available as optional equipment for the System 4 washer-extractor. The machine-mounted unit can inject four supplies into an individual washer-extractor in the proper wash cycle. / Pellerin Milnor Corp.

483 DOCK LEVELER / A fully automatic, extra-heavy-duty leveler, the "FA 1696-80M" is activated by the truck trailer backing into the loading platform. The completely mechanical unit is available in capacities up to 100,000 lb, is OSHA-approved and carries a five-year warranty. / Rite-Hite Corp.
DOCK BUMPERS / Now available are “extra thick” and “extra length” dock bumpers for more flexible handling of equipment. / Durable Mat Co. GB, ICR*

ADD-ON LEVELER / This adds a full-sized leveler to an existing dock without the expense of pit construction or major dock alteration. It is applicable to any of the company’s RF Series mechanical or hydraulic levelers. / Overhead Door Corp.

DOCK SEAL / Model DSE Curtain Head Dock Seal offers an efficient method of achieving carrier-to-building sealing on applications where a clear door opening is only occasionally required. / Overhead Door Corp.

MEDICAL EQUIPMENT

MEDICINE CABINET / This portable medicine cabinet for hospital use is designed with a lock drawer, individual prescription drawers, and lighted top surface for efficient dispensing of prescriptions. / Waterloo Industries Inc.

RESIDENTIAL EQUIPMENT

ENERGY-EFFICIENT STOVE / A unique new residential kitchen stove heats a pot immediately. Drawing from standard 60 Hz household current, a computerized power pack underneath the smooth-topped stove changes the current’s frequency to 25 KHz. / Farsar Systems Inc.

MICROPHONE MIXER / This 8-channel, solid-state mixer/amplifier has plug-in input accessory modules. Total system mix gain is held constant by automatic adjustment of the signal level in each channel. / Altec Lansing, GB, ICR, E, CC*

THEATER & STAGE EQUIPMENT

POWER AMPLIFIER / The Incremental Power is a power amplifier system that is claimed to meet almost any audio application. / Altec Lansing, GB, ICR, E, CC*

STEREO MIXING CONSOLE / Model 1690 Mixing Console is portable or rack-mountable designed for musical or commercial sound reinforcement and professional recording. / Altec Lansing, GB, ICR, E, CC*

ICE DISPENSER / The “Crystal Tips DCE-030” sanitary hard ice dispenser has a 300-lb. ice storage bin, and may be combined with ice makers of from 250- to 650-lb. capacity. Unit offers portion control; operation by hand, coin, key or token; and sanitary-code approved cabinets. / McQuay Group, McQuay-Perlex Inc.

SOFT DRINK VENDOR / Engineered for simple operation and low maintenance, this two-beverage dispenser operates with a 10-pronged plastic key instead of coins. Its low cost permits installation in small offices, social clubs, schools, etc. / McQuay Group, McQuay-Perlex Inc.
FINISHES: UCI 9

3104 COATING COLORS / Literature describes the color selection aids offered with this line of paints, vinyl wall coverings and maintenance coatings. These materials include a Color Selector book, Color Deck, and a two-volume, 1024-page binder of tear-out color samples. / Glidden Coatings & Resins.

3105 NYLON CARPET / The Antron III "Showcase" contains samples of carpet from four different lines of commercial and residential floor coverings. / Kenmore Carpet Corp.

3106 TEXTURED FINISH / A Designer Portfolio contains actual samples of Dryvit System insulation board finishes. Selection chart displays the 14 fade-resistant colors for the various Dryvit textures. / Dryvit System, Inc.

3107 OFFICE CARPETING / Color brochure discusses advantages of specifying Zefran acrylic and acrylic blends; Zeflan subbed luster nylon; and Zeflan 500 solution-dyed nylon yarns in carpeting for office use. / Badische Corp.

3108 COMMERCIAL CARPET / Titled "The Public Carpet with the Private Look," color booklet provides commercial carpet specifications with many in-use photos of Karastan carpets. Special styling features and recommendations for use in various public spaces are included along with full product specifications. / Karastan Rug Mills.

3109 RETAIL CEILINGS / Published for designers interested in retail stores, restaurants and malls, a 12-page booklet contains color photographs of 19 recently completed installations using a variety of lighted and decorative ceiling systems. / Integrated Ceilings, Inc.

3110 PREFINISHED WALLS / Brochure on the Eternamold vinyl surfaced gypsum board line of interior partitions and high traffic finishes provides samples of each of the 16 standard patterns and colors. Fire hazard data and maintenance instructions are included. / Georgia-Pacific Corp. *

3111 PREFINISHED PANELING / Idea brochures called "The Designer's Touch" show prefinished wood and simulated woodgrain panelings used in living rooms, kitchens and dining areas, family rooms and bedrooms. / Georgia-Pacific Corp. *

3112 GYPSUM PRODUCTS / Corporate profile describes the construction products offered by this manufacturer of gypsum board, Actionwall partitions, drywall accessories, and two-hour shaftwall systems. Color photos depict a number of construction projects and commercial applications. / Donnart Gypsum America Inc.

3113 PLYWOOD FINISHES / How to finish plywood for exterior exposure is explained and illustrated in "Stains and Paints on Plywood." The 8-page booklet covers plywood storage, edge sealing, recommends various paints and stains, and discusses weathering, coating application, maintenance and refinishing. / American Plywood Assn.

3114 SHEET FLOORING / Decorative hints, room scenes, flooring facts and design and coloration information are included in eight product brochures on resilient sheet flooring for commercial and residential applications. / Mannington, GB*

3115 STAIR COVERINGS / Color-coordinated rubber and vinyl safety treads and landing tiles are shown in a 12-page catalog. Flame-retardant Disc-O-Tile rubber flooring, which meets ASTM-1684 requirements, is highlighted in the literature. / The R.C. Musson Rubber Co., GB, LCR*

3116 SEAMLESS VINYL / Folder explains how "Conductive" and "Contract V" solid vinyl tile may be heat welded into a seamless, unitized flooring installation. Color and pattern choices for floor tiles and seaming strips are shown. / Flexco, Div. of Textile Rubber Co., Inc. GB*

3117 SOFT WALLCOVERING / Product folder provides samples of Cordette and Velvette textures of noise-reducing Brunswall non-woven fiber wallcovering. For use directly on walls or laminated to drywall or panels, Brunswall has a Class A flammability rating. / Brunswall.

Vollrath walk-ins mean royal treatment for any installation

On the grounds of the lavish Biltmore Estate, America's finest castle and North Carolina's outstanding tourist attraction, is Deerpark—the Biltmore dining experience. Only the finest quality refrigeration equipment is good enough for this outstanding facility. That's why a Vollrath walk-in cooler-freezer was specified.

From spec to finished project, Vollrath specialists assist in mechanical/electrical requirements; size, storage and materials data. On time delivery with reliable post-sale service is also a part of Vollrath's royal treatment. And isn't that the way you and your clients should be treated?

DEERPARK...
where Vollrath's dual temperature walk-in is part of the Biltmore dining experience

Vollrath serves markets world-wide with modular walk-in coolers, freezers, and refrigeration systems...when only the best is good enough.

The capable hands of Vollrath build exactly what you want in a quality walk-in cooler/freezer.

ARCHITECTURAL RECORD Mid-October 1979 129
ARTWORK

508 CORPORATE SYMBOLS / Corporate symbols can be custom emblazoned on a tapestry, area rug or carpet. Carpets and wall hangings are manufactured to meet the client's specifications. Wall hangings can be ordered in sizes ranging from 2- to 2-feet to 3- to 3-foot by 3-feet. / Logo Looms Limited.

509 TAPESTRIES / The "Chamot Collection" consists of 40 designs, hand-woven in Peru, each produced in limited editions of six. Tapestries measure 6'-8" by 7'-4", and have a list price of $3,500 each. Pictured is "Art Deco," a colorful geometric pattern. / Atelier International Ltd.

510 CUSTOM Murals / Metropolitan Opera memorabilia painted by Ronald Millard for a New York City bank is an example of the capabilities of this firm specializing in architectural decoration. Services also include lighting fixtures, stained glass and art metal work. / The Rambus Co.

511 ROCKEFELLER COLLECTION / Decorative accessories from the Nelson Rockefeller collection are available in hand-made reproductions. Pictured are the Giacometti "Balustrade" bronze standing lamp, a wooden gilt table designed by Jean-Michel Frank, and a gilt-on-bronze vase-shaped table lamp, also by Giacometti. The Chrien Lung hawks and Modigliani watercolor are also part of the Collection. / The Nelson Rockefeller Collection. 1st edition.

512 ROMAN ART / Painted in oil by artist Bill Skilling, the "Antica Romana" collection incorporates figures and nature motifs in rich earthy colors reminiscent of ancient Pompeii. Paintings, in custom sizes and colors, are framed in parchment-finish ash wood. Fresco-like walls and ceilings may be specially commissioned. / Karl Mann Associates

513 PICTURE RAIL / This simple graphic display system consists of a wall track with a slot along the full length, which carries any number of metal suspension rods. An adjustable hook clips onto this rod and supports a framed picture. Any given rod can carry several hooks, up to a total of 176 lb. / The Ironmonger Inc.

514 LITHOGRAPHS / "Avanti" is an original lithograph, numbered and signed by the artist, industrial designer Raymond Loewy. It is one of eight Loewy graphics sized 21" by 28" offered in limited editions of 300 each. / Circle Gallery.

CABINETS & STORAGE

515 WALL SYSTEMS / Oak, maple and cherry wood is used for office and commercial wall storage systems. Pre-installed locking devices and shelf track facilitate assembly. Pictured is a four-section unit, in flush door style, with open adjustable shelves and cabinet storage. / Mutschler, A Triangle-Pacific Company.

516 SLIDE STORAGE / Up to 3,960 2" by 2" slides can be stored in a compact metal cabinet for on-the-spot viewing, editing and retrieval. Each of the 33 pull-out frames holds 120 slides; a self-contained lightview box pulls out behind for true-color viewing. / Multiplex Display Fixture Co.
517 SHOE STORAGE / Each individual compartment of the "Scarpier" storage unit can hold six pairs of shoes; three or four can be placed side-by-side. Unit is made of colorful polyurethane, with self-closing sprung doors. / Hastings II Bagno Collection.

518 MOBILE STORAGE / Made of white, red, yellow or black ABS injection-molded plastic, the "Matrix Boy" personal storage unit can be used in home or office. Its sections include three swing-out trays, three open drawers, two open shelves, two adjustable deep pockets, one shallow pocket, and two surface trays. / Leesal Incorporated.

519 HOSPITAL STORAGE / The Un-cell self-contained module provides prime storage, control and mobile distribution in one basic lockable unit. The interior may be fitted with shelves, trays, and drawers of varying sizes; all finishes may be sanitized. / American Sterilizer Co., GB*

520 KITCHEN CASEWORK / Manufactured by Telsa of West Germany, this modular cabinet system offers over 300 units for kitchen work areas and storage. "Program 42" cabinets have rounded edges; laminate doors come in white, curry, brown or green. / Contemporary Systems Inc.

521 PLAN FILES / Constructed of oak and oak veneer, files store drawings, prints, or any flat graphic material in five 24'-by-36'-or 30'-by-42'-drawers, each 2'-in. deep. Units may be stacked as shown, up to 60'-in-high. Plan files are priced about $410 for a 24'-by-36'-in. model with cap and base. / Charrette Corp.

522 OAK KITCHENS / Designed for improved storage efficiency with a large number of concealed accessories, "Ultra 2000" series cabinets are offered with five oak or laminate door options. Units come in three-in.-size increment; options include spice and bottle racks, wire baskets, deep drawers and pull-out appliance shelves. / MasterCraft Industries Corp.

523 VERTICAL STORAGE / For the kitchen, this handy vertical storage unit has two separate compartments with sliding drawers. It comes in a variety of woods. / MasterCraft Industries Corp.

524 VITRINE / Illuminated at top and bottom, four-shelf vitrine is hand-made of exotic woods, acrylic plastic, mirrored back and locking glass doors. Standing 78'-in.-high on a radial steel base, display unit may be used in home or office. A wall-hung version is also available. Suggested retail: $5,000. / Vladimir Kagan Designs, Inc.

525 MICROWAVE CABINET / A specialized cabinet designed to house microwave ovens, the standard size is 30'-by-35'-by-19'-in. For smaller ovens, a special size can be ordered. / MasterCraft Industries Corp.

526 BATH STORAGE / A versatile line of modular storage compartments, "Die BadBox" units provide customized bath storage. Included are vanity cabinets, hanging lockers, clothes hampers, shelving, etc. in a variety of laminate finishes. / Heidental Group.

FABRICS

527 TEXTILES / Called "Devon," this textile collection is part of the manufacturer's British Woolens Collection. It has a rugged, large-scale weave and comes in six wool-dyed colors. / Stow/Davis Textiles.

528 WOOL FABRICS / "Highland Heather" has 14 soft, muted colors to give the look of Shetland sweaters. All fabrics are wool-dyed so that the color is blended before the yarn is spun. / Stow/Davis Textiles.
529 STRETCH WOOL / A 99-per cent-wool cloth with over 15 per cent stretch in all directions. "Stretch luxe" tailors well on both contoured and conventional furniture. A tweed look is produced by combining three yarn-dyed colors within each colorway. / Stow/Davis Textiles.

530 LINEN/COTTON BLEND / Geometric lines and squares on a linen background are woven in 60 per cent linen/40 per cent cotton drapery and upholstery fabric. "Bi-Line" and "Check List" are available in stock and custom colorings, both as fabric and as wallcovering. / Karl Mann Associates.

531 DRAPERY PRINTS / "Nob + Non" collection of casement and drapery fabrics uses soft color, white on white and white on natural in cotton batiste and cotton percale so that an individual transparent panel may be layered over an opaque panel to give a two-dimensional quality. There are seven patterns offered in 39 colorways. / Knoll Textiles.

532 DRAPERY FABRIC / Woven with a combination of wool, silk and acrylic, the "Sterling Collection" of 84-in.-wide drapery fabrics comes in 21 solids, stripes and plaids, in a selection of subtle natural tones. / Design Tex Fabrics, Inc.

534 PRINTED CASEMENTS / Geometric forms in muted colors appear in the "Screen" pattern casement cloth by designer Christa Haessler. This fabric may be ordered as a sheer, with burnout pattern, or printed on a heavier cloth. / Sunar.

535 CONTRACT WOOLS / Primarily for upholstery applications, fabrics in the "Natural Wool Textures" series can be specially woven up to 104-in.-wide for use as wallcoverings or for wrapping panels. / Carnegie Fabrics.

FURNISHING ACCESSORIES

536 CHAIR CONTROL / Said to provide the chair user with better control at both upright and full-tilt positions, the "Unitron" swivel/tilt device uses dual torsion coil springs for an exceptional torque performance curve. "Unitron" controls are standard on many of this manufacturer's new chair lines. / Steelcase.

537 TERRA COTTA PLANTERS / Hand-made planters are finished in a matte glaze; inside is sealed with a clear glaze, with drain holes for direct planting if desired. Terra cotta planters stand 16- and 19-in. high, walls are one-in.-thick. / Forms & Surfaces.

538 CLOCK / Designed by William Sklaroff Design Associates, this "Sculptura" series clock is encased in satin aluminum with a glass crystal, and has a black face plate and chrome hands. It is quartz battery-operated. / Howard Miller Clock Company.

539 DIGITAL CLOCK / Time "QC-870" quartz digital clock operates for a full year on one 1.5V battery. Extra-large 3½" by 3-in. leaftype numbers can be seen from across a room; clock itself measures 12-in. wide by 5½-in. high. It comes with a slide-in stand for counter use, and may also be wall mounted. / Coplex Corp. of America.

