PRODUCT IDEAS FOR ARCHITECTS AND ENGINEERS
CASE STUDIES: DESIGN SOLUTIONS THROUGH PRODUCT APPLICATIONS
ARCHITECTURAL ENGINEERING: TWO SPACE FRAME APPLICATIONS
FULL CONTENTS ON PAGES 2-3
Introducing New Era® Corlon® commercial vinyl flooring.

We asked more than 2,000 architects and designers to judge 20 different design prototypes for the New Era line, the first commercial vinyl floor of its kind.

The winners were these innovative geometric patterns. They combine the popular designs of pattern-dyed commercial carpets with all the advantages of resilient flooring. And since these specifiers selected New Era's distinctive colorways as well, you can be sure the colors all coordinate with contemporary interior designs.

New Era's wider widths give you fewer seams.

Available in rolls 12' wide and up to 75' long. New Era can be installed without seams in most rooms. And virtually seamless corridors are possible, too, with specially ordered 9'-wide rolls.
beauty contest. Here are the vinyl floors that won.

When you can't avoid seams, our chemical sealant makes it look as if you did, creating the impression of a continuous flooring surface.

The fewer seams and faster installations of New Era mean less labor in both new and remodeling jobs.

**Good looks that stand up to the march of time.**

New Era's high vinyl-resin content makes it more stain resistant than most other vinyl floors. Spills also wipe right up. And no special maintenance is needed.

So let these winning designs work for you. Contact your local Armstrong representative to see samples. Or, for more information, write Armstrong, Dept. 05FAR, Lancaster, Pa. 17604.

The manufacturer as hero—involved just as the design professionals are

As I've said before on this page, for most months of the year we editors are researching and talking and concerned with and writing about the work of you readers—architects and engineers. But for two months of the year—during which this compendium of new products and product literature is being organized, written, and checked, and double-checked—we are very aware of the enormous input and contribution that the manufacturers and suppliers of building products and materials and furniture make to the process of creating architecture.

For just as design professionals concern themselves with holding down building costs, designing smarter to conserve energy, and (always) looking for new ways to build more beautiful buildings, so must the manufacturers.

For one specific example: At the recent Round Table on passive approaches to energy conservation, we talked a great deal about daylighting—and the architectural and engineering approaches being tested. But think also about the range of manufacturers and suppliers who are involved: you think at once about the glass manufacturers—for daylighting clearly involves more glass, and sophisticated glass to minimize glare and heat loss. But it also involves (changes) the heating and air-conditioning requirements—and probably demands more sophisticated air-conditioning controls. It probably increases the demand for skylights and the lighting of walls to create balanced light across the room. Still different manufacturers involved. Daylighting will almost surely require dimming controls as outside light changes. Daylighting will probably affect the exterior of buildings as attempts are made to improve shading and bounce light into the building—and thus curtain-wall manufacturers will be involved. Daylighting may require a reconsideration of office layout—putting open plan spaces near the windows while the "status offices" move into the core, perhaps with glass partitions. And this would affect the manufacturers of all manner of furniture, office-furniture systems, and partitions. Will colors and textures change as we move towards greater reliance on daylighting? Still more manufacturers involved.

In short, as architects and engineers become deeply involved in new techniques and design approaches, so must (and so do) many, many manufacturers and producers.

Consider that involvement as you look through this issue. . . .

How to use this issue
This year, Product Reports is organized as usual on the 16-division UCI format. The page number for each division can be found on the Contents pages 2 and 3, and more information on any product or service in this issue can be easily obtained by using the Reader Service Inquiry cards on pages 5 and 173. There are Circle Numbers for more information on the products in any advertisement; and for more information on any product or literature item in the editorial pages you simply need write in the number of the item in boxes provided on the Reader Service Inquiry Cards. Advertisers in this issue are indexed on page 172. May you find in this issue 100 solutions to your problem and 100 fresh ideas you can use.

—Walter F. Wagner, Jr.
Craftsmanship of architectural arts is not dead, evidenced by the continuing artistry of Rambusch Co. in New York City. Viggo Bech Rambusch, third-generation president of the family-owned company, runs a "shop" for both new and restoration work in fields of glass, metal, wood, fabrics and lighting. Typical of the integral complexity of work accomplished is the restoration of the Ohio Theater in Columbus (far right). While the building was designed by architect Thomas Lamb, the original Baroque interior was designed by Rambusch in 1928. The firm's work includes restoring murals and painted decorations, cleaning gilded ornamentation, replacement of drapery fabric and trimmings, and remodeling of lighting fixtures. One of the most current jobs is the rehabilitation/restoration of aspects of the Villard Houses—the Madison Avenue private mansion once owned by the Roman Catholic Archdiocese of New York and now incorporated into the new Helmsley Palace Hotel. Called The Urban Center, it is occupied by professional and civic organizations including the New York Chapter/AIA, The Architectural League and the Municipal Arts Society. Rambusch's work includes restoration of specific interior details and lighting, and metal sconces (right).

For more information, circle no. 900 on the Reader Service Card.
The problem with power and communications systems in buildings is their refusal to stay put. Users' needs change often faster than their ability to respond. Power poles, underfloor raceways, and raised floors overcome this intrinsic inertia, but even these channels cannot entirely escape the high costs of capital outlay or installation.

However, flat cables—only some \( \frac{3}{1000} \) in. thick—can be placed on structural floors, covered with carpet squares, and directly connected to pedestal outlets, baseboard connectors, phones, and call directors. They can be readily moved, tapped, and folded. Few if any special tools are required. Such flat cables are now offered by at least three manufacturers.

Versa-Trak power cable by Thomas & Betts, for example, encloses three, four, or five flat conductors in sizes equivalent to No. 12 or No. 10 AWG sizes rated 20 and 30 amps, respectively, for standard 120-volt office equipment. Teletape communications cable by Brand Rex contains 25 pairs of No. 26 AWG round copper conductors. Similar properties are exhibited in a flat power cable by AMP Industries.

For more information on Thomas & Betts Versa-Trak circle No. 901 on Reader Service card. For Brand Rex Teletape circle No. 846, for AMP circle No. 852.
Poke-through wiring—one common, accurate way to distribute electrical and communications service throughout a commercial building—exposes the structure to heat, smoke, and toxic gas because it penetrates fire-rated floors and walls. Fortunately, specially designed through-floor service fittings lined with fire-resistant material can effectively stop the spread of fire this way.

Square D Company has produced a removable service fitting consisting of two round metal plates enclosing a "sandwich" of three ¾-inch thick disks of 3M Brand Fire Barrier, a polymeric/inorganic composite material. Top and bottom plates have one-inch EMT conduits for telephone wiring and ½-inch EMT conduits for power, swaged to the plate and extending to but not piercing the Fire Barrier disks. Each disk has two holes cut to pass through wiring. Another disk is placed below the bottom plate.

When exposed to smoke, hot gas, or flame at 250 deg F or higher, Fire Barrier expands to at least five times its original size. In doing so, it fills the spaces around the cable and inside the conduit. The eventual char blocks flame, has a strength of 500 pounds per square inch, and withstands fire hose stream pressure. Fire Barrier is available in sheets.

For more information on 3M Fire Barrier circle no. 902 on Reader Service Card.
A right isosceles triangle chosen by architect Marvin De Winter Associates to embody the floor plans for the Gerald R. Ford Presidential Museum in Grand Rapids, Michigan, was extended conceptually to embrace the ceiling plane using a triangular space frame from Mero.

Mero, supplied and serviced by Unistrut Corp., is a simple system in that there are only two components—spherical steel nodes and round steel tubing. The nodes are solid, forged-steel spheres with flat facets and tapped holes in precise mathematical relationships. Tubular steel with cone-shaped ends act as members. The components are secured by a hexagonal sleeve and locking pin.

Making the system relatively uncomplicated is the inventory of different sized members to accommodate different loading conditions of tension and compression, as well as different lengths that form square, rectangular, and triangular configurations. Besides flat planes, Mero, can also assume such attitudes as arches, domes, and irregular polyhedrons. In-place or ground assembly with crane hoist are both feasible, depending on size of structure, cost of labor, and availability of heavy equipment.

For more information on Unistrut Mero, circle no. 903 on Reader Service Card.
A structural steel space frame constructed from Moduspan, a product of Unistrut Corp., has enabled architect L. Barry Davidson to develop a strong building materials vocabulary for a one-story building in Baton Rouge, Louisiana. The exposed space frame, which covers the building’s rectangular site, is supported by two load-bearing masonry walls and two steel columns. Exterior walls and interior office walls are expressed in glass and metal panels, with additional interior partitions in drywall.

Moduspan functions as a major organizational focus for the resulting design. The black painted space frame is visible almost everywhere in the interiors of private offices and open areas. Mechanical and electrical systems are painted black and suspended from it. Interior partitions frame into it. The space frame even continues beyond the glass transom that glazes the space between lower and upper chords along the building perimeter to create an overhang.

Aside from furnishing an emphatically industrial milieu for the clients, an engineering and data-processing firm, Moduspan offers obvious advantages of space frame design. For architect Davidson, the system is esthetic as well as functional.

For more information on Unistrut Moduspan, circle no. 904 on Reader Service Card.
The City Centre mall in Middletown, Ohio is a charming, well-manicured exercise in urban design with a riddle to tell. On its shoulders are rows of trees. Lining its center aisle of hexagonal pavers are rows of flowers. Yet none of the familiar curbs or catch basins are in sight. And the mall stays dry.

The secret: Armco Slotted Drain, specified by Harry Weese & Associates, the designer of the mall. Made of sturdy corrugated steel pipe, cut along its longitudinal axis to accept a grate of solid spacer bars, Slotted Drain forms a 1 1/2-in-wide slot for water removal. When buried to the appropriate depth, it drains streets, highways, parking lots, pedestrian thoroughfares, and bicycle paths.

Installation is fairly easy, as Slotted Drain involves less excavation, less backfill, and no large dips in grade associated with conventional catch basins. Once installed, it is maintained by a simple flushing of water. When any one area is blocked, loss of total effectiveness is minimized because the length of the grate is so much greater than its width.

Slotted Drain pipe ranges from 12 to 30 inches in diameter, in 16 and 14 gage. The grate is welded hot-dip galvanized structural steel.

For more information on Armco Slotted Drain, circle no. 905 on Reader Service Card.
1 COMPUTER FAMILY / "Architectural Resource Management Phases I, II, and III" are designed for firms of varying sizes. Software includes project management and specification editing. / Numeri/Comp, Inc.

INFORMATION SYSTEMS

2 DATA RETRIEVAL SYSTEM / This system contains over 30,000 pages of current contract furnishings catalogs grouped by manufacturer and/or product group. / Xetron Corp.

OFFICE SUPPLIES

3 DRAFTING TABLE / The "Futuristic" table features finger-tip controls for positioning adjustments. The top has a tilt range from horizontal to 90 deg; height may be raised from 30- to 50-in. / Mayline Co., Inc.

4 CALIBRATED CURVE / This curve drawing and measuring instrument allows the designer to quickly form the curve, draw the required line, and then measure distances along the perimeter of the curve. The "Calibrated Adjustable Curve" is available in 22- and 32-in. lengths, marked in V8-in. increments, or in an equivalent metric version. / Hoyle Products, Inc.

5 GRAPHICS STORAGE / Modular steel flat files offer storage protection for large flat documents, blueprints and drawings. Five-drawer units stack easily for space saving. A hinged depressor on each drawer protects materials from tearing or curling while the drawer is being opened. / Safco Products Co.

6 SLIDE STORAGE / The "Abodia Horizontal" slide storage system allows storing, viewing, and editing from one cabinet. Each slide may be viewed fully, while remaining locked securely under the clear acrylic covers. / Abodia-Elden Enterprises Inc.

7 WORK STATIONS / The "MPC System" provides a freestanding frame to which accessories can be hung or bolted according to worker and production needs. It can be used individually or in a series. Includes lockers, pegboard, book shelf, parts storage and work surfaces. / Republic Steel Industrial Products Division.

8 APPLIQUE FILM / Stylized adhesive-backed film is compatible with over 75 plain-paper office copiers. Title blocks, standard notes and repetitive details are easily copied directly onto the film sheets and then cut out and applied to the drawing as required. / Saga, Div. of Dade, Inc.

9 BINDER/PUNCH / With a housing molded from Noryl/resin, the "323" combination binder/punch weighs only 65 lb, yet can automatically bind documents up to three-in-thick. Unit will accommodate computer printouts up to 14 X 11 in. wide. / Velo-Bind Corp.
DESIGN BULLETIN

“The Paperless Catalog... current, reliable, instant.”

You’re looking at the new Contract Furnishings Data Retrieval System user terminal.

An automatic microfiche catalog system that stores an incredible 40,000+ pages of product literature, specs, and prices in one simple notebook.

And our system has a combination of features that plain old catalogs don’t.

Features like automatic monthly updates, to keep you informed and current on the new products and prices of over 300 manufacturers.

And a single toll-free number to speed samples and literature to you — FAST!

All of which means that specifying furnishings, looking for prices, and getting an overview has done faster, and better than it ever did before.

The new C.F.D.R.S. microfiche catalog system. Years ahead of its time. Available today. And about 39,750 more pages of information in the same amount of space as a paper catalog.

C.F.D.R.S. service is available now — call or write today — tomorrow is already here.

XETRON CONTRACT FURNISHINGS DATA RETRIEVAL SYSTEM
312/751-1104...Suite 49G...111 E. Chestnut Street...Chicago, IL 60611

OFFICE LITERATURE

OFFICE SUPPLIES & EQUIPMENT: UCI 1

3006 DRAFTING AID / A brochure describes “Axo-Scale” as a three-axis drafting machine that simplifies the drawing of axonometric projections and perspective views. The instrument consists of two lockable/revolving protractors. / Appalachian Drafting Supply.

SITE WORK: UCI 2

3007 CONCRETE PAVING / Three decorative concrete paving and flooring systems are covered in a color brochure. Products include Bomanite cast-in-place paving, Bomacron colored and textured concrete, and Grasscrete grass and concrete structural pavement for parking, driveways and access roads. Licensed Bomanite contractors are listed. / Bomanite Corp., GB+

3008 STORM DRAINS / Bulletin discusses the advantages of vane (slant bar) graters for street drains, explaining more literature on page 24
FENCES & GATES

22 SLIDING GATES / Sliding gate for aluminized chain link fence provides an alternative to swinging gates. A cantilever gate rides horizontally between four rollers suspended by two posts. Overhead gates hang from a track suspended approximately 14-ft high. Either can be motorized or remote-controlled. / Page Fence.

23 FENCING / "Ornamental" fence is made from high-strength steel pickets coated with two ounce of zinc and 15 mil of bonded PVC. This maintenance-free structure provides security without detracting from the overall appearance of the project. Available in black, dark brown, and green. / Cyclone Fence. GB, I*.

24 STEEL FENCE PIPE / Manufactured from cold-rolled zinc-coated steel, "SS-20" and "SS-40" fence pipe can have a "heat-sink fused" 15-mil thick coating of PVC, available in brown, black, or green. Color coating is said to offer exceptional corrosion resistance. / Allied Tube & Conduit Corp. GB, ICR*.

FOUNTAINS & POOLS

25 PACKAGED FOUNTAIN / The "Waterworks" architectural fountain is factory assembled, equipped with custom controls, and pre-tested before delivery to the job site. Enclosed equipment room can be located underground. / Imperial Bronzellite.

26 HYDRAULIC MULCHING / A cost-effective alternative to sod or seeding for rapid turf establishment and erosion control in large landscape areas, wood-fiber "Hydro Mulch," seed, and fertilizer are mixed with water to form a slurry, and applied in one step. / Conwed.

LANDSCAPING

27 PAVING SEALANT / "Guard-Top Sealant and Coating" is a preservative for bituminous surfaces such as parking lot, driveway, or ramp. Applied by sprayer, brush, or squeegee; dries in two to three hours. / Garon Products.

SITE DRAINAGE

28 WATER DRAINAGE / A two-layer water drainage composite of open nylon mesh heat-bonded to a non-woven filter fabric is applicable where the water table is below the level of any foundation. "Enkadrain" is installed flat against any wall. / American Enka Co. GB, LRC*.

SITE FURNISHINGS

29 BENCHES / These benches come in a wide variety of designs in fiberglass, wood or polycrystalline seating surfaces. Bases are in steel, cast iron, fiberglass or concrete. Suitable for indoor or outdoor applications and available in standard or custom designs. / Architectural Fiberglass Division of Krueger.

30 PLANTERS / Now available in the U.S. for the first time, a variety of fiberglass plant containers and trays is offered by this British company. Patterns include hexagons, triangles and radius spheres in various colors. / By Design.
31 PARK BENCHES / Available with seats and backs of redwood or smooth pebble aggregate, these park benches weigh 500 or 770 lb., respectively, to discourage random moving about. Both come KD with utilized seat and back with hidden, tamper-proof bolts. / Wausau Tile.

32 TRASH CONTAINER / Constructed of concrete with an exposed aggregate finish, this 55-gal. trash receptacle weighs 550 lb to discourage vandalism. Plastic top comes in “pitch-in” or “swing door” styles, and has a shelf behind lip to hide the plastic bag liner. Plastic container liner is optional. / Wausau Tile.

33 TRASH RECEPTACLE / This trash receptacle, part of the “Trestle Group,” is clad in 1- by 2-in. solid oak slats and 1-in. square metal tubing. / Landscape Forms, Inc. GB*

34 DOUBLE BENCH / This bench, part of the “Trestle Group,” is made with 1- by 2-in. solid oak slats and 1-in. square tubing. / Landscape Forms, Inc. GB*

35 TREE GRATES / Functional cast iron grates add decorative interest to landscaped malls and street plantings. Over 60 standard shapes, sizes and designs are offered, as well as custom-made grates. / Neenah Foundry Co. GB*

36 PLANTER BENCH / Exposed aggregate concrete planters combine with rustic cedar bench units to offer non-directional area/convenience seating; weighs from 330 lb. to 420 lb each. / Wausau Tile.

37 BENCH / This sculptured bench of redwood, mahogany, or cedar is secured by internal galvanized steel rods and comes in 48-in., 60-in., 72-in., and 84-in. lengths or in custom sizes and finishes. / Sitecraft by Rosenwach, Inc. GB, 1*

38 SECURE RACK / This bike rack has the added feature of front wheel protection. A cable is provided to secure the front wheel to both the rack and cyclist’s padlock. / Rally Racks, Division of Rally Enterprises Inc. GB*

39 BIKE STAND / This secure stand designed for motorcycles and mopeds claims maximum security through a rugged 3/4-in. steel plate and boron alloy chain. The owner’s padlock is recessed and rendered tamperproof form cutters and other tools. The stand and chain are coated with mar-proof, maintenance free Nylabond. / Rally Racks, Division of Rally Enterprises Inc. GB*

40 MOLDED FURNITURE / Seats, tables, and benches in molded fiberglass or polycrystalline are suitable for indoor or outdoor use. Custom designs also available. / Architectural Products Division of Krueger.

41 RECEPTACLES / These sand urns and litter receptacles of fiberglass combined with wood or “polycrystalline” are suitable for indoor and outdoor applications. Also available are planters, tables and benches in standard or custom designs. / Architectural Products Division of Krueger.

TUNNELING

42 PEDESTRIAN BRIDGE / Custom designed prefabricated bridges up to 100 ft long, are available in painted carbon steel or weathering “cor-ten” steel. Decking is pressure-treated wood. / Continental Custom Bridge Co. GB, E*
Krueger has purchased Architectural Fiberglass, a name distinctively associated with public space furnishings for over twenty years.

For more information and the representative in your area contact Krueger.

architectural fiberglass
division of Krueger
P.O. Box 8100
Green Bay, WI 54308
414/468-8100
We're More Than A Foundry

- Over 15,000 design variations meet many local, state and federal standards
- A 10,000 ton inventory available at Neenah and 7 distribution centers
- Over 5,000 patterns and a 300-page catalog

Time-proven construction castings backed by reliable technical information and continuing research has earned Neenah a reputation for excellent quality and product reliability.

Neenah is...more than a foundry.
CAST-IN-PLACE CONCRETE

55 CHEMICAL RETARDER / An exposed aggregate finish that is weather resistant and maintenance-free is said to be possible using “Super-Tuf-Cote” chemical retarder in cast-in-place concrete form work. / Preco Industries.

CONCRETE ACCESSORIES

56 CHUCKHOLE PATCH / Immediate traffic-bearing capacity is said to be one of the features of “Rannie” chuckhole patch. Special resin binder withstands all weather conditions; packs to extreme density in concrete or blacktop. / Randustrial Corp.

57 TRANSPORTER / Small quantities of concrete or masonry, from ½ yd. to 1 ½ yd., can be delivered to building sites via a line of ready-mix transporters designed to be towed by pick-up truck. With tandem axles, surge brakes, hydraulic lift. / Can-Do Concrete Systems.

58 FLOOR PATCHING / Where concrete industrial floors are worn, chipped, or corroded, four floor patching compounds are available for repairs. Choice depends on need: for chemicals, for traffic, for speed, for freezers. / Permaflex Products.

59 SEALANT / “Lastek 35” is an adhesive-like structural sealant designed to seal cracks and separations in concrete while resisting shrinkage. Intended for floors, steps, foundations, and sidewalks, especially to seal water out of structural breaks. / Maintenace, Inc.

60 MASONRY COATING / When sprayed on porous masonry and stone surfaces, “Vand-L-Shield” saturates the sub-surface and is said to provide protection from paint and other defacement. An important component is BF Goodrich “Carboset” resin. / BF Goodrich Co.

61 FORMING SYSTEM / “Con-Tech” concrete forming systems have been used in more than 30 countries to produce basic living units in as little as five working days. Also applicable to offices, factories, stores, schools, and hospitals. / International Housing Limited.

62 FOAMED CONCRETE / A “precastable autoclaved light-weight concrete,” or “REPALC,” is available that is worked like timber and is said to have the insulating properties of wood; is non-combustible; is formable for light construction. / Showa Denko America.

63 WALL PANEL / A patented finishing process permits several exterior style options for this factory-insulated, pre-stressed concrete wall panel system. Insulated cores of variable thickness and U values available. / Butler Manufacturing Co.
MASONRY ACCESSORIES

76. CAULKING / "Seal0" caulk is formulated with slow-drying waterproofing oils which are said to allow the caulk to become firm yet pliable underneath, filling openings in metal, brick, wood, and masonry. / Randustrial Corp.

MORTAR

77. ACRYLIC STUCCO / Premixed, colored, ready-to-use "Z-Brick" exterior or acrylic all-weather stucco is applied to any clean structurally sound substrate, such as concrete, exterior plywood, polystyrene foam board, or cement block. / Z-Brick.

SIMULATED MASONRY

78. STUCCO PANEL / A simulated stucco siding panel is available in 4- by 8-ft. and 4-ft. by 9-ft. sizes as "Adobe," factory-primed hardboard for exterior use. / Weyerhaeuser.

79. BRICK PANELS / Crushed stone and reinforcing fiber glass produce "Marlite" brand interior antique brick panels in three tones, to which mortar can be added by caulking gun. These imitation brick walls can be cleaned with soap and water. / Masonite Corp.

STONE

80. STONE PANELS / Aggregates in nine colors and several textures are applied to a ½-in. APA plywood or ½-in. mineral fiber board substrate sized 4-ft. by 8-ft., 10-ft., or 12-ft. as Natural Stone Panels for exterior and interior use. / Sanspray Corp.

UNIT MASONRY

81. BRICK IN COLORS / The traditional building material is available in reds ranging from light pink to deep crimson, buffs from light cream to brown, and light to dark earth tones, with smooth to rough finishes. / Triangle Brick.

82. MASONRY UNIT / An addition to the Soundblox line of structural, sound-absorbing masonry, the "Type R Split Rib" unit has an inner metal septa dividing cavity volumes. Slots are funnel-shaped. "Type R" units may be used indoors or out. / The Proudfoot Co., Inc. GB, ICR.

83. BRICKPLATE / An unglazed brickplate called "Sandstone 1500" is strongly patterned in tan and brown shades to resemble grain hardwood. Available in 4- by 8-in. size for indoor or outdoor walkways, slip-resistant, frostproof, stain resistant. / Gail.