FURNITURE

540 CLUB CHAIR / As one of several models in the Lucerne lounge seating series, this chair is multi-layered with varied densities of polyurethane foam and dacron fiberfill. The frame is of hardwood with rubber webbing. The seat pulls out for a deeper lounge position. The designer is de sede of Switzerland. / Stendig Inc.
541 CONSOLE / A geometric form for storage and display, this 18-in by 64-by 32-in-high console has a lacquered "linen" top resting on a mirror-finish stainless steel frame. There are three flush-fit apron drawers. / Cy Mann Designs Ltd.

542 FREESTANDING STORAGE / Custom-made in an Art Deco style, unit shown here is finished in Plexiglas and brushed aluminum. Many other materials may be ordered. / Charles Craig Limited.

543 EXECUTIVE DESK / The basic desk pad accommodates a selection of recessed management modules containing work papers, confidential files, and built-in aids such as multi-line speaker telephone, electronic calculators, clock/calendars and adjustable task lighting. / Croydon Furniture Systems Inc.

544 OPEN OFFICE / "Series 1000 Office Adaptables" work with the effective acoustical control properties of Owens-Corning "Sound Dividers" to construct a versatile, productive open office environment. Work station components include panel-hung and freestanding work surfaces, storage, and space arranger units, and lighting. / Harmon.

545 BURL STORAGE UNIT / The "Tall System" is a storage unit that could include television to refrigerator bar. Facing and counters shown here are olive ash burl with viennes in a high polished lacquer finish. Suggested retail price is $14,700. / Vladimir Kagan Designs, Incorporated.

546 CYLINDER DESK / Finished in mirror-polished high gloss opaque colors, the "Ponte" desk is trimmed in stainless steel and rich-lay bronze. Single cylinder desks, credenzas and tables are also available in the collection, designed by J. Wade Beam. / Brueton Industries.

547 CRT TERMINAL TABLE / This split-top table is specifically for use with a keyboard input and screen unit, allowing individual height, tilt and depth adjustments for each machine. Table is supported by a column set on a five-arm caster base: table surfaces are oak. / Facit, Inc.

548 FEMININE DESK / Scaled at an unmassive skirt, "The First Woman's Executive Desk," has a roll-top and leather writing surface. The deep drawers contain a built-in mirrored vanity; small filing system; phone and call director; and personal storage space. Steel-based desk is made of sculptured wood in a lacquer finish. Price for the made-to-order desk: $13,500. / Vladimir Kagan Designs, Incorporated.

549 EXECUTIVE CREDENZA / As an accompanying piece to the woman's executive desk, this matching credenza is equipped with an electronically controlled tambour and lateral filing system. It has four deep drawers, sits on a radius corner steel base and has the same highly polished lacquer finish as the desk. / Vladimir Kagan Designs, Incorporated.

550 OPEN OFFICE / The basic C-Forms system consists of six visually and dimensionally related modular units used alone or in combination to structure any number of altogether different work environments. Composite structure technology in wood, laminate, steel and fabric furniture contributes to C-Forms price/value/delivery advantages. / Herman Miller Inc.

551 PRIVATE OFFICE / Teak furniture for the executive office may be selected from C-Form components. The 84-in. double pedestal desk has removable plugs in end caps allowing phone and other wiring to run down inner portion of leg, out of sight. Matching credenza has file and box drawers. / Herman Miller, Inc.

552 STORAGE/DISPLAY / The top of this 84-in-long console is brushed aluminum; it contains three apron drawers, one lined for silverware. Base cabinet is available in wood, or any of 12 shades of polyurethane lacquer. / Cy Mann Designs Ltd.
553 BOARD ROOM TABLE / "Omega" conference tables come in sizes that seat 12 to 20 persons. Base element is tubular steel in a mirror chrome finish. Rounded-edge tops are available in wood/veneer combinations in oak, walnut, and Carpathian elm burl. / Stendig Inc.

554 CAFE CHAIR / Made of European beech wood in the original 19th century proportions, this bentwood cafe chair has an upholstered seat of foam-cushioned plywood. Available in matte natural or walnut finish, as well as a glossy transparent red aniline. / Stendig Inc.

555 STEEL BASE SOFA / The "Lido" lounge series gets its slender silhouette from its shaped steel armature, which is covered in molded foam and upholstered in velour or woven wool. Two versions are offered: as shown, channel and box tufted with a tight seat construction, and a loose seat model, with fiberfill cushions. / Stendig Inc.

556 LOUNGE SERIES / Multi-layered densities of polyurethane foam and Dacron fiberfill have been placed exactly for greatest seating comfort in the "Lucerne" lounge line. Also, the seat itself pulls out for a deeper lounge position. Upholstery options include Swiss leather or suede, "Natura" leather, or COM. / Stendig Inc.

557 DINING TABLE / The Dialogo table, designed by Afra and Tobia Scarpa, has a transparent glass table surface and outer frame and legs that are finished in black polyester lacquer or walnut. Another version is a flip-top extension table. / B&B America, a division of Stendig International, Inc.

558 WOOD FRAMED SOFA / Butter-block wood with multiple finger joinery on all four radius corners frames the "850-8" lounge series of chair, settee and sofa (shown). Designed for hard-use public areas, small-scale seating also is suitable for private offices. / Hiebert, Inc.

559 HIGH BACK SOFA / This plush looking modular seating is available in many variations to allow for right angles as well as long runs. Its construction conforms to California Fire Retardancy regulations. Upholstery is leather, suede or fabrics, and COM. / Intrex, Inc.

560 LOUNGE SEATING / Serpentine curves can be created by using a combination of wedge modules from this series 900 modular lounge seating. A high-density foam is used, and is suggested for public areas or in health care facilities. / Hiebert Inc.

561 DRAFTING COMPONENTS / An adjustable angle drafting/engineering work surface is available for use with any of five different "Upholstered Panel System" heights. Tables measure 60- by 44- or 60- by 32-in., and can be installed at either desk or drafting height. Tops are finished in mushroom laminate; below work surface storage units can be placed under the drafting desks. / IG Furniture, A div. of Burlington Ind.

562 TABLE DESK / Part of an extensive collection of custom executive furniture, this crescent table desk has a fiddleback olive ash top, which curves into heavy clear acrylic supports. It has one suspended pencil drawer and is available in a variety of precious woods and lacquers. Suggested retail: $5,683. / Vladimir Kagan Designs, Inc.

563 TABLE/DESK / Oval table top is a matched sunburst of parquet pattern Corrilla mahogany veneer, edged with solid mahogany trim. Top cantilevers over a pedestal base of weighted molded ebony polyester. Table measures 72-in. wide by 46-in deep finished in "Polygloss," price is $1,375. / Harvey Probber, Inc.

564 HIGH PERFORMANCE / Designed for optimum acoustical control, "System 2" open offices have fabric-surfaced panels with a NRC of .90 and an STC of 30. Oak finish is used for hard-surface panels and components; integral task/ambient lighting provides visual comfort at lower energy levels. / Conwed Corp.
565 WOOD FURNITURE / "320" series executive desks with cube styling have been added to "Designs in Wood" office furniture. Desks provide to-the-floor storage, adjustable file space, and a wiring grommet inset in the work surface. Optional stainless steel base and trim bands the unit continuously, across pedestal fronts and inside the kneehole space. / Steelcase.

566 DISPLAY SYSTEM / Unicube chrome tubes assemble to form etagères, tables, chairs, displays, habitats and store fixtures. The system, in 5½, 8½, 11½and 2-in. diameters, also includes bent tubes and circles, tube connectors, shelving and lighting. / Unicube Corp.

567 WORK STATIONS / Designscape freestanding panels and hang-on components create an organized environment of semi-private work stations in place of the "bulbpen" office. Acoustical dividers have a NRC of .60; system includes task lighting, power center, storage shelving and work organizers. / Conwed Corp.

568 CUBE DESK / Book-matched Carpathian elm burl veneer is used for this faceted cube desk and credenza, with mirror aluminum trim on the corner angles. Surfaces are finished in PVC or "Polyglass" lacquer. Desk as shown is priced at $4,990. / Harvey Probber Inc.

569 LAMINATED RED OAK / Full pedestal and high profile desks and credenzas in natural red oak or walnut, with a hand-rubbed fire resistant polyester finish. Coordinated seating is also offered in the Skagen line. / R-Way Furniture Co.

570 TABLE SERIES / The sleek sculptured lines of "The Resin Group" are created by molding liquid polyester resin over structural cores. Tops on the cylindrical pedestals may be round or square with two-inch, bullnose edges; resin colors are high gloss or satin finish. / Metropolitan Furniture Corp.

571 CAMPAIGN DESK / Wide-set pedestal bases and recessed brass drawer pulls distinguish this campaign-style elm burl desk. Top is 72-in. wide; desk has seven working drawers and one extra-large file unit. / Smith & Watson.

572 DECORATIVE DISPLAY / Each unit of this triple cabinet has four glass shelves and two lights. Brass-grilled glass is used on three sides; wood frame is shown here in a pale antique finish. Triple unit measures 12'-1 by 18'-by 87-in. high. / John Widdicomb Co.

573 CONFERENCE TABLE / Offered in rosewood or black oak, the "Bruneing" table has two drawer elements and a brushed aluminum foot base and belt edge. Table measures 83-in. wide by 39½-in. deep by 28¾-in. high. High and low-back versions of the "Consen-so" executive chair are illustrated. / Turner Ltd.

574 COMPLETE OFFICE / The "Interpanel Acoustic" system dividers are faced in oak veneer with radius oak end posts; interior surfaces are fabric. Fiberglass core panels have a NRC of over .85. The system also includes wing desk unit, ambient and task fixtures, files and chairs. / Hiebert Inc.

575 BURL CONSOLE / With an unusual antique bronze frame, this storage and display console can be made almost any length with many combinations of drawers and door cabinets. / John Stuart, Inc.

576 WORK STATIONS / Desks, work stations, and wall units are custom-designed from standard components, including lighting. Melamine, wood veneer, satin aluminum and bronze glass finishes are available; all parts are easy to assemble and relocate as necessary. / Discovery Systems.

*In 1980 Sweet's Catalog File (s): General Building (GB); Light Residential Construction (LRC); Engineering (E); Interiors (I); Industrial Construction & Renovation (ICR).
577 CONFERENCE TABLE / The "Ginkgo Biloba" table sits squarely on seam-free T- or X-bases, available in polished aluminum or any of 16 thermoset colors. Top, in veneer or laminate, may have a 2-in. convex edge; six shapes and 35 sizes are offered. / Vecta Contract, Inc.

578 CONTRACT TABLE / This version of Gunter Eberle’s "Ginkgo Biloba" table has an orange plastic laminate top with a 2-in. self edge. The X-shape tubular base is finished in orange thermoset epoxy. / Vecta Contract, Inc.

579 OFFICE FURNITURE / Desks, credenzas and breakfronts of traditional design are offered in hand-rubbed walnut or mahogany finishes. Desks are available with straight grained wood or inlaid leather tops. / Wood Design, Inc.

580 KD BUTCHER BLOCK / Economically-priced solid wood butcher block furniture is offered knocked down, ready for easy re-assembly in home, apartment or office. Table shown is 3-in. thick; other pieces include dining tables, bookcases and desks. / Newwood Products of Oregon.

581 HUTCH BOOKCASE / Also part of the "Interpanel" line, this 72-in.-high credenza with hutch bookcase has a fully finished back: units can be used as room dividers. Fully adjustable shelving has metal bookstops routed in, to support books in any position. Design elements such as upright panels are available square, as shown, or with radius corners. / Heibert Inc.

582 CONFERENCE/DINING / Tops of the Bob Becker-designed "NQ" series tables are "not quite" round or oval, with their dimensional variations emphasized by the bullnose edge in a contrasting wood. Several wood species are available in the pedestal-mounted series, including mahogany, walnut, rosewood and elm burl. / Heli- kon Furniture.

583 COORDINATED LINE / The high-style, functional components of "Design Option III" offices integrate with this maker's other full-height panel systems. Accessories from swing arm lamps to coat hangers are included in the line of variable-height walls, work surfaces, storage units, electrical distribution and management devices. / The E. F. Hauserman Co.

584 RESTAURANT TABLE / Both the scored, anodized aluminum base and natural-look butcher block top of the "Discus" table carry a two-year guarantee. Top options include plastic laminate, solid oak or maple butcher block, and Carrara marble; base diameters may be 18", 25", or 33-in. / ICF, Inc.

585 LOFT BED / This company's newest addition to their Roommate Series of dormitory furniture is an elevated bed underneath which is a desk and storage units. Fluorescent light and oak ladder are optional features. / Adden Furniture Inc.

586 TWO-SEAT SOFA / The solid oak wood frame has rounded corners and bullnosed edges. The Irish wool upholstery and backs are removable for easy cleaning. The unit is also available in one-, three- and four-seat versions. / Adden Furniture Inc.

587 CONFERENCE TABLE / A handsome contemporary conference table is accentuated by mirror chrome or antique bronze base. The Circa 90 Executive Series is oak with matched oak veneers. Designed by Carlos Lopez-Benitez. / Monarch Furniture.

588 SPECIAL LEG BASE / A set of four table legs are available on which any wood top can be attached, to create a table in any size and for any purpose. The legs are 3-in. in diameter and are made in steel, finished in either black or white stove-enamel or in polished chrome. The top plate and foot is always in black "Hostiform" plastic, and the foot adjusts to compensate for uneven flooring. / The Ironmonger.
WOOD FURNITURE / The 8700 series of wood office furniture has shaped contours of walnut solid surfaces blended with walnut veneers. All desks have an off-the-floor front panel design. / Myrtle Desk Co.

DUAL-PEDESTAL DESK / Meticulously detailed woods with mitered corners are used in the "Omega" executive desks, offered in three- and four-drawer pedestal versions. Wood species include oil-finished oak, walnut, teak, brown oak or pao ferro. Three size choices: 32- by 66-in.; 32- by 72-in.; and 36- by 76-in., all 29½-in. high. / Stendig Inc.

RUGS

Wilton Weave / The "Meridian" pattern of all-wool loop pile is available in rugs with a 6- or 9-in. border in sizes from 4- by 6-ft to 12- by 16-ft. Natural White is carried in stock; custom colors may be ordered. / The Scott Group, Selaco Div.

NATURAL WOOL / The basic design of "Modena" is a series of parallel diagonal lines. Within this pattern, however, the wool yarn is allowed to fall into its own natural irregularities in the course of weaving. / V'Soske.

SEATING

OFFICE SEATING / The "Logano" chair has a hand polished tubular steel frame upholstered in leather or fabric. Sled base, swivel, and swivel-tilt models are available, all 30-in. high. / Brayton International Collection.

TENSION-FABRIC CHAIRS / The "Archizoom" office seating system is now available in a separate "Kevi" nylon version. The abrasion resistant fabric is stretched over an arm or armless tubular steel frame in chrome or black epoxy finish. Integral seat cushion provides support at the knees. Base options: sled, five-star or circular pedestal. / Atelier International, Ltd.

ITALIAN SEATING / A gas spring height adjustment and five-star pedestal base are now standard features on the "Tecno Collection" office seating. Upholstery may be fabric, vinyl, suedes or leathers with removable seat and back pads in tufted or channel styling. / Atelier International, Ltd.

COMMERCIAL SEATING / Careful design considerations are said to have improved the comfort and convenience of "Modus" line of institutional and commercial office seating without increasing the over-all price. Molded of anti-static nylon, chairs have a five-star base and gas spring height adjustment. / Atelier International, Ltd.

AUDITORIUM SEATING / The "Axis 7000" is basically a ganged armchair with either one or two arms between the self-rising seats. The armrest houses a simple writing tablet and/or translation equipment. Polyurethane cushioning and Nylatron or wool/nylon upholstery meet California and Boston flammability standards. Price per seating unit: about $250. / Castelli Furniture Inc.

HANGING SETTEE / Shown here installed on the Danish liner "Dania Anglia," model "181" seating is mounted on wall rails. The space-saving settee is available with one arm rest, or with upholstered rests on both sides. / Cado Royal System.

OFFICE SEATING / The 15 models in the "Focus I" line provide ergonomic postural support in chairs with oak bases. Executive chairs may have either shaped laminate oak or upholstered arms. / Kimball Office Furniture Company.
601 FOLDING CHAIR / A streamlined design of molded copolyester mounted on a chrome-finished steel frame, the "Skyline" chair is suitable for both contract and residential use. Tip-proof chair folds to a 1/2-in. width for storage. / Howe Furniture Corp.

602 SWIVEL CHAIR / Scaled for use in confined office areas, the "Aspen" chair is molded entirely of Proberon foam with synthetic down around a welded steel frame. Version shown is fully upholstered with plywood arms; fabric options include COM, vinyl and leather. / Harvey Proober Inc.

603 SIDE CHAIR / Upholstered in fabrics by designer Jack Lenor Larsen, the "dePolo" chair for home or office use is built on a small-scale sculptured wood frame. Back height is about 32-inches. / Dunbar.

604 BACK SUPPORT CHAIR / The ErgoSeal office chair, from Wilde & Spieth of West Germany, features a back support mechanism that provides continual back support; pneumatic height adjustment; and a tip-proof, five-point caster base. Office, drafting, and health care models are available. / Carretta Corp.

605 CLUSTER SEATING / “Cebra” units seat from two to eight persons in self-centering, swivel spring return molded chairs. Chair/table combinations come in three styles for flexible installation: freestanding island; freestanding wall style; and wall-mounted. / Plymold Booths, Div. Foldcraft Co., GB, IR, I.C.C.*

606 HEALTH CARE SEATING / The "Steinberger Elm" series for medical facilities now includes a lounge chair, a two- and three-seater, and an occasional table. Exposed fasteners in the solid elm frames facilitate upholstery replacement. / Thonet Industries, Inc.

607 SOLID WOOD CHAIR / Developed by Vignelli Designs, the "Acorn" chair has a solid turned wood frame constructed with precise joinery work. The chair is offered in three woods and five finishes; seat options include leather or natural linen sling; cane; or foam covered in fabric. / Sunar.

608 SIDE CHAIR / Another Vignelli design, the "Rotonda" chair, is a fabric-covered tubular shape constructed of high-resiliency foam on a steel frame. Side chair version is 32-in. high; a "Rotonda" lounge chair measures 29-in. high. / Sunar.

609 GARDEN CHAISE / The “Berkum” recliner is constructed from tubular steel and wire, coated in a durable white or dark green synthetic finish. / Architectural Complements.

610 LOUNGE FURNITURE / “Circolo” seating—sofa, settle, and lounge chair—has an architecturally formal, yet comfortable appearance; the enclosing wood frame is deeply upholstered and cushioned with 10 in. of foam. A Vignelli design, the chair shown measures 26-in. high by 48-in. wide. / Sunar.

611 ROW SEATING / Tandem units for lounges and waiting rooms and adjustable chairs for office use have easily maintained upholstered seats. Components are fastened in place by one screw, and are quickly removed for cleaning or replacement. / KCF, Incorporated.

612 STEEL STACK CHAIR / David Rowland has designed the Sof-Tech chair using plastic-coated sinuous springs as exposed seat and back sections. The mesh-like springs provide flexible, ventilated seating. Options include a ganging version of the chair and zip-off upholstery sleeves for seat and back. / Thonet Industries, Inc.
613 MOLDED PLY CHAIRS / The basic arm and side chair versions of this molded ply line have seats, backs and arm/leg units of oak veneer molded plywood. Exposed fasteners facilitate replacement of components; a metal-linking device is available for multiple seating arrangements. / Thonet Industries, Inc.

614 CONTRACT SEATING / The "Multiple Choice" collection, by designer Hans Kriels, is composed of five basic units: one seat, two seats, and two tables, which may be ordered in any wood. A reverse seating unit with one table is pictured. / Helikon Furniture Co., Inc.

615 LUXURIOUS TWO-SEAT CHAIR / The Panda 2401-2403 series, designed by A. Rascaroli, is offered in an armchair, 2-seat sofa (shown) and a 3-seat sofa. The structure is wood and metal; the upholstery is available in fabrics, leathers and suedes. / The Pace Collection, Inc.

616 CONTRACT CHAIR / A stainless steel frame with no-sag springs and helicals, welded into a seamless integral unit supports the "Chia Two" chair measurements: 33-in. high; 26-in. deep; 21½-in. wide. / Brayton Industries.

617 PATIENT CHAIR / "H" series chairs provide a complete program for a variety of seating applications within health care facilities, including lounge seating and tables, ottoman and guest chairs. Designed for ease of maintenance as well as proper support and comfort, the patient chair has a space between back and seat for cleaning. / The Gunlocke Co., Inc.

618 PULL-UP CHAIR / An addition to the executive office collection by designer Giovanni Carini, this fully upholstered armchair has a sled base of self-skin urethane foam. The companion table has the same type of sled base, with a top of ashwood veneer, in natural or ebony finish. / Atelier International Ltd.

619 CORBUSIER SEATING / Original Corbusier designs, some never before produced, are available under license from Cassina of Italy, along with classic chairs in new color options. Included are two padded stools, a dining chair with a tubular padded back, and the Chaise Longue de Régate à réglage à continu, offered with chrome, matte black, or two-color urethane finished base. / Atelier International, Ltd.

620 PARK CHAIR / For outdoor and indoor use, this steel stacking chair, designed by Wirth, was selected for the Centre Beaubourg, Paris. The tubular steel and wire is coated with white or dark green abrasion- and rust-resistant finish. / Architectural Complements.

621 ARM CHAIR / Tubular steel frame of the "Pilster" chair reads as one continuous flowing tube; upholstered seat and back units allow for easy cleaning or replacement. Frames are available in polished chrome or fused polyester powder coating. / Metropolitan Furniture Corp.

622 GANNING STACK CHAIR / Hardwood-framed "Straz" chairs have interlocking tabs molded into polypropylene seats to simplify ganging. Large compound curved seats and backs offer the option of foam cushioning in wool or nylon upholstery. Arm chair, armless, and bench seat models all stack for storage. / Knueger.

623 SECTIONAL SEATING / Flexible "441" units have arms that can be added or removed on location; arms may be used on both sides of each seat in a sectional group, even if the seat adjoins an attached table. The full line is 92 units, including two-, three- and four-seat settees and benches, tables, and freestanding chairs. / Steelcase Inc.

624 MONOCHROMATIC / Color options for this maker's "430," "454," and "441" chair lines now include single-color choices: chair bases, upholstery materials, frame finishes and outer shells may be ordered in neutral tans and gray. / Steelcase Inc.
625 HIGH TRAFFIC SEATING / Basic "570" and "571" lounge style consists of an upholstered seating unit suspended between two arm panels. Back and reversible seat cushions attach to the chair with Velcro strips; all fabric components are easy to remove for repair or replacement. / Metropolitan Furniture Corp.

626 FULL LINE SEATING / This seating system includes eleven chairs for any office work requirement. Each individual chair allows a five-way adjustment of cushions, back support, height and tilt to suit each user’s own comfort needs. / Litton Business Furniture.

627 CLUB GROUP / Generously-proportioned cushions are set into a solid oak chassis in the "140" club chair. Chair is 37"-in. wide; two- and three-seat sofas are also available, all with solid oak end panels. / Tuohy Furniture Corp.

628 DUAL PURPOSE / This oak-framed sofa designed by Steenberger converts into a Hide-A-Bed, one of a series of versatile furniture. Available with wide channeled or non-channeled upholstery detail, the group includes two sizes of sofa, a chair, and a loveseat. / Thonet.

629 STACKING CHAIR / Constructed with a ¼-in-dia polished steel frame and foam-covered molded plywood seat/back, the "Linear" molded plywood seat/back, the "Linear" chair is offered in arm and side versions. A linking device holds chairs in place when lined up side-by-side; options include row and seat numbers; storage pockets; and tablet arm (armchair only). / Stendig Inc.

630 POLYURETHANE FURNITURE / Self-skin polyurethane foam on all arms and base parts is combined with ergonomic research to produce this chair system. The soft-skin feature protects the user's shoes and ankles and will not damage desks. The "Bar-bar" collection has secretarial through executive versions. / Atelier Internationale, Limited.

631 CAPTAIN'S CHAIR / A special version of the captain's chair, designed by Arthur Umanoff, features exposed oak arm caps, which are available in natural, medium or dark oak. The hardwood base is recessed and painted black. / Madison Furniture Industries.

632 CURVACEOUS SEATING / Described by the manufacturer as "the old park bench updated for today," this modular seating can be attached in groups of threes and fours. The "Park Lane" line has a bent plywood frame, upholstered in fabric. / Monarch Furniture.

633 WICKER STOOL / This swivel wicker bar stool features natural wicker, hand woven over a tubular frame with a polished chrome base. The seat and back are upholstered foam pads, with a tufted back. / Shelby Williams Industries, Inc.

634 INSULATED SHUTTERS / Constructed with a solid wood frame and birch plywood panels completely enclosing a ¼-in. polyurethane core, interior mounted InsulShutters block conduction, convection and radiation heat loss from windows and sliding doors. Retail costs range up to $8.40 per sq ft. / InsulShutter, Inc.

635 FABRIC VERTICALS / Forty-two fabrics in five texture groups are offered in the Flexilam line of vertical window treatments. Easy-to-clean fabric panels are 5"- or 3½-in. wide; the system permits equidistant spacing of panels regardless of window size, eliminating bunching at either side. / Hunter Douglas, Inc.

636 DRAPERY POCKET / An unvented center strip accommodates drapery tracks and retains venting efficiency. It is made of steel primed on surfaces with baked on Alkyd exposed surfaces. / Fry Reglet Corp.
EQUIPMENT: UCI 11

3125 DOCK LIFTS / "The Disappearing Dock" shows where dock lifts can be most effectively used, and gives cost comparisons between lifts and conventional raised concrete docks. / Advance Lifts, Inc. GB, ICR

3126 STEEL OPERABLE WALLS / The Acousti-Seal movable partition is described in a product booklet. Performance data, operating and storage methods, and fire safety information is given in the literature. / Modernfold/An American-Standard Co.

3127 FOOD SERVICE / Mobile equipment for institutional and restaurant food service is cataloged in a 48-page price guide. Products include buffet servers, food transport carts and hot, cold and proofing storage cabinets, conveyors and compactors. / Precision Metal Products, Inc.

3128 NUCLEAR QUALIFICATION / Methods and facilities for environmental qualification of nuclear safety related equipment to IEEE Standard 323-1974 are described in a 4-page brochure. / Wyle Laboratories.

3129 LABORATORY SAFETY / Comprehensive manual covers accident prevention, first aid, fires and firefighting, handling toxic fumes, working with gases and acids, and disposal techniques. OSHA lab safety requirements are outlined. Safety products are catalogued, including personal protection equipment, smoke alarms, eye wash fountains, etc. / Fisher Scientific Co.

3130 DOCK SHEDS / Product data brochure shows how "Series 400 Weather Guard" sheds provide an effective seal against docked trucks and permit full access to the truck body. / Frommelt Industries, Inc.

FURNISHINGS: UCI 12

3131 STEEL DESKS / Literature describes over 60 different single-and double-pedestal desks, credenzas, tops and component cabinetry that make up the "5200 Series" office line. The expanded collection includes 20-in.-deep desk-height returns, free-standing storage credenzas, convertible cabinets and laminate tops. / Steelcase Inc.

3132 DRAWER SLIDE / Selector guide lists 26 types of drawer slides, giving side space requirements, load capacity, sample applications and available sizes. / Grant Hardware Co. GB

3133 COMPUTER FURNITURE / The "ES" line is furniture designed especially to facilitate the integration of the mini computer and other portable types of electronic information processing equipment into the office environment. Product brochure describes this "Electronic Support Furniture." / GF Business Equipment, Inc.

3134 FEASIBILITY STUDIES / Folder explains services offered to design professionals in establishing the space and budget requirements for office facilities. Working from building plans and job descriptions, feasibility study report includes photographs, plans and dimensions of suggested work stations for each employee category. / Herman Miller, Inc.

3135 SOUND DIVIDERS / The design versatility of open office sound dividers is explained in a 12-page brochure. The system permits positive locking, an electrical raceway, hang-on capability and two inches of leveling adjustment; technical data and assembly instructions are given. / Owens-Corning Fiberglas Corp.

3136 FIRE-RESISTANT LINERS / Reference source acts as a guide to Vontron interliners and their use in business and institutional furniture. Photos show extensive flammability testing carried out on seating constructed with and without the polymer interliner. / DuPont Co., Eastman's Dept.

3137 POCKET-SIZE CATALOG / A pivot-bound card book enclosed in a swing-open plastic case, the "Book Kasse" format is used as a catalog for this line of furniture, lighting, art and accessories. Each 2 1/2- by 4-in. card contains product data and photographs of contract seating, lounge pieces, armchairs, office systems, lighting, etc. / Atelier International Ltd.

3138 OFFICE FURNITURE / Designed by Bob Becker, "Options System" open office furniture is introduced in a color brochure on these enclosures and storage components. / Helikon Furniture Co., Inc.

SPECIAL CONSTRUCTION: UCI 13

3139 ACOUSTICAL CEILINGS / Sound absorption, flammability, light values and other data on ceilings and interior surfaces are given in a 12-page brochure. Included are acoustic ceiling panels and panels; the "Architecture" series; energy-saving ceilings and wall treatments; and noise barrier batts. / Owens-Corning Fiberglas Corp.

3140 FABRIC STRUCTURES / Permanent architectural fabric structures, both air-supported and tensioned, are described in a 14-page color brochure. Applications range from radomes to convention centers; photos show completed buildings and illustrate each step in the erection of both types of fabric structures. / Birdair Structures, Inc. GB, ICR, E*

3141 PLYWOOD ROOFS / "Build a Better Roof!", a 24-page booklet, outlines the benefits of plywood roof decks, explaining how they cut costs and work with almost any support system used in commercial and industrial construction. Modifications in roof deck design to resist high winds and seismic loading are suggested. / American Plywood Assn.

3142 INTEGRATED CEILINGS / Two aluminum ceilings are covered in a color brochure: the Planar ceiling in indoor and soffit applications, including out-of-square and curved areas; and the Plenum Mask system, which screens mechanical and other equipment while allowing air to circulate and sprinklers to operate. / Alcan Building Products. ICR*

CONVEYING SYSTEM: UCI 14

3143 GRAVITY CONVEYORS / An 8-page brochure explains wheel and roller conveyors, designed for handling loads of up to 110-lb and 350-lb respectively. The Cleaneal aluminum roller conveyor, for light loads such as food trays and components, is featured. / Rapistan, Inc.

3144 PEOPLE MOVERS / Fully illustrated with color photos of recent installations, capabilities brochure describes elevators and escalators for new buildings as well as retrofit applications. / Westinghouse Elevator Co. GB

MECHANICAL: UCI 15

3145 SOLAR CASE STUDIES / Professionals interested in practical applications of active solar energy systems may subscribe free of charge to the "Solar Spectrum" newsletter. Each issue will cover installations of Daystar and other solar products on a project basis, providing information of funding, historical details, design, installation and system performance. / Solar Thermal Systems, Div. Exxon Enterprises Inc.
AIR SUPPORTED STRUCTURES

649 FABRIC STRUCTURES / This permanent fabric structure is claimed to be economical due to minimal maintenance costs and energy saving features while allowing design freedom. / Birdair/Chemfab.