84. HIGH BRICK / Manganese finishing is now available in this line of structural high brick. Each unit is over 60 per cent solid, and is offered in a fine- or heavy-finish spec on nominal eight- by eight-in. face sizes. Manganese high brick may be used indoors or out. / Stark Ceramics, Inc. GB, ICR.
Better than ceramic tile: Economical. Structural. And permanent.

Why specify block and tile separately, when Stark textured tile gives you the economy of a structural wall and durable face in a single product?

Stark tile is as attractive as it is durable. In fact, in applications like the Akron-Canton Airport shown above, textured tile's deep-relief, random pattern and earthtone colors encourage innovation in design and atmosphere.

Combines noise control and low maintenance

For those areas where sound control is necessary, specify Stark acoustical tile, available with a glazed or textured face. Both are virtually impervious to heavy traffic and vandalism, never need painting, and provide a sound absorption coefficient of .73.

Granite is the elite paving material for plazas, walkways and mail areas where a combination of beauty, durability and ease of maintenance is required. Granite is a natural building material and it naturally complements the landscaping portions of your architectural design. A wide selection of features including fountains and seating areas are available to enhance the overall appearance of your project.

For more information, plus a packet of full color literature illustrating our products in use, call toll free 800-328-7038. In Minnesota, call (612) 685-3621 or write to the address below.

Granite. Not-so-pedestrian plazas for pedestrians.
FASTENERS & SUPPORTS

CAPSULE ANCHOR / This capsule anchor is a two-part system composed of a threaded rod stud and a sealed glass capsule containing a premeasured amount of polyester resin, quartz sand aggregate, and a hardener in a separate vial. / Molly Divison/Emhart.

METAL FABRICATIONS

STEEL PLATE / 4-Way raised lug steel plate is said to be easy to fabricate, with superior weather resistance. Applications range from structural floors to "high tech" tables and interior panels. / Inland Steel Co.

METAL STAIRS

METAL STAIRCASE / Shipped as one complete welded unit, including siderails and handrails, the Linder stair is built on a six-by-eight-in. rectangular steel beam, rolled and welded to varying degrees of a circle. Steel treads and side rails may be covered in carpet as shown. / Linder Enterprises.

METALS & ALLOYS

ARTWORK STORAGE / Unistrut metal channeling and materials were used in an innovative way to construct this sliding screen storage system for the La Jolla Museum of Contemporary Art. / Unistrut Div., GTE Corp.

EMBOSSED METAL / A durable, simply installed metal surface, "Embossed Metal" sheets are noncombustible; panels have a Class 1 fire rating. New to the line is the AS120 design pictured, one of four patterns and textures now offered in brass plated steel, as well as stainless steel and aluminum panels. / Forms & Surfaces.

STRUCTURAL METAL FRAMING

SPACE FRAME / The Moduspan space frame is composed of five-ft reinforced steel modules with steel connectors. The 5,250-sq-ft frame shown here, a support canopy at the Fairmont Hotel in Denver, was erected on-site by crews using motorized platforms. / Unistrut Div., GTE Corp.

GEODESIC DOME / A 60 per cent sphere, this Merlo system dome houses an atrium lounge in a Denver hotel. Only one size of wrench was needed to assemble the structure from Merlo steel nodes and round steel tubing. / Unistrut Div., GTE Corp.
Design for

Put Wheeling Steel Framing in your plans. Cut construction costs. Shorten financing time.

You specify savings in more ways than one when you specify Wheeling Steel Framing systems.

By fabricating wall and floor sections off-site ahead of schedule, construction costs can be cut by as much as 50 percent. And since the shell goes up faster, construction loan costs can also be cut because of shorter financing time.

Wheeling Steel Framing can support greater loads than wood or any other framing material. That means you can space it wider with centers at 24 inches or more. And reduce the number of members. In addition, all parts of the Wheeling Steel Framing system—studs, joists, trac and bridging—fit together in a practical building frame that lowers costs. And speeds construction.

These are just a few of the reasons why economical Wheeling Steel Framing is on the job at construction site of all kinds: apartments, schools, townhouses, nursing homes, shopping centers, and low-rise office buildings. It is being specified and used by more and more architects and contractors every day.

To find out even more ways to save with Wheeling Ste
Get fast information about Super-C Steel Framing. Plus a complete range of lightweight steel framing members for commercial and industrial buildings... all from a nearby source.

Lightweight steel framing—roll-formed from galvanized steel—is a unique, innovative building material that offers you some impressive advantages. Greater strength with less weight. Faster erection. Less handling. No on-site waste. It requires no special skills or equipment, and it's cost-competitive with wood and masonry construction.

Best of all, it's extremely versatile—a good choice for either curtainwalls or load-bearing walls. And it's compatible with traditional materials and techniques.

U.S. Steel developed Super-C Steel Framing over ten years ago and has licensed Super-C to independent manufacturers nationwide—who can be a valuable resource for you. They'll provide you with design, technical and cost information on Super-C plus other lightweight steel framing members in a wide range of sizes and gages. And they can refer you to experienced contractors in your area.

For technical data, price and delivery information from a local source call us toll-free: 800-221-3333

We'll put you in touch with a Super-C manufacturer who can give you fast information about Super-C and other lightweight steel framing.

We'll also send you these fact-filled books on Super-C...including sizes, gages, physical and structural properties, load tables and architectural details. We'll deliver these books as fast as you need them!
Call toll-free: 800-221-3333.
(In New York State, call collect: 212-775-1395.)

Wheeling Steel Framing

Wheeling Steel Framing is a lightweight structural framing system that gives you flexibility of design and ease of installation, as well as major savings in construction time and labor costs.

To learn more about this popular and practical system, write for brochure WC-608. You'll get the information you need for specification, design and construction.

Write: Wheeling Corrugating Company, Wheeling, Pittsburgh Steel Corporation, Dept. GC-17, Four Gateway Center, Pittsburgh PA 15230.

with nonwoven fiberglass, Samafil single-ply membrane is claimed to not separate even under the most severe weather, pollution and mechanical stress conditions. A catalog provides complete product data and installation requirements for the UL- and FM-approved roll roofing. / Samafil U.S., Inc. GB*

3031 BUILDING PAPER / Product literature describes the multiple uses of Flor-Cure W/S, a pre-shrunk, wet-strength paper for the construction industry. Made of two sheets of 30 lb paper with a layer of tri-directional fiberglass reinforcement, Flor-Cure W/S meets FS standards for concrete curing paper and moisture retention, as well as ASTM-171. / GENtech, Glass-Kraft Div.

3032 COMMERCIAL INSULATION / Information kit includes fact sheets on Styrofoam insulation and two-dimensional heat flow calculator for perimeter foundation applications. The calculation method considers the most effective placement of the insulation and the amount of energy that may have been short-circuited around the insulation system. / Dow Chemical U.S.A.

3033 HARDBOARD SIDING / Available in panel and lap siding sizes, Teton Stain Base siding allows builders flexibility in customizing stain finishes. A color brochure contains information on finishing techniques, applications, sizes, and the Teton three-year guarantee. / Georgia-Pacific Corp.

3034 URHETANE INSULATION / Spray, froth, pour and foamboard types of rigid urethane insulation are discussed in a product catalog. Drawings show the insulation in place; product data and properties are listed. / Chemetics Systems, Inc. GB*

3035 WINDOW EXTRUSION / An eight-page color brochure with cutaway illustrations, engineering drawings and load table describes the thermally improved characteristics of the Therm-A-Frame insulating window extrusion system. Units can be installed from either the exterior or interior of the building. / Elwin G. Smith Div., Cyclops Corp.

3036 MEMBRANE ROOFING / Data sheet describes the uses and advantages of GlasBase asphalt-coated fiber glass mat, designed as a base sheet in built-up roof assemblies. / Johns-Manville.

3037 ROOFING ANALYSIS / "Field Application of Systems Technology" computer systems are programmed to do major design and specifying computations for built-up roofing. A brochure explains this free service, offered to professionals through this manufacturer's regional offices. / Johns-Manville.

3038 BUILDING SYSTEMS / Pre-engineered buildings for commercial, community, farm and industrial use are shown in a color brochure. Features include the Mecolok standing seam roof, prefinished metal panel coverings, and accessories such as canopies and fascias. / Mitchell Engineering Co., Div. of The Ceco Corp.

3039 GLASS SEALANTS / Technical bulletins describe Thiolok 800 and 805 insulating glass sealants, two-component polysulfide products developed specifically for use in the fabrication of organically sealed insulating glass units. / Thiolok/Specialty Chemicals Div.

3040 METAL WALL SYSTEMS / Flat and profiled architectural metal walls are presented in a comprehensive brochure. Data covers materials and finishes, fire ratings and insulation; diagrams and photos illustrate a variety of non-residential building installations. / H. H. Robertson Co.

3041 WATERPROOFING / Architectural guidelines for total waterproofing systems are given in a 17-page booklet. Information is presented for both traffic-bearing and non-traffic bearing systems. Details drawings included. / Tremco, Inc.

DOORS AND WINDOWS: UCI 8

3042 METAL DOORS / An expanded full-line catalog includes samples of the seven new colors available in Steelcraft doors and frames. / Steelcraft by American-Standard.

more literature on page 35
3043 COMMERCIAL WINDOWS / Brochure outlines the Gerkin total commercial replacement window system, designed for energy efficiency and installation ease. Units have a three-inch dead air space and wood thermal break, with many options available. / Gerkin Co.

3046 LAMINATED GLASS / A 20-page color booklet discusses in detail the four primary benefits of laminated architectural glass: safety, sound control, solar control and security. Photos show laminated glass in a range of structural applications. / Monsanto Co.

3047 HEALTH CARE DOORS / The special requirements of slide-swing patient access doors are discussed in an automatic door brochure. An all-steel entry door with slide-swing action is also offered. / Horton Automatics, Div. Overhead Door Corp. GB*

3048 AUTOMATIC DOORS / Pneumatic and electric swinging doors for a complete range of occupancy and life safety requirements are highlighted in a six-page folder. Traffic control accessories and actuators are included. / Horton Automatics, Div. Overhead Door Corp.

3049 OVERHEAD DOOR / Illustrated product sheets detailing seven different types of commercial/industrial/residential overhead doors. Information covers features, optional equipment, track details, space conditions, installation instructions, detail drawings, size range and specifications. / McKee Door Co.

If your work includes multi-residential or light commercial projects, we urge you to look into the use of steel framing. For a number of very good reasons.

First, speed. All framing components can be prefabricated into panels—up to 40 feet long—which are simply positioned, plumbed, and welded or screw attached. Each section includes the necessary openings for doors, windows, air conditioning and ventilation units. Once the structural frame is in position, the assembly can be quickly closed in—allowing inside work to proceed immediately . . . without regard to weather conditions.

Steel framing can trim several months from the construction schedule. Which means earlier occupancy and, often, substantial savings in interim financing.

Overall costs are lower than for alternative construction techniques. The assemblies are lightweight, so no heavy equipment is needed for placement. And components of the steel framework will not warp, shrink or swell . . . are incombustible . . . and are impervious to termites, rot, or varying climatic conditions.

Design freedom is virtually unlimited. These systems can accommodate a wide variety of exterior finishes—from traditional stone and brick to intricate stucco, metal, wood and concrete panels, and composite facing materials.

Write for our Technical Bulletins 131 and 136 which give complete information on steel framing.

ARCHITECTURAL WOODWORK

118 WOOD PRODUCTS / "Compass Wood" planks are part of a line of construction wood products that go from green log to finished, seasoned timber in less than 60 minutes. Thin boards are press-dried under heat and pressure, producing a plank said to shrink or swell less than conventionally dried wood. / Sentinel Structures, Inc.

120 WOOD PANELING / A German technique for paneling with wood specially grooved for clips that are nailed or stapled to furring strips—wood is untouched by nails—is now available as "Profilewood." Made from clear grain wood in three- to 20-ft lengths. / Ostermann & Scheiwe.

121 REDWOOD LUMBER / Knot-textured lumber products include kiln dried or air seasoned redwood with tight knots in a range of grades for interior use, siding, trim and millwork. / California Redwood Assn.

122 RUSTIC SIDING / This select knotty redwood siding and paneling is applicable for interiors and exteriors. The rough tight-knotted texture is accentuated with random streaks of cinnamon-toned heartwood and cream-colored sapwood. / Simpson Timber Co.

PLASTIC LAMINATES

123 METALLIC LAMINATE / "Brite Interweave" is a woven cane design in aluminum-metallic laminate, available for vertical and light-duty horizontal surfacing. "Wilsonart" laminates resist a number of commonly used organic solvents and household materials. / Ralph Wilson Plastics Co.

124 GRID DESIGN / One of five dimensional designs in the "Design Concepts" group of decorative laminates, "Graph" features thin lines geometrically set 5 mm apart on a high-gloss background. Available in six basic colors, "Graph" was designed by Barbara Ross and Barbara Schwartz of Dexter Design, Inc. / Formica Corp.

125 PLASTIC LAMINATE / "International Oak" is a plastic laminate with the appearance of oak butcher block in a mid-tone brown coloration. / Concoweld Corp.

WOOD TREATMENT

126 FIRE-RETARDANT WOOD / "NCX" fire-retardant treated wood protects against fire in exterior applications. The wood is pressure-impregnated with a specially formulated preservative solution; not affected by weather exposure or high humidity. / Koppers Co., Inc.
CLADDING/SIDING

139 ALUMINUM COMPOSITE / “Alucobond” material, a high-strength yet extremely flat and easily formed aluminum composite, is used in exterior and interior wall applications and architectural signs. It is made of two thin sheets of aluminum with a thermoplastic core. / Consolidated Aluminum Corp.

140 BEVEL SIDING / Exceptionally thick-butted bevel siding has the advantageous combination of redwood’s natural rustic beauty and its superior performance. The thick butt and resulting shadow lines make the siding walls look stronger with a deeper third dimension. / The Pacific Lumber Company.

141 REDWOOD SIDING / Air-seasoned or kiln-dried redwood plywood produces a siding material naturally resistant to fire, decay and weather. Shown used on a house designed by Lee Hayes & Associates. / California Redwood Assn.

142 ALUMINUM SIDING / “Driftwood” has a deep grain texture embossed into the metal, and is finished in two complementary shades of the same color to provide depth and contrast. The butt end of each vinyl-coated panel is extra thick for a more natural-appearing shadow line. / Alcan Building Products.

143 VINYLCOATED SIDING / Viny- Al-Wood aluminum siding, embossed with a wood grain, is finished with a coating of polyvinyl chloride said to be five times thicker than ordinary paint finishes. Viny-Al-Wood siding is backed by a non-prorated 40-year limited warranty. / Alcan Building Products.

144 PANEL SIDING / Plank side panel siding in a redwood grain comes pre- stained in two finish colors, or factory- primed for field finishing. Four-foot-wide panels are eight- or nine-foot long, shipped for easier installation. / Masonite Corp.

145 WALL CLADDING / EFG Cladding System 601 is an opaque glass wall designed to give exteriors of new and remodeled low-rise buildings an all-glass appearance. Glass panels are joined edge to edge, so that support members do not interrupt the clean line. / PPG Industries, G&B.

146 HARDBOARD SIDING / Hardboard siding with a deeply textured surface duplicating real wood siding is now offered as “Teton Stain Base.” Its surface is said to accept a semi-transparent acrylic stain using only about half the normal quantity of paint required for hardboard siding. / Georgia-Pacific Corp.

147 VINYL SIDING / “Mark 5 Vinyl-Shake” comes in an easy-to-install double-five width. Made of Duramy vinyl compound, panels are solid color clear through, and backed by a 40-year limited warranty. / Mastic Corp.
Always open.

Trus Joist Corporation's wood and steel TJ/50 series trusses are always open for ductwork, plumbing and wiring. This feature really cuts installation costs, and often eliminates the need for costly suspended ceilings.

In many 7-Eleven stores, the open-web structure is used for return air-flow to the air-conditioning system. To support roof-top mechanical units, two TJ/50 series trusses are provided, fastened together for easy installation.

Trus Joist precision engineering and stringent manufacturing requirements ensure a high-quality product that's simple to use and easy to install.

Like 7-Eleven stores, Trus Joist is local and convenient. Over 100 sales offices dot the map. 180 field representatives are always ready to respond to local problems and special requirements.

They are open to your inquiries.

Wood Technology Leader for 20 years.

TRUS JOIST CORPORATION
P.O. Box 60 A • Boise, Idaho 83707 • (208) 376-4400

COMPLIMENTARY COPY of our 94-page technical support manual will be delivered by a Trus Joist representative on request. Please write on your company letterhead to the address below.
FANCY CUT SHINGLES / Decorative cedar shingles in round and diamond patterns are now available in plywood-backed eight-ft panel form. The laminated panel requires no sheathing or furring strips, and can be nailed directly to studs. Other "fancy cut" shapes may be special ordered. / Shakertown Corp. LRC®

VINYL CASING TRIM / For use with T-Lok solid vinyl siding, vinyl channel literally becomes the new casing around doors and windows. Solid-color trim provides a custom look, eliminating the need for break-forming aluminum casing. / Mastic Corp.

FLAShING

ROOF ACCESSORIES / "Superflash" multi-seal makes any roof projection water-tight. Made of ethylene propylene diene monomer, these products are ozone- and ultraviolet-resistant with a temperature range of −60 deg. F to 270 deg F. Fittings are all stainless steel. / York Manufacturing Inc.

INSULATION

INSULATION / Now available are "FSK-25" fiberglass batts for commercial insulation, designed for areas where an insulation with flame spread of 25 or less is specified. The facing material is flame-resistant and serves as a vapor barrier. / Johns-Manville. GB LRC®

ACOUSTICAL CONTROL / fiberglass sound control batts help reduce sound transmission through steel stud wall constructions. Made especially to fit standard spacing and thickness of steel studs. / Johns-Manville. GB, LRC®

PIPE SLEEVES / Pre-slit Pipesulation thermal sleeves slip around water pipes to reduce energy usage while also prohibiting condensation buildup on pipes. / U.S. Gypsum Co.

DUCT INSULATION / This duct insulation is made with an inner layer of 1/8-in. closed-cell insulating foam and a protective outer layer of thick, heat-reflective aluminum foil to stop air leaks and insulate from temperature extremes. / Macklanburg-Duncan Co.

SHEATHING BOARD / Super Sheath foil-faced sheathing board combines insulating qualities of expanded polystyrene with highly reflective foil laminate to provide light weight, tough facing and firm backing. / Monticello Group Corp.

BLOCK INSULATION / These individually molded, place-installed, expandable polystyrene inserts are designed to fit the cores of standard two-core masonry units of 6-, 8-, 10-, and 12-in. sizes. / Korfil Inc. GB®

ROOF INSULATION / Fiberglass has replaced organic felt as the facing material used for this line of urethane roof insulation products. Porous in construction, the fiberglass facer will not retain surface moisture. Bonded to both sides of the insulation, facers are offered in asphalt-impregnated and aluminum fiberglass versions. / NRG Barriers Inc. BG®

CRICKET SYSTEMS / Six "Foamglas" roof insulation cricket systems designed to work with Pittsburgh Corning's tapered Foamglas roof insulation systems are available in 30-ft to 80-ft lengths in 10-ft increments. They form a series of peaks and valleys, all directing water to the drains. / Pittsburgh Corning Corp. ICR®

SIDEWALL SHEATHING / This nail base sidewall sheathing is made of strong insulating structural building board plus polyurethane foam with a Class 1 flame spread and with a back surface of asphalt-saturated felt. Available in 4-ft by 8-ft, 4-ft by 10-ft, and 4-ft by 12-ft. / Homasote Co. LRC®

ROOF INSULATION / Fiberglass has replaced organic felt as the facing material used for this line of urethane roof insulation products. Porous in construction, the fiberglass facer will not retain surface moisture. Bonded to both sides of the insulation, facers are offered in asphalt-impregnated and aluminum fiberglass versions. / NRG Barriers Inc. BG®

*In 1981 Sweet's Catalog File (1): General Building (GB); Light Residential Construction (LR); Engineering (E); Interiors (I); Industrial Construction & Renovation (ICR).
MEMBRANE ROOFING

MEMBRANE ROOFING / This single-ply, cold-applied roofing and waterproofing membrane for new construction and reroofing is also used as flashing for conventional coal tar bitumen built-up roof systems. The highly reflective exterior makes a significant contribution to cooling efficiency in air-conditioned buildings. / Koppers Co., Inc.

METAL ROOFING

METAL ROOFING / Certified to UL-90, the Riblok roof uses pre-drilled clips to hold the 30-in.-wide steel panels. A roll-on sealant and batten cap ensure the leakproof integrity of the sidelafts. / Kirby Building Systems, Inc.

STANDING SEAM ROOF / The Auto-Lok zinc roofing system produces a water-tight, double-lock standing seam, and includes a ventilated air space to remove condensate. Auto-Lok roofs are available in pre-weathered Microzinc 70 and mill-finish Econo-Zinc. / Ball Metal & Chemical Div. GB*

PREFORMED WALL & ROOF PANELS

PANELS AND TRIM / Bold lines, wide-coverage panel design, and careful use of color give a more tailored look to pre-engineered buildings with the “AP-3” architectural wall panel. It is 36-in.-wide with 2-in.-high double ribs on an 18-in. module. / Atlantic Building Systems.

SEAM ROOF / A stand-off clip, creating a full 1/2-in. space for insulation between roof panels and purins, has been added as an optional feature of the “AR-5000 Standing Seam Roof System.” This space acts as a thermal break to reduce heat transfer through the roof. / Atlantic Building Systems.

METAL ROOFS/WALLS / Said to combine attractive appearance, weather-tight construction, low-cost erection and long life, the Kgp-Rib roof and wall system is based on a unique installation clip, which mounts the panels without penetration, battens or sidelaft crimping required. / ASC Pacific, Inc.

PREFORMED WALLS / Insul-Therm metal wall panels sandwich three in. of polyurethane foam between G90 galvanized steel faces for a U-value of 0.05. Each integral wall panel has a 24-in. nominal coverage width, and is available up to 28-ft long. Vertical tongue-and-groove sides joints come with factory-applied sealant. / Steelite, Inc. GB, ICR*

ROOF ACCESSORIES

ROOFING FELT / Barricade single-underlayment is claimed to perform significantly better than traditional asphalt roofing felt. Wide widths and more square footage per roll facilitate easy installation. / Simplex Products Group.

WALL COPING / A new protective wall coping for masonry walls has coping extruded from rigid vinyl. Ordinary mortar is used to imbed the coping in the wall top. Then it forms a key which holds the coping firmly in place. / Tepromark International Inc. GB*

PAVER PEDESTAL / For use with single-ply and protected-membrane decks, the Pave-It system elevates, spaces, and provides drainage for paver-stone installations. Lightweight plastic units have eight vertical spacing ribs on the upper surface, and are placed below the intersecting joints of four pavers. / Envirospec Inc.
ROOFING

172 SOFFITS/FASCIA / Available in ventilated and solid versions, vinyl-coated aluminum soffits resist the moisture and condensation problems common to roof overhang areas. Matching fascia complete the roof trim installation. / Alcan Building Products.

173 FRAMING SYSTEM / System features interlocking panels with vee or square battens, three spacings, and four colors. This lightweight, high-strength system also incorporates connectors that bend to any angle. / W.P. Hickman Co., GB.

174 ROOFING TILE / Brand 117 vitreous tiles have a rain groove to prevent water from accumulating between roof and tile. Interlocking design provides exceptional wind, rain and vibration resistance, and requires only one nail per tile for installation. Frostproof glazed tiles and insulations are available in 10 colors. / International Tile & Supply Corp.

175 PRE-FINISHED FASCIA / Factory-formed Microzinc 70 fascias have a pre Weathered finish, and need no painting or maintenance. / Ball Metal & Chemical Div., GB.

176 SILICONE SEALANTS / Number 863 is a glazing and construction sealant with high structural strength. Number 864 is an architectural sealant of low modulus for applications requiring high elongation and compression recovery. Both are available in 10-gal. cartridges and 2-gal. pails in four colors. / Pecora Corp., GB.