650 FABRIC ROOF / An architectural grade Teflon coated Fiberglas roof, as shown here, demonstrates the prime design characteristic of an unusual, handsome and translucent roof. Its fire resistance is particularly suited for retail and other public buildings. / Birdair Structures, Inc. GB, ICR, F*

651 SPECIAL FABRIC ROOF / The largest air terminal in the world soon to be completed in Jeddah International Airport has a tension fabric roof. For a more complete story of this roof see RECORD, mid-August 1979. / Birdair Structures, Inc. GB, ICR, F*

652 CANOPY SHELTER / Shown as an unusual roof design at the Duval Center in Jacksonville, Florida, this tensioned fabric roof provides a shaded rest area and a stage for outdoor events. / Birdair Structures, Inc. GB, ICR, F*

653 AIR SUPPORTED ROOF / Specifically designed for tennis court facilities, this fabric roof creates an "envelope," providing a totally open recreation area. / Birdair Structures, Inc. GB, ICR, F*

INTEGRATED ASSEMBLIES

654 SPACE FRAME / The "Crystogon" space frame features bronze tinted acrylic panels and bronze anodized aluminum extruded framework. The project shown is the botanic garden in Des Moines. / Temcor. GB*

655 METAL BUILDING SYSTEM / The Triotic structural system produces grids, arches, domes and various other geometrical forms, with which any covering system is compatible. / Butler Manufacturing Co. ICR*

INTEGRATED CEILINGS

656 CEILING GRID / A luminous ceiling grid system includes "Envelume" panels. Logotypes can be displayed in the panels or plain plastic light diffusers can be used in ceilings. / Envel Corporation. GB, I*

657 INTERIOR SYSTEM / An integrated interior building system is composed of wall, ceiling and access floor of interchangeable components and re-connectable mechanical-electrical elements. / Flexten Systems, Inc. GB*
658 INTEGRATED CEILING / These 3-by 3-foot interlocking aluminum panels called "Bold Cell" provide an unbroken sweep that creates an illuminated ceiling pattern. / Neo-Ray Lighting.

659 COFFERS / Classic Sculptured Modules are manufactured from gypsum cement and inorganic reinforced materials. They are furnished with square or round downlights, openings for air diffusers and sound fittings, or can be blank as accent panels. / Neo-Ray Lighting.

660 REFLECTIVE CEILING / The Bright Sheet Planar ceiling system has a mirror-like quality that makes it particularly attractive for retail applications. It is lightweight and needs little maintenance while providing access to utilities. / Alcan Building Products. ICR*

661 CEILING PANELS / Pre-punched eight-foot long carriers and aluminum panels of the Planar Ceiling System allow for special concave and convex applications. / Alcan Building Products. ICR*

662 PREFABRICATED BUILDINGS / Four-inch thick, metal clad panels are available for walls, vertical corners, roofs and floors. They have a high insulating efficiency of R 34. / Bally Case & Cooler, Inc. GB, ICR, E*

663 SPECIAL PURPOSE ROOMS / Sauna Kit / Pre-cut sauna room packages are available in eight standard sizes from 4-by 4- to 8-by 12-ft, and include all equipment and materials to finish the interior of the sauna. / Amerec Corp.

664 TOTAL ENERGY SYSTEMS / POWER CONTROL / The JC/84 is a computer based system that features user programmability, with color CRT, static and dynamic graphics. / Johnson Controls, Inc.

665 POWER MANAGEMENT / The PMF system has a "Power Monitor Control" that regulates peak demand and total power usage. It features "Demand Limiting" controlling electrical loads, and "Cycle off," controlling total power usage by shutting down building systems for periods of time. / Barber-Colman Co.

666 FACILITIES MANAGEMENT / The Econ VI Facilities Management System is utilized in this Kansas City hospital. The computerized and centralized control system provides communication with mechanical and electrical controls and humidity monitoring. / Barber-Colman Co.

667 BUILDING AUTOMATION / This System 600 offers a full range of management and monitoring functions, with digital technology, Fortran programming and color graphic CRT for new and retrofit applications. / MCC Powers.

668 DIGITAL MANAGEMENT / Using fully digital transmission, the DMS 2400-3 System provides computerized automation that ranges from basic monitoring to fully programmed management of all building functions including fire and security protection. / Robertshaw Controls Co., Control Systems Division.

669 COMPUTER MANAGEMENT / The S170/80 Energy Management System is a micro-computer based system that automatically controls building operations without a full-time operator. It includes an automatic scan of alarms, equipment start/stop and runtime totalization. / MCC Powers.

How to get a round ceiling through a square client.

Talk sense to him. Donn Paraline linear metal ceiling system is a sensible, affordable way to turn a workaday building into a showcase. The dramatic, flowing design possibilities of Paraline are limited only by your imagination.

Yet for all its visual impact, even your most skeptical client will see Paraline for the very practical solution it is. And — it's the only linear metal ceiling that's fire-rated!

Paraline adds flexibility to lighting and air return design while allowing easy access to the service area above. It's easy to install. Easy to maintain. Paraline is available in steel or aluminum with a wide variety of wipe-clean standard color finishes, chrome-like polished aluminum or nearly any custom finish. It's also available in a fire-rated version for nearly any application you can conceive. It's even available with an NRC sound control characteristic up to .90.

Ask your Donn representative for full details. Call us toll-free. Or write us. Donn makes access floors. Donn makes wall systems. And Donn makes ceiling systems. But most of all, Donn makes sense.

Paraline now available fire-rated!

Paraline Ceilings

CONVEYERS & CHUTES

682 VERTICAL CONVEYER / Record-lift is an automated, continuous chain selective vertical conveyor that is designed to carry mail, files, records, books and supplies in high-rise buildings, libraries and hospitals. Pre-addressed trays, moving at speeds up to 12 per minute, may be received by or sent from floor stations. / MCC Powers-Transitube.

683 DISTRIBUTION SYSTEM / "Tele-lift" is a system of aluminum track and switches designed for installation within the mechanical and electrical system and equipment spaces that are an integral part of structures. New narrow, tall containers operate on electric "cars." / The Mosler Safe Co. GB*

ELEVATORS

684 ELEVATOR RETURN / Rechargeable battery-operated power unit provides emergency return for low-rise elevators during power failures. Automatically activated by loss of power, it causes the car to descend to the lobby landing at a normal rate of speed. / Otis Elevator Co.

685 PORTABLE CRANES / This crane is portable, fully retractable and can be truck-mounted, and is capable of medium- to heavy-duty lifting applications. It provides 9 to 27 feet of working height and has a rated capacity to 4,000 lb on a 1/2-ton pickup. / Bantam Hoist, Inc. GB, LCR*

686 HAND HOIST / This high-capacity portable hand hoist combines durability and light weight. Loads up to 6 tons can be lifted. It has an aluminum alloy frame with impact-resistant, Lexan resin end covers over the gears and hand wheel. / Acco Industries, Host & Crane Division.

687 CHAIN HOIST / Extra lifting strength is offered in the Lodestar heavy-weight chain hoist line, with units of 2', 3', 5', and 6-ton capacities. The Hoistaloy chain used in the "heavy-weight" will not twist, kink or jam the hoist. / CM Hoist, div. of Columbus McKinnon Corp.

688 HYDRAULIC STACKERS / Loads up to 1,000 lb can be handled with this Hand Hydraulic Stacker series H. Standard features include a rugged steel plate chassis, dual lifting chains and fixed forks (that nest directly over the outriggers). / Crown.

689 FLYING PLATFORM / This airborne platform, used as a fire-fighting device in Chicago as shown, is suspended from a helicopter and can deliver firemen to and from upper floors of a high-rise building. It can also be used to reach inaccessible spots because of adverse terrain. / McDonnell Douglas Corp.

PNEUMATIC TUBE SYSTEMS

690 COMPUTER SYSTEM / This material handling system (available in 4- or 6-in. tube size) can move papers and records within suggested institutional, commercial or industrial buildings. "Trans-Logic" is computer-controlled, and additional stations can be added by updating the computer program. / MCC Powers-Transitube.
Montgomery Moves People at the Detroit Science Center

This escalator, a thrill in light and motion, is part of the Montgomery-built system which moves people at the new Detroit Science Center. The system includes another similar escalator and a giant elevator that can hold two bus loads of children — that's 140 — or 21,000 pounds. Beautifully and functionally designed for fast, efficient movement of people, these Montgomery escalators and elevators were specified to compliment the Center's unique architectural concept. Montgomery offers total capability in design, production, installation and maintenance of elevator and escalator systems, to assure uninterrupted service and long equipment life.

Circle 1057 on inquiry card
AIR DISTRIBUTION EQUIPMENT

703 MOUNTED FAN UNIT / The TriFan is a combination supply and exhaust fan unit with fans mounted. There is only one roof opening necessary and there is usually shorter supply and exhaust ductwork required. / Econovent Systems, Inc.

704 VARIABLE AIR UNITS / An air valve with only one moving part provides torque-free damper operation for the expanded VarTrane line of variable air volume equipment. Control options include system-powered (pneumatic), pneumatic and electric versions. / The Trane Co.

705 AXIAL FAN / A controllable-pitch axial fan is newly available for the company's Weathermaker central station air handlers. The product is claimed to help control noise and is of a convenient size to minimize design problems. / Machinery & Systems Division, Carrier Corp.

706 CENTRAL AIR STATION / The Weathermaker modular central station air handling unit comes in 13 new indoor units; and 13 Rooftite units, designed for outdoor, curb-mounted, rooftop applications. Capacities range from 2,300 to 63,000 cfm. / Machinery & Systems Division, Carrier Corp.

707 PACKAGE A/C, HEAT PUMPS / Two packaged unit lines offer all-electric operation and a large wrap-around outdoor coil with a powerful outdoor fan for maximum heat transfer. An outdoor coil removes heat and humidity from supply air during cooling and allows for optimum heat transfer. / Lennox Industries Inc.

708 CONDENSING UNITS / Designed as a residential split system air conditioning condensing unit, the HS13 Landmark III produces seasonal energy efficiency ratios of up to 11.7. The unit is available in 2.5-, 3- and 3.5-ton capacities. / Lennox Industries Inc.

709 DUST COLLECTOR / A six-module fabric filter fly/ash reverse dust collector removes fly ash particulate from the exhaust gas leaving a coal-fired heating plant. It cleans fabric bags with a flush of recycled cleaned air. / Combustion Engineering, Inc.

710 FIRE PROTECTION EQUIPMENT

711 SMOKE DETECTOR / PhotoBeta is a newly introduced smoke detector that has the option of three different detectors with a common, interchangeable base. The "Sensmoke" is for Beta ionization detection; the "Pyro/Smoke" is for photoelectric detection; and the "PhotoBeta" with sensors linked in two different configurations. / Gamewell Corp.
712 ESCAPE HARNESS / Constructed of fire-retardant materials, this personal safety harness acts as an emergency exit device. Anchored to a window jam or in masonry, the one-piece harness slips over the head and under the arms; hand pressure controls rate of descent along the rope. Unconscious and invalid persons may be lowered easily. / B-K Products, Inc.

713 FIRE HOSE / All-synthetic “Rack ‘N Reel 500” emergency fire hose is fully lined, constructed to 500 psi test. Hose may be hydrostatically tested and re-racked wet or dry. UL- and FM-listed for rack storage, the hose is immune to mildew and rot. / National Fire Hose Corp.

714 SPRINKLER PIPE / The Allied Light Wall Sprinkler Pipe is a Schedule 10 sprinkler pipe, which meets the requirements for the installation of sprinkler systems in NFPA No. 13. It is claimed to be as much as 30 per cent lighter in weight than Schedule 40 pipe and is manufactured from sheet steel which is cold rolled in a continuous process into pipe. / Allied Tube & Conduit Corp.

715 DOOR CLOSER / The Smok-Chek “Combo Quad” smoke actuated door closer is now UL-listed for limited open area smoke detection. It is a door-frame-mounted detector which can also serve to monitor for smoke throughout the room, eliminating the need for an additional ceiling-mounted detector. / Rixon-Warner, Inc. GB

716 WATERFLOW INDICATOR / The “Flo-cator” model FC is an electric paddle-flow device to signal the travel of water through fire protection system piping. Designed for use on wet-pipe systems, it features an electronic retard adjustable from 0 to 90 seconds. There is no mechanical connection between the vane and electronic components to ensure a watertight seal. / Sprinkler Manufacturing Division, Grumau Company Inc.

717 FIRE-PROOFING TAPE / An arc and fire-proofing tape made of an unsupported elastomer (thus making it flexible) expands in fire to form an insulating firewall between the flame and the cable in which it has been wrapped. / 3M Electro-Products Division.

718 ALARM VALVE / A lightweight Alarm Valve has been introduced that is an external by-pass. The divided seat ring alarm check valve is designed for either vertical or horizontal installation in wet pipe sprinkler systems. / Grinnell Fire Protection Systems Co., Inc. GB, ICR, E

719 GAS HEATING SYSTEM / Additional burner sizes have been added to the line of ceiling hung Co-Ray-Vac heating systems. Four different sizes have outputs of 20, 40, 60 or 80,000 Btu. / Roberts-Gordon Appliance Corp.

HEAT EXCHANGERS

720 WATER HEATING ELEMENT / A built-in electric heating element provides continuous hot water from cold water taps. The temperature is regulated by the volume of water selected, and the unit works on either 220V or 110V electrical currents. / Orlando Enterprises. Manufactured by Productos Electricos Corona LTDA in Brazil.

721 SPA HEATER / The electric “Spa-Pak” consists of heavy commercial grade stainless steel low watt density resistance elements installed in an all bronze tank. The unit is UL-approved as pool heaters for indoor and outdoor installation. / Raypak, Inc.

722 HEAT PUMP / A residential two-speed heat pump, the HP11 “Legend,” has a low speed for normal, average operation during the year, but the high speed can be used for peak demand periods. / Lennox Industries Inc.

HEAT PUMPS

723 COOLING/HEATING / The “EPCC” series residential electric/gas unit uses a unique Heat Transfer Module for efficient, safe heating with natural gas or LPG fuels. Furnace may be located outdoors. Compressor is designed for reduced internal resistance and low power consumption. / Amana Refrigeration, Inc., URC

HVAC TERMINAL EQUIPMENT
724** FAN COIL AC** / Design improvements and larger sizes are available in Hi-Line Seasonmaker fan coil air conditioning units for multi-story construction. Factory-assembled hvac terminals are said to offer substantial savings in installation costs and energy usage. / McQuay Group, McQuay-Perlex Inc.

725** AIR HANDLING SYSTEMS** / The Klimatic King Series 70 rooftop air handling unit provides a combination of cooling, heating, filtration, dehumidification, ventilation and pressurization. It is recommended to be especially adaptable to all food processing, pharmaceutical, hospital and clean-room requirements. / The King Company.

726** FAN CONVECTORS** / The new company line of fan convector includes five versatile models for every room. The unit shown is claimed to burn less than a 100-Watt bulb. The unit also allows room temperatures to be controlled independently. / Myson Incorporated.

---

**MECHANICAL CONTROLS**

727** ENTHALPY CONTROL SYSTEM** / Shown is one element, the transmitter, in the pneumatic enthalpy control system. A differential logic module selectively adjusts the outdoor and return air dampers. / Barber-Coleman Co.

728** ZONE CONTROL VALVES** / A line of non-electric zone valves, called ThermoMare, provides precise individual room temperature control in existing or new hydronic and two pipe low-pressure steam baseboard, convector and radiator installations. / Bell & Gossett ITT (a unit of the Fluid Handling Division, International Telephone & Telegraph Corp.).

---

**PIPING & SPECIALTIES**

729** GASKET FITTINGS** / All sizes of Lasco-O-Seal/PVC gasket pressure fitting now meet Class 200 requirements for water service applications. Requiring no adhesives in field installation, the fittings comply with ASTM regulations. / Lasco Industries.