177 JOINT SEALANT / Sonneborn's "Sonolastic HP" is one-component, non-priming, low-modulus urethane sealant designed for application in active interior and exterior joints. With proper surface preparation, it bonds to concrete, masonry, aluminum and glass without the use of a primer. It is formulated with a urethane base and is available in a wide range of architectural colors. / Sonneborn Building Products Division of Contech Inc., GB.

178 ROOFING / These fiberglass shingles have received UL approval, Class A fire rating. Recommended uses include residential and commercial. / Johns-Manville, GB, LRC.

179 ROOF SHEATHING / Thermo-ply roof sheathing is intended to be used in place of traditional plywood and/or 30 lb. felt for under-roof tile applications. When specifically used with concrete roof tiles, the building's thermal performance is claimed to be increased by at least 8 R-factors, compared with tile roofs with no underlayment. / Simplex Products Group.

180 CEDAR SHAKE PANELS / For roofs, mansards and side walls, labor-saving shake panels consist of random width 24-in. hand-split cedar shakes permanently bonded to 3/8-in. exterior plywood to form eight-ft. panels. Panels have a self-aligning feature for an 11/2-in. exposure. / Shukertown Corp., LRC.

181 FIBERGLASS SHINGLE / Made of fiberglass mat, special asphaltics and rock granules, "Glas Bilt" shingles earned the Class "A" fire resistance rating. The shingles also have a wind seal feature that uses thermoplastic dots. / Bird & Son, inc.

182 WOOD PRESERVATIVE / The new "Weather Screen" is an exterior water repellent, wood preservative stain. Available in 10 semi-transparent colors, it was developed for use on exterior wood materials such as decks, fences and siding. / Olympic Stain.

183 HEAVY DUTY COATING / Cement-base "Thoroseal" is packaged in dry powder form and gives a heavy duty coating to all masonry and concrete. It fills and seals pores and voids, assures complete protection against moisture penetration, and permits walls to breathe—unlike paint film. / Standard Dry Wall Products.

Introducing

TAMKO

TAM-GLASS

a new generation of fiberglass built-up roofing products.

The TAMKO TAM-GLASS Built-Up Roofing System offers all the advantages of conventional fiberglass — plus improved strength and a broader product line. TAMKO-produced fiberglass mat features improved tensile strength. Unique steps in our manufacturing process give TAM-GLASS fiberglass added strength in the cross-mat direction. The advantage is extra resistance to extreme stresses of thermal shock. And of course, this exclusive construction meets all requirements of ASTM D-2178-76, Type IV.

TAMKO is unique in offering a broader line of fiberglass built-up products. Many companies offer only the fiberglass ply sheet, giving you no choice of base or surfacing options. The TAMKO line includes two base-sheet types, ply sheet, and mineral-surfaced cap sheet.

Plus all the advantages of inorganic fiberglass construction. Light in weight. Superior resistance to rotting, curling, warping, fishmouthing, wrinkling, buckling, blistering, and weather oxidation. In addition, its porosity permits moderate amounts of air and moisture to escape during application.

Free 8-page brochure available. Call or write for yours today.

TAMKO Asphalt Products, Inc. P.O. Box 1404, Joplin, Missouri 64801. 417 624-6644, TWX 910-774-4521

Since 1944. The nation's only manufacturer of organic, glass, and polyester base roofing products.
High inflation. Unstable money supplies. Escalating energy costs. Each is an indicator of the economic climate confronting today's building market.

To weather the '80s, design, construction and maintenance practices must improve. In efficiency. In reliability.

That's why building teams are turning to Dow Corning silicone construction products. Perhaps the one building investment that will survive the decade. And beyond.

Unmatched weatherability.
Nothing lasts like Dow Corning silicone construction products.
They offer extraordinary resistance to moisture penetration and attack by environmental contaminants.
They respond well to the thermal expansion and contraction cycles all building materials undergo. And our silicone sealant line includes a selection of dynamic joint movement properties to match the application.

Even a clear day has its destructive element in ultraviolet light. But Dow Corning silicone construction products can handle it. Without breaking down. Without drying out. Without cracking. And year after year.

Unsurpassed reliability.
The truly critical question one can ask of a building material is "How long will it last?"

Dow Corning silicone construction products have been used successfully for more than 25 years. In certain instances, materials applied 15 to 20 years ago are still on the job. With no visible signs of deterioration.

A four-point plan.
Dow Corning's silicone construction product line can handle any sealing operation. In construction joints. In glazing applications. Especially on the roof.
Dow Corning 790 silicone building sealant, developed for expansion joints, offers the lowest modulus available today. It reliably accommodates joint expansion up to 100 percent and joint compression up to 50 percent without tearing or shearing out.

A structural glazing compound, Dow Corning 732 silicone building sealant provides high modulus characteristics and excellent adhesion. It accepts inordinate wind-load stress to ensure the success of structural glazing systems.

Ideal for all conventional sealing and glazing applications, Dow Corning 795 silicone building sealant adheres well to a wide variety of construction materials. Its low modulus properties allow for ±50 percent joint movement.

The Dow Corning silicone/urethane roof system seals in heat and cool air for up to 30 percent energy savings. It also provides long-term protection from the environment. Seamless and self-flashing, it can be installed on new or existing roofs.

For more information on Dow Corning's silicone investment plan for the construction market, write: Dow Corning Corporation, A-0009, P.O. Box 1767, Midland, MI 48640.
Together, we can weather the '80s.

Pre-fabricated panels go up fast and easy.

The inverted pyramid structure (facing page) went up fast thanks to skillful application of Dryvit pre-fabricated panels. In this case, the panels were created nearby. They could have been trucked in to the site.

Cross-section of the panel system used by the architect is shown.

1. Dryvit Insulation Board: a rigid panel of expanded polystyrene with optimum insulating characteristics. Board sizes, thicknesses and shapes are available as required by design.
2. Dryvit Reinforcing Fabric: specially woven and treated fiberglass fabric is embedded in the Primus coating to prevent surface cracking.
3. Dryvit Primus/Adhesive: Dryvit's unique plaster material mixed with Type I Portland Cement is used to adhere Dryvit Insulation Board to backup surface. It is also used to embed Dryvit Reinforcing Fabric on the face of the board.
4. Dryvit Quartzputz Finish: one of four finishes available. This synthetic plaster material has high bond strength, permanent integral color and an applied texture that provides a weatherproof, jointless exterior surface.
5. 4" x 16 ga. "C" stud at 16" O.C.
6. ⅛" exterior grade gypsum sheathing conforming to federal specification SS-L-30D, Type II, Grade W, Class 2 and ASTM C-79.

VOLCLAY PANELS
Bentonite Waterproofing Systems

Entrance is flexible: a product brochure explains how variable & height bottom rails and wear shields allow the designer to meet various code and height requirements. / Kawneer Co.

3062 ROLLING DOORS / Color catalog gives information and product specifications on metal rolling doors for service entrances in plants, warehouses and terminals. Also included are fully weather-stripped doors, UL-labeled fire doors, rolling grilles and shutters and electric operators. / Windsor Door Co.

3059 AUTOMATIC DOORS / Entrance catalog features the Swingmaste door with an electromechanical operator. Available in both surface-mounted and overhead concealed versions, the Swingmaster is a spring-close unit that requires no air, oil, or other fluids. Balanced and sliding doors are also shown; actuating control options are listed. / Besam Inc. CB*

3063 SECTIONAL DOORS / Upward-acting sectional doors for commercial and industrial applications are shown in a 20-page catalog. Also included are insulated steel and combination doors, pedestrian pass doors, and special designs with removable posts for clear-span applications. / Windsor Door Co.

3060 ALUMINUM ENTRANCES / Thermal entrance featuring Insulclad 260 aluminum doors are shown in a product brochure. Entrances are available with closers, locks, hinges, push-pulls and other hardware to meet a variety of applications. / Kawneer Co.

3061 STEEL ENTRANCES / Color photos of all “Designer Series” doors are shown in a booklet on Benchmark insulated residential entrance systems. Vista patio doors and bi-folds are also included, as well as sections on energy saving features, fire ratings, and installation procedures. / General Products Co., Inc.

3064 STEEL DOORS / The Versadoor is a 24-gauge steel unit with foamed-in-place insulation, available with flush, embossed or raised-plant faces. A color catalog illustrates a number of door configurations for multi-family and light commercial applications. / The Ceco Corp.

*In 1981 Sweet’s Catalog File (s): General Building (CB); Light Residential Construction (I); Engineering (E); Interiors (l); Industrial Construction & Renovation (ICR).
3200 STORM DOOR / Introduced recently is this company’s new fully insulating storm door, the “Thermcore.” Available in three styles, the new door is clad in rugged galvanized 24-gauge steel, filled with solid polyurethane foam, and has a complete thermal barrier to prevent heat transfer. Air infiltration is minimized by a custom-matched mounting frame, heavy weatherstripping and double vinyl bottom sweeps. Baked enamel finishes are available in a choice of white or brown. The door is being distributed in all states east of the Rocky Mountains. / Chamberlain Manufacturing Corp.

3201 INSULATED WINDOW / This four-page, full-color literature outlines the typical window problems associated with older buildings; (namely broken, vandalized and falling out windows). Six possible solutions to these problems are presented by the company’s Kalwall Replacement Units, describing their construction, operation and installation. Technical data and typical window replacement drawings are included to demonstrate how the units can be installed in any type of building. These units have U-Factor options between 15 and 40. The units are translucent, with light transmission options ranging between 2 and 83 per cent. / Kalwall Corp.

3202 LOCKING DEVICES / A 36-page pricing guide from this manufacturer details a complete line of electric locking devices and accessories, including power supplies, controls, monitoring devices and basic support equipment. / LOCKNETICS.

3203 DOORS/HARDWARE / Available is a 12-page condensed catalog of fire and industrial doors, hardware specialties, electric operators, and controls for doors and gates. Included are industrial, commercial and sound retardant doors; wood, steel, aluminum and tin-clad doors; blast, radiation, damper, X-ray and acoustical doors. Sizing guides are shown for most types of doors, giving the specified information on door thickness, configurations for sliding doors, horizontal and vertical lift doors, swinging doors and folding doors. Weights per square foot are shown along with panel thicknesses. / Richards-Wilcox Manufacturing Co.

3204 ACCESSORIES / A full line of door hardware and accessories for electric enclosures, commercial refrigeration units, food service products, acoustical chambers, test chambers, environmental equipment and heavy duty vehicles are contained in a new, free catalog from this manufacturer. The 24-page Hardware Catalog contains photos, descriptions and diagrams of hinges, latches, handles and accessory hardware to fit almost any industrial door requirement. Where applicable, explosion-venting hinges and latches, sliding door and trigger action latches, inside release handles and pull-handle levers are listed. / Kason Industries Inc.

3205 WOOD DOORS & WINDOWS / A four-color brochure shows the company’s entire line of natural wood door and window products. There are 64 wood door and window products represented in hundreds of sizes, all suitable for staining or painting. Each photographed setting incorporates accessories, wall coverings, and other decorating ideas. / Jessup Door Co., Inc.

3206 ALUMINUM ACCESSORIES / Practical aluminum entrance door pulls and push plates are now available with individualized designs, which could include a logo, design or name of firm, or room designations. Brochure is called “A New Dimension in Door Pulls and Push Plates with Logos and Designs in Two Anodized Colors.” / TAC Enterprises Inc.

3207 ACRYLIC WINDOW / Krinklig, a translucent or opaque acrylic panel used as a stained glass alternative, is being distributed by this manufacturer. Because of a fiberglass reinforcement, Krinklig is impact-resistant, lighter and is claimed to be 20 times stronger than glass. Its multi-faceted textured surface draws and refracts light in a three-dimensional manner, its color range is unlimited with a standard selection of 50 solid colors and 15 multi-hued combinations. It can be used for both exterior and interior applications, including paneling, railings, skylights, interior partitions and screens, luminous ceilings, as well as church windows. / Wiedemann Industries, Inc.

3208 TRIPLE GLAZING / An eight-page booklet, called “The Andersen Triple Glazing Answer Book,” translates technical information on triple glazing into layman’s terms. The booklet sets forth the advantages of the triple glazing in reducing chill factor near windows, and explains how it works to limit passage of indoor heat to the outdoors. Included are tables that help calculate the savings in heating costs and illustrations that describe easy installation of various types of triple glazing to most styles of the company’s windows. / Andersen Corp.

What the best insulated roof is

The Pink Stuff: Thermax® It is simply the most efficient roof insulation on the market with a Factory Mutual Class I Fire Rating over steel decks. Thermax provides more insulating efficiency per inch than fibrous glass, composite, perlite or fiberboard roof insulations. Since mechanical fastening is the preferred system of attachment to steel decks, use Insulfast rapid fastening nail/disc system - a pneumatic gun and oxide-coated nails for fast, easy, permanent installation of Thermax to steel decks.
fs are wearing these days.

The Green Stuff: Tempchek®: It gives you the same high R values as Thermax, and is used on all types of decks, except directly over steel decks. Tempchek is reinforced with glass fibers to give it greater dimensional stability than other urethane foam insulations, so it resists ‘growth’ and ridging. All of which makes Tempchek first choice for any application other than directly over steel. Talk to your Celotex representative about the stuff the best insulated roofs are wearing these days, or call Ed Levin at Celotex, Roofing Products Division: (813) 871-4545.

Hyatt Regency Hotel - Chicago
To make it easy for maintenance personnel to service the equipment in the mechanical space above a new ballroom that is part of a major addition to the Hyatt Regency Chicago, the architects-engineers selected a walk-on platform ceiling system consisting of gypsum formboard supported by Keydeck Truss Tees and poured-in-place gypsum reinforced with Keydeck Reinforcing Mesh.

According to the architects-engineers, the walk-on ceiling assembly will cost half as much as the steel catwalks provided in the ballroom of the original facility.

Cutler Ridge Shopping Center - Florida With business good enough to call for a 300,000 sq. ft. addition to the Cutler Ridge shopping center, building owners and prospective tenants wanted construction completed as quickly as possible. So ease and speed of installation added to the reasons behind specifying Keydeck® Truss Tee Subpurlins and Keydeck® Reinforcing Mesh for fabrication of the poured gypsum roof deck system. The initial low cost of the Keystone Group components was an extra bonus.

Foedert Memorial Lutheran Hospital - Milwaukee During construction of Froedtert Hospital the interstitial space between floors became a fast-tracking work area. Rather than having to erect scaffolding to install utility and air conditioning runs, causing an interruption of continued work in the functional floor areas, the walk-on platform/ceilings supported and reinforced with Keystone Group construction components supported men and materials during installation.

Write or call George Byard at (309) 697-7611 for further Information and specifications. Check our catalog in Sweet's General Building File.

ENTRANCES & STOREFRONTS

196 AUTOMATIC DOOR / This electronically-controlled sliding door can be pushed outward like a swinging door in the event of a power failure or in an emergency. / Besam, Inc.

197 STEEL ENTRANCES / The “San Francisco” line of “Benchmark” insulated steel residential entrances features a nine-panel design with choice of decorative center inserts or stained glass panes. Doors are pre-hung, complete with magnetic weatherstripped frame and threshold. / General Products Co.

GLAZING ACCESSORIES

198 WINDOW FILM / Highly resistant to abrasion, Valvac SR window insulating film provides solar protection in summer and reduces heat loss in winter. Permanently installed reflective film comes in silver, bronze and gray. / Van Leer USA, Valvac Products Div.

HARDWARE & SPECIALTIES

199 DEADBOLT LOCK / The “3200” deadbolt lock has been redesigned to provide a low-profile, featuring a 1-in. throw bolt and options of key or thumb-turn operated from the inside. / Yale.

200 LIFT-OFF HINGES / Made of black thermoplastic to resist corrosion, this line of lift-off hinges permits many mounting variations. Units can be specified in two sizes, off-set for flush doors or in-line, and with door positioning cams or for free-swinging operation. / Southco, Inc.

201 SECURE DEADBOLT / Locks in the “D-11” series provide maximum protection against drilling, prying, and break-in attempts. UL-listed high-security dead-bolt has thumbturn key option for safe, sure, exit. Two-in. bolt has a one-in. throw. / Medeco Security Locks Inc.

202 SECURITY LOCKSET / An occupancy indicator is featured on this “Key-in-Knob Hotel-Motel” lock. With the occupancy button depressed from the inside, not even another key will open the lock from the outside. / Best Lock Corp.

203 DOOR CLOSER / The “LCN 4041” Super Smeathh closer features low-rate spring power to facilitate use by the handicapped. Opening force may be set below five lb. to meet interior barrier-free requirements, or adjusted upward to satisfy exterior opening force minimums. / LCN Closers, G.B., E*

204 LEVER HANDLE / The “Kim” handle is available in antique brass, antique bronze, and satin chrome finishes. Function options include passage set, privacy lock with emergency release, and keyless entrance lock with exterior knob. / Falcon Lock.
205 WEATHERSTRIPPING / This "1410" screw-in perimeter weatherstripping is constructed of a sturdy 1/8-in.-thick extruded aluminum housing with a durable 1/4-in. by 1/4-in. extruded closed-cell neoprene sponge sealing member with a tough outer skin. Available in two finishes. / Stanley.

206 WOOD DOORPULLS / Ten solid wood or laminated doorpull designs are available in teak rosewood, oak and beech. Mounting elements come in oil-rubbed bronze, polished chrome, stainless steel, and black fluoroclad finish on aluminum or bronze. / Forms & Surfaces.

207 DOOR OPERATOR / The "Magic-Swing" operator converts electrical energy directly into mechanical motion for efficient, low-cost operation. "Magic-Swing" can be installed in header; a visible model is offered for retrofit applications. / Stanley. GB*

208 LOCKSET / "Orbit," a contemporary design, is offered in the "F" series of residential locksets. It is available in both keyed and non-keyed functions in a variety of finishes. / Schlage Lock Co., GB, LRC.*

209 LEVER LOCKSET / The "Levon" handle can be operated by handicapped users; the return feature overcomes objections to lever designs. It is offered in heavy-duty commercial and lower-cost residential versions, in a variety of finishes. / Schlage Lock Co., GB, LRC.*

210 DOOR CONTROLS / Controls are surface applied, providing ease of application for retrofit as well as new construction. "Series 1100" meets the new ANSI A117.1 and all other existing handicapped codes. / Reading Door Closure Corp.

211 HOTEL LOCKSET / Particularly suitable for hotel/motel applications, the "Spin Free" knob rotates 360 degrees in either direction. Only the room key activates the lockset from the outside, minimizing the possibility of forced entry. / Best Lock Corp.

METAL DOORS & FRAMES

212 SAFETY DOORS / As a continued offering, these "Safetyline" doors—Encore, Advent and Regent—offer safety and security features in a handsome textured panel model. Available with antique bronze, pewter and copper finishes. / Amaxlite Anaconda. GB*

213 DRYWALL FRAME / This steel drywall frame has an adjustable jamb depth of up to 1/4-in. to allow for inconsistencies in finished wall thicknesses. Designed primarily for pre-fit wood doors. Available pre-finished in several models. / Curries Mfg., Inc. GB*

214 METAL/GLASS DOORS / Four door profiles have been added to the "System 7" line in three- by seven- or three- by eight- fit sizes. Doors are offered in stainless steel, and anodized or acrylic-coated aluminum. Factory-installed tinted, clear, or reflective glazing is set in a black neoprene gasket. / Forms & Surfaces.

215 JALOUSIE DOOR / Strong enough for motel and apartment applications, this 1/4-in. aluminum door comes with extra-durable push bar, glass clips, screen, and keyed lock. Door is offered in standard anodized aluminum, or optional white or bronze. / Alcan Building Products.

216 STORM DOOR / The "Shelter-guard" aluminum storm door features efficient foam insulation, thermal-break construction, and tempered safety glass. The 1/4-in. door comes in Colonial, scalloped, and diamond styles. / Alcan Building Products.
217 RETROFIT DOOR / This "Benchmark" steel insulated door is pre-hung, and allows for use of the existing wood frame and interior trim. Deeply embossed door has dense polyurethane foam core, compression and magnetic weatherstripping, and frost-free threshold. / General Products Co., Inc.

218 SLIDING GLASS DOOR / The "Magna-Glide" patio door features all-around thermal break construction and one-in-thick tempered insulated glass. Both door and screen slide on steel ball bearing rollers; a built-in "Nite-Latch" improves security. / Three Rivers Aluminum Co., Inc. GB*

219 METAL DOOR / Hand-finished textures are cast in metallic bronze, aluminum, copper, brass, nickel, silver and simulated wood on a fiber glass core. From the "El Dorado" line of metal doors. / Pinecrest, Inc.

220 THERMALIZED WINDOWS / "Norguard" triple-glazed aluminum windows feature a full thermal break on frame and sash members plus a thermal break between frame and interior insulating panels to reduce heat loss and increase frost resistance. / Norandex Aluminum Building Products.

221 VANDAL RESISTANT / A dual-glazed, single-sash replacement window, model "610" is available with 3/8" or 3/4" thick Lexan on the exterior and/or interior. A neoprene gasket creates a tight, impact-resistant thermal seal between glazing material; the two glazing frames are mechanically separated. / Amcor Industries, Inc. ICR*

222 SLIDING WINDOW / The 3/4-in. sealed insulated glass is positioned on the exterior of "Series 1241", set into a thermal barrier frame of aluminum and vinyl. In the interior is the third window, framed in aluminum, which glides in a thermal resistant rigid vinyl track. / Continental Aluminum Products Co.

223 RETROFIT WINDOW / Model "505" double-hung aluminum window is a replacement window for commercial, institutional and industrial applications. Called a "custom fit" window, there is no need to modify the wall inside or out. / Season-All Industries, Inc. GB*

224 GLIDER WINDOW / Particularly suitable for kitchens or in crowded quarters, this glider window opens from right or left. Two sash locks on each unit improve security. An optional third lock can be positioned where desired to allow partial ventilation with intrusion resistance. / Alcan Building Products. GB*

225 AWNING WINDOWS / Aluminum awnings have a self-locking action; the vents close, a cam moves all vents into locking grooves, providing a weather-tight, intrusion-resistant fit. Window vents are removable for cleaning. / Alcan Building Products.

226 ALUMINUM DOOR / This aluminum door is 6ft-8 feet tall and affords easy access to all floors of the building. The structure is durable and can withstand even hurricane velocity winds without signs of damage. / Jim Walter Door.

227 INDUSTRIAL DOOR / Doors made with "Hetron" chemical-resistant polyester resin are guaranteed for five years against failure due to corrosion. "FRP" doors have color molded in; units are insulated to R9. / Chem-Pruf Door Co.

228 COLD STORAGE DOORS / "Mark II Electroglide" cold storage doors feature the new "PowerTron" operator with fewer moving parts for high reliability performance and low maintenance. An all-gear drive, submersed in an oil bath, eliminates V-belt wearouts and breakdowns. / Jamison Door Co. GB*
229 DOORS / "Pendador II" uses a new hardware system that retains full-swivel heavy-duty hardware to relieve stress on the strip material as high loads pass through. Rather than using spacer tubes to determine degree of overlap, the hanger bracket is designed with a series of slots. / The McGuire Co., Inc. GB, ICR*

230 FIRE DOORS / This composite-core fire door has a perimeter edge system said to provide better fire protection and daily operating performance than doors with conventional salt-treated wood edges. The new edges have virtually the same fire resistance as the door's mineral core. / Cal-Wood Door.

231 INDUSTRIAL DOOR / "Thermacore" industrial steel doors have foamed-in-place high-density polyurethane insulation, and a perimeter sealing system combined with a true thermal break in each door section for energy efficiency. / Insoport Industries, Inc.

232 TRAFFIC DOOR / Large vision areas in the "Fendor" model "4615" industrial traffic door are provided by double-glazed clear G.E. Lexan panels. The lower four feet of the door are fitted with tough, formed rubber centerpoint bumpers to absorb fork-truck impact. / The McGuire Co. Inc.

233 ELECTRIC OPENER / Driven by a solid-state controlled DC motor, the "Electra-Swing" automatic door opener has a high gear ratio (120:1) for long motor life. Open and closed speed, back check and hold-open time are adjustable. "Electra-Swing" openers are suitable for high-traffic areas. / Ronan and Kunzl, Inc.

234 SPECIAL WINDOWS

235 GLASS WALL / The "Super-Wall" system features fully insulated glass and spandrel rebate pockets, a full 1-1/2-in. thermal separator between the pressure plate and mullion stem. / Wausau Metals Corp. GB*

236 ENTRY DOOR SYSTEM / This system has new edge profile that allows the doors to be beveled. The edge profile simplifies sapping for hinges and provides better surface contact with the frame. The doors are also available with "Weatherbond" panels, warranted never to split. / E.A. Nord Co.

237 SLOPE GLAZING / This oblique wall system incorporates aluminum products specially engineered for slanted or diagonal applications needing stronger load-bearing qualities, tighter weather seals, and faster water drainage channels. / Aamarite Anaconda GB*

238 MARQUIS ENTRY DOOR / This entry door features beveled, leaded glass and Western wood for entries with limited natural light. It has a raised, decorative moulding, a matching sidelight is available. / E.A. Nord Co. LRC*

239 PANEL BIFOLD DOORS / These doors are made from pitch-free, vertical-grain Western hemlock 1-1/4-in. thick. Hardware features no metal-to-metal contact for quieter operation. They match Nord's interior doors of the same line. / E.A. Nord Co. LRC*

240 TRIPLE-GLAZED / The "T-3000" triple-weatherstripped window provides three light glazing options, including a one-in. thick insulated glass unit. The aluminum frame has baffled venting and a .375-in. neoprene thermal barrier. Narrow slat venetian blinds are suspended between outer light and insulated glass unit. / Disco Aluminum Products Co., Inc. GB*
241 ENTRY DOOR / This door has clear and etched leaded glass surrounded by a narrow strip of earthen- tone opaque glass. It uses "Weather- bond" panels that are warranted never to split through. The door is constructed with ribbed dowels that provide a tight joint between stile and rail. / E.A. Nord Co. I.R.C.*

242 BIFOLD DOORS / "Greenbrier" is an eight-panel bifold door made from vertical grain western hemlock that measures 1 1/4-in. thick to substantially increase the rigidity of the door. The tight, even grain results in a uniform finish and ribbed dowel construction provides a tight joint between stile and rail. / E.A. Nord Co. I.R.C.*

243 WOOD ENTRY DOORS / Oval and arched lights in the model "106" oak or mahogany door may be ordered with leaded glass insert with half-cut bevels, or with an etched glass oval with glass-chip background. / International Wood Products.

244 TEAK DOOR / Kiln-dried golden teak from Thailand is used in 12 solid-wood doors with hand-carved details. Entry door is constructed to withstand the most extreme weather conditions. / International Wood Products.

245 WOOD GARAGE DOOR / All-wood doors are factory-treated to have a weathered appearance, with a deep relief texture ready for staining or painting. "Weathered wood" garage doors seal tightly, and are available in all basic sizes. / Phoenix Mfg. Co., Inc.

246 DECORATIVE GLASS DOOR / The "Chateau Bordeaux", in the company's "Classical Glass" series, uses a Tiffany-style glass in Victorian-peaked windows within a wood door frame. Laminated panels feature warranted "Innerbond" construction. / Simpson Timber Co.

247 PATIO DOOR / This redesigned line of doors is intended to provide greater break-in protection and elimination of ice build-up on sliding door fills. A "Safe-T" lock system is claimed to resist 1000 lbs. of force. / Marvin Windows.

248 SILL & DOOR BOTTOM / A self-sealing sill and door bottom is claimed to be so tight that it eliminates water and air filtration, thereby reducing heat loss and moisture seepage. / Therma Tru.

WOOD & PLASTIC WINDOWS

249 CASEMENT WINDOWS / Total exterior aluminum cladding with a thermostatic coating and wood inside provides an attractive appearance with 10-W maintenance for "Carclad" windows. Caradco solar control insulated glass cuts heat loss; sash opens 90 degrees for cleaning. / Caradco Corp.

250 WOOD WINDOW / This wood single-hung window is tightly weather-stripped and available with a removable insulating double glazing panel. Prefinished both inside and out, spring balanced, and including tilting bottom sash for easy washing from the inside. Optional combination storm and screen. / Hurd Millwork.

251 WOOD WINDOW / This clad casement window fits prefinished extruded aluminum members onto selected pine sash and frame clad with extruded aluminum. Features "Roto" operators, heavy-duty concealed hinges, full 90-degree opening of sash, and 1-in. triple insulating glass. / Hurd Millwork.

252 CASEMENT WINDOW / Now available in a residential casement model, the "Nor'Clad" window combines the insulating efficiency of wood with weatherproof exterior aluminum cladding. Double-pane 1/2-in. insulating glass is standard; optional triple glazing provides additional protection. / Norco Windows, Inc.
EGP provides beauty, economy and efficiency

EGP's WEATHER-PROOF insulating units with HEAT STRENGTHENED COOL-VIEW reflective glass is used in the State Office Building, Boise, Idaho. This excellent energy efficient glass reduces summer air cooling costs and winter fuel bills.

EGP, the architectural division of Shatterproof Glass Corporation, furnishes these environmental glass products used in the construction industry. Providing architects, owners and glaziers with a total environmental glass package.

- COOL-VIEW reflective glass
- TRANS-VIEW transparent mirror
- WEATHER-PROOF 10 insulating glass
- EGP HEAT STRENGTHENED glass
- COL-SPAN spandrel glass
- TEMP-R-LITE tempered glass
- LAMINATED glass — for security, safety, sound control & detention

Forget other folding doors you've seen. Pella wood folding doors are in a class apart.

Thanks to durable wood construction combined with genuine wood veneers or high-quality, low-maintenance vinyls, these folding doors offer long-lasting service and beauty.

Thanks to outstanding mechanical design, these folding doors function smoothly, quietly, unobtrusively, year after year.

Thanks to attention to detail that's the hallmark of excellence in design, Pella wood folding doors, available in three different styles, will lend a touch of distinctive beauty to many different interior designs.

For more detailed information, send for your free copy of our full color catalog on Pella Wood Folding Doors. See us in Sweet's General Building File, call Sweet's BUYLINE number or look in the Yellow Pages under "doors," for the phone number of your Pella Distributor.

ACOUSTICAL TREATMENT

265 LINEAR LOOK / "Second Look III" ceilings combine the visual impression of a linear ceiling, with the economy and convenience of a two- or four-ft. lay in acoustical tile. Available in a "Cortega" pattern, the panel is scored three times in the long dimensions to form four six-in. strips. / Armstrong Cork Co.

266 GRAPHIC CEILING / "Gallery" matte-finished regular tiles come in 12 colors keyed to contemporary office furnishings. Office space may be visually divided by using different colors for various work areas. / Armstrong Cork Co.

267 ACOUSTICAL CEILING / Frosted Acoustone panels have a deeply textured winter-white finish over darker tones of color: green, red, yellow, blue, brown or charcoal. Available in two- by two- and two- by four-ft. sizes, Acoustone panels have a foil backing for improved insulation performance. / United States Gypsum Co.

268 SOUND CONTROL / Tackable attened® walls are fabric-covered mineral fiberboard panels with an STC of 35 or 40, and an NRC of 60. Wall system has a Class 25 Flame Spread rating; the non-woven polyester fabric covering is available in four earth-tone colors. / Conwed Corp.

269 ACOUSTIC PANELS / Panels efficiently reduce background noise and reverberation to provide food service operations with an economic method for obtaining a pleasant acoustic environment. The panels are available in a wide range of colors. Their functional design means that only 25 to 30 per cent of the reflective surfaces of a room needs to be covered. / Eckel Industries, Inc., Eckoustic Division.

270 CEILING PANEL / These soft-scape fabric-faced ceiling panels feature molded-edge design for flush-revealed or bold-revealed installation. Over 16 designer colors available, including earth tones and accents. Panels in ribbed white glass fabric also available for open-plan sound absorption and high light reflectance. / Capaul.

271 FLAT CEILING / An integrated ceiling lighting/air handling package, the Synergon 60 Luminaire Ceiling system is said to offer significant energy savings for commercial installations. Lighting fixtures include a pendant-type task fixture, suspended from two rods. / Armstrong Cork Co.

272 ACOUSTIC BAFFLES / "Designer Series" Vicra acoustic baffles consist of two-in-thick rigid glass fiber board completely wrapped in Vetricx vinyl wallcovering or Victoria fabric. Panels have no frames; U-bolts are provided for installation in existing grid system. Baffles can be hung with wire or chain. / L. E. Carpenter & Co., Inc. GB.

273 WALL PANEL / Whether wall hung or mounted on floors, "Softsound" acoustical wall panel is designed to absorb noise in commercial interiors. Specifications include an NRC of .85, Class A fire rating, woven polyester and nylon velvet fabrics, and standard sizes, from 24- by 36-in. to 48- by 60-in. / Vogel-Peterson Co.
ADHESIVES

274 SEAMING TAPE / An all-purpose thermoplastic tape. "750" tape has nine tracks of adhesive which bond quickly at the recommended heat level to jute, woven and non-woven polypropylene, unitary carpets and sized and unsized backings of Axminster, Wiltons and velvet wovens. / Bond Narrow Fabric Co.

275 MORTAR/ADHESIVES / Laticrete Universal Thin Set mortar/adhesive units consist of a liquid polymer and a powder hardener. Units are packed in a mixing pail complete with instructions. Suitable for interior and exterior applications. / Laticrete International, Inc.

CARPETING

276 LOBBY CARPETING / Constructed for heavy traffic areas such as lobbies and corridors, the Customatics carpet line includes the "Highlands" pattern shown here. A cut pile tufted of Anso continuous filament nylon, "Highlands" is available in 34 stock colorations. / Welco Carpet Corp.

277 CROSS-CHECK DESIGN / Karastan, woven of cut and looped Antron III nylon yarns, "Directorship" has a trim, tailored look for commercial areas. The light-pile carpet comes in 18 skein-dyed colorings. / Karastan Rug Mills.

278 ACCESS CARPET / Pressure sensitive adhesive secures "Surfaces," a modular floor carpet that affords access to power and telephone cables below. Cut in 600 mm module with heavy face weight fiber tufted with thermoplastic lamination. / Lees Carpets.

279 SPIKE-RESISTANT / A patterned carpet designed for golf clubs and other heavy traffic areas, "New Spike Turf" has a yarn-dyed stripe pattern. Each stripe is a mixture of three colors. A woven polypropylene backing provides dimensional stability and moisture resistance. / Stratton Industries, Inc.

280 PATTERNED VELVET / A windowpane design, "Weavepoint" heavy-duty carpet of Antron III nylon is woven on a special velvet loom that can produce geometric patterns formerly possible only on more expensive axminster or jacquard machines. / Bigelow-Sanford Inc.*

281 RAG RUGS / Hand-woven of cotton strips, rugs from Hungary and Portugal recreate the homemade rag rug of Colonial America. Custom-designed patterns of stripes and blocks come in standard sizes from three- to 11- by 16-ft., as well as special sizes to order. / Stark Carpet Corp.

282 LEVEL-LOOP NYLON / Graduated tones from dark to light form a small-scale multi-colored print in "Beacon" level-loop carpeting. Backing is moisture-proof urethane. Carpet is said to stand up to heavy traffic, and is guaranteed against wear for five years. / Trend Carpet.

283 NYLON CARPET / Two contract grades of Antron III nylon with velvet finishes have been used in carpets by Bentley Mills: "Windsors," a small-scale geometric, and "Wellington," a dense construction. / Du Pont Co.

284 CHEVRON PATTERN / "Domaine" subdued luster nylon carpet, in a special blue, brown and gray stripe, is shown laid in a chevron design to reinforce the angular traffic pattern of Los Angeles's Western Jewelry Mart Plaza. The Zefran yarn of the carpet is performance-certified for heavy commercial traffic. / Patrick Carpet Mills.

285 PUBLIC AREA CARPET / A jacquard Wilton weave, "Happiness" pattern carpeting may now be custom ordered (minimum 500 sq yds) in Zefran CR-4 yarn, a 70/30 acrylic/mellow blend. It has been Performance Certified for Class III, extra-heavy commercial traffic, and is especially suitable for such public areas as restaurants, banks and hotels. / Jack Lenor Larsen.
286 DIAGONAL BLOCK / Produced by an LCI machine that permits the reproduction of geometric Wilton-type patterns by the more economical tufting process, "Grand Royale" is available in two-tone combinations in any of the 73 stock Zefran CR-4 yarn colors. / Patcraft Mills, Inc.

287 LEAF PATTERN / A diamond/leaf pattern available in six colorways, "Trellis" is a new addition to the Royal-Ax line of heavy-duty contract carpeting. It is woven in 12-ft widths of 80 per cent wool/20 per cent nylon. / Couristan, Inc.

288 HEAVY-DUTY NYLON / Shown here installed in the Performing Arts Center of Albany, New York, Empire State Plaza, Karastan's custom woven plush of Anso nylon provides acoustical warmth, soil- and wear-resistance. Carpet is a variegated blue and green pattern, glued directly to the concrete floor. / Allied Fibers & Plastics Co.

289 LOOPED TEXTURE / The "Woolcraft Series" uses thick, boucle-knotted looped texture and Berber tones to provide a homespun feeling in contract carpeting. All-wool pile yarns are Karastan woven for a heavy, dense surface. / Karastan Rug Mills.

290 GREYWORK DESIGN / A small-scale geometric, "Constituity" contract carpeting of Antron nylon is permanently static protected. Colorways are in the natural, gray and rust families. / Lesco Carpets.

291 TWILL PATTERN / "Clubhouse" cut pile nylon carpeting stands up to the demands of golf clubs and other high traffic areas. The yard dyed pattern, a small-scale twill is available in earth, blue, burgundy, chestnut and orange colorways. "Clubhouse" has a warranty against spike damage and excessive wear. / Stratton Industries, Inc.

292 COMMERCIAL CARPET / "Gauntlet," woven of Anso IV nylon, provides long-term soil- and stain-repellency, as well as permanent anti-shock properties. Carpet is a cut and uncut design, available in 12 colors. / Bigelow-Sanford Inc. 1

293 BRAIDED RUGS / Early-American style braid rugs are custom-made from all-wool yarn. Possible designs include tweeds, solids and diagonals, as shown, and squares, ovals and rectangles of any size. / Stark Carpet Corp.

294 GEOMETRIC PRINT / A cut-pile Erika Phase VII nylon carpet, backed with jute. "Windows" has a small neat geometric print with a pattern repeat of 18 by 18 in. Treated for soil- and static-resistance, carpet carries a five-year warranty. / Trend Carpet.

295 NYLON CARPET / "Braemar II," a contract grade carpet with dense, tufted cut and loop pile, and "Quadrant," a contract grade carpet with dense, tufted loop, have been introduced by Stratton Industries using "Antron III" nylon. / Du Pont Company.

296 WOOL-LIKE NYLON / A pindot pattern of Zellon nylon, "Classic" carpeting is said to have a wool-like luster which is neither bright nor chalky. It carries a five-year wear warranty. / Patrick Carpet Mills.

297 STIPPLED EFFECT / Made of new YS75 nylon yarn, "Brawny Class II" carpeting has an unusual stippled look, and can be produced in 259 color combinations. Cut pile carpeting has a five-year wear guarantee. / Patcraft Mills, Inc.
298 PUBLIC AREA CARPET / A thick, plush carpet offered in 14 skein-dyed colors, "Tuturity" has a subtle geometric cross-weave pattern. The Anso nylon pile is durable enough for golf spike traffic in country clubs. / Karastan Rug Mills.

299 ACRYLIC CARPETING / A multilevel, 12-ft-wide carpet, "Wyngate," is available in 12 colors, ranging from light pastels to rich, deep tones. Carpet is suitable for both heavy-duty contract and residential use. / Weave-Tuft Carpet Corp.

300 BASKETWEAVE / "Berberae Check" acrylic carpeting features a basketweave texture and slubs of accent yarns mixed with berber colorings. Suitable for heavy-traffic areas, "Berberae Check" is treated to retard soiling. / Karastan Rug Mills.

301 MODULAR CARPET / With construction and surface texture identical to "Faculty II" commercial broadloom, 600mm carpet modules provide easy access to telephone and power cables located in subfloor ductwork. Quarter turn, multicolor, and basket weave effects are possible. / Lees Carpets.

302 CARPET / A custom design option is now available in short runs of modular carpet system by this manufacturer. It is offered in 600mm modules, as well as broadloom in 6- and 12-widths. Pile yarns are soil-resistant, permanently static-protected Antron nylon by DuPont. / Lees Carpets.

303 CONTRACT CARPETING / A Quadra-TAK dyed continuous filament nylon carpet, "Bright Seasons" offers subtle color shadings in a tracery pattern. Carpet is soil- and static-resistant. / Roxbury Carpet.

304 NYLON CARPET / Using Antron III nylon, Milliken introduces "Constellation," a contract carpet in pin stripe, pin dot, and solid in ten colorways. / Du Pont Company.

305 SCHOOL CARPETING / "Academy," a cut pile fabric of Teflon subdued luster nylon, was developed especially for school use. Its construction is said to be dense enough to resist raveling and running, while offering superior soil hiding and easy cleaning characteristics. / J & J Industries, Inc.

306 PATTERNED BROADLOOM / Colors such as burgundy, hunter green, navy and mahogany provide a bold background for this geometric design of white/gold dot modules. A heavy-duty broadloom, Karapoint is woven in a dense ribbed texture formed by cut and loop pile yarns of Antron III nylon, available in 19 colorways. / Karastan Rug Mills.

307 GEOMETRIC PATTERNS / A new group of contract carpets, called "Vision 1," simulate the appearance and performance of Axminsters. The collection is made entirely of Anso-X nylon fiber. Patterns range in geometric boldness. / Harbinger, A Horizon Company.

308 CUSTOM COLORS / "Intrepid" loop pile carpeting, and its companion cut pile tufted velvet "Trieste," is offered in 73 Zefran CR-4 yarn colors. Custom mohair, stripes and other modifications of these colors are also available. / Fabrica International.

309 SHADOW TONES / Constructed for the heavy traffic requirements of public interiors, "Structural" broadloom features a shadow design in berber tones to give it a noninstitutional look. Carpet is tufted of Antron III nylon in a multi-level loop texture, and comes in six colorways. / Karastan Rug Mills.

*In 1981 Sweet's Catalog File (A): General Building (GB), Light Residential Construction (LR), Engineering (E), Interiors (I); Industrial Construction & Renovation (ICR).
310 RATED CARPETING / A space-dyed level loop fabric made of Zeflon nylon, “Academic” is performance-certified for such Class I moderate traffic as offices, schools and healthcare facilities. Carpeting has a Class A flame-spread rating under ASTM E84. / Focus Carpet Corp.

311 CORDUROY EFFECT / A tufted loop carpet made of Anso IV nylon yarns. "Cordridge" commercial carpeting comes in 12 colors. Anso IV is said to ensure low maintenance characteristics in contract carpet products. / Bigelow-Sanford Inc. 1st

312 LARGE AREA CARPETING / "Panel Dot" is specifically designed for large public areas such as corridors, lobbies, etc. The axminster carpet comes in 12-ft widths, and is woven of 80 per cent wool/20 per cent nylon. / Couristan, Inc.

314 WOOL CARPETING / A berber-type contract carpeting woven in pure wool 12 ft wide. "Clouds" design is available in four colorways: bone, white, beige and flannel gray. / Weave-Tuft Carpet Corp.

315 EMBOSSED CARPET / This embossed pattern, "Ocean Crest," is offered in dense 34-ga. gauge textured loop construction made from continuous-filament 20-oz. yarn-dyed nylon. For heavy traffic with soil-hiding capability. / Armstrong.

316 NYLON CARPET / A commercial design, "Heatherton" is made of Antron III bulked continuous filament nylon in a looped texture. A woven polypropylene backing with a nylon cap provides a strong tuft bond. "Heatherton" has a five-year wear guarantee, and is priced to retail for about $10.00 per sq. yd. / Columbus Mills, Inc.

317 BROADLOOM CARPET / A checkerboard cut-and-loop construction of Zefran CR-4 acrylic/nylon yarn. "Monte Carlo" commercial carpeting is performance certified for abrasion-resistance to retain at least 90 per cent of its pile fiber for five years. / Couristan, Inc.

318 CUSTOM RUGS / All-wool rugs in custom and stock designs can be made in almost any size. Designs are produced in cut and loop pile for a feeling of depth. Illustrated is "Swirl," a standard pattern in five colors. / Logo Looms Ltd.

319 MODULAR CARPETING / Interface carpet systems are available in 60 standard color combinations to provide an almost unlimited variety of individual patterns. Custom color options further expand the design potential of this manufacturer's carpet squares. / Interface Flooring Systems.

CEILING SUSPENSION SYSTEMS

320 CEILING PANEL / "Marin" creates an unbroken surface of light through its open one-inch tangent cells in gold or silver metallic finish over acrylic, suspended from the ceiling below lamps and sprinklers / United Lighting and Ceiling Corp.

321 CEILINGS / "Renovation Ceiling Systems" are joined to existing T-frames by an exclusive grid clip assembly eliminating the need for tearing down old ceilings or removing light and ventilation fixtures. The suspended ceiling is composed of vertically installed, nominal four-in.-deep aluminum panels. / Hunter Douglas Inc., Architectural Building Products Division.
322 BEAM CEILINGS / Changes in beam direction, parallel beam islands in concealed ceilings and checkerboard patterns are all possible with this Vista system. All components are steel and carry an ASTM Intermediate Duty Rating. Available in 13 colors. / Chicago Metallic Corp. GB*

323 SPACE FRAME / Aluminum pipes and die-cast zinc junctions are the basic components of the “Pipe and Junction” space frame system that can be used either as a suspended ceiling or as space divider/shelving. Modules are 2”, 2½”, and 3-ft square. Fabric panels of cotton canvas can be attached. / Integrated Ceilings, Inc.

324 CEILING TILE / “Aurora” mineral ceiling tile provides a choice of concealed or reveal edging, as well as a fire-rated reveal tile. “Aurora” is shown here in 12” by 12”-in. concealed tiles set in four- by four-ft bays of mirrored grid. The tiles install easily around lighting and other ceiling penetrations. / Conved Corp.

325 SUSPENDED CEILING / Based on five- by five-ft channel modules, an expanded Styline 1900 ceiling series permits a nearly unlimited range of designs in modular, island and linear configurations with exposed or concealed tile. System carries a UL fire rating under two-floor-ceiling designs. / Chicago Metallic Corp. GB*

326 EXPOSED CEILING / An all-stainless-steel suspended ceiling, the Styline 1800 system was developed for interior locations where high moisture levels and corrosive vapor may be present. It has USDA approval for food processing plants. The ceiling can be washed down or chemically cleaned regularly to maintain high sanitary conditions. / Chicago Metallic Corp. GB*

327 PAINTING MATERIALS

328 WOOD FINISHING AIDS / “StainWax” seals in one operation to produce a rich, satin-like finish and to accent the woodgrain. “Danish Oil Finish” provides a soft, natural finish for new wood surfaces. “Caborthane” is a clear polyurethane finish ideal for wood subject to excessive handling, alcohol spills, and other potentially damaging situations. / Samuel Cabot Inc. GB, LRC*

329 BRONZE PANELS / An addition to the Bonded Bronze decorative metal panel line, the “600 Series” is a group of four modular panels with a common design theme in low relief. These same designs are also available in forms for elevator doors and interiors, curved walls, column cladding, counter facing, or, as shown, as complete doors with bronze or hardwood edges. / Forms & Surfaces.

330 METAL PANELS / New “2200 Series” Metal Graphics comprise three design variations in panels 46” by 96- or 120-in. long. Metals include stain-finish stainless steel, aluminum with clear or bronze anodized finish, or brass-plated steel. / Forms & Surfaces.

331 WALL TREATMENT / A new Bonded Wood design, “300 Series” random-length patterns, are available in oak, teak or redwood; finished, unfinished, or treated with Thermo-Lag fire retardant. The flexible panels can accommodate curves down to a 12-in. radius, and are applied to walls with adhesive. / Forms & Surfaces.

*In 1981 Sweet’s Catalog File (s): General Building (GB); Light Residential Construction (LR); Engineering (E); Interiors (I); Industrial Construction & Renovation (ICR).
334 REDWOOD PANELING / Solid redwood lumber is offered in tongue-and-groove panels, one side smooth-sanded and one side resawn-textured. Interior paneling comes in lengths of from eight to 12 ft and four- and six-in. widths. Redwood moldings are also available. / Windsor Mill.