---

730** STEAM TRAPS** / The stainless steel Thermoclick trap has only one moving part and has a replaceable seat and disc. The trap's disc includes a controlled micro bleed slot to prevent air binding and the trap is freeze resistant. / Hoffman ITT (a unit of the Fluid Handling Division, International Telephone and Telegraph Corp.).

731** PLUMBING FIXTURES & TRIM**

732** PEDESTAL LAVATORY** / Called "Chablis," this lavatory is made of vitreous china and designed to add a continental flair to baths. The unit has a rounded basin and corners, an anti-splash rim and concealed wall fasteners give additional stability. / Kohler Company.

733** BARRIER-FREE COOLER** / Extending 20½ in. from the wall to permit wheelchair user access, "Model 1106BP" water fountain is all stainless steel, with lever handles located on both sides. Unit price is about $340.00. / Haws Drinking Faucet Co. E*.

734** SHOWER ENCLOSERS** / Tub-Master "B" series doors are rigid by-passing units that also fold by unhooking the towel bars, allowing both doors to fold into small stacks at either side for complete tub/shower access. / Tub-Master Corp.

735** HAND-CARVED PEDESTAL** / The hand-carved pedestal washbason of marble is one of several new bath fixtures offered by Sherle Wagner. It has a specially designed polished chrome faucet set. / Sherle Wagner International, Inc.
BATH FIXTURES / Designed by Italian industrial designer Paolo Tilche, the pedestal lavatory and floor-mounted toilet of the "Tilche Suite" combine curves and angles for classic, simple bath fixtures. / American-Stan- 
dard. LRC.

WATER-SAVER / Low profile and an elongated bowl provide comfort and low maintenance in the "Lexington" toilet; water conservation design requires only 3.5 gallons of water per flush. Toilet is available in most of this maker's standard and premium fixture colors. / American-Stan- 
dard. LRC.

EXTRA-SIZE TUB / The "Fontaine" bath is a full six feet long, with built-in lumber support. The enameled cast-iron tub measures 36-in. wide by 18-in. deep; slip-resistant bottom and chrome-plated grab bars are standard. / American-Stan- 
dard. LRC.

LOW FLUSH TOILET / The Microphor tankless toilet needs only two quarts of water for an air operated 12-second flush cycle. Vitreous china toilets are floor-mounted with either rear or downward discharge; units have major plumbing code approval. / Microphor, Inc.

PLUMBING FIXTURES / Shown is the S-4121 Easy-Push cast brass single metering latory faucet. It has a 33/4-in. code type spout with Vand-rator. It also has a concealed cycle adjustment that works without shutting off the water supply. / Speakman Co.

SHOWER SET / This bath-tub/shower wall-mounted plumbing fixture is manufactured in England by Czech & Speake, Ltd. The unit is hand-finished, and is made of solid brass and available in finishes of polished brass or polished chrome, with polished gold as special order. / Manufactured by Czech & Speake, Ltd.; distributed by Fearless Faucets.

Faucet Set / These bathroom fittings are available in polished brass, polished chrome, and polished gold; available on special order. This set is called the Edwardian Range, model no. 6450. / Manufactured by Czech & Speake Ltd., distributed by Fearless Faucets.

BAR/PANTRY SET / The goose-neck bar/pantry fittings are of solid brass, and are available in finishes of polished chrome or in baked enamel (white, navy blue, bright red, dark brown, beige and black). / Manufactured by Rubinetterie Zazzeri, distributed by Fearless Faucets.

WOOD FAUCET / The Alterna wood faucet line is a handsome combina- 
tion of Cocobolo or Zebrawood handle tops and 24 karat gold, or brushed or polished chrome fittings / Kohler Co.

METERING FAUCET / Designed specifically for public restrooms, the push-button model 90-75 is timed to shut-off from 5 to 15 seconds, limiting flow of hot water to maximum of .45 gpm. / Bradley Corp. GB, ICR, E.

SHOWER IN THE ROUND / A cylindrical see-through shower cabin is made of metacrylic, and has polished chrome trim and fittings. The "Serie 2001" has compartments for bathtub accessories, mirror, thermostatic mixer controls, hand spray and cooled towel holders and warmer (that also serves as a hot water pipe); towels and bath accessories stay dry behind a special clear sliding panel. / Distributed by Hastings II Bagno Collection. GB, I.

SPECIAL BATH UNIT / The "Serie 2001" bath unit is available as a single item or can be used in conjunction with the "shower in the round." Made of reinforced fiberglass metacrylic, with polished chrome trim and fittings, the bath is also available with an 8-jet whirlpool system. Colors are beige, red, brown, black, white or blue. / Distributed by Hastings II Bagno Collection. GB, I.
748 MULTI-PURPOSE BATH UNIT / Called "Lavandone," this bathroom unit is of rustproof polyurethane. It includes a basin, counter, open compartments, medicine cabinet with sliding mirror, and special fittings of spray head, linen hamper, medium-wave radio and neon light diffuser. / Hastings II Bagno Collection.

749 BATH IN THE ROUND / The "Serie 2001" combination bath/shower in the round is a cylindrical see-through shower cabin atop a circular tub, with optional 8-jet whirlpool. / Hastings Tile & II Bagno Collection. GB"*

750 SEE THROUGH SHOWER / "Antares" square shower unit incorporates 2 clear sides, non-slip floor, contoured seat, a mono-command hand mixer, folding door and compartments for accessories. The clear panels and door are metacrylic, and the other two walls are solid metacrylic reinforced fiberglass. All units are pre-fitted with pipes, requiring only connections to the cold and hot water and waste pipes. / Hastings II Bagno Collection.

751 STEAMBATH / The "Steambath" unit has a stainless steel boiler and solid state controls, and is no larger than an attaché case. It converts the home tub or shower enclosure into a spa. Simple plumbing hook-up brings water to the generator. / Steamist Co. Inc.

752 PEDESTAL BASIN / The "Pegaso" fluted pedestal basin is made of molded vitreous china. It is available in white, blue, ochre, green, amethyst, and special order colors. / Hastings II Bagno Collection.

753 SHOWER/TUB / The "Gemini" two-piece, fiberglass tub/shower unit is of a convenient size for remodelings. Safety features include two horizontal grab bars on the back wall. Available in white, blue, green, gold and creme colors. / Universal Rundle Corp.

754 WATER COOLER / This water cooler is designed to be easily accessible to a wheel chair, featuring soft touch, self-closing push bar operation. Model HCWC-8 has a 12-in. bar that is activated by pushing the middle or either end. / Sunroc Corp.

755 SPECIAL FITTINGS / Strong geometrical design, these fittings are of mirrored chrome or gold finish. The highly sculptured, arched handles are equally functional. / Sherle Wagner International Inc.

756 UNUSUAL FITTINGS / The globe knobs and cylindrical faucet are highly contemporary designs for bath fittings. Available in mirrored chrome or gold finishes. / Sherle Wagner International Inc.

757 MARBLE WASHBASIN / Designed for small bathrooms, this compact unit has grooves and corners carved individually by hand from a solid block of marble, therefore colors and patterns vary. / Sherle Wagner International Inc.

758 STONE BATH FITTINGS / Semi-precious stones used as prominent and elegant elements of hardware surpass the ordinary bath fittings. / Sherle Wagner International Inc.

759 MARBLE SINK / This hand-carved mottled gray marble sink is called "Dimensions," and has contemporary fixtures in brushed chrome. / Sherle Wagner International Inc.
760 SWIVEL FAUCET / This deck-mounted, single-control mixing valve has a double swivel spout, which permits the user to wash the sides and back of sink without use of hand-held spray. Designed by Arne Jacobsen, the brass fixture is available with a range of mixing valves, outlets, plates and accessories. Manufactured by Vola Sanitary Fittings; distributed by Architectural Complements.

761 WALL-MOUNTED FAUCET / Designed by Arne Jacobsen, this single control mixing valve with short fixed spout is available in 10 epoxy colors plus polished chrome and brass. The unit is washerless. Manufactured by Vola Sanitary Fittings; distributed by Architectural Complements.

762 BATHTUB/SHOWER FIXTURES / These fixtures are wall-mounted with a single control mixing valve and diverter overhead shower and a hand shower/bathtub spout soap ring and mounting bracket. Available in 10 epoxy colors and polished chrome and brass. The pull handle increases flow of water, with only a turn to adjust water temperature. Manufactured by Vola Sanitary Fittings; distributed by Architectural Complements.

763 FAUCET / This handsome faucet is deck-mounted and has a single control mixing valve with fixed spout. It has a brass modular plumbing system composed of valves, outlets, plates and accessories. The mixing valves are washerless and manufactured under license from Bradley Corp. Manufactured by Vola Sanitary Fittings; distributed by Architectural Complements.

764 WASH BASIN / The EWS wash basin is a steel round wash basin with an enamel finish. Available in red, yellow, brown, black and white. Manufactured by Alape Vitreous Enamel Sinks/Vola Sanitary Fittings; distributed by Architectural Complements.

765 KITCHEN SINK / The two compartment sink is adjoined by a special drainboard platform. The “Epicurian” is cast in iron and is enameled in 15 colors or white. A cutting board is designed to connect with the wooden drainboard for convenience. Kohler Co.

766 SHOWERS ENVIRONMENT / The Aquasphere 360° is a freestanding structure of translucent acrylic set on a molded fiberglass base. Hot water pipes form preheated towel racks in the molded back panel, enclosed by a sliding door. Unit is sized to fit through doors, and measures 78-in. high. Meets major code requirements. Alsons Corp. E°

767 PERSONAL SHOWER / Easy to attach, the Glide Rail wall bar for hand-held shower units has an adhesive backing that adheres to fiberglass, marble and other types of shower walls. A roll of holes are undesirable. An acrylic dial handle on the rail adjusts the shower height to individual requirements. Alsons Corp.

768 ACCESSIBLE TUB/SHOWER / A fiberglass-reinforced tub/shower combination with completely flat walls, the “Grabber” can accommodate all types and arrangements of grab bars as required by individual healthcare, code or architectural specifications. Slip-resistant bottom complies with ASTM F 462-79. Lasco Industries.

769 WHIRLPOOL BATH / A 5-ft fiberglass bathing alcove with seamless, one piece walls, the “Barbados” bath has four adjustable whirlpool jets, dual air controls to regulate the amount of hydro-massage, and a choice of timers that allow bathers to select the length of whirlpool action desired. Bath is available in 8 colors and white. Kohler Company.

770 PULL-CHAIN TOILET / This Victorian-style high-tank toilet has been added to a “nostalgic” plumbing product line. Brass piping, supports and pull-chain are available in polished chrome or gold finishes. Seat, cover and chain handle are solid oak, finished with a moisture sealer. Tank is insulated to prevent condensation and dripping. Kohler Company.

771 WOOD FAUCET HANDLES / “Alterna” fittings are available with red-brown Central American Cocobolo wood or distinctively grained African Zebrawood handles. Naturally water-resistant woods have a moisture-proof coating to ensure long use life. Kohler Company.
PUMPS & COMPRESSORS

772 BOOSTER PUMPS / These “Series 6000” industrial/commercial sized circulators require absolutely no maintenance or lubrication, and have been designed to reduce velocity noise. / Grundfos Pumps Corp.

REFRIGERATION EQUIPMENT

773 REFRIGERATED BAR / A portable serving and refrigerated storage unit, the “Clarby Bar” is subdivided into three sections that open along a vertical axis. Bar is 30½-in. high, made of expanded polyurethane in white or black. / Hastings & Bagno Collection.

774 REFRIGERATED TABLE / “Model RPT-26” food preparation table is designed for efficient assembly of pizzas, salads, sandwiches, etc. Self-contained refrigeration system has a thermostatic valve that restores and maintains design temperatures. / Nor-Lake, Inc.

SELF-CONTAINED HVAC UNITS

775 AIR-COOLING UNITS / Air cooled refrigeration chassis in either heat pump or conventional heating/cooling models is offered for the process cooling requirements of small-to-medium electronic switching stations. / AC Manufacturing Co.

776 PROCESS COOLING / “UCW” system chilled water modules are specifically designed for large electronic switching centers that generate high “sensible” heat. Units are only 18-in. deep. / AC Manufacturing Co.

777 CHECK VALVE / Designed to simplify testing of low water cut-offs on hot water boilers, the “Test-N-Check” valve automatically checks the boiler control when the blow-off valve is opened. / McDonnell & Miller ITT.

778 THERMOSTATIC VALVES / Self-contained temperature control unit regulated individual room temperatures in hot water or low-pressure steam heating systems. Temperature control dial corresponds to a range of 40°F to 80°F. / Ista Energy Systems Corp.

WATER SUPPLY & TREATMENT

779 BACKWASH FILTER / Brass backwash filters remove sand, rust, particles and other sediments down to 40 microns in size from municipal or private water systems. One-in. size lists at $149.00; ½-in. port unit is $159.00. / Ista Energy System Corp.

780 METERING PUMP / The “Dola 05” is an efficient, compact proportional chemical metering pump fully integrated with a Flowmeter. Corrective or refining liquid is fed directly through the injection fitting into water flow, protecting pipes and equipment against corrosion or scaling. Unit price: $425.00. / Ista Energy Systems Corp.

781 WATER STRAINER / “Poro-Edge” automatic strainers remove solids as small as 250 microns from water supplies as well as recirculated water used or hvac, fountains, etc. Units are available in capacities of from 1000 to 85,000 gallons per minute; strainers are continuously cleaned by a backwash system. / R. P. Adams Co., Inc.

SOLAR EQUIPMENT

782 SOLAR HOT WATER / For residential or light commercial applications, the LSHW2 Solar Domestic Hot Water System consists of a solar collector, a stone-lined solar hot water storage tank and a newly-designed control module. Up to five solar collectors may be matched with a solar storage tank ranging from 40 gal. to 120 gal. / Lennox Industries Inc.

783 SOLAR COLLECTOR / This solar collector uses a patented Tube-In-Strip copper absorber plate, with liquid carrying tubes integrally formed in a solid sheet of copper by a special process to maximize heat transfer. / Revere Solar and Architectural Products, Inc.
784 SOLAR COLLECTOR / The “Daystar 1600” solar collector was designed for high efficiency in mid-temperature applications. There are simple plumbing hookups to adjacent collectors and to supply/return lines. Typical uses are domestic hot water, space heating and domestic hot water and process heating. / Solar Thermal Systems, Division of DXXON Enterprises Inc. GB ICR, E*

785 SOLAR ABSORBER PLATE / A patented high-pressure solar absorber plate made of copper is for side-to-side or external manifolding. The absorber is lightweight at 3.6 lb per sq ft. / Terra-Light, Inc.

786 SOLAR HEATING SYSTEM / Specially designed for pools, the system is available with 18- and 23-sq ft absorber plates, and is designed to provide uniform thermal efficiency. No secondary heaters are used; round manifolds accommodate the flow of solar heated water through the system and absorber plate. / Terra-Light Inc.

787 SOLAR HEATING SYSTEM / This air-to-air “SunCell” solar heating system is used on this test model, with three sensors, a two-stage thermostat, a mode indicator display panel and a controller, all interconnected by low-voltage wiring. / Research Products Corp. GB*

788 SOLAR HOT WATER / The “Sun-pump/Suncycle” solar water heating package consists of collectors and heat exchanger. Most residential water tanks can be converted to solar water heaters with this system. / Entropy Ltd. LRC*

789 SOLAR COLLECTOR / This solar panel consists of a non-ferrous heat transfer surface and a container. Features include a floated absorber, all copper waterways, low iron glass, and a baked enamel exterior. / Raypal, Incorporated.