335 WOOD PANELING / A solid hardwood panel for interior use, Townsend "Regal Oak" comes in 1/4-in.-thick mellow-toned planks with a variety of natural surface markings. Boards are supplied in random lengths and widths, with deep V-groove edges. / Potlatch Corp.

336 RESILIENT FLOORING

336 RESILIENT FLOORS / A new design in the Lustrecon line of no-wax sheet vinyl, "Cantobella" is a textured, terrazzo look set off by a colored grout line. Flooring is available in five natural colors, including slate gray and quarry red. / Mannington Mills, Inc. GB*

337 COMMERCIAL VINYL / "River Drive," an overall geometric pattern, is offered in the New Era sheet vinyl line. Subject to extensive use-testing, .060 gauge New Era flooring has superior abrasion- and cut-resistant characteristics, and is suitable for even the heaviest-traffic commercial applications. Floor comes in 12-ft widths, for almost seamless installation by the Interflex method. / Armstrong World Industries. GB, ICR, LR, I*

338 EDGE/DIVIDER / "Quick-Edge," a resilient flooring-to-carpet transition track, now comes with a self-stick back. Available in custom colors or four basic colors of black, brown, avocado and gold. / Mercer Plastics Co., Inc.

339 SAFETY TILE / Safe, attractive, long-wearing, and easily cleaned, this tile has a raised design to maintain its non-slip quality—water, snow, and dirt drop between rows of raised blocks. Made of molded rubber and available in several colors. / The R.C. Musson Rubber Co.

340 STRIP TILE / A close-nap carpet-like surface of specially processed rubberized fabric strips are cut from recycled heavy-duty tires to make this strip tile. The strips are non-skid, non-absorbing, and resist shrinkage. Tiles are easily swept or vacuumed and act as a wiper where dirt or moisture is a problem. / The R.C. Musson Rubber Co.

341 WOOD/VINYL TILE / "The Real Wood Collection" has square wood designs in ash, cherry, pecan, etc. molded under pressure between layers of pure vinyl to form tiles of 3/16-in. thickness. Tiles install in the same manner as conventional vinyl over concrete or wood sub-floors, and may be used in most interior areas, including kitchens. / Natural Vinyl Floor Co., Inc. GB, LR, I*

342 CLEAN ROOM FLOOR / Aristocon no-wax sheet vinyl flooring met the "Super Clean" requirements of this facility producing integrated circuits. The flooring passed severe chemical, impact, burn and solvent tests. Pattern shown is "Surf City," an over-all design in light-hued colorways. / Mannington Mills. GB*

343 WALL INSULATION / This insulation and finish system includes precast or poured-in-place concrete, unit masonry, and gypsum sheathing on metal or wood stud framing. It acts as a weather resistant, maintenance-free insulating envelope and results in facades that are lighter in weight, esthetically appealing, and crack-resistant. / Compo Industries, Inc. GB, ICR, LR, E*

344 COATINGS AND SURFACINGS / The New-Wall system incorporates the use of fiberglass material and Glidden coatings to strengthen damaged wall surfaces. The fiberglass material is available in either smooth or textured stock. / Glidden Coatings & Resins.

369 MARBLE TILE / Manufactured in France by a process that produces tiles in a six-by-six-by-5/16-in. size, marble tile available in stock in this country includes Red Royale, Rouge Turquin, Brown Tourmaline and St. Jean Fleury. / Marble Technics Ltd.
TILE

345 CERAMIC MOSAIC / Feature stripes and borders form a block and chain pattern in dramatic black and white for this ceramic mosaic floor. Border designs come in pre-mounted full sheets for ease of installation; corners and crossovers are also mounted in full sheets. / Wintburn Tile Mfg. Co.

346 RESIDENTIAL TILE / Made with a 1/4-in. body and hard surface, "Antique Series" mottled double-glazed tile is suitable for floors as well as the kitchen counter application shown here. New colors in the line are Mexican sand and gray, available in six-by-six and three-by-six-in. sizes. / Huntington/Pacific Ceramics, Inc.

347 UNGLAZED TILE / "Romany Pavers" have a frost-proof vitreous shale body with cushion edges, and may be used indoors and out in residential, commercial and institutional applications. Unglazed ceramic tile comes in three earth tone colors—red, camel and brown—and in square and rectangular shapes. / U.S. Ceramic Tile

348 CLAY PAVER TILE / Radius-corner 6 in. by 6 in. full size natural clay paver tile is available in both unglazed and glazed maintenance-free surfaces. Unglazed tiles are available in five colors with slip-resistant surfaces. Glazed tiles are offered in three neutral colors and can be ordered with the same slip-resistant surface. / Quarry Tile Co.

349 CERAMIC TILE / This glazed, fine-textured ceramic tile can be used in light-duty commercial installations as well as in residential ones. Available in five earthtones in 6-in. by 6-in. and 3½-in. by 3½-in. sizes. / U.S. Ceramic Tile Co., Subsidiary of Spartek Inc.

350 HANDMADE LOOK / "Terra Craft" tile features rounded edges, surface irregularities and slight variations in color and dimension. It is offered in the two textures shown here: "Dunes" and "Waves." Tile comes in three sizes, up to four by eight ins.; colors include almond, charcoal, cordovan, networked walnut and white. / Franciscan Ceramics, Inc.

351 HEAVY TRAFFIC TILE / "Ecological" tiles have a dark red/brown body and a flat, low-relief grid back; vitrified, impact-resistant tiles measure 12 by 12 ins. Surface of the tile is slightly mottled for a rustic appearance. "Ecological" tiles come in seven warm earth tones. / Marazzi USA, Inc. GB*

352 LARGE-SCALE TILE / Atomar5 "Spazio" series tiles measure 24 by 24-in., suitable for such areas as hotel lobbies, museums, etc. Frost-proof tile installs with minimal (1/4-in) grouting. / Marazzi USA, Inc. GB*

353 GLAZED COPPER TILE / "Serie Copper" tiles are made by fusing a layer of copper metallic powder with the clay at high temperatures. A large-format, 12-in.-sq tile, German-made "Serie Copper" has an unusual incandescent appearance. It is suitable for light traffic areas, and on walls. / Hastings Tile & Il Bagno Collection. GB*

354 CERAMIC TILE / "Sierra" is a ceramic tile for interior walls, residential floors, kitchen counters, and vanity tops. Offered with eggshell-textured surface in natural tones of white, putty, buff, gold, tanbark, brown, and blue. / American Olean Tile. GB*

355 BRICK TILE / Rugged enough for use in a shopping mall, this "Olde Town Brick" ceramic tile comes in an earthy terracotta shade. Tiles are made in four-by-eight and eight-by-eight-in. sizes, and are available in smooth or wire-cut surfaces, sold or flashed color. / Summitville Tiles, Inc.

WALL COVERING

356 FLORAL HANDPRINT / From designer Jack Foley's "Fresh & Charm- ing" collection of wallcoverings and coordinated fabric, "Montclair" floral stripe pattern works with the small print "Montrose," wallcovering. Strippable wallcoverings have a suggested retail price of $18.99 to $28.99 per single roll. / Reed Wallcoverings.

*In 1981 Sweet's Catalog File (s): General Building (GB); Light Residential Construction (LR); Engineering (E); Interiors (I); Industrial Construction & Renovation (ICR).
357 MARBLE WALLPAPERS / The look of marble can be applied to furniture, accessories, and walls in commercial and residential spaces using "Carra," "Pompeian," and "Lugano" wallpapers. Printed on heavy paper stock with lacquered waterproof finish and prepared back in 25- by 39-in. sheets. / Patterson-Piazza.

358 CUSTOM COVERINGS / As part of a collection of wallcoverings from California, "Flamingo" is a custom-designed, hand-painted, 10-ft.-high panel. / House of Verde.

359 WALLCOVERINGS / "Maytex," woven from pure Mexican sisal yarns treated for Class A fire retardant rating, now comes in four new colors: Cozumel blue, Mayan honey, Aztec straw and chicle. The pile height, 1/8-in., and an extremely tight weave provide a tough wallcovering. Available in reversible weave in 4 ft. and 12 ft. widths for walls only. / Cordemex-USA, Inc.

360 WALL PLASTER / Decorative wall plaster in a roll, the Flexi-Wall System is applied in a one-step operation like wallpaper over such unusual surfaces as concrete block, grooved wood and paneling. It produces no toxic fumes in a fire and has a Class A flame spread rating. / Flexi-Wall Systems, G8*

361 WOOL WALL FABRIC / A 100 per cent wool fabric in natural colorways from England is offered as pattern 7320 for wall surfaces and fabric wrapped panels, one of 68 designs in the "Wall 14" collection. Should be treated for fire rating. / Carnegie Fabrics.

362 VINYL WALLCOVERING / A sheeting-backed vinyl wallcovering, "Textural" pattern is offered in 15 colors. Pattern weighs 15 oz. per linear yard, and meets FS Type 1 requirements under CCC-408A with fire hazard ratings of 15-0-10. / B.F. Goodrich.

364 WALLCOVERINGS / Belgian linen and linen blends in neutral weaves are backed with acrylic or paper backing for use as wallcoverings. Can be treated to pass vertical burn standards of the National Fire Prevention Association. Paragraph 701. / Scalamandre Inc.

365 WALLCOVERINGS / "Lugano" is a new addition to L.E. Carpenter and Co.'s Vicortex vinyl wallcovering collection. A deeply etched, sophisticated texture with subtle tonation, this wallcovering is sturdy, soil-resistant, and mildew-resistant, and carries a Class A fire-safety rating. Available in 54 in. width and 24 colors. / L.E. Carpenter & Co., Inc.

366 JUTE WALLCOVERING / Imported from England, "Flight from Egypt" is a subtle chevron design woven in natural shades of jute fabric. Paper-backed wallcovering is 34 in. wide, and has a Class A flame spread rating. / Gifford, Inc.

367 RED OAK FLOORING / "Williamburg Strip" Chicksaw oak flooring is now available in a natural-finished version, ¾ by 2½-in. in random lengths to 8½-ft. Flooring is installed by blind nailing over board or plywood subfloors, or even over old floors. / Memphis Hardwood Flooring Co.

368 PARQUET FLOORING / Teak or oak parquet provides a single material for flooring, wall paneling, doors, and coordinated architectural elements. Mono-Systems 2x2 comes in two color tones in each wood species, both with a wax finish. / Forms & Surfaces.
Introducing Resopal.
The solid color glossy laminate that has two things going for it.

The gloss. And the quality.

Chances are, you think all solid glossy laminates are pretty much alike. The truth is, they’re not.
This is Resopal. The high pressure laminate that’s glossier than the other glossies. In fact, no other solid color glossy laminate equals its brilliant finish.
All because the unique Resopal process gives you a high lustre enamel-like surface. No brushlines. And nary a hint of “orange peel.”
Furthermore, Resopal fabricates easily. Requires little maintenance. (Merely wipe with a damp cloth.) And meets or exceeds all important N.E.M.A. requirements for high pressure laminates. (It’s also available with a Class I fire rating.)
Resopal comes in 4' x 8' and 4' x 12' sheets. In standard and vertical grades.
Thirteen glossy colors to start (ivory not shown). In stock for immediate delivery.
So get in touch for samples. Or contact us about a distributor in your area.
Once you get all the facts, we’re certain you’ll take a shine to us.

Yes, Matéflex has been put down at some very nice places. To name a few, there's the Williamsburg Inn in Virginia; the Ilikai Hotel in Honolulu; the Crown Center Hotel in Kansas City; the Ocean Reef Club in Florida; Tennis World of Seattle; and Galleria Plaza in Houston.

Matéflex by Mele

People keep putting us down

Indoors or outdoors, for building new courts or for resurfacing old courts, Matéflex has all the features you want in a tennis court surface—flexibility, uniform resiliency and ball bounce, instant drainage, good looks and durability. Plus, Matéflex is literally a snap to install and is maintenance-free!

Matéflex is the original tennis court surface made of rubber/polypropylene interlocking modules, proving itself in match after match, season after season. For complete details, send the coupon today.

NEW! Ask about our specially designed platform tennis court surface.

Color clear through for beauty that damage can't mar!

ACOUSTONE®

Mineral Acoustical Ceiling Panels

America's prestige ceiling—ACOUSTONE—offers you elegant colors that are not just painted on but moulded right in the mineral fiber base. No more glaring white spots from gouges and scratches. Four earthtones and six natural-texture patterns are standard. Custom-matched colors are available on a special-order basis. For details, see your U.S.G. Representative or write Sound Control Products, 101 S. Wacker Drive, Chicago, Ill. 60606. Dept. AR 1080C
Reputation
Portfolios don't come with excuses—like, "I couldn't talk the client into what I really wanted to do." You can win aesthetic battles, if you have the right ammunition. Get it from us.

Versatility
In the home, tile is at home in almost any room. In the mall, the business building and the industrial plant, every year striking new looks and uses are developed by award-winning designers and architects.

Touch
Ceramic tile is forever. It won't fade, warp, dent or peel. And neither will your image.

Sight
Never has there been the myriad selection there is today. Compared to real ceramic tile, there is no aesthetic argument for plastic, linoleum or vinyl pretenders.

Cost
Against all the temporary competition, permanent tile actually costs less to install and maintain. Send the coupon for our independently-conducted research on long-term costs. It'll help when a client says, "Sure, I love ceramic tile—but I can't afford it." He can.

Portfolio pieces.

Tile's beauty is in its sight, touch, versatility, cost...and your reputation.

Ceramic Tile

inspiration in the application of tile. And our independently-conducted research will set to rest all objections about the long-term costs of ceramic tile. Skeptical? Then send the coupon. We think we can convince you.
3100 STORAGE SYSTEM / An automated storage and retrieval system is described in a four-color brochure which lists standard and optional equipment, planning dimensions, and operational data. "Minitrieve MH" is intended for small parts handling. / Bynon Metal Products, Inc.

3101 PUBLIC TELEPHONES / Summary catalog presents a survey of a complete line of telephone booths, shelves, portable units, lock-up enclosures, coin furniture and accessories. / Benner-Nawman Inc. GB

3102 REFLECTIVE SHEET / Dura-Mir mirror-like sheet is made of Lexan polycarbonate with a mar-resistant coating. A product brochure illustrates such applications as prisons, hospitals and public and school washrooms. Cutting and installation instructions are given. / General Electric Co.

3103 MOVABLE PARTITION / A movable partition system that provides floor-to-ceiling, partial height, and open base wall surfaces is described in a four-color brochure on "Movable Partition Systems." / Modernfold.

FURNISHINGS: UCI 12

Color clear through. Now frosted, too!

ACOUSTONE® Frosted Mineral Acoustical Panels

Now America's prestige ceiling is available in beautiful, integral colors enhanced by a frosting of white for a most dramatic deep dimensional look. In 2x2' and 2x4' panels and six base colors. And they're foil-backed. See your U.S.G. Representative or write to us at 101 S. Wacker Dr., Chicago, Ill. 60606, Dept. AR 1080D

more literature on page 106
The future belongs to
USG® Z-FURRING CHANNELS permit progressive attachment in three cost-effective steps:

1. Channel attaches speedily to old or new interior masonry surfaces!
2. Mineral fiber or foam insulation friction-fits quickly in place!
3. Gypsum panels or gypsum base screw-attach fast to complete assembly!

Mineral fiber or rigid foam insulation attaches quickly and easily with USG Z-Furring Channels—the superior system for reducing energy losses in masonry, concrete and wood frame applications. Among other benefits, you'll find use of z-furring channels provides an excellent fire-resistive surface—minimizes effects of structural stresses—prevents wicking of moisture to inside surfaces. And these rigid, rust-resistant channels feature slotted web design to minimize shadowing—eliminate any chance of adhesively-attached insulation failure. Spec this versatile, low cost way to get the sound and fire ratings you expect from gypsum panel and veneer plaster assemblies. And you can count on U.S.G. for nationwide availability in 1", 1½", 2" and 3" depths. Call your U.S.G. Representative. Or mail the coupon now!

UNIVERS STATES GYPSUM

BUILDING AMERICA
3110 WORK FURNITURE / Catalog file on the “2000 System” includes a separate page on each component: desks in four depths and various heights and lengths, panels, storage units, work stations, etc. / Corry Jamestown Corp.

3111 KITCHEN CABINETS / Highly detailed and crafted kitchen cabinetry in an array of styles, finishes, and accessory components is illustrated in over 90 pages of color photos, 64 pages of specifications, and a special metric/inch detailing insert for the U.S. From West Germany. / TELSA-Contemporary Systems, Inc.

3112 WINDOW TREATMENTS / A 224-page “Encyclopedia” catalog contains information on shutters, drapes, wood Venetian blinds, shutter panels, shoji screens, hand carved doors and wrought iron decorative elements. / Pinecrest, Inc. GB

3113 POWER DISTRIBUTION / Brochure explains how “8000 Series” power panels provide design versatility in meeting a broad range of power and electrical access requirements in open office applications. / All-Steel Inc.

3114 WINDOW BLENDS / One- and two-in blinds crafted from basswood heartwood as “Heartwood” and “Heartwood Two” are displayed in four-color flyers offering brief descriptions and installation photos. / Americana Naturals.

3115 WALNUT FURNITURE / This handsome color booklet shows the “Lo” line of R-Way walnut Veneer and walnut-toned laminate top office furniture. / R-Way Furniture Co.

3116 LOUNGE CHAIR / The “Gamma” group of armchair, two- and three-seater sofas is depicted in a four-color catalog insert that includes photos, basic specifications, and design dimensions. / Castelli Furniture.

3117 KITCHEN CABINETS / This color folder includes 11 color sheets on each line of Connor cabinets and vanities, as well as base cabinet accessories. Includes full specifications and drawings. / Connor Forest Industries.

3118 FABRIC STRUCTURES / Recent fabric-roofed designs are featured in “Creating New Environments with Fiberglas Fabric Structures,” a 16-page color brochure on air-supported and tension structures. Projects described and illustrated include Bullock’s department store in California; sports and recreation complexes in South Dakota and Florida; and the Haj Air Terminal tent roof in Saudi Arabia. / Owens-Corning Fiberglas Corp.

3119 INTEGRATED CEILINGS / Owens-Corning’s 11 new integrated ceiling systems are shown in a 28-page color brochure. Full-page photographs and descriptions of the various components are given. / Owens-Corning Fiberglas Corp.

3120 CEILING SYSTEMS / Full-line catalog contains replace product photos, technical and hazard data, and installation drawings of all types of integrated ceilings. Included are “Designer” ceilings, impact and metal-face units, standard and fire rated suspensions, and mineral acoustical wall systems. / Conwed Corp. GB

3121 CEILING SYSTEM / An aluminum ceiling panel system designed to accept various luminaires and air diffusers is portrayed in a four-color, 12-page catalog which includes specifications, design details, and photos. / Alcan Building Products.

CONVEYING SYSTEMS:

3122 ESCALATOR DESIGN / An “Architect/Contractor Planning Guide” for the Modunile 100 escalator series features escalator details to 1/8-in. scale on clear acetate overlays; construction details are printed on opaque sheets. Locating the overlay to suit vertical rise and desired location produces prints which show how the Modunile 100 will place in the building, and the location of the support beams at the truss ends. / Westinghouse Elevator Co.

Now Scamp sound masking gives your “closed” office the privacy you deserve.

Just because you don’t have an open office doesn’t mean you’re not affected by noise such as typewriters, copying machines and the chatter of people using them. Even with your office door closed these sounds can seep through and hamper your work. No more! One or more decorative Scamp units for wall or ceiling, placed strategically in your office, can mask these sounds and provide the atmosphere for optimum efficiency.

The Scamp system provides speech privacy in most offices by generating a unique sound spectrum which masks unwanted speech, noise and its directivity without being intrusive itself. Scamps install quickly and easily and have music and paging capability.

Find out how Scamp can make a better working environment out of your office. Write or call us today. Also ask about Scamps for open office areas with dropped ceilings or high ceilings.

ACCESS FLOORING

383 FLOOR PANEL / These panels, designed as a raceway system throughout office buildings, are installed on the top of pedestals in 2-ft by 2-ft modules. / Tate Architectural Products, Inc.

FIREPLACES

384 FIREPLACE / The Warmmagic fireplace draws-in dual circulating layers of room air, causing them to flow over, under, along sides and back of the firebox for stove-like heating efficiency. / The Majestic Co.

385 BUILT-IN FIREPLACE / An easy-to-install, economical fireplace, the "Model MHC36 Heat Circulator" uses outside air for combustion. There are two separate airflow patterns in the sides and backwall. / The Majestic Co.

386 FREESTANDING FIREPLACE / Auburn University tests showed the Provider heat-circulating fireplace equipped with the optional outside air intake kit, to be exceptionally efficient in burning wood fuel and minimizing lost room air. / Preway Inc. LR*

387 BUILT-IN FIREPLACE / The pre-fabricated Energy Mizer IV incorporates several new energy-saving features, including using outside air for combustion, sliding glass doors, and a refractory base. / Preway Inc. LR*

GRILLES & SCREENS

388 WOOD GRILLES / Handcrafted Dowelok grilles have solid wood uprights drilled to receive a series of wood dowels at 12-in. intervals. Hardwood veneers on composite wood cores may also be used. Wood species include oak, mahogany, redwood and white fir, offered finished, unfinished, or with Thermo-Lag fire retardant. / Forms & Surfaces.

389 ROOM DIVIDERS / The Interlok grille is constructed of individual solid wood or wood veneer members fir together to form various rectilinear patterns. Grilles may be used as space dividers, on walls or on ceilings. Solid wood versions are offered in red oak, redwood and white fir. / Forms & Surfaces.

390 ROLLING GRILLES / A lightweight yet rugged security grille, the VueArt curtain is constructed of scratch-resistant, nylon-covered aluminum tubes. Grille, rails and guides may be in matching or contrasting colors; optional Lex-an panel inserts add extra protection without restricting visibility. / Kinnear Div., Harso Corp. GB*

IDENTIFYING DEVICES

391 IDENTIFYING PARTITIONS / This easy-to-assemble wall system with tubular chrome frame that holds smoked plexiglass sign is shown here in a custom application as mini-computer station in Radio Shack stores. / Unicube Corp.
392 LETTERS / Injection molded letters and numerals are manufactured of acrylic Plexiglas with the finished products measuring approximately 1/8-in. thick. Clearly trimmed and displaying a glossy smooth surface, the letters come in a variety of colors and styles. / Scott Plastics Co.

LOUVERS & VENTS

393 RIDGE VENT / Ridge Univent can be installed on roofs which have little or no ventilation at the soffit. The vent, which has been proven to be completely weather-infiltration proof, uses an exclusive weather filter that effectively blocks moisture at all wind speeds, yet retains virtually all of the net free vent area for air passage. / Air Vent Inc.

PARTITIONS

394 MOovable Partition / Floor-to-ceiling, partial-height, and open-base movable partitions are available with anodized aluminum extruded framing, hardboard and honeycomb core panels, and optional vinyl snap-on base trim. / Modernfold.

395 ACOUSTICAL SCREENS / "Series 600" screens provide sound control in the open office, with ratings of 0.90 NRC and 30 STC. Freestanding or connectable, screens come straight or curved, and are available in 18 sizes and 13 colors. "Series 100" desks are also pictured. / Conwed Corp.

396 WORK STATIONS / Movable screens in three heights and five widths provide semi-private offices. These "D03" partial-height space dividers work with a range of desk surfaces, storage components, task and ambient lighting and magnetic accessories. / The E. F. Hauserman Co.

PEST CONTROL

397 BIRD CONTROL / Stainless steel needle strips make this inconspicuous, non-intrusive, flexible structure. Easy to install on any surface and available in a variety of models for different building applications and bird species. / Nixalite of America.

398 BIRD CONTROL / Weighing less than three pounds per 1000 sq ft, "Birdnet" black plastic netting is designed to stop birds from nesting or roosting on fields or on buildings with covers or scrolls. It is ultraviolet-stabilized for long life. / Conwed Corp.