790 SOLAR CELLS / LEXAN polycarbonate resin encapsulates the Silicon Sensors, Inc. line of standard solar power modules shown. The modules contain photovoltaic cells, which convert sunlight directly to electricity and are used most frequently in isolated areas where no other power supply is available. / General Electric, Plastics Div.

791 SOLAR HEATER / The F 101.0 “Sun” Solar Water Heater includes a glass-lined tank, heat exchangers of the immersion type, a differential control providing control of circulator, a diaphragm expansion tank and insulation. / A.O. Smith Consumer Products Division.

792 SOLAR ENERGY COLLECTOR / Weighing less than a pound per sq ft, this collector can be produced to any specified length with factory applied manifolding, insulation package and choice of color backings. The panel is a single extrusion of transparent polymer in a three-channel configuration; the upper two channels serve as lenses to direct light to the lower channel or fluid passageway. / Ramada Energy Systems, Inc.

793 SOLAR COLLECTOR / The “Sun-Jammer” solar collector is the newest addition to the company’s line of flat plate collectors, designed for commercial, industrial and residential applications. Fully tempered cover glazing provides a claimed 91.3 per cent solar spectrum transmittance. / AMETEK Power Systems Group.

794 SOLAR HOT WATER / Easy to install, compact module contains most of the components needed for a harsh climate solar hot water system: heat exchanger, operating controls and pumps. One end connects to the water storage tank, the other to the roof-top collectors. Sunstream unit is 38.2-in. wide, including fittings; retail price is $650.00. / Grumman Energy Systems. ICR, ICR, E*

795 SOLAR CELL ENCASEMENT / In this prototype, solar cells are sandwiched between sheets of calendared uncured silicone rubber and then vulcanized, to protect the solar cells and yet allow maximum passage of sunlight direct to the cell surface. / Keene Corp, Laminates Division.
Introducing the pressure water cooler that needs no drain.

Now you can have a pressure water cooler where you never could before. Because this Oasis needs no waste water drain — only inlet water from a 1/4" or 3/8" supply line. A push-button faucet dispenses water into cups or glasses. And a detachable waste water receptor catches the occasional drips or splashes. So now you can put cold water refreshment where the work is.

Because the drainless Oasis can go almost anywhere you want it — at a very low installation cost. Get the drainless Oasis, for drainless places. Ebco Manufacturing Company, 265 N. Hamilton Road, Columbus, Ohio 43213

Oasis
The water cooler that's built without shortcuts.

Circle 1058 on inquiry card
WHEN WATER TEMPERATURE CONTROL IS CRITICAL YOU CAN DEPEND ON POWERS-FIAT.

Powers-Fiat systems provide protection and safety in critical bathing situations.

- In Health Care Facilities: whirlpool, hydrotherapy, sitz bath.
- In Housing for the Elderly: shower bathing with high temperature alarm system.
- In Correctional Institutions: remote shower control.
- In Schools: multiple shower systems.

When you consider our line of water temperature controls, remember that our reputation for dependability can make everyone more comfortable, including you.

COMMUNICATIONS

808 DESK TOP PA / A compact control center providing full dual-channel communication for as many as 50 rooms, the "Director II" school sound system uses color guidelines to identify each operating function. Features include supervisory tone, classroom privacy, and instant one-button transmission of announcements or emergency messages. / Rauland-Borg Corp.

809 INTERLOCKING SYSTEM / "System 1200" is a combination of outside and inside telephone, public address, background music, and emergency announcement system that is based on microprocessor technology. The system is designed for use in schools and high-rise buildings. / Dukane.

810 BASE STATION / Model "1104CM" pre-amplified base station microphone has a built-in audio meter and external tone and volume controls for operating convenience. Powered by a 9-volt battery, the microphone comes with a six-wire coil for relay or electronic hook-up. / The Astatic Corp.

811 DUPLEX INTERCOM / Simple installation and instant two-way speech with natural voice quality are features of the Philips M100 communications system for business and institutions. Options include three-party conferencing; group-call; all-call; "camp-on" busy signal; "queue"; floating number; pocket paging; and tie-line for remote locations or buildings. / Rauland-Borg Corp.

812 AUDIO DELAY / For use with sound reinforcement systems containing multiple loudspeakers, the "DDS100 Spectrum-Master" permits the precise synchronization of sound at the listener's position no matter where speakers are located. Solid-state system is capable of delaying an audio signal from 0 to 120 ms, in increments of 7.5 ms at each of two independent- ly adjustable outputs. / Rauland-Borg Corp.

813 TELEPHONE USE DATA / The "Comptroller" promises to reduce telephone usage by as much as 40 percent, by recording who called whom, when, for how long and how often. Data in computer printout form. / Executone, Inc.

814 SMALL BUSINESS PHONE / A computerized installation for organizations requiring as few as four telephones, the "Equity" system identifies incoming calls, provides "Hands Free Talkback," has intercom and paging capabilities, and lets after-hours calls ring on only one phone. / Executone, Inc.

815 WINDOW ANNUNCIATOR / Model "A1400" can be expanded without the addition of extra power supplies or terminals. Assembled to customer height-width requirements, each module comes complete with a built-in discrete power unit. / Halmar Electronics, Inc.

CONDUCTORS

816 BULB LIFE EXTENDER / When placed directly in a standard light socket, Bulb-Miser thermal shock absorbing disc regulates the initial flow of current to the bulb's filament, allowing it to reach maximum lighting capacity gently. Protecting the filament in this way extends the bulb's life four times. / American Electro-Dynamics Corp.
817 CONDUIT FITTING / This UL-approved two-part connector for liquid-tight flexible metal conduit needs no "O" rings, gaskets or special tools. / Specialty Connector Corp.

818 HEATING CONTROL / An economical and easy to install system for older buildings with steam or hot water heat, the ECONOSTAT solid state differential controller adjusts the building heating output as the outdoor temperature changes. / Barber-Colman Co.

819 HOT WATER HEAT / "Fine Tune" control units allow exact thermal balancing for heat loss in buildings using hot water heat. Water and outdoor air sensors continuously measure and compare temperatures, and adjust to the thermal balance by adding hot water to the heating loop or switching on the burner to heat the water. / Isra Energy Systems Corp.

820 THERMOSTAT / Said to reduce hvac costs as much as 38 per cent, Zero Energy Band pneumatics controls provide heating and cooling setpoints for an adjustable range over which no heating or cooling energy is needed to maintain space temperatures. / Honeywell Inc.

821 ROOM THERMOSTAT / This modulating pneumatic thermostat has a Free Energy Band, a temperature range between pre-set heating and cooling call-ups where no energy use is required. Limits are field-adjustable or factory-fixed to meet DOE and ASHRAE requirements. / MCC Powers.

822 CONTROL COVERS / Molded from self-extinguishing reinforced polyester, Russelstoll nonmetallic control device covers and boxes, push buttons, pilot lights and switches are intended for marine and general purpose industrial applications. / Midland-Ross Corp.

823 DEMAND CONTROLLERS / Units in the "PDC-1100/1150" series feature programmable microprocessors to contend with present and future utility rate structures and metering methods. Designed to reduce peak power demand in industrial and commercial facilities. / Dynapar Corp.

824 LIGHTING CONTROL / Promising a complete payback on investment through reduced energy costs within 18 months, the "LC-500" Monitol automatically regulates illumination in commercial and industrial buildings. The microprocessor-based unit controls an unlimited number of circuits with nine schedules of on/off times per category. / CSI Industries.

825 MASTER PANEL / For use with Home Control System installations, the "Master Panel" shown here allows the homeowner to operate lights and appliances all over the house from one location. A wall-mounted board consists of a "TouchSensor" matrix and an array of LEDs that show which circuits are on. The "Master Panel" operates 32 circuits. / Harris Labs Inc.

826 HOME LIGHT CONTROLLER / The "Command Unit" of the Home Control System allows the homeowner to turn lights and appliances on or off automatically, by time of day, day of week, or time and date. The system uses surface-mounted "TouchSensors" to operate lights and outlets. / Harris Labs Inc.

827 THERMAL STORAGE / Designed to provide domestic hot water housing for the elderly and small apartment buildings, the Megatherm model SC draws electricity during off-peak rate periods only. Heat is stored within a medium temperature fluid reservoir. / Megatherm.

828 ELECTRONIC THERMOSTAT / Autopace 7 residential thermostat allows for the programming of 28 temperature changes per week, or four changes per day. The solid-state unit includes an LED display on time and temperature. / Autotronics, Inc.
829 HOT WATER BASEBOARD / For use with Intertherm hot water electric baseboard heating systems in homes, institutions, and commercial buildings, the HeatMinder sets back the temperature in any remote room from 9 to 18 deg. / Intertherm Inc. GB, LRC*

LIGHTING

830 LIGHT TOWER / Illuminated on three sides, this decorative light source may be used as a freestanding room divider or backed against a wall. Made of precious woods and acrylic, as well as custom colored lacquers, the light tower stands 84 in. high and is 7 in. wide by 12 in. deep. Approximate retail ranges from $1,500 depending on materials used. / Vladimir Kagan Designs, Inc.

831 MERCHANDISING LIGHT / Designed to replace warm white deluxe fluorescents in stores, restaurants and other locations where high light output and true color rendition are important, the Royal White 3K” series of lamps includes standard, high output and “SuperSaver” models form 15 to 96 Watts. All have a CRI of 80. / GTE Lighting Products.

832 HIGH-PRESSURE SODIUM / The 880-Watt Unarvox lamp is designed to directly replace many 1000-Watt mercury vapor HID lamps often used in factories, warehouses, etc. Operating on most existing ballasts and equipment, the Unarvox consumes about 12 per cent less energy while delivering 62 per cent more light. / GTE Lighting Products.

833 AISLE LIGHTING / This HID fixture provides a choice of lighting distribution for warehouse and factory storage bin aisles. A vertical light refractory aims light directly on stored material; a horizontal refractor can distribute light up and down aisles to illuminate traffic flow. Aisle-Liter fixtures are corrosion-resistant. / Sylvania Lighting Equipment.

834 DECORATIVE LUMINAIRE / ”TL” series fluorescent fixtures for interior applications may be mounted on ceiling or as a wall bracket. Die-cast endcaps have no exposed fasteners; diffusers are matte opal acrylic with opal or metal fascia. Available in single- or two-lamp sizes in 2-, 3- and 4-ft lengths. ”TL” luminaires come in nine enamel colors. / Columbia Lighting Incorporated.

835 GLASS PENDANT / Manufactured by Barbini Lighting in Italy, the “Spiro” hanging fixture has a 15-in.-dia hand-blown shade of varied intensity white and clear glass with concentric rings. Table and floor versions are also available. List price: $660.00. / Barbini-Lighting Associates Inc.

836 BRASS LAMPS / Designed by Ernst Lowy, the ”Crescent” lamp comes in three versions: a 61-in. floor lamp; a 20-in. desk model; and as a pin-up or bracket-style wall lamp. The curved heads turn a full 360 deg and take a 150-Watt bulb. Solid brass fixtures have polished chrome or brass finish; prices range from $75 to $183.00. / Kisch + Lowy.

837 LOW-WATTAGE HID / The ”V6” fixture, used in combination with various HID lamps, can replace industrial incandescent lighting systems while maintaining lighting levels. Lamp life would be 24 times longer for lower maintenance costs, and electrical consumption would be reduced by 70 per cent. / Sylvania Lighting Equipment.

838 MULTI-PURPOSE LIGHT / Listed for wet locations, the Hand-Liter-Sligh-pressure sodium fixture can be used for warehouses, garages, tunnels, shipping docks, etc. The surface fixture has an Alzak aluminum reflector, molded lens, and a bronze baked enamel finish. Unit price: $90.00. / Guth Lighting.

839 RECESSED UNIT / A 12-in.-sq recessed fixture has a solid wood frame and latticework, with a matte white acrylic diffuser. Luminaire accepts HID and incandescent lamps. Torsion springs self-adjust the wood trim to the ceiling plane and permits easy relamping. / Guth Lighting.

840 EMERGENCY LIGHTS / ”AS-BC” 6- and 12-volt emergency lighting units operate on sealed pure lead batteries, which require no maintenance over a normal 15-year life expectancy. For industrial as well as commercial applications, self-contained units provide a minimum of 90 minutes emergency light. / Dual-Lite Inc. ICR, E*
841 EMERGENCY LIGHTING / Recent additions to the economical Lumenette emergency lighting line, models "ML-4" and "ML-5" are designed for applications requiring up to four or five remotely-connected lighting headers or exists. Rechargeable units meet or exceed OSHA, NEC, NFPA Life Safety codes. / Dual-Lite Inc. ICR, E*

842 COMPONENT SYSTEM / Taso system provides custom lighting effects from a series of components used horizontally or vertically. Different systems feature clear glass globes, polished chrome cylinders, or double lamp holders with white porcelain sockets. / Taso Designs, Inc.

843 HALOGEN LAMP / For table-top or wall mounting, "Daphine" high-intensity, 50-Watt lamp has its transformer in the base unit. Pivoted arm extends 87 cm. Arm is available in white or black enamel; transformer base comes in black only. List prices for the Italian import: $300.00. / Lighting Associates.

844 HUMID LOCATIONS / Constructed to withstand corrosion caused by moisture and high humidity in such locations as kitchens, laundries and garages, the Sentry fluorescent fixture has a vandal-resistant fully gasketed lens. All metal parts are finished in Porsyl powder coating. / Sylvania Lighting Equipment.

845 FOUR-HOUR LIGHT / A two-lamp unit, the "SPU-70" Decor-Lite provides four full hours of emergency lighting for elevators. Rechargeable nickel cadmium battery is warranted for 12 years. A fused extension output option allows for such added loads as a 12-Volt bell. / Chloride Systems, U.S.A.

846 EMERGENCY LIGHTING / Providing instantaneous non-glare illumination automatically upon power failure, square Decor-Lite emergency lights now include a master unit capable of powering several remote fixtures. / Chloride Systems, U.S.A.

847 EMERGENCY LIGHTING / The UL-listed Chloride-Lite Master Unit makes possible the remoting of many combinations of emergency lighting fixtures and exits. Thermoplastic white cylinders may be either surface- or flush-mounted to a recessed junction box. / Chloride Systems, U.S.A.

848 LOW LEVEL LIGHTING / Built-to-order of laminated Western red cedar, "Junior Jefferson" landscape and walkway lights can be adapted to accommodate graphics and individual site conditions. Lamping is 60-Watt glass globe, or 50-Watt Lexan globe. / Ryther Purdy Lumber Co. CB*

849 ARCHITECTURAL SHAPE / One of the Canibe line of outdoor luminaires, the "Soft Cube" in impact-resistant acrylic or polycarbonate offers efficient prismatic light control. Lamp choices include HPS, mercury, metal halide, and incandescent. Luminaires may be pole mounted, mounted singly or in clusters of up to five. / Johns-Manville Sales Corp., Holophane Div.

850 AREA LUMINAIRE / A mansard-style top canopy is featured on the Holophane "Square-Postup" pole or wall-mounted fixture for area and parking lot lighting. A prismatic glass refractor provides square, symmetrical light patterns. Luminaire accommodates three HID lamp types in a wide selection of wattages. / Johns-Manville Sales Corp.

851 OUTDOOR LIGHTING / Vertical brackets for either wall- or ceiling-mounting use 18-Watt low-pressure sodium lamps, which provide more light than a 100-Watt incandescent and last ten times longer. "Low Energy Outdoor" lighting fixtures are equipped with a vandalproof "DR" acrylic lens; a directional inner reflector allows light beam adjustment over 60 deg. / Thomas Industries Inc.