STORAGE SHELVING

399 SMALL PARTS STORAGE / Modular drawer cabinets measure over 36 in. wide by 24-in. deep, in 42- and 60-in. heights. Suspension-type drawers have many compartment and divider options, for storage of paper supplies, microfilm, art materials, computer parts, etc. / Lyon Metal Products, Inc.

400 HIGH DENSITY FILING / Electrically-operated Fullspace PD80 mobile files are constructed on heavy-duty steel carriages capable of moving 80,000 lb of payload. A key must be inserted in the master control panel to activate the system; a push-button parts or rolls the carriages in unison to provide the desired access aisle. / Lundia, Myers Industries, Inc.

SUN CONTROL DEVICES

401 STOREFRONT AWNING / All exposed hardware for the Solarair European-type retractable awning are made of anodized aluminum. A torsion bar distributes stress across the full width of the lateral-arm awning; angled elbow hinges provide positive protection from strong winds. / The Astrup Co.

402 PATIO COVER / The SunView system places translucent skylight panels between solid Woodgrain aluminum panels to regulate the amount of shade and sunlight desired. Panel tops have a white polyester finish to reflect heat. / Alcan Building Products."
TELEPHONE ENCLOSURES

404 PHONE BOOTH / This acoustically treated, walk-in, outdoor/indoor booth accepts a telephone mounted at the 54-in. coin-slot height which accommodates the handicapped as well as children. It has a sloped, stainless steel shell and an ADOO coin telephone security mounting. / Acoustics Development Corp.

405 TELEPHONE ENCLOSURE / Made to telephone company and UL standards, the "BN4000" coin telephone enclosure has a four-way lighted sign. Compact unit is constructed of vandal-resistant porcelain steel with tempered glass or matching porcelain side panels. / Benner-Nawman Inc. GB*

TOILET & BATH ACCESSORIES

406 STEAMER / "The Steamer" is designed to generate steam for enclosures up to 420 cubic feet and may be used in conjunction with a custom designed ceramic tile steam room or used to convert an existing bathtub or shower. / Amerex Corp. GB, LRC*

407 CONVENIENCE UNIT / For recessed, semi-recessed, surface or through-partition mounting in toilet compartments of women's washrooms, this stainless steel unit combine a toilet seat cover dispenser, dual paper roll holder, and sanitary napkin disposal. / The Charles Parker Co. GB*

408 EASYSOAP DISPENSER / A versatile, less expensive unit for use in office, medical buildings, homes and shops, the Cleaf dispenser is made of foam-molded plastic. The regular or anti-bacterial hand soap is packaged in 250-leaf cartridge refills. / Parachem Corp.

409 BATH ACCESSORIES / The "Grand Oak" series of bath accessories comprises a three-way viewing cabinet with storage, vanity bases with built-in drawers, linen cabinet, and solid oak toilet seat. Doors available in wooden cane and plain. / General Bathroom Products Corp.

410 PLUMBING BRACKET / A new mineral-reinforced Valox resin is used in the swivel bracket assembly of Water Pk. With heat strength and chemical resistance, the resin has eliminated possible stress cracking and creep problems in the bracket. / General Electric Co.

411 HAND/HAIR DRYERS / Rapid-air, brushless dryers may now be ordered in any custom epoxy paint color at a small extra charge. Bright chrome and white epoxy are the standard finish options. Dryers come in surface-mount and recessed versions; list price is $240 and $260, respectively. / Excel Dryer Corp. GB*

412 SOAP DISPENSER / The Disposal-valve "Soap Gun" comes loaded with a disposable liquid soap cartridge complete with throw-away plastic valve. This replaceable valve eliminates many of the maintenance problems associated with permanent metal valves. The dispenser housing is vandal-resistant stainless steel and aluminum, recessed or surface mounted. / Accessory Specialties, Inc.

413 RESTROOM CABINETRY / Vanity top, available in post-form or self-edged construction, integrates all restroom accessories, including paper towel dispenser, towel disposal, and soap dispenser. This "CRC" unit was also designed for use by the handicapped. / Ampco Products Inc. GB*

414 TOILET PARTITIONS / Solid plastic Poly-Mar HD partitions are made in one piece, with no seams to come apart. Enclosures will not rust, dent or delaminate. / Santana Products Co.

WARDROBE SPECIALTIES

415 BATHROOM CABINET / Pipedo, a single-unit cabinet for the bathroom designed by Carlo Urbiniati and imported from Italy, is ideal for tight spaces. It revolves on a 19½-in. base and stands 78 in. high. It features back to back three-shelf cupboards for medicines or cosmetics, a line compartment with pull-down flap, two drawers and a laundry basket. / Hastings Tile & Ill Bajno Collection.
The Alliance to Save Energy believes every American should know the facts about our energy situation. So it has produced a 40-page book called: “The Energy Puzzle. How you fit in.”

Knowledgeable authors and energy experts review, in understandable language, our alternative sources of energy. You will learn how coal, solar heating, windpower and other reserve sources fit into the energy puzzle.

But the compelling question is what we Americans can do now to stretch our resources. Articles on conservation, at home, at work, on the road, will help guide us to ways of saving energy, and saving money.

You, and everyone who works for you, should have a copy of “The Energy Puzzle”. For information on how to get bulk copies, write the Alliance to Save Energy.

3126 SINGLE-PLY MEMBRANES / Data on a protected membrane roof system that aids the performance of single-ply membranes discusses the advantages and disadvantages of the single-ply membranes and how this new system can help. Includes black and white photographs. / Dow Chemical U.S.A.

3127 SOLAR ENERGY SYSTEMS / Evacuated tube solar collector systems for hot water, space heating and/or air conditioning are featured in this four-page color brochure. Patented reflectors and high strength vacuum tubes allow these high-technology turnkey systems to operate efficiently even on cloudy days. Solar consulting services for various applications are explained. / Sunmaster Corp.

3128 BATH TUBS / Eight-page color booklet describes several tubs, all with unusual shapes for different uses. Also includes information on hydro-massage and lavatory vanities. / Cortina Manufacturer's Association.

3129 FAUCETS / European-style faucet for bath, kitchen and spa are shown in an eight-page color brochure on the "International Collection." Solid brass fittings are offered in chrome, 23-kt gold, pewter, antique and satin brass finishes. / Grohe America, Inc.

3130 PLUMBING FIXTURES / Moen's complete line of faucets, shower heads and valves, tub spouts, and stainless steel sinks is featured in this 32-page color catalog. The book, entitled "Enduring Elegance," shows both elaborate and simple fixtures for home uses. / Moen-Division of Stanadyne.

3131 SOLAR ROOM / Color brochure outlines the various heating effects possible with the GreenRoom passive solar room, and shows how the redwood and insulated glazing structure can be incorporated into the design of new or existing homes. Active solar heating accessories and options such as grow-beds and movable insulation are explained. / Solar Technology Corp.

3132 SOLAR ENERGY COLLECTORS / Collector ratings, engineering features and material specifications for Sun-Air solar panels are given in a color folder. A card is attached for ordering literature on other Revere solar hot water and heating systems. / Revere Solar and Architectural Products, Inc.

3133 FINNED-TUBE RADIATION / Full-line catalog describes the Versa-Line commercial finned-tube radiator, with enclosure configurations for almost any application. / Sterling Radiator.

RECORD
IMPRESSIONS
CATALOG

SEND FOR A COMPLETE, DETAILED CATALOG of “Record Impressions.” A
convenient service offering reprints of Building Type Studies, Interiors and Special
Reports. Offered are more than 50 items including the practical reference
guide, “Air Conditioning: A New Interpretation.”

Address your request to: Record Impressions, Architectural Record,
P.O. Box 457, Princeton Road, Hightstown, New Jersey 08520.

3141 STEAM BOILER / Product bulletin contains complete ratings, data and
dimensions on new Shock-Proof packaged boilers, which provide absolute
protection against thermal shock in hot water heating systems. / Kewanee
Boiler Corp.

3142 AIR CONDITIONERS / Eight-page booklet explains the “Spacemaker II”—a compact computer room air conditioner. Describes system in detail
and includes detailed data on cooling capacities as well as the unit itself. / Hiross Inc.

ELECTRICAL: UCI 16

3143 ACCENT LIGHT / Folder on the Lite-Pak high-intensity quartz fixture
illustrates how it works both as a wash light in a museum gallery and a
indirect light to accent architectural features of a Gothic ceiling. / Ram
busch.

3144 LIGHTING PRODUCTS / A condensed catalog describes a full line of
commercial, industrial, health care and specialty lighting units. Fifty-two page
booklet contains prices, product photos, dimensions and luminaire tables. / The Miller Co., Lighting Div.

3145 WATER TIGHT PLUG / Plugs are connectors that are water-tight, mud
tight, dust-tight, and corrosion-resistant to meet or exceed UL Hospital Grade
standards are explained in a four-color brochure on “Tech-Spec” products. / Bryant Division, Westinghouse Electric
Corp.

more literature on page 13
ATHLETIC EQUIPMENT

427 MAT STORAGE / The "Mat Mover" stores gym mats at ceiling level for more efficient floor space. A 10-in. diameter heavy duty corrugated tube, around which mats are rolled, is one feature of the system. Once rolled, mats are positioned in a vinyl-coated, heavy duty one-piece sling attached to a steel load bar. / Mac Press Inc.

428 COMBINATION GOAL / An official-size goal adaptable to both football and soccer play, unit is composed of two galvanized pipe sections that bolt together at their centers. Football uprights can be easily detached, and the soccer net added. / SportsPlay Products.

BANK & VAULT EQUIPMENT

429 VAULT DOOR / The American-Century vault has passed the UL test for two hours net working time to effect entry, and has been given a Class III rating. The door itself is nine-in.-thick; a UL-listed emergency vault ventilator is built into the frame. / The Mosler Safe Co. GB*

FOOD SERVICE EQUIPMENT

430 NOURISHMENT CENTER / Stainless-steel "Galley" station provides a work surface with a deep-coved corner sink and gooseneck spout. Top section can accommodate two microwave ovens; pre-plumbed base unit is a double-door refrigerator that will take various size trays as specified. / Precision Metal Products, Inc.

431 FAST FOOD / The Car Hop system consists of pivoting baskets which travel in an upright position, over aluminum tracks, from the inside food service area to the customer's car and back, at the touch of a button. The system can be expanded to many drive-in lanes, and has low power requirements. / The Mosler Safe Co.

432 WINE SERVICE / A countertop, refrigerated unit, the Winery holds three 18-litre "Bag-in-Box" house-wine dispensing containers. Taps extend through door for easy service of red, white and rose wines; an insulated removable divider allows red wines to be served at room temperature, or chilled, as desired. / Nor-Lake, Inc. GB*

LABORATORY EQUIPMENT

433 REFRIGERATORS / Uniform cabinet temperature, rapid temperature recovery, automatic condensate evaporator and adjustable shelves and drawers are among the features of a contemporary style laboratory refrigerator line. / Jewett Refrigerator Co. Inc. GB*

434 GLASSWARE WASHER / The Pullstar 5000 laboratory washer has been designed to clean a variety of laboratory glassware and utensils and trays as well. It is controlled by a microcomputer which provides easily programmed cycles that allow the operator to match wash and rinse phases to the soil and load conditions. / AMSCO/American Sterilizer Co.

435 EYE/FACE WASH / This hand-held laboratory eye/face wash fountain has a 12-ft recoiling hose, and may be used both as a wall-mounted hand-free unit and as a flexible hand-held spray. "Model 903" is especially suitable for installations where space may be a problem. / Western Drinking Fountain.

*[In 1981 Sweet's Catalog File (s): General Building (GB); Light Residential Construction (LR); Engineering (E); Interiors (I); Industrial Construction & Renovation (CR).]
LAUNDRY EQUIPMENT

436 WASHER / This high-security, two-speed washer has a perforated stainless steel washbasket designed with strategically sized and placed perforations which separate lint, sand, dirt, and other sediment from the wash. Newly designed polypropylene agitator sweeps a full 210 deg agitation stroke. / Speed Queen Co.

437 BATCH WASHER / This modular continuous batch washing system has a drive unit for each module so a problem with a motor does not shut down the entire system. Batches are transferred from one washing compartment to the next under the control of automatic programming. / Pellerin Milnor Corp. GB*

LOADING DOCK EQUIPMENT

438 SAFETY DEVICE / This self-aligning device is used to secure trucks and semi-trailers to the face of a loading dock, preventing trailer movement. / Rite Hite.

439 DOCKBOARD FRAME / This frame consists of structural angles and struts all welded to form a single, unitized assembly to enable food plants to easily maintain clean pits. This ensures equalized load distribution, ease of installation and perfect alignment. / Systems, Inc.

440 DOCK LEVELER / These levelers are designed to withstand heavier loads and perform under more loading cycles. The full-width, fully supported rear hinge withstands the continuous impact from moving fork trucks; rigid I-beam supported, non-racking deck forms a structural bridge between the building and the truck. / The McGuire Co., Inc. GB, ICR*

MEDICAL EQUIPMENT

441 MANAGEMENT SYSTEMS / This system features Unicel modular units and Open Office systems—a combination of movable partition panels, work surfaces, lights, power and communication wiring, and tables and chairs. The basic module is available in four heights and two depths. AMSCO/American Sterilizer Co.

442 BICYCLE PARKING / Made of steel with a brown Perma-guard finish, each Pedal Park unit holds two bicycles. Both front and rear tires and the frame itself are secured to the main post with the rider's own locks, placed in a protective steel cover. / Miracle Recreation Equipment Co.

PARKING EQUIPMENT

443 WOOD CABINETRY / Solid oak doors and a horizontal slat motif are some of the features of a European styled cabinet line, "Slatted Oak," for kitchens, hutch and wall systems, vanities, and bathroom cabinets. / Mutschler.

RESIDENTIAL EQUIPMENT

444 KITCHEN VENT / The Dacor "Space Saver" range hood is designed to create an eye-level space above it to accommodate a full size microwave oven, toaster/broiler, or other portable appliance otherwise requiring counter space. The ventilator has either ducted or ductless options, and incorporates a light and a power outlet. / Dacor.

445 STOVE/MICROWAVE / The "Common Sense" cooking center combines a meal-sized microwave oven mounted on top of a self-cleaning gas oven and range unit. Options include a range hood, either ducted or ductless. / Magic Chef. GB*

446 GERMAN DESIGN / "Program Carat 1304" cabinets use linen-textured laminate in beige tones, combined with a natural solid oak gripper. Kitchen cabinets feature a number of convenient storage racks and drawers. / Tielsa-Contemporary Systems, Inc.

447 GARBAGE DISPOSER / The Whirlaway in-sink disposer features a simple, five-step installation procedure. Unit is available in five sizes, up to 1/2 hp. / Anaheim Mfg.
It's defined as the power of discerning and appreciating fitness, beauty, order, or whatever constitutes excellence. It's foremost in the minds of the designers and builders of Magic Chef appliances. And it's just one of the things you can count on when you specify Magic Chef Taste in design. Quality construction. Dependable delivery. Coast-to-coast service. Magic Chef. When it's a matter of taste. And more.

Call 615-472-3371 for the name of your nearest Magic Chef sales representative—plus our new Sweet's brochure. Or write Magic Chef, Inc., 740 King Edward Avenue, Cleveland, Tennessee 37311.
ARTWORK

460 GRAPHICS / Geometric graphics are mounted on panels that can simultaneously power convenience outlets, special equipment and lighting on separate electrical circuits. The "Unigraphic" system can also accommodate single and dual circuit use. / Haworth, Inc.

461 WOOL WALL HANGINGS / These wall hangings and area rugs are made from designers' drawings, fabric samples, and photos. The design is done in all wool, ½-in.-thick, in more than three levels to give it dimension. Stock designs also can be ordered made to individual colors and sizes. / Logo Looms, Ltd.

462 LASER CARVINGS / Service allows architects to create their own laser-carved wood panels from small hardwood tiles with repeating patterns to doors and hardwood wall murals up to 4- by 8-ft. Original artworks, company logos and traditional design motifs equally adaptable with any species of wood. / Lasercraft.

463 PHOTO MURAL / Photographed by Steve Solinsky, "Canyon" is one of the large-scale photomurals offered in the Naturescapes collection. Mounted on a stretch-proof, washable synthet-ic material, low-glar Naturescapes meet all institutional standards. / Naturescapes, Inc.

CABINETS & STORAGE

464 MODULAR KITCHEN / Luigi Massoni has designed modular kitchen cabinet components based on 6-in. increments ranging from 6-in. to 48-in. Finishes include: walnut, ash, elm, plastic laminate and high-gloss colors. Pull-out baskets, corner lazy-susans and plate racks are some of the many interior components. / ICF.

465 KITCHEN CABINETS / Heavy oak fronts finished in antique stain with sculptured handles characterize the "KF" style, part of a wide range of styles and finishes in kitchen cabinetry from West Germany. Customizing conveniences include lazy-susans and specially fitted drawers. / Heidapal.

466 CREDENZA / A wine storage system comes with a light or dark oak finish as well as unfinished. The "Wine Vault Credenza" holds ten cases of wine and runs on standard 115-V service. It is portable and convenient for home or office. / Viking Leisure Products Co.

467 AUTOMATED FILING / This system is operated from a front work station that has simple keyboard controls to retrieve files in less than 30 seconds. Automated charge-out and in-file verification are also available. / Supreme Equipment & Systems Corp.

468 CABINET ACCESSORIES / Designed to accept hood inserts, 30-in. wood range hood is new from Connor. Wood door panels provide the decorative custom look. / Connor Forest Industries.
469 CABINETS / Connor introduces three new cabinet lines—Woodland Oak, with a rustic plank-style cabinet and solid oak batten edges and solid center panel; Westminster, with all-oak exterior and raised panel doors framed in solid oak; and Westminster Cathedral, with all of the above features plus cathedral-arched doors in all wall units. / Connor Forest Industries.

470 RAIL HUNG STORAGE / Hanging a storage system on a rail allows users to relocate storage units readily and without tools. This product line, "770 Plus," is offered in seven colors and one wood grain pattern. / Monitor.

FABRICS

471 VINYL FABRIC / Silk-screened vinyl upholstery fabrics stand up to hard commercial use; handprinted designs are fused into the ground surface, then coated with clear vinyl for resistance to abrasion and fading. Designed by D. Bruce Rabbino, Silver Stripe is a series of banded stripes in two colors. / Durawall Inc.

472 GLAZED CHINTZES / Floral designs in eight to ten colors for upholstery, drapery, and wallcovering have been printed on glazed chintz 54 in. wide. "Field of Tulips," (shown) is especially intended for upholstery. It is Scotchgard treated. / Decorators Walk.

474 WOOL UPHOLSTERY / Custom-colored yarns may be specified to give a unique appearance to a group of contract wool and wool blend fabrics for upholstery applications. "Pomplio" and "Napoli" are offered with standard off-white warp and standard or custom fill yarn, or with solid-color piece dyeing. / Scalamandre Inc.

475 WOOLEN UPHOLSTERY / Irish handwoven woolens styled in natural tones are available for contract upholstery in widths from 52 to 56 in. An array of weaves includes heavy textured basket weaves, interlaced squares, deep textured twill, and chevron. / Isabel Scott Fabrics.

476 REVERSIBLE FABRIC / Suitable for residential and commercial use, reversible woven worsted doublecloths come in three two-toned colorways. Small-scale patterns include stripe, criss-cross, and triangle designs. / Jack Lenor Larsen, Inc.

477 UPHOLSTERY FABRIC / "Croydon," a sturdy upholstery fabric, is color-keyed to today's basic colors and is both durable and comfortable. It is made from a 100 per cent wool face and a 100 per cent cotton backing and is imported from Germany. This flame-retardant fabric comes 54 in. wide and weighs 20.8 oz per lineal yd. / Schumacher & Co.

478 FABRICS / A rich selection in content, pattern and color. Pace fabrics include solids and prints, velvets, and textures using wool, cotton, rayon and acrylic fibers. The collection is woven in Holland, France, Switzerland, and Italy. / The Pace Collection, Inc.

479 WOOL UPHOLSTERY / Said to be suited to heavy-duty requirements is "Avanti," a wool upholstery fabric in 17 colorways at a 54-in. width. Has cotton backing. / Carnegie Fabrics.

480 SILK HERRINGBONE / A luxurious all-silk fabric in a broad herringbone weave, "Scheherazade" meets the fire-resistant standards of FAA 25.853(b). Woven in Italy, this silk fabric is available in seven colors. / Gretchen Bellinger, Inc.
481 QUILTED FABRIC / "Petrouchka" 51-in.-wide matelasse has an all-cotton face supported by a resilient wool stuffing. The fabric's quilted construction provides a heavy-duty abrasion rating for upholstery applications, with continued definition of the horizontal channels. Fabric is available in seven colorways. / Gretchen Bellinger Inc.

482 WOOL FABRIC / Woven in New Zealand of 99 per cent wool/one per cent lurex, "Vieille Garde" is flame-treated, meeting the requirement of the FAA 25.853(b) vertical flame code. Artificial lighting picks up the lurex thread grid for a day/night appearance change in the casement fabric. / Gretchen Bellinger Inc.

483 TEXTILES / The 100 per cent nylon fabric, "link," has a subtle texture created by regular skips across the weave. This understated texture gives great versatility because it avoids a patterned appearance. The line consists of fifteen colors and the fiber is extraordinarily durable. / Stow/Davis Furniture Co.

484 PLANTER / A .003-in. aluminum-clad planter is available in aluminum, bronze, brass, or gold finish with bronze color rim. The 700 series planter has a structural fiberglass core in round or rectangular versions. / Forms & Surfaces.

485 DIGITAL CLOCK / Battery-operated digital clock has extra-large 3½-by-3-in. leaf-type numerals that can be easily seen from a distance. Clock comes with a slide-in stand for counter use; there is a slot on the back for wall mounting. Quartz crystal ensures accuracy within 15 seconds per month. Suggested list price: $89.95. / Copal Corp. of America.

486 DESK/WALL TRAY / Users may mount the Correspondence Pocket and Calendar/Memo combination unit on either wall or work surface; each Cycloc acid-etch accessory has an optional steel hanger that fits the slotted members of most panel systems. Desk-top Pockets may be stacked; side-opening tray holds full-size computer printout paper. / McDonald Products Corp.

487 EXECUTIVE DESK / Walnut solids and veneers are contrasted with solid oak butcher block tops in the 8700/8800 Series of executive office furniture. Included are executive desks, table desk, and service unit (credenza). / Myrtle Desk Co.

488 WALL SYSTEM / Acoustical, curved, and see-through panels in eight widths and eight heights allow users to create own office configurations with existing furniture or available components. "Harter/Wall" comes in aluminum or oak frames with three-wire management options. / Harter Corporation.

489 DESK LINE / Wood finishes and laminates with chrome bases are the basic vocabulary for the D-6000 line of 24-in. and 36-in. deep desks and credenzas called the "Cube" series. / Corry Jamestown Corp.

490 WALNUT VENEER / The "Lo" series combines the warmth of walnut veneer with plastic laminate tops in straight-lined furniture for the general office. Pieces include desks, credenzas, bookcases, secretarial returns, executive and secretarial seating, and pull-up chairs. / R-Way Furniture Co. 14

491 MILLED PLY CHAIR / Available in both arm and side chair versions, the "Peter Danko" chair is formed of a single blanket of ply ⅛-in. laminated oak veneer, urethane filled and upholstered. Chairs will stack four high in either version. / Thonet Industries, Inc.

492 BENTWOOD STOOL / Designed by Otto Wagner for the Austrian Postal Savings Bank in 1902, this bentwood stool is the first in a series of Classic Reproductions. Legs are solid ⅛-in. squares of steam-bent American elm, with aluminum detailing caps and perforated seat of elm veneer molded plywood. / Thonet Industries, Inc.
493 CASEGOODS GROUP / The "019" furniture line has plastic laminate exterior surfaces and edges over a particleboard core. The three-drawer chest, wardrobe, nightstand and single-pedestal desk have brushed aluminum door and drawer pulls. / Thonet Industries, Inc.

494 HEALTHCARE FURNITURE / The "181" bed features four-button pneumatic control; side rails, head, and footboards are solid oak. Matching overbed table and triangular-shaped movable bedside cabinet also have solid oak tops, treated with a water- and chemical-resistant finish. / Gulf & Western Healthcare.