852 RECESSED TROFFERS / Parazak recessed fixtures have a special semimirrored finish on the parabolic louver, said to offer superior brightness control and a high rate of lighting efficiency. Available in 1- by 4-, 2- by 2-, and 2- by 4-ft sizes, troffers can be combined with heat removal and air handling functions. / Thomas Industries Incorporated.
853 COLUMN LIGHT / Thermoplastic columns 15 in. in diameter and various lengths house an arc tube image duplication reflector system. Ambient light source uses HID lamps to provide a quadrant distribution pattern in large open interiors; asymmetrical lighting may be selected for perimeter locations. UL-listed "Motif 2" is offered in various finishes and lamp types. / Gardco.

854 INDIRECT HID LUMINAIRE / Pendant mounted rounds in 15- and 20-in. diameter have an "L" shaped cantilevered stem, offset to cast virtually no ceiling shadow. Fully enclosed metal housings are finished in baked enamel. High power ballasts are remote mounted; fixture is available in a variety of metal halide or HPS lamp types. / Gardco Lighting.

855 ACCENT LIGHTING / Round "Magnum-Spot" display fixture has a powerful magnet holding the ball, allowing flexible aiming of the light beam. Made of heavy metal, the spot comes in white or chrome finishes with brown trim, and accepts incandescent lamps up to 60 watts. / ITT Lighting.

856 SPOT LIGHTING / Incandescent "Flexaspot" fixture comes in three styles: clamp, pin-up, and box mount. Light takes up to a 60-Watt bulb, and may be used as a plant grow light, reading lamp, as an accent or backdrop drop, etc. / ITT Lighting.

857 FACADE LIGHTING / New, larger Elliptipar tungsten halogen fixtures are designed for applications requiring even lighting of large wall, ceiling or floor plane areas from one side. The reflector projects an asymmetric cutoff pattern, delivering 95 percent of the lumens emitted to the target. / Elliptipar Inc.

858 WALL FIXTURE / Surface-mounted light has a 10-in.-dia highly polished reflector with a beveled midsection, which distributes light from a 100-Watt bulb in a uniform pattern. Chrome bowl lamp, clear or frosted "C" bulb, or "A" lamps may be used to vary the light quality. / Habitat Inc.

859 REFLECTOR SPOTLIGHT / For theatrical, photographic and studio applications, a 4.5-in. "Ellipsoidal" 500-watt light permits a 50-, 40-, or 30-deg field angle to be achieved by the movement of one lens within the lens barrel. The unit accepts 250-, 400-, and 500-Watt mini-can screw base lamps. Price: $135.00. / Berkey Colortran.

860 THEATRICAL LIGHT / Axially mounted Lekolite spotlights have a focusing mechanism that allows the operator to adjust the lamp easily for flat or peak distribution, or any intermediate light intensity. Seven different models accept 500-, 750-, and 1000-Watt lamps. / Strand Century.

861 PICTURE LIGHTS / Decorative spotlights offered in 7- and 14-in. sizes; a swivel attachment directs the light up or down. Finish options include polished or antique brass and polished chrome. Fixture comes complete with 8-ft cord, mounting screws, and 25-watt frosted picture bulb. / Sattelite Products, Inc.

862 OPEN-PLAN FIXTURE / Tank/ambient lighting fixture, designed by Sylvan R. Shemitz, is now available in a universally-applicable version which can be mounted on a wall, partition, panel or other work surface. Aluminum Lite-A-Part fixtures provide both up and down light from the same lamp, illuminating work surfaces with minimum veiling reflections on the task. / Elliptipar Inc.

863 CEILING LIGHT / A close to the ceiling fixture, especially suitable for hallways and foyers. This square version of the "Radiance" chandelier has clear rods of solid glass suspended from a mirror-chrome reflector. / Lightolier.

864 EMERGENCY LIGHT / The C-Ling Light is designed for easy installation in dropped panel type ceilings. The self-contained unit has twin adjustable cylinders, which provide direct lighting to any location. / Chloride, U.S.A.
865 BARRIER-FREE EXITS / Exquisite Series HC17.1 signs meet ANSI requirements for displaying the International Symbol of Access, and for providing audible and visual signaling capabilities. Sign faces have red or green letters on a white ground with the access symbol in blue. Battery pack or remote 6-volt operation. / Dual-Lite Inc. ICR.E*

866 INDUSTRIAL HID / Super Watt luminaire operates at over 90 per cent efficiency; the spacing-to-mounting height ratio is 2.5:1. Pendant- or surface-mounted fixture measures 17½-in-deep, and accepts HID lamps up to 400 Watts. Luminaire is UL-listed for damp location. / The Miller Co.

867 ADJUSTABLE HID / Cost reductions were achieved in the Side Car industrial luminaire by wrapping the ballast in a metal sleeve instead of a casting, and locating it to the side of the fixture in a simple unified stamping. Lamping choices range up to 400 Watt; light distribution patterns are field adjustable. / The Miller Co.

868 STREET SYSTEM / Street Modules-System 2 offers expanded configurations of components, improved installation, and more flexible add-on capabilities. Architecturally styled street furniture integrates luminaires, traffic/pedestrian signals and control equipment, graphic panels, booths, and litter containers to suit individual requirements. / Crouse-Hinds Co.

869 DECORATIVE FLUORESCENT / Form 4 fixtures are designed for architectural and accent lighting of building interiors. Available in 4- and 8-ft standard lengths, luminaires may be used individually or in rows and patterns using connector boxes. Form 4 units can be ceiling mounted; hung from stem or cable hangers; attached to the wall by brackets or mounted wall-to-wall. / Columbia Lighting

870 WOOD CHANDELIER / Four-light hanging fixture has two concentric rings of white oak sections fitted with oxidized brass connectors. Over-all height of fixture is 18-in., with a 21-in. diameter. UL-listed light comes with matching oak canopy. / Charles Loomis Inc.

871 OAK FIXTURE / Suspended from an interior pendant, fixture is handcrafted of solid white oak with oxidized brass trim. Globe is 8-in. opal glass, and takes up to 100 bulb. UL-listed light is 19-in. wide by 19 in. deep. / Charles Loomis, Inc.

872 INDUSTRIAL FIXTURE / For use at low and medium mounting heights, the Lobay HID luminaire provides a square light distribution pattern through a high-heat acrylic quadrature lens. Easy-to-install fixture is available enclosed and gasketed, or UL-listed for wet locations. / Johns-Manville Holophane Div.

873 OFFICE LIGHTING / Deep cutoff optics of the "SPI" indirect lighting fixture permit below eye level mounting with top surface of the fixture at panels heights down to 54-in. Optional brackets allow top or side-of-panel mounting; rubber feet protect surface for portable installation. / McGraw-Edison Co.

874 DOWNLIGHTS / The "Aura" series of recessed/semi-recessed lights have low brightness parabolic aluminum cell in tandem with clear specular Alzak reflector. Fixtures come in 12-, 18-, and 24-in-sq sizes, for use with HID and incandescent lamps. / Omega Lighting

875 SITE LIGHTING / The "Monolite" is a 12-in-sq pillar mid-level site fixture, available in 8-, 10-, and 12-ft heights. For use with mercury vapor, metal halide and hps lamps; completely weathertight units are constructed of extruded aluminum. / mcPhalen Lighting

876 TASK LIGHTING / Two 8-watt task lights provide twice the ESI footcandles on the major work plane at the single 40-watt fluorescent strip commonly used in offices. "SPI" lights are offered with various mounting devices which tailor the basic fixture to a variety of tasks, including a portable magnet mounting for use with metal shelves in open plan offices. / McGraw-Edison Co.

* In 1980 Sweet's Catalog File (6): General Building (GB); Light Residential Construction (LR); Engineering (E); Interiors (I); Industrial Construction & Renovation (ICR).
877 AMBIENT LIGHTING / Excellent photometric performance is offered in this line of upward directed office lighting. Models include “Mini Lites” for use on top of filing cabinets; freestanding “Box Kites;” and “Lite Towers, with or without storage chambers. Solid oak or color finishes are available / ITT Indoor Lighting.

878 HPS LUMINAIRE / Rectilinear outdoor fixture has been designed to precisely capture, control and convey the output from high-pressure sodium lamps. All electrical components are mounted on one swing-down door. Seventy- to 400-watt units are available in corrosion-resistant aluminum housings. / ITT Outdoor Lighting.

879 OUTDOOR FLOOD / Designed for precise control, the “Style Flood” has a parabolic reflector, which maximizes light efficiency by 59 per cent by projecting the illumination directly onto specified surfaces. Mounting options include tenon or davit arrangements. Flood accepts up to 400-Watt hps and metal halide lamps. / ITT Outdoor Lighting.

880 GLASS CHANDELIERS / Suggested for use in dining areas, the “Radiance” chandelier has slender solid glass rods extending up and down from a mirror-chrome center disc. Fixture takes six lights, and measures 18½-in. in diameter. / Lightolier.

881 DECORATIVE LIGHT / “Mirage” series fixtures float a sculptural arrangement of clear glass cubes against finishes of polished or satin chrome or brass. Chandeliers come in 9- or 13-light versions; 3- and 4-light wall models are also offered. / Lightolier.

882 ETCHED GLASS / Another version of the “Mirage” hanging light, “5389” has cubes of glass inside-etched for a warm, diffused effect. The frosted fixture measures 12½-in. in diameter, and is available in polished and satin brass finish. / Lightolier.

883 LOW LEVEL FLOOD / Offered in three light distributions for specific area and stairway applications, “LLF” series floodlights are designed for mounting on building exterior or in concrete pedestals. Lamp choices include HID types and incandescent. / Kim Lighting Inc.

884 FRP POLES / Manufactured by a process that combines radial and longitudinal fiber-reinforcement, heavy-duty “FRP Series” lighting poles are said to have exceptional strength and wind resistance, permitting their use in applications not possible with other fiberglass poles. Polyurethane-coated finish is a dark bronze color. / Crouse-Hinds Co.

885 FLUORESCENT TROFFER / A three-lamp fixture lowers energy requirements by using one less lamp than standard troffers; the unit is wired to allow for one, two- or three-lamp operation for additional savings. The high-efficiency fluorescent troffer, named “HEFT,” is ½-in. deep to facilitate installation in retrofit applications. / Keene Corp., Lighting Div.

886 SPORTS LIGHTING / The “Super Sports-Beam” is ballasted for either metal halide or hps lamps; a range of 21-in. dia anodized aluminum reflectors provide all NEMA beam spreads from Type II to Type VI. Heat-generating lamp socket is housed within an integral pod on top of the fixture and exposed to cooling air. / Keene Corp., Lighting Div.

887 CLASSROOM FIXTURE / The “Director” school luminaire delivers glare-free light through prismatic lenses which split light from twin fluorescent lamps into distinct upward and downward components, providing precise task illumination and even ambient light. / Keene Corp., Lighting Div.

888 QUARTZ FLOODLIGHT / The “Triumph 500” tungsten halogen light has a cast aluminum body with integral cooling fins and heat dissipating socket for low operating temperatures and long lamp life. Adjustable mounting arms have degree-marked aiming quadrant; lens assembly clamps open and shut without tools. / Keene Corp., Lighting Div.
892 REDUCED WATTAGE / The Watt-Miser II Power Groove fluorescent has been added to this maker's line of reduced wattage full output lamps. For use indoors in two-lamp fixtures, the Power Groove draws 18 per cent fewer watts yet gives almost the same amount of light as the standard lamp. / General Electric Co. E*.

893 LAMP/BALLAST / The "F40" Maxi-Miser lamp/ballast system combines two reduced wattage, high efficiency Watt-Miser II 4-ft fluorescent lamps with long life high performance Maxi-Miser # electromagnetic ballast. Fixtures provide equal or more light at 14- to 18 per cent savings in wattage. / General Electric Co. ICR, E*, 1*

894 TABLE LAMPS / Six new sizes have been added to the "Cylinder and Square" collection of table lamps. Finish can be mirror-polished aluminum or bronze; off-white linen shades in new shapes are also available. / Brayton Accessories.

895 AMBIENT LIGHTING / Developed for use with the AmSeCo open office system, the "Softshine" partition-mounted fixture sends 85 per cent of its light out to the sides, yet projects only 5 per cent of its light below standing eye level. Low-energy fixture is available in 4- and 8-ft lengths. / Peerless Electric Co.

896 FLUORESCENT STRIP / The Lite Stripe is a tailored fluorescent strip light for displays and exhibits. A narrow aluminum extrusion holds all wiring, ballast and hanging clips. Invisible connectors allow extension to any length; movable shields conceal lamp ends. Lite Stripe is offered in lengths from 4- to 24-ft. / Peerless Electric Co.

897 WIDE-SPREAD LIGHTING / Lite Strut has an aluminum housing and indirect optical assembly that provides an exceptionally wide light spread, allowing for even light distribution under low ceilings while using minimum wattage. Fixtures available in standard lengths of from 4- to 24-ft, and any length in increments. / Peerless Electric Co.
901 INDIRECT LIGHTING / The ceiling-mounted, SPS Symmetric SDE2 luminaria provides glare-free ambient lighting for stores, offices, and other interior spaces. Dual lamp assembly may combine metal halide and HPS lamps for warm color temperatures. The optical chamber directs the light upward, spreading the concentrated HID light sources into wide symmetric distribution. / McGraw-Edison Co.

902 RECESSED HOUSING / The versatile R-17 Rexall recessed incandescent light housing combines a plaster frame, an adjustable socket, which accommodates a variety of screwbase lamps, and over 30 different trim. Bar hangers can be positioned for 16- to 24-in. joist spacing. / Halo Lighting Div., McGraw-Edison Co.

903 AREA/STREET LIGHT / Pole- or wall-mounted Spherical Site Light can be used singly, or in clusters up to four, for both area and street illumination. Luminaria takes a range of HPS lamps and wattages; spun aluminum top canopy may be color matched to round, tapered poles / Johns-Manville, Holophane Div.

904 LOADING DOCK LIGHT / The flexible joints of this Dociota fixture allow it to swing safely out of the way when struck from any direction. The fixture has a 60-in.-reach, and adjusts 240 deg vertically and 300 deg horizontally. / Phoenix Products Co.

905 PANELED CEILING LIGHTS / Fixtures and air diffusers are designed to blend mechanically and esthetically with the Planar ceiling: diffuser uses slots between aluminum panels for air distribution. Lighting fixtures include fluorescent, incandescent, or mercury vapor styles. / Alcan Building Products Inc.

906 LIQUID LIGHTING / Clear acrylic flexible tubing has ½-Watt lamps spaced every 2-, 3-, 4-, 6-, or 12-in. for use in surface-mounted graphic displays and signage. Non-oxidizing tubes come in ¼- and ½-in. diameters up to 12-ft long; may be interconnected to form patterned lighting environments up to 96-ft. / Neo-Ray Products, Inc.

907 LOW VOLTAGE ACCENT / A 12-Volt light with a self-contained transformer, this cylinder offers good beam pattern control in track lighting applications. Rotating bezel positions the light, and snaps out for easy relamping. / Progress Lighting, E. I.*

908 WALL WASHER / An addition to the Trak-7 line of single circuit track lighting, this 6½-in.-wide adjustable lampholder accommodates 100-, 150-, or 250-Watt T4 quartz lamps. Matte black finish is standard. / Progress Lighting, E. I.*

909 LIGHTING CONTROL / For use with up to 410 low energy decorative lamps displayed in patterns up to 96-ft, the “Feever” control allows sequential chasing, waiver, visual sound and other dramatic lighting effects. / Neo-Ray Products, Inc.

910 WALL COLUMN / Suggested for use in interior areas such as halls and stair landings where lamps or recessed lights are not practical, this wall illuminating column stands 96-in. high. Element allows light to bounce off the wall and either side of the column, and can be used horizontally or vertically. Crafted of precious woods and custom lacquers, prices range from $1,500. / Vladimir Kagan Designs, Inc.