495 LOUNGE GROUP / Large-scale "Adagio" seating includes a 100-in. long sofa and 46-in.-wide chair. Designed by Dennis Christiansen, pieces have a sharp back, semi-hard edges, and deep, single-slab seat cushions. / Dunbar.

496 WOOD FURNISHINGS / Offered in teak, walnut and rosewood, the "Multi-Case System" is built on two basic units: a square, 31/2-in. high and wide (pictures) and a larger, 44-in.-high case. Each works with other System Cadco pieces, and may be stacked, placed back-to-back, used freestanding, set on plinth bases, etc. / Cadco Royal System, Inc.

497 MANAGEMENT DESK / Tops of the "Management II" moderately priced desk line are set off by a corner connection in bronzed anodized aluminum. Wood used is "Finegrain" oak veneer in either a natural or hickory stain. "Management II" furniture complements the "Advent" line, for the executive office. / Harvey Probber, Inc.

498 MARBLE TOP TABLES / Designed by Afra and Tobia Scarpa, the "Piedraferro" table has a pyramid base of lacquer-finished cast iron. It comes in three heights, 15\(\frac{1}{2}\), 26, and 28\(\frac{1}{2}\) in., and a number of square, round and oval top sizes. Table surface may be marble, as shown, or a special felt in black, gray or green. / B&B America.

499 OPEN OFFICE / Expanded product range in the "8000 Series" open office includes standard curved panels, plus straight and curved glazed panels. CRT and transaction work surfaces, panel-mounted task lights, and a selection of panel corner fillers are also offered. / All-Steel Inc.

500 LEISURE FURNITURE / Sun cots and umbrella groups are among the "Solaria" leisure furniture pieces in all-welded rust-free aluminum frames with baked enamel finish and seat and back straps in heavy-duty vinyl. Available in large selection of frame and strap colors for commercial use. / Lloyd Furniture.

501 MODULAR OFFICE / A total of 150 configurations are possible using basic self-contained work modules with auxiliary units, from the "M.O.S." or "Modular Office System." Each module has task lighting, wire management, and optional acoustic panels. Crafted in wood. / Modern Mode Inc.

502 SYSTEM MODULE / Specifically designed for electronic information processing equipment and operators, "System Support Modules" feature work surfaces, level adjustments, wiring accommodations, and reinforced structures for added strength. / Inter-Royal.

503 WORK SURFACE / A trapezoidal work surface has been designed as a cantilevered support for electronic equipment as part of the "Open Plan System" or "OPS." Operators can position the tops at different heights for comfortable typing and reduced glare. / GF Business Equipment.

504 SHELVES / The "Manhattan Group" casegood system features roll-front doors of ABS plastic that roll completely behind fiber board shelves fitted with filing drawers, shelving, pull-out work surface, or bottle racks. Eight configurations, seven lacquer colors. / Rudd International.
505 SHELVING / "Soft Shelves" consists of assorted canvas storage compartments suspended on a steel frame. Included are accessories for clothes, shoes, linen, and laundry. Offered KD. / Up and Co.

506 SYSTEMS FEATURES / Additions to "ASD" open office system include redesigned wall panel, widened edge trim, and modified panel post connectors, plus oak veneer, fabric colorways, restyled cabinet fronts, and stacking trays and angled supports for paper flow. / Westinghouse.

507 FACTORY SYSTEM / "Action Factory" is a modular work station, material handler, and storage system based on seeing the light industrial work process as continuous flow; it comprises panels, work surfaces, storage and dispensing containers, and transport components. / Herman Miller Inc.

508 OFFICE SYSTEMS / "Group Artex" office system, featuring space-frame construction, wall panels, work surfaces, and wall-hung components, is complemented by Earl Koepeke's ergonomic "Focus 2" office task seating, and oak or walnut lateral files. / Kimball.

509 CONVERTIBLE DESK / This desk, designed by Cini Boeri, has a top available in wood, leather or stainless steel, and a stainless steel base. Also available completely in polyester. Top folds out to seat 12 people for dining. / Turner Ltd.

510 DINING TABLE / This dining table flips open to reveal a 52- by 26-inch surface and then flips back to its 26-inch square closed dimensions. The base is made of tubular steel with mirror-polished chrome finish and the top is available in white or black plastic laminate. Designed by Eileen Gray. / Stendig Inc.

511 BAR UNIT / Three open compartments with adjustable shelves, a drawer, and a locked liquor cabinet are featured with this "Baccus" bar unit. Top and sides are edged with bull-nosed shaped hardwood, mitered at corners. Available in plastic laminate top and sides with oiled walnut or oak cabinet and bullnose edge. Polished chrome foot-rail adds elegance. / Stendig Inc.

512 NESTING TABLES / Tubular frames for these tables come in bright chrome or three damage-resistant powder-coated finishes match the frames. Tops in three sizes with plastic laminate or hardwood veneer surfaces. Companions to designer Tom Tollefsen's "Matrix" high-density stack chairs. / Krueger.

513 TABLE GROUP / Rectangular, square, and circular tables are available as the "La Loggia" group designed by Mario Bellini and crafted in solid walnut or ash bases hinged to particle-board tops with leather covering and solid hardwood bullnose edges. Bases fold flat. / Atelier International.

514 OFFICE SYSTEM / The "Marcatre" office system designed by Mario Bellini to include work station panel components, chairs, storage units, and accessories, adds beige to its available colors for PVC laminates, baked enamels, and epoxy enamels; natural wood finish is oak. / Atelier International.

515 OFFICE GROUP / The "Skagen" office furniture group of full pedestal and high profile desks, credenzas, returns, and chairs in rift-cut red oak veneers has added an "Autumn Oak" hand-rubbed oil finish to its walnut and natural oak finishes. / R-Way Furniture Co.

516 SCULPTED GLASS SEATS / Bent plate glass was used to make these seating units available with and without etching. Due to the heat process used during manufacturing, they can withstand 600 lb/sq ft. This sculptured glass furniture is suitable for residential or office interiors. / The Pace Collection, Inc.
517 VITRINE / This Vitrine features curved glass and shelving with lacquered wood frame. The vitrine is available in many sizes, and the lacquered wood frame is available in maroon or black. These sculpted glass designs can be used in residential as well as business interiors. / The Pace Collection, Inc.

518 DESKS AND CABINETS / This modular desk system is made up of a pedestal, a leg, and desk tops available in a variety of sizes. The pedestal is a steel frame clad with side and back panels and drawer and cabinet fronts. The tops can be used to make desks, cabinets, credenzas, and secretarial and executive returns. / Knoll International.

519 UPHOLSTERED PANELS / Fully upholstered curved panels equipped with an adjustable sled leg base are available in five heights. They complement UPS’s acoustical panels, available with a choice of inner construction materials that meet specific requirements for sound and speech privacy. / IG Furniture Systems.

520 DESK / Softly radiused matte black edges with polished mahogany veneer make this desk an elegant, sleek piece of office furniture. Each veneer offered—warm natural, medium, and dark mahogany—is protected by an oven-cured catalyzed vinyl finish. / IG Furniture Systems.

521 FINISH POSTS / Finish posts, used to continue panel lines where panels are connected in two- and three-way, right-angle conditions, are designed for “TriCircuit ERA-1” installations. The posts are available in wood grains and solid colors. / Haworth, Inc.

522 CONFERENCE TABLE / The most recent addition to the “Resin Table Group,” the “9300” conference table comes in two widths, 42 and 48 in., and five lengths to 10 ft. Tops and cylindrical leg supports are covered with 1/4-in. polyester resin, refinable on-site if necessary. Table is offered in any of 18 colors, with either a satin or gloss finish. / Metropolitan Furniture Corp.

523 SWIVEL ARM CHAIR / For the conference room or executive office, the “Auburn” chair has upholstered arms, seat and back for comfort. Available on casters or glides, the bases come in polished aluminium, oil-rubbed bronze, and 18 colors of paint finish. / Metropolitan Furniture Corp.

524 CONTRACT GROUPING / Jay Heumann has designed the “Avalon” group to fit medium-scale modular seating layouts. Components include a chair, love seat and sofa, for use individually or in a variety of seating arrangements. / Metropolitan Furniture Corp.

525 OFFICE SEATING / Offered in executive arm and lounge versions, as well as a secretarial chair, this office seating line was designed by Don Pettit. Construction is upholstered resilient polyurethane foam over a steel frame with well detail. / Sunar.

526 ACRYLIC FURNITURE / The “Study Center” pictured is constructed with one-in. clear faceted acrylic standards. Shelves are 1/2-in. plate glass; the desk top is 1/4-in. plate. The entire unit is shipped KD; custom sizes and colors are available. / Art Services.

527 COMPUTER DESK / “Rondo” office components feature smoothly rounded steel frames, with tops in beech veneer or laminate. The computer terminal desk shown has an adjustable wooden bar upon which the operator’s hands rest while working. Special lamp has a movable paper holder. / Dux Interiors.

528 CURVED DESKS / A Swedish design, “The Round Office” is based on desks keyed to the circle: six straight and curved sections form a complete oval. Components, including desks and coordinating shelves, side table, drawer and cabinet units, are available in natural beech as well as mahogany. / Dux Interiors.
529 OFFICE COMPONENTS / The economical Designscape system consists of “Series 800” or “960” acoustical screens and hang-on components, which include shelves, overhead storage, task lighting, work surfaces and pedestals. The system installs easily around standard desks, or works with matching wood desks and laminate surfaces. / Conved Corp.

530 OFFICE SEATING / These unique chairs incorporate a patented support system that fights fatigue by conforming to natural body movement. The chair pivots in two places—the top of the back and the seat edge. Chair can be powered up or down with a concealed power pack. Available in fabric, vinyl, or leather. / Knoll International.

531 EXECUTIVE CHAIRS / The “Daria” executive chair series features a high back, a low back, and a conference chair available either with molded polyurethane or upholstered arms with a base of molded black polyurethane on casters. Most are offered with swivel/tilt and pneumatic lift to adjust seat height and all come in imported Pace leathers, suedes, or fabrics. / The Pace Collection, Inc.

532 WALNUT FURNITURE / A furniture group by R-Way offers perfectly matched walnut veneers and practical walnut-toned laminate tops. Desks, credenzas, bookcases, secretarial and storage essentials, and executive, staff and occasional seating available. All in contemporary lines. / R-Way Furniture Co.

533 EXTENSION TABLE / Paul Mayen’s “Toronto” table has a two-in.-bulbosn edge top supported by a split cylindrical pedestal. When the top is extended, by 24-in.-wide leaves, each half of the base separates. Basic table is round, in 42-, 48-, and 54-in. diameters. Finish options include 13 lacquer colors, four woods and four burls. Suggested list: $1,200. / Intrex, Inc.

534 TABLE SERIES / “Summit” series tables are set on a segmented base, a system of modular common components for all base configurations. Parts are satin-finished aluminum; column is chrome-plated steel. Natural wood veneered tops are 1½-in. thick. / Castelli Furniture.

535 OPEN OFFICES / Hang-on furniture components work with acoustically-efficient “System Two” panels to create a productive office environment. Functional parts include files, shelving, work surfaces and drawers. / Panel Concepts, Inc.

536 TABLE / A “Cube” table is a recent addition to the “Delta Oak” furniture series, and features solid oak frame joined with dowels, oak veneer top and sides, and flat stainless steel glides. / Gunlocke Co.

537 WOOD TABLE / The cylindrical legs of this table support a smooth top that comes in natural oak, mahogany and other wood finishes. It is suitable for both contract and residential projects and was designed by Leila and Massimo Vignelli. / Turner Ltd.

538 SOFA BED / This two-seat sofa opens up to become a double bed. Back cushions turn down to become part of the mattress when the bed is in use; linens are stored in a shallow drawer. Made of urethane foam molded over a steel frame. Upholstered in a combination of foam and Dacron. May be covered in leathers and fabrics or COM. / Stendig Inc.

539 SIDE CHAIR / Built on exposed wood frames of either oak or walnut, the “Atherton” side chair has an upholstered seat and back covered in a choice of fabrics for residential or commercial applications. / Metropolitan Furniture Corp.

540 DESK SERIES / Radial edges against crisp lines distinguish William Sklaroff’s “SK7” desk series. / Gunlocke Co.
RUGS

541 AREA RUG / Kid leather cuttings have been hand-knotted to form "Gallop," an area rug designed by Flatterman in four colorways. Made in Portugal to a minimum size of 3- by 3 ft., or to order. / Jack Lenor Larson.

542 ORIENTAL DESIGN / New sizes offered in the "Gem Masterpiece Collection" of machine-made Orientals include fringed and roll runners. Fringed runners are 27 in. wide by 9-ft 6-in. or 12-ft 6-in., in either Dusty Rose or Regal Red colorations. The roll runners are also 27 in. wide, available in the Antique Royal Heriz design/Regal Red. / Couristan, Inc.

543 EGYPTIAN PATTERN / Authentic Egyptian and Tunisian designs in Berber colorations are used in the "Naturelle" collection of wool axminster rugs. Pictured is "Egyptian Lotus," available in four rug sizes, from 27- by 58-in. to 8-ft 3-in. by 11-ft 6-in. / Couristan, Inc.

SEATING

544 SETTEE / The "Fledermaus" settee was designed in 1909 by Josef Hoffmann for Vienna's Fledermaus Cafe. The settee and its companion spindleback chair have resumed production. / ICF.

545 CONTRACT CHAIR / Self-skin urethane is molded to form the seat, back, and base parts for "Leonardo" designed by Paul Tuttle. Leg and arm frames are available in ashwood, walnut, rosewood, mahogany, black or white lacquer, or metal finishes over steel. As high-volume, stools, or office seating. / Atelier International.

546 LOUNGE SEATING GROUP / The "Riva" group is composed of an armchair, two-seat sofa, three-seat sofa and a footstool. Every seat unit pulls out 3 in. to provide deeper seating. The headrest cushion folds over for added resilience, and in the armchair it pulls up for a higher backheadrest. Urethane foam-molded over steel frame. Upholstered in combination foam and Dacron. / Stendig Inc.

547 LOUNGE CHAIR / Strongly articulated upholstery welts characterize "Gamma," designed by Piazzesi. An armchair, two-seat, or three-seat lounge sofa in molded polyurethane foam over tubular steel frame with tubular steel and spring seat support and polyurethane seat cushion. / Castelli Furniture.

548 LEATHER CHAIR / Under a zipperred leather cover is a welded tubular steel frame with flexing action, "Cab" designed by Mario Bellini. / Atelier International.

549 PULL UP CHAIR / Earl Koepke has designed "Century Oak," oak-framed pull-up chairs in solid oak with natural, medium, or dark finish. Available with open or closed back, smooth or tufted upholstery. / Harter Corporation.

550 SIDE CHAIR / Architect Gianfranco Belotti designed this "Spaghetti" chair of steel tube frame and PVC "spaghetti" strands for seat and back. Designed for the dining room of the Marina Hotel in Italy in 1960, it is now available for sale in chrome or baked epoxy finish. / ICF.

551 LOUNGE GROUP / A series of single-, double, and three-seater sofa pieces in solid oak butcher block frames with radius edges and fabric-wrapped cushion supports by flexible steel mesh form the "Harbiner" group. / Tuohy Furniture Corp.

552 LOUNGE SEATING SERIES / This modular series has straight back and arms for a clean minimal silhouette. Fully cushioned with Dacron on foam, the arm is curved to form an armrest continuing along the back. Hardwood frame construction with rubber webbing. Four units included. The ends of elements are fully covered and can be re-arranged. / Stendig Inc.
553 ARMCHAIR / A continuous curving form functions as legs, arms, and back for "Ergo," available as armchair or two-seater sofa. Designed by Damir Perisic. / Brayton International Collection.

554 OFFICE CHAIRS / Seven office chairs, including executive, secretarial, and side chairs, form the "Mark I Seating" series designed by Lou Mark in laminated oak frames. Executive chairs feature segmented seat and back cushions shaped and positioned for posture support. / Harter Corporation.

555 RECLINING CHAISE / Part of the "Cicero" line of made-in-Sweden contract furnishings, this upholstered lounge chair has a multi-position, stepless motion, achieved with a friction bracket which causes each position to be balanced by the weight of the body. Chaise is available in a range of fabric and leather options, retailing for $1200 to $2200, depending on upholstery choice. / Dux Interiors.

556 PLUSH CHAIR / The "Echelon" series of office chairs is fully upholstered with a soft rolled edge and loose cushion effect. The series offers ten chairs, with and without arms, for office, guest, and conference uses. Fabric or leather available. / Vecta Contract, Inc.

557 SOFA BED / Although Alvar Aalto chose to design furniture mainly in Finland's native birch, he designed a sofa bed in 1930 using a metal frame. Available again. / ICF.

558 SOFA / "Limbo" is a lounge group available as easy chair, two-seater and three-seater sofa. Seat cushions are coil-sprung. Seams and other details are designed for leather upholstery. From the Walter K. Collection. / Brayton International Collection.

559 LOUNGE CHAIR / The seat/back of this "Eichenberger" high back lounge has a three-position pivot and is made of aniline-dyed leather in tan or black with saddle leather edge, or natural Swiss sailcloth with tan saddle leather edge. Mirror-polished chrome tubular bent steel frames come with a clamp-on table. / Stendig Inc.

560 ARMCHAIR / A closed-arm, full-back armchair, the 083 series, is available in four versions, which differ in arm treatment, oak or upholstery, and in legs, open or closed. / Tuohy Furniture Corp.

561 WOOD STOOL / Solid oak frames with radius corners and upholstery in fabric or vinyl over foam banded to contoured plywood cores characterize the "Lambda" stool with or without back. Height: 24½ in. or 30 in. to seat. / Tuohy Furniture Corp.

562 OFFICE CHAIR / Hugh Acton has designed "Bio" chair around human factors. Its three models, Manager, Taskworker, and Secretarial, feature a back which pivots and rotates, nonrestrictive arms of fiberglass-reinforced plastic, molded seat cushion, and five-star base. Pneumatic seat height adjustment is optional. / American Seating Co.

563 ENCORE SEATING / High-density foam cushions provide firm support and a waterfall front eliminates pinching in this seating collection. A free space on the upholstered arms also adds to the comfort quality. Seamless oval tubing is used throughout and bolts and fasteners are hidden. The five-model line can be ordered in earthenware treads and in a variety of other fabrics and vinyls. / Haskell of Pittsburgh, Inc.

564 CHAIR / This sturdy, light chair for desk, conference table or office has a chrome frame and an upholstered seat, back and armrests. It is available in fabric or leather. / Dux Interiors.
565 CHAIR SERIES / Steambent wood is essential to the “Defuccio Series” armchair and side chair designed by Robert DeFuccio. A flexible back post is featured for added comfort. / Gunlocke Co.

566 SEATING / The “Ayris seating Group” offers buttonless tufting for a sculptured effect and frames and bases of the same polished, seamless, round tubing. Wide cushions, soft padded arms, and comfort-angle seats included. Available in four models, each upholstered in a choice of fabrics and vinyls with fire retardant foam cushions and a sturdy plywood foundation. / Haskell of Pittsburgh, Inc.

567 LOUNGE CHAIR / Paul Tuttle has designed “Arco,” a lounge chair whose seat and back of foam-encased steel armature are upholstered in leather and supported by a highly polished chrome steel frame. / Atelier International.

568 SWIVEL TILT CHAIR / The “Giblterra” executive swivel-tilt chair uses the Vectrol swivel-tilt mechanism, a concealed double-spring torsion action that is fully adjustable and maintenance-free. Mirror chrome or thermostet finished frames available. / Vecta Contract, Inc.

569 CONTRACT SOFA / The “Arc” sofa combines two simple forms into a smoothly shaped seating unit for contract or residential use. Available in 90- and 69-in. lengths, the “Arc” may be upholstered in Prober fabrics, leathers, or COM. / Harvey Probber Inc.

570 SEATING SYSTEM / This system has perforated steel-plate construction seats and cast aluminum bases to make it durable under intensive uses. A special coating provides good weather resistance. An upholstered version also available adds a wooden shell covered in fabric fastened to the steel seat. / Turner Ltd.

571 MODULAR SEATING / The “Mikro” modular seating system consists of six units, each completed with integral black ABS plastic base. Components include inside and outside wedge seats at different angles, a table, and a non-wedge seat. / Vecta Contract.

572 SECRETARIAL CHAIRS / The “Paradigm” secretarial and high chairs use extra-high-impact styrene to make the outside seat and back shells. This provides the necessary light, yet rigid structure for these parts. Available upholstered in a black, camera-like textured finish for maximum durability or upholstered for a more tailored look. / Stow/Davis Furniture Co.

573 LOUNGE GROUP / The “Nouveau Deco” group of upholstered seating in tubular forms includes lounge chair, love seat, and sofa. / Vladimir Kagan.

574 LOUNGE CHAIR / A fluted cylindrical form in Dacron-wrapped molded frame with rubberized webbing and foam padding for seat support gives model “7270” its individuality. Velvet upholstery and polished brass base. / Shelby Williams.

575 STACKING CHAIR / A curving oak or walnut frame with continuous seat and back in contoured upholstery, with or without arms, is the basic form of the “Pyramid” stacking chair. / Monarch.

576 WICKER GROUP / Sofas, daybeds, upholstered chairs, and tables of the “Malibu” wicker group are available in eight lacquer colors and 17 colorways of polished duck or cotton canvas upholstery; structure is wicker over hardwood frame. / California Wicker.
577 BENT TUBE CHAIR / A "Bent Tube" series of upholstered lounge chair, side chair, and adjustable swivel chair, with tubular steel frames, has been designed by Paul Tuttle. / Belyerian.

578 TASK SEATING / A high degree of support and comfort, freedom of movement, and convenient comfort and function adjustments were the objectives of "Concentrix," office seating in designer's and operator's styles designed for tasks in the electronic office environment. / Steelcase.

579 RECLINING CHAISE / A durable synthetic finish protects H. Wirth's design for a reclining chaise constructed from tubular steel and wire, available in white and dark green. / Kron Architectural Complements.

580 STEEL TUBE CHAIR / Jens Risom has designed the "Tempren" chair group of cantilever side chair and straight leg chair, with or without arms, using one-piece all-welded chrome-plated steel tubing and one-piece sewn envelope upholstery over foam seat and back. / Howe.

581 OFFICE CHAIRS / Five separate adjustments—seat height, seat depth, back height, tilt tension, and armrest position—are among the features of the 360 chair group, it includes four basic functional models: management/executive, two operations styles, and staff. In aluminum frame with foam over contoured shells. / Shaw-Walker.

582 WOOD FRAME CHAIRS / The "Continuum Series" is a group of elegant wood frame conference, guest, and stacking chairs. Upholstery detailing includes French seams, and the polyfoam seat and back are flame-retardant. All chairs are 24- by 23- by 30½ in. and are available in either solid white oak or American black walnut. / Stow/Davis Furniture Co.

583 PUBLIC AREA SEATING / "Series 10" offers fully upholstered, lightly scaled seating durable enough for high-traffic public areas. The system consists of one table, two seating modules (full seat and seat back units) and one arm unit that fastens to a peripheral tubular steel frame. Eighteen satin or high-gloss colors are available for the hard-surface components. / Metropolitan Furniture Corp.

584 SEATING GROUP / John Duffy has designed the "Phoenix" group of low-back swivel chair, guest chair, and high-back swivel chair in wood and upholstered with a characteristic flaring out of the arms. / Gunlocke Co.

585 OFFICE CHAIR / The "Everybody's" chair is a nylon upholstered stool with metal base, adjustable back, and pneumatic seat height adjustment. Options: back, foot ring, round seat, three colors. / Furnipa Inc.

586 BISTRO CHAIR / This traditional bistro chair has the words "hello" there graphically incorporated into it. It is made of light, high-pressure cast aluminum and is available in machine-polished aluminum, or with an epoxy- and-polyester coating in red, white or black. / Turner Ltd.

587 COMPONENT SEATING / The "Turkish" seating group is distinguished by flowing fabric upholstery gathered to a double-welt center seam. Corner units, armless center seats, and ottomans may be mounted on bases of ebonized wood or chrome, covered in fabrics, leathers, or COM. / Harvey Prober, Inc.