911 PAR LIGHT / Another fixture option with the Inlite 3000 Series light track. “Phasor” units are offered as 150 Watt PAR-38 side prong and 200 Watt PAR-46 side prong lights. White finish is standard; color filters are available. Unit price for the light alone is $25.50. / Inlite Co.

912 TRACK FIXTURE / Available in white, black, yellow and orange, “Aurora” fixtures slip into a one- or two-circuit “3000 Series” light track only 1½-in. wide. Light takes 100- or 150 Watt incandescent bulbs; fixture alone is priced at $19.00. / Inlite Co.
913 HANGING FIXTURE / The "5700 Series" chandelier employs concealed downlights to provide a good level of task lighting, while the up-lights are a source of both ambient and atmospheric light. Designed by Don Clever, chandelier is offered in 6-, 9- and 10-light versions. / Robert Long Inc.

914 HURRICANE LAMP / Designed by Jules Heumann, this contemporary version of the traditional hurricane lamp has a cylinder base and glass chimney scaled for use in contract or residential interiors. Offered in kerosene or candle-oil models, the lamp comes in silver, oxidized brass or dull brass finish. / Robert Long Inc.

915 ALUMINUM POLE / Shown here installed in the Empire State Plaza in Albany, N.Y., is a variation of the "Designer Series" architectural poles for area and street lighting. Poles are one-piece construction, tapered from seamless aluminum tubing finished in Duranodic colors. Painted and powder coatings are also available. / Pfaff & Kendall.

916 LIGHTING CONTROLLER / This "Energy Control Device" regulates fluorescent lighting levels in commercial buildings without major rewiring. A central transmitter at the main lighting panel sends high-frequency signals that trigger a small receiver that turns on the lamps. / GTE Lighting Products.

917 AC EMERGENCY POWER / Dependable emergency power for fluorescent and incandescent fixtures is generated by the compact Modular AC Power Station. The solid-state unit permits flexibility in the choice of emergency lighting systems which can meet UL, Life Safety Code, NFPA 101, OSHA and National Electric Code requirements. / Johns-Manville Sales Corp., Hologaline Div.

918 PACKAGED GENERATOR / Optional equipment offered with standby and prime power generators makes these power sources more useful for construction and other on-site applications. / Caterpillar Tractor Co., Engine Div. CB, ICR, E.

919 SWITCHGEAR / Built to 1978 NEC standards, this floor-standing switchgear is designed for use with Caterpillar generator sets in single- and multiple-unit installations. Four methods of paralleling are available; nine amperage ratings are offered in two sizes of enclosure. Unit can be used with both manual and automatically started generators, and is mounted remote from the power source. / Caterpillar Tractor Co., Engine Div. GB, LCR, E.

920 STANDBY GENERATOR / The "Saturn" gas turbine generator is shown here installed in a cogeneration system. The turbine's waste exhaust heat is used to produce steam for processing in this food plant. / Solar Turbines International.

921 FULL-DUTY GENERATOR / The "Mars" gas turbine electrical generator sets are intended for applications where the slightest interruption of power service cannot be tolerated. / Solar Turbines International, Div. International Harvester.

922 GAS & DIESEL ENGINES / Developed for the construction and material handling markets, "VR" series gas, diesel, and propane fueled engines are compact, heavy-duty units for a variety of off-highway applications. They can be used for power loading and waste handling equipment, lifts and hoists, heat pumps and compressors, and for on-site power generation. / Waukesha Engine Div., Bresser Industries, Inc.

923 RESIDENTIAL SECURITY / Designed for the home, apartment (and can be also used in small business), the "Minuteman II" has a control detector, alarm timer, test circuits and rechargeable batteries. / Delta Products Inc.

924 MONITOR PANEL / The "Mark V" monitor panel controls surveillance of unlimited number of zones, security equipment and fire equipment, and desk top, rack mount or flush mount models are available. / Continental Instruments Corp.
925 DIGITAL LOCKS / A new model in the Comp-U-Lock keyless security locking system is a digital that operates electronically. It offers 10,000 possible combinations that can be entered on the four rows of rocker switches on the unit. The electric latch part fits most standard door jams and is installed with common hand tools. / ESP Systems Development Inc.

926 CARD KEY SECURITY / Designed for medium- to large-sized installations, the Pass maximum security system operates an entire network of security, access and environmental equipment. The system provides a simultaneous response to any alarm condition or malfunction by specifying corrective action. Cost starts at $50,000. / Cardkey Systems.

927 SECURITY SYSTEM / An encoded card is used in the Delta 1000 access control system. It not only controls who enters a building, but also restricts traffic through such critical areas as computer rooms, record centers and vaults. / Honeywell Inc., Commercial Construction Div.

928 RADIO-CONTROLLED SECURITY / A wireless, radio-controlled security system can be used in both industrial and residential applications. The base unit contains a radio frequency receiver that receives signals from remote wireless window and door transmitters, smoke and fire detectors or other accessories. / Radar Detection Inc.

929 COMBINATION LOCK / A push button combination lock provides one-hand operation in this security system. Called the Unicam 1000 Access Control, the device is weatherproof and pick-proof, with alterable combinations. / Simplex Security Systems, Inc.

930 ACCESS CONTROLS / The "Code 'n Card," part of the Cypher Lock line, permits field selection of any of three operating modes—memory-coded only, magnetically encoded card only, or code and card. / Continental Instruments Corp.

931 MICROWAVE SECURITY / Special microwave circular units are key elements in this outdoor security system for perimeter protection. Model 14000-01 includes a transmitter and receiver, which automatically adjusts the coverage zone from 25 to 1,500 feet; detection sensitivity is field adjustable. / Racon, Inc.

932 LIGHT FIXTURE BOX / Guard-A-Lite sheet metal boxes prevent the unsafe buildup of heat around light fixtures recessed into insulated spaces. Boxes keep the insulation at a distance from the fixture while preventing back drafts. / Leigh Products.

933 SECURITY MONITOR / Custom graphics on this illuminated annunciator panel show the individual floor plan of the protected area, with the signaler's location indicated with LED or incandescent legends and isolated buzzer circuit. Low-voltage panel has a built-in test circuit, and is expandable to handle any number of rooms, floor plans and repeater stations. / Life Dynamics.

934 EMERGENCY NOTICE / The Remcom II command console provides five fully-supervised facilities, color-coded for easy identification by fire-fighters. These include telephone master; page master; alert alarm signal; evacuation alarm signal; and alarm annunciator. All equipment is protected by a Flexiglass smoke door. / Roberts Engineering Co.

RACEWAYS

935 ENERGY DISTRIBUTION SYSTEM / A subsystem of the company's Action Office, extends power only to required areas, rather than energizing an entire panel; works with available power supply point, provides up to four-circuit capacity, and permits flexibility in outlet placement. / Herman Miller Inc.

936 POWER POLE / A 2- by 2-in. U.S.-listed pole is factory pre-wired for power, and has separate channels for power, communications and electronic cables. Easily installed, it is plugged into a 3M brand Power-Dock or jumper system. / 3M Electro-Products Div.
937 POWER PANELS / Each power panel incorporates a number of power and component options based on exact needs, with each panel providing two 20-amp, 125-volt circuits. Power is distributed to adjacent panels through special connectors. / All-Steel Inc.

938 POWER MANAGEMENT / Wire management and electrical distribution throughout the company's Action Office plan is possible through an interrelated set of panel bases and power poles. / Herman Miller, Inc.

939 POWER POLE / The 25TP-4 power pole has two channels for delivering separated power and communication circuits from overhead ceiling connections to points-of-use. An access cover located at the lower end of the pole makes it convenient to update telephone service wires at any time with the pole in place. / The Wiremold Co. E*

940 PLUGMOLD / For sterile environments such as hospitals, restaurants, clean rooms and home kitchens, a stainless steel plugmold is available in multi-outlet wired sections. The "S-2000" comes in 3-ft, 5-ft and 6-ft lengths. / The Wiremold Company. E*

941 SERVICE & DISTRIBUTION

942 POWER CENTER / A power center has been designed for the data processing facility. To minimize service and installation labor, all flexible connection cables are blue and coded by circuit, length and appropriate computer equipment. / Conditioned Power Corp.

943 UNDERFLOOR SYSTEM / An underfloor electrical distribution system for concrete frame and slab buildings, "TR" ducts have 50 per cent fewer components than typical installations. The system requires only a 3-in. total depth, with no electrical fixtures above the floor line. / H. H. Robertson Co.

944 RACEWAY SYSTEM / Improvements in the aluminum Power-T-duct modular distribution system are said to make it more flexible and reliable. Ceiling fixtures and Commmuni-Power poles may be plugged into the nearest outlet in a PTD raceway. / 3M Electro-Products Div.

945 CABLE TERMINATOR / One-piece unit for use with concentric neutral cable, the QUICK-Term In needs no stress cone, yet provides full stress relief. Termination requires only a 4/8-in. cutback of the cable jacket; the Quick-Term design permits non-forced placement before unwinding the collapsible plastic core. / 3M Electro-Products Div.

946 NONMETALLIC BOXES / Switch and outlet boxes are available molded from non-conductive fiberglass reinforced polyester, requiring no grounding. The boxes accept up to 10 #14, 9 #12, or 8 #10 romex wires in accord with NEMA. / Midland-Ross Corp.

947 LAMP SAVER / This dummy lamp tube acts as a power shunt, replacing one fluorescent light in 4- and 8-ft two-lamp circuit fixtures. The power shunt tube, of clear glass to eliminate shadows and light blockage, completes the normal parallel circuit ballast wiring used in the fixture. Light levels are reduced evenly, with one light burning in each fixture. / Eversave Co.

948 WEATHERPROOF ENCLOSURE / For flush installation in all types of building walls, this plastic flanged box produces a system that, when used with a wet or damp location cover, provides a total weatherproof enclosure to meet UL standard 514 and NEC 410-57. / Slater Electric Inc.
Walkerflex™ Architectural Power Systems.
The possibilities are endless.

Installation is fast, easy
The Walkerflex APS distribution unit is the conversion point from hard wiring to the flexible system. It distributes power from the panel board to wherever you need it, through cable sets that install by simply plugging in. No fishing for wire, no bending conduit. Constructed with special armor-clad appliance cable, Walkerflex cable sets come in lengths from 3 to 50 feet—or longer if needed. All major light fixture manufacturers are UL listed and able to install APS receptacles in their products.

No rewiring for relocation
Move wall receptacles when you move walls. Change lighting fixtures as work areas change. All it takes is unplugging and plugging. The Walkerflex APS makes any spot on the ceiling available for light fixtures, every area in the building easy to remodel and rearrange.

Mistake-proof design
Each plug and receptacle is color-coded according to voltage and function, with a strong, durable LEXAN™ 141 resin housing that doesn't expand or contract. Tight-fitting connections minimize heat buildup. The unique
The Amazing “Disappearing” Flip Top® Floor Fitting

For the first time, architects and interior designers can specify a floor outlet which maintains the design integrity of office and commercial interiors. The Flip Top dual service floor fitting is there when it’s needed and folded down beneath the carpeting when not required.

The UL-listed Flip Top recessed floor outlet can accommodate both communications and electrical wiring within a compact floor box enclosure of steel and injection molded phenolic plastic. Its unique hinged cover door permits easy accessibility to power and telephone outlets...and is operable without exposing metal parts. Carpeting is attached to the hinged injection molded polycarbonate cover door with Velcro attachment pads.

Fully adjustable both before and after concrete is poured. The junction box, which comes complete with specification grade receptable, is 14-gauge CRS galvanized, nominally 8 X 4½ X 3 inches with corner supports and leveling screws. Flip Top is the floor outlet that remains out of sight—hidden beneath the carpet—until activated. Flip Top...it’s there only when you need it!
MANUSCRIPTS WANTED
Architectural Record Books publishes hard cover books on architecture, engineering, interior design, housing, construction and related subjects, and is seeking book proposals and manuscripts. If you have a manuscript or a proposal, or know of someone who does, we’d appreciate it if you would arrange that it is sent to us for evaluation for possible publication. In order to make an evaluation we will need a chapter outline and at least one sample chapter.

Please address all inquiries to:

3146 MODULAR COLLECTOR / The efficiencies of the Sun-Aid collector’s Tube-in-Strip copper absorber plate are outlined in an illustrated brochure. Liquid-carrying tubes are integrally formed in the sheet; collectors may be manufactured in virtually any configuration to meet special design requirements. / Revere Solar and Architectural Products, Inc.

3147 SOLAR COLLECTORS / Technical brochures and case histories describe the Sunmaster round glass tube solar collector, an efficient energy source for solar hot water heating systems. Design of cylindrical tubes and reflectors permit collection of energy up to 10 hours a day, even in cloudy or sub-zero weather. Literature features a Sunmaster installation in Amherst, Mass., which produces over 75 per cent of the year-round heating, hot water and air conditioning requirements of a 50,000 sq ft college complex. / Sunmaster Corp.

3148 ACCESSIBLE WASHROOMS / A “Planning Guide” based on AAHSA A-117.1 specifications on making buildings accessible to, and usable by physically handicapped people, helps the professional select and place washroom equipment. / Bobrick Washroom Equipment, Inc.

3149 WATER COOLERS / Color catalog contains recessed and semi-recessed water coolers, floor-standing, pedestal and counter top fountains. The “Modular Service Wall” system, which groups mechanical facilities, phones, etc. in one space-saving wall cut-out, is briefly described; color options are shown. / Halsey Taylor. GB*

3150 KITCHEN/BATH / Decorating ideas for kitchen, bath and powder room are illustrated in the “Elegance” plumbing fixture brochure. Color photos show whirlpool baths, tubs, shower coves, toilets, lavatories, sinks, faucets, etc. in room settings. / Kohler Co.

3151 BARRIER-FREE SHOWER / Preassembled shower modules designed to meet all known accessibility codes are features in a 16-page equipment brochure. Detail drawings illustrate various barrier-free shower room renovation suggestions. / Bradley Corp. GB, ICR, F*

Sure wish we had installed Caterpillar standby power!

CATERPILLAR

OFFICE LITERATURE continued from page 147

3152 OFFICE ENERGY SYSTEM / Written for those concerned with developing and maintaining capabilities for open plan equipment, the “Action Office Energy Distribution Handbook” describes new relocatable electrical systems and how they interface with the Action Office. Problems such as change inhibition, service delivery failure and safety hazards are discussed. Circuity, codes and telephone systems are among the topics covered. The softcover guide is published by Herman Miller Research Corp., 3970 Variety Dr., Ann Arbor, Mich. 48104. Individual copies are $7.50 prepaid; quantity discount available.

3153 LIGHTING / Updated catalog describes two lines of Halo lighting fixtures. The “Surface” group was designed for visual impact and offers soft squares, spheres, shades, Lexan drums, brackets, shell lights and communication lights. The “Recessed Architectural” lighting catalog contains the detailed information required to make critical design choices for lighting, and shows downlights, telescoping spots, eyeballs, brick and aisle lights, etc. / Halo Lighting Div., McGraw-Edison Co.

3154 RECESSED LIGHTING / Offered in-stock, the “21MV/100” is a 100-watt mercury vapor recessed housing based on the 21 Plus series. Brochure explains the versatile applications of the compact housing, and illustrates the seven trim styles. / Prescolite.

3155 LARGE LAMPS / “Ordering Guide 79-1” provides product data and ordering information, including prices, on energy-saving lamps for commercial and industrial applications. / Sylvania.

3156 HAZARDOUS AREA LIGHTS / Petroleum indoor/outdoor luminaires that conform to NEC and UL hazardous location standards are shown in a 12-page brochure. Reflector, light pattern, and mounting choices are covered. / Johns-Manville Sales Corp., Holophane Div.

3157 LAMP SAVINGS / Catalog presents all of this maker’s fluorescent surface and wall fixtures, and includes a chart showing annual savings possible with various types of fluorescent lamps. / Lightolier.