588 SEATING SYSTEM / Multiple seating is provided in a beam-mounted system of seat and back units in injection molded polyurethane foam over molded plywood shells on a die-cast aluminum alloy frame; tables are white plastic laminate. Called "Axis 5000." / Castelli Furniture.
592 WIDE ARMCHAIR / Designed by deSede, the "Excalibur" chair is a full 60 in. wide and 34½ in. deep. It has a hardwood frame with rubber webbing that is cushioned with layered combination foam and dacron. Available in six deSede leathers. / Stendig Inc.

593 OAK CHAIR / This Vico Magistretti chair has a modern design that combines solid oak, soft radiuses and leather. It has three legs supporting the round seat and tubeshaped armrests. A variety of oak-based tables with glass or formica tops complement these chairs. Available from Turner. / Turner Ltd.

594 WOOD SHUTTERS / Shutters and blinds made to standards of fine furniture using solid cedar are available for custom installations, sized to meet designers' needs. Finished in hand-rubbed wood tones or paint. / Ohline Corp.

595 THERMAL SHADE / "Window Quilt" is a thermal window shade made of a five-layer sandwich of polyester fiberfill, aluminized plastic film, and a covering of off-white polyester, quilted by ultrasonic stitching. Can fit ordinary window trim. / Appropriate Technology Corp.

596 SHUTTER DRAPES / Curvilinear shutter drapes made of wood act as solar control and draft-free solid wood wall. Each shutter measures 3½-in. across. Track system self aligns. / Finecrest, Inc.

597 WINDOW BLINDS / One- and two-in. blinds crafted from basswood heartwood are offered as "Heartwood" and "Heartwood Two." Available in 27 colors with matching wood valance and color coordinated cord or standard cloth tape. / Americana Naturals.

598 WOOL CASEMENTS / Crochet-knit of heavy natural Berber-type yarns, the "Harvest Line" is suitable for use as room dividers as well as case- ments. Wool-blend fabrics are offered in four designs, each in six colorways. / Mira-X.

599 WOODEN BLINDS / Wider-slat versions of Nanik wooden venetian blind are available, with 1¼- and 2½-in. models in addition to the standard 1- and 2-in. slat width. Custom made from hardwood, blinds come in a choice of 20 natural hues. / Nanik.

600 INSULATED SHUTTERS / Insul-Shutter is an air-tight folding insulated window shutter for interior use that completely stops cold air flow. It incorporates a rigid insulation core within a beautiful solid basswood frame to efficiently block conduction, convection and radiation heat loss. A high-density polyurethane foam strip surrounds the entire opening and lines the tongue-and-groove interlocking joint. / Insul-Shutter, Inc.

Creativity starts here.

Today the office is a personal workspace, and the choice of office chair reflects the user as well as the work that has to be done.

Whether you are furnishing an office for an architect or a computer programmer, a secretary or a corporate vice president, the Shaw-Walker 360 Chair will make the user feel at home in the working environment.

It comes in 18 different models—including 4 counter-height chairs—and a wide range of colors, fabrics, and finishes.

For further information and a copy of our new 360 Chair brochure, call your Shaw-Walker representative or write Shaw-Walker, Muskegon, Michigan 49443.
Design flexibility.

Instant habitats

Unicube is the most versatile tubular chrome system ever designed. Habitats, exhibits, displays and store fixtures can be created to your specifications. Assembly is fast and easy, too. Unicube is available in ½", ¾", 1¼" and 2" diameters. For FREE catalog write on your letterhead to: Unicube Corp. Dept. A-10, 540 Manida St., Bronx, N.Y. 10474. Tel. 212/378-1700.

3146 REFLECTOR LAMPS / General Electric's elliptical reflector lamps are shown in this four-page color folder with pictures, drawings, charts, and energy savings data. The light beam focuses two in. ahead of the lamp and then spreads out, so little light is trapped by fixture baffles. / General Electric Co.

3147 METAL HALIDES / A four-page brochure explains the new 325-Watt "Watt-Miser" Multi Vapor lamps. Both clear and phosphorescent lamps are shown with performance data and energy-saving information. With this lamp, as energy costs go down, light levels are increased to have more efficient light for less watts. / General Electric Co.

3148 FLUORESCENT LAMPS / Four-page color folder describes General Electric's "Maxi-Miser II" systems that use fewer watts and cut energy costs up to 21 per cent with no loss of light. Data on cost savings and "Maxi-Miser II"'s performance is given along with general specifications and data. / General Electric Co.

3149 OVERHEAD LIGHTING / Colorful booklet illustrates a new ambient-task interior lighting system and equipment. Information including economic analysis, effects of body shadows, horizontal footcandles, and equivalent sphere illumination is given plus comparisons with direct fluorescent lighting. / Sterner Lighting Systems, Inc.

3150 OUTDOOR LIGHTING / A 96-page "work book" catalog presents lighting products in six divisions: site lighting, sharp cutoff luminaires, downlighting, low profile lighting, surface lighting, and floodlighting. Based on an outdoor task lighting approach, the Lightolier catalog includes isolux charts, footcandle values, and color product-in-place photos. / Lightolier.

3151 WIRING DEVICES / This maker's "Interior Design" collection of switches, receptacles and wallplates is covered in a 24-page catalog. Featured products include rocker switches which can be imprinted with logos or descriptive information. Most devices are provided in eight different colors with wallplates to match. / Slater Electric Inc.

3152 SERVICE BOXES / Telephone and CATV service boxes for exterior and interior locations are shown in a four-page catalog. Product information includes photos of each service box model. / Benner-Newman, Inc. GB*

3153 GARAGE DOORS / "Finishing Touch" brochure illustrates custom residential garage doors in styles, materials and textures to suit any house type. / Windsor Door Co., Div. Ceco Corp.

3154 PADDLE FANS / Brochure on 48-in. industrial/commercial paddle fans explains how the direct-drive units lower heating and cooling costs in factories, retail stores, indoor sports facilities, auditoriums, etc. New features include a swivel mount for easy fan installation on exposed beams or vaulted ceilings. / Nutone Housing Products Group.

3155 TOTAL PROTECTION / A product booklet describes the Delta 1000 as a single, integrated building protection system that performs all the functions of several independent systems. Access control, fire, vandalism and employee dishonesty problems are monitored from one computerized command center. / Honeywell.

3156 ALARM / New glossy color folder described Flexi-Alarm—an advanced monitoring and control unit—and Flexi-Alert—an emergency voice communications center. Includes a diagram of the system's components. / Gamewell Corp.

3157 CIRCULATING FANS / This 20-page brochure covers the entire line of Hunter ventilating and circulating fans for residential, commercial, and industrial uses, with application photos. Includes whole-house ventilators, air-spread fans, window fans, oscillating fans, attic exhausters, office fans, and "Hustler" fans. Also, data on accessories, specs, and installation tips are included. / Comfort Conditioning Division of Robbins & Myers, Inc.

3158 CEILING FANS / Full-color, 16-page brochure tells the history of the old-fashioned paddle-blade Hunter ceiling fan and why it is making a comeback today as an energy-saver. Illustrates many models, styles, colors, new decorating ideas, accessories, and blade and control options. Includes installation tips. / Comfort Conditioning Division/Robbins & Myers, Inc.

3159 TRACK LIGHTING / 122-page book covers NuTone/Sterling's track and recessed lighting with color pictures and lots of diagrams on each lamp style showing different uses. Includes spot lights, down lights, unbreakables and light sculptures for residential and commercial applications. / NuTone/Sterling.

3160 SOUND DIVIDERS / Brochure describes the prewired sound dividers by Owens-Corning that provide complete, enclosed electrical and communication channels to all work stations. / Owens-Corning Fiberglas Corp.

3161 TELEPHONE CABLE / A four-color brochure illustrates the design and technical features of "Teletape," a flat underwater telephone cable with a nominal thickness of 0.035 in. / Brandex.
AIR-SUPPORTED STRUCTURES

613 STRUCTURAL FABRIC / Woven of glass fiber and coated with DuPont Teflon Sheertex in a permanent architectural fabric, shown here at Florida Festival in Orlando, Florida. / Chemfab, Birdair Structures Division. GB, E, ICX*

614 FABRIC STRUCTURES / A permanent fabric structure made in fiberglass fabric coated with Teflon was used over the 105-acre Haj Terminal in Saudi Arabia. / Owens-Corning Fiberglas Corp. GB, ICX, E*

INTEGRATED CEILINGS

615 CEILING PANELS / These colorful panels can be suspended flat or at any angle between 5 and 30 deg. Decorative panels available in a broad range of designs and colors for code-approved "Envex" inserts. / Envel Corp. GB, E*

616 REFLECTIVE CEILINGS / A new line of high-styled commercial ceiling with a clear reflective surface called "Reflections" has been introduced. This latest addition is a 2-by-2-ft lay-in unit with acoustical properties and is available in mirror silver, bronze, reflective black and brushed-aluminum. / Armstrong World Industries, Inc.

617 CEILING SYSTEM / "Synercon 60" is an integrated ceiling system combining module-defining grid, lighting fixtures such as recessed troffers and pendant task lighting, and air handling options. / Armstrong World Industries, Inc.

618 LAY-IN CEILINGS / Featuring four earth-tone colors plus black and brown, the new "Cortega Colortone" mineral-fiber lay-in ceiling comes in a non-directional fissured design. Available in 2-by-4-ft lay-in panels and 2-by-2-ft regular-edged panels. / Armstrong World Industries, Inc. GB.

619 COLORED CEILING / "Gallery," a new line of 2-by-2-ft lay-in regular ceilings, is offered in 12 matte-finished colors. The new ceilings provide acoustical performance with an NRC range of .53-65 / Armstrong World Industries Inc. GB.

SOUND & VIBRATION CONTROL

620 SOUND CONTROLS / Panels of Fabrasorb Teflon-coated fabric were hung in the St. Louis, Mo., Checkerboard arena to correct a high sound reverberation time, and to dampen focused reflections from the roof. / Chemfab, Birdair Structures Div. GB, ICX, E*

SWIMMING POOLS

621 DIVING TOWER / "Duradapt" one- and three-meter diving towers feature cantilevered styling and side ladders that permit installation in pools even where deck space is limited. / KDI Paragon Inc. GB*
CONVEYORS & CHUTES

634 MONORAIL / Autotrac monorail combines the advantages of an electrically-powered system with the economy and light weight of a manual model. It consists of independently controlled carriers suspended from an overhead track. Operates from speeds of 200 ft per minute to 50 ft per minute. / Acco Industries Inc., Crane & Monorail Systems Division.

635 VERTICAL CONVEYOR / Whizlift consists of an upright carousel containing a rugged elastic and fabric retaining cover that holds the load firmly against a belt conveyor. Items are held firmly in place even when vertical. / W & H Conveyor Systems, Inc.

636 MATERIAL DISTRIBUTION / The Amscar 7000 operates in reverse as well as forward to automatically keep materials and supplies constantly moving to delivery points with minimal human contact. To enhance infection control, it takes a bath automatically after each soiled trip. / AMCOS/American Sterilizer Co.

ELEVATORS

637 ELEVATORS / This microcomputer-based elevator system is the most advanced in the market. The "Elevonic 101" solid state control system can issue orders to any part of the elevator system, receive immediate feedback and change its instructions within a split second. / Otis Elevator Co., GB*

638 GLASS WALLED CAB / A standard cab for use with hydraulic and traction elevators has a glass rear wall. Installed in shopping malls and other areas where the hoistway is open, the glass wall affords passengers a view. / Dover Corp.

HOISTS & CRANES

639 JIB CRANE / For lifting in a defined area or as a supplement to overhead cranes, these freestanding jib cranes provide 360-degree continuous rotation. Available in capacities to 5 tons with spans and height under the boom from 8 to 20 ft. / Acco Industries Inc., Hoist & Crane Division.

640 TRUCK-MOUNTED CRANE / The "4000" crane can be set up and remote-controlled by one worker for such load-lifting and positioning jobs as steel erection and span placement, rooftop hvac work, solar panels, etc. / BH Hoist Co.

LIFTS

641 WHEELCHAIR LIFT / A compact version of the Porch-Lift, "Model 41" is said to be ideal for eliminating architectural barriers where installation space is limited. The all-steel unit may be installed indoors or out. / American Stair-Glide Corp. GB*

MOVING STAIRS & WALKS

642 ESCALATOR / Now manufactured in this country, the Paragon escala- tor combines a slim, space-saving profile with built-in safety features. It is currently available in all traditional speeds and sizes. / Schindler Haughton Elevator Corp. GB*
Montgomery Saves Energy and Increases Elevator Reliability at Deere & Company Administrative Center

The Deere & Company Administrative Center enjoys the finest in elevator service, efficiency and reliability with Montgomery elevators. The elevators are equipped with the SSC-6010®, a solid state elevator power control system that reduces elevator power consumption up to 25%. The SSC-6010® incorporates static control for adjustable speed, acceleration/deceleration, precise leveling accuracy and smooth stops. MIPROM®, a microprocessor elevator logic control, is also part of the Deere & Company elevator system. MIPROM® offers high reliability, programmable flexibility, lower maintenance costs and reduced machine room space requirements. Contact your Montgomery Representative for more details.

MONTGOMERY ELEVATOR COMPANY, MOLINE, ILLINOIS 61265 MONTGOMERY ELEVATOR COMPANY, LIMITED, TORONTO, ONTARIO MIBSSS OFFICES IN PRINCIPAL CITIES OF NORTH AMERICA
AIR DISTRIBUTION EQUIPMENT

655 EXHAUST/SUPPLY FAN / Offered in 12 wheel sizes, the SW/B belt-driven, single-width inlet blower can be used for exhaust or supply in any of 15 discharge positions. Optional accessories enable the blower to be located on roof top, inside equipment rooms, or mounted in ductwork. / Greenheck Fan Corp.

656 CEILING FAN / The Hunter Olde Tyme fan is available with solid oak blades for both 52- and 36-in. fans. Irons come in brass or antique brass finish. / Comfort Conditioning Div., Robbins & Myers, Inc.

657 FLEXIBLE AIR DUCT / For low-, medium-, and high-pressure applications, the Gentlex AFG uninsulated air duct has two plies of aluminum laminate totally covering the steel spring helix, providing extra strength under job site conditions. Available in standard diameters from four- through 18-in. Gentlex AFG is listed as a UL-181 Class I air duct connector. / General Environment Corp.

658 VENTILATOR / "Ultra-Flow Streamline" is an industrial gravity ventilator incorporating two air-foils to channel air up through each side of the ventilator for smooth air flow and even discharge. Because it uses no electricity, it is unaffected by power outages. / H.H. Robertson Co.

659 DUCTLESS FAN / The "CA/90" is a self-contained air cleaning/air deodorizing device for use as an alternative to exhaust fans and ductwork in bathrooms. It also can be installed in walk-in closets, dens and other rooms in houses and apartments. UL-listed unit does not exhaust conditioned air, lowers construction costs, and reduces fire hazards. Rush-Hampton Industries, Inc. GB, IRC*

660 AIR FLOW ASSEMBLY / A variable-air-volume, single-duct unit, the Enviro-Master features fully adjustable minimum and maximum air flow limits, and is able to maintain precise control at extremely low pressures. / Koppers Co., Inc.

661 ROOF EXHAUST / The "GB" fan is a centrifugal, belt-driven roof exhaust unit. Said to provide high air-moving efficiencies and quiet, low-maintenance operation, spun aluminum exhausters are available in nine sizes, up to 48 in., with capacities up to 25,000 cfm. / Greenheck Fan Corp.

662 INTERIOR AIR FAN / A room-to-room air transfer system, the Transaire moves warmed (or cooled) air to adjacent rooms without duct work. Installed in any interior wall, unit's adjustable housing adapts for fit to walls from 2 1/4- to 5 1/2-in. in thickness. Suggested retail price: $86.20. / Preway Inc.

FIRE PROTECTION EQUIPMENT

663 SPRINKLER HEAD / The "Quartzoid" ceiling-style sprinkler is a fragrantly bubble-type unit with an unobtrusive appearance. It is available in a range of predetermined temperatures for light and ordinary fire hazards. / Grinnell Fire Protection Systems Co., Inc. GB, E, ICR*
HEAT GENERATION

664 TANK-TYPE HEATER / The "DVE" and "DRE" Conservationist water heaters are tank-type electric units for such commercial applications as restaurants, office and apartment buildings. / A. O. Smith Corp.

665 STEAMBATH GENERATOR / These packaged-power electric steam generators, manufactured to section 1 of the ASME code, are designed for heavy-duty, round-the-clock operation and are fully automatic. The independent, all-electric system does not use the building's existing boiler, eliminating expensive piping. / Steamist Co., Inc.

HEAT PUMPS

666 SINGLE PIPE LOOP / Using the Tri-Water system, EnerCon water-source heat pumps can share the same piping provided for building sprinkler systems. This NFPA-approved installation eliminates dual pipe loops, and is said to improve the performance of both the HVAC and sprinkler systems. / American Air Filter Co., Inc. GB, ICR*

PIPING & SPECIALTIES

667 RATED COUPLING / "Style HP-70" coupling is designed to provide greater rigidity for a grooved piping system; especially useful in mechanical rooms, at valve connections and headers, and in various fire protection services. Housings have a wider key section, eliminating movement at the joint. / Victaulic Co. of America.

668 CLEANOUT / The new Wade cleanouts have cast iron bodies and a new Ty-Sea/hub outlet, offered for the first time on a specification-type clean-out. This new outlet is suitable for SV or No-Hub connections, and eliminates the need for clamps, couplings or lead/oakum. / Tyler Pipe.

PLUMBING FIXTURES & TRIM

669 BATH/WHIRLPOOL / The "Cesar" is 5½-ft long by 3½-in. deep and is made of molded fiberglass-reinforced acrylic. Also available in a compact model, both including twin grab bars and adjustable water jets. / Crane Co.

670 SUNKEN WHIRLPOOL / One-piece vacuum-molded-acrylic "Premier" is available in a wide variety of colors and has four strategically placed jets and two air volume controls. All jets are adjustable. Two built-in grab bars also included. / Aqua Glass Corp.

671 COMPACT COOLER / "Model CSW-4" weighs only 65 lb. and may be hung on the wall at any convenient height for adults or children. For areas of moderate traffic, the unit delivers 4.0 gph. Steel cabinet is finished in gray enamel; top is stainless steel. Price: $287.00. / Sunroc Corp.

672 WHIRLPOOL BATH / The Ellisse "Grande Pool" measures 6' by 5-ft and is 20 in. deep. Twin chrome grab bars and a slip-resistant bottom with Heritage fittings. Also available without whirlpool action. / American-Stanadyne.

673 TOILET AND BIDET / The one-piece construction of the Ellisse water-saving toilet offers the latest in modern design. The new matching Ellisse bidet has chrome Dualux fitting. Both were designed by American-Standard with contoured lines to complement one another. / American-Standard.

674 LAVATORY / The sleek, sculpted lines of American-Standard's new Ellisse integrated bathroom suite are handsomely complemented by the continental design of this new chrome Dualux fitting. Oval-shaped basin on a smooth pedestal makes a unique addition to the lavatory. / American-Standard.

675 LEVER HANDLE / Designed for commercial and industrial projects, it is also recommended for use by the handicapped. There are three model series—Moen, Moentrol and Chateau. / Moen, Div. of Stanadyne.

For information, use inquiry card.
676 ACCESSIBLE FOUNTAIN / This wall-mounted drinking fountain provides easy access to those confined in a wheelchair. "Model 440-2," constructed of 18-gauge stainless, has a skirt that extends a full 20 in. from the wall. Dual lever handles are operated by pushing up, down or inward. / Western Drinking Fountains.

677 TWO-QUART TOILET / Toilet functions with less water because it has an air-assisted flush. The low-profile toilet is available in vitreous china and, comes with either a rounded or elongated bowl. Stainless steel models also available. / Microphon, Inc. GB*

678 BATH ACCESSORIES / Eight new Florentine accessories from Bradley include two different towel bars, a towel ring, a soap dish, a toothbrush and glass holder, a paper holder, a robe hook, and a combination grab bar/soap dish. Each features a durable antique finish and sculptured styling and can be used with matching plumbing fittings for a coordinated look. / Bradley Corp. Faucet Div.

679 VICTORIAN FAUCET / This new two-handle Victorian fitting features a spout, escutcheon and lever handles all made of vitreous china. Accent trim in polished chrome finish. The widespread faucet can be mounted on 8- to 12-in. centers. Made to match Bradley tub/shower controls and bath accessories in the same line. / Bradley Corp. Faucet Div.

680 FIXED SPOUT / The "Volta HV-1" fitting, a deck-mounted single-control mixing valve with fixed spout, is part of the company's brass modular plumbing system. / Krohn: Architectural Complements.

681 ENAMEL FINISH / Solid brass faucets and fittings for bath and shower are offered in white, navy, bright red, dark brown, beige and black baked enamel finishes, as well as polished chrome and brass. All times in Zazzeri's "Camelia" series will be available in stock. Price range: $100 to $250. / Watercolors, Inc.

682 BRASS FAUCETS / Both single-fitting and two-handle polished brass lavatory faucets feature a cast-brass body with a hand-polished finish for the look of gold. Single-control faucet features a ball-shaped handle made of crystal-like acrylic. The two-handle centerset fitting features lever crystal-like handles. / Bradley Corp. Faucet Div.

683 FAUCETS / This "Centerset" faucet has a satin brass decorative finish and is made of solid brass with a solid-brass non-rotating cartridge. Other styles are also available in 23-k gold, pewter, antique and polished chrome. / Grohe America, Inc.

684 TUB THERMOSTAT / This tub filler, which comes with a personal shower as well, has a GrohMix thermostat unit built in to regulate the water temperature. The solid brass unit is available in polished chrome and a 23-k gold finish. / Grohe America, Inc.

685 DESIGNER FAUCETS / This Grohe "Colani Centerset" model is part of a designer faucet collection by Luigi Colani. The curved form of these fittings favors the free flow of water for natural noiseless passage. Made of solid brass. / Grohe America, Inc.

686 SCULPTURAL HARDWARE / A variety of unusual geometric shapes make up one of this manufacturer's most popular lines. Available in chrome or gold finishes. / Sherle Wagner Int., Inc.

687 MIXING VALVE / While "Volta 172-H1" was designed by Arne Jacobsen in 1968, this wall-mounted single-control mixing valve with hand-held shower is now available in 10 epoxy colors, polished chrome or brass. / Krohn: Architectural Complements.

*In 1981 Sweet's Catalog File (s): General Building (GB); Light Residential Construction (LR); Engineering (E); Interiors (I); Industrial Construction & Renovation (ICR)
688 SAFETY BUBBLER / Now available as a standard feature on all Elay coolers and drinking fountains, the Flexi-guard bubbler is made of a pliable polyester tear- and abrasion-resistant elastomer. It protects against face and mouth injuries possible with stable bubblers in school and public fountains. UL-listed Flexi-guard meets all sanitary codes. / Elay Mfg. Co.

689 ANTIQUE BRASS FAUCET / An attractive charcoal knob set on antique brass makes this “Chateau” decorator antique brass faucet a handsome fixture. A matching tub and shower valve is available in a squared-circle design. / Moen-Division of Stanadyne

690 WHIRLPOOL BATH / The Serena VI offers an interior contoured for whirlpool bathing comfort. It combines extra interior width and depth with a specially engineered Jacuzzi Whirlpool system featuring three recessed, fully adjustable inlets powered by a high-capacity pump. / Jacuzzi Whirlpool Bath. Inc.

691 SHOWER UNITS / Double and triple “Hydiper Units” are designed for gang shower installations. They have no pipe chases, meaning narrower walls and lower construction costs. The enclosed piping is vandal-resistant. / Symmons Industries, Inc.

692 BATH IN THE ROUND / This combination of transparent cylindrical shower cabin atop a giant sized circular bath incorporates compartments for bath accessories, a mirror, and a hand spray into the back wall. It also features coiled stainless steel towel holders that act as warmers. A clear sliding panel keeps towels and accessories dry. Optional 8-jet whirlpool system available. / Hastings Tile & Il Bagno Collection.

693 PLUMBING FITTINGS / These fittings were designed for elegant appearance and rugged use. The 24-karat gold plated fittings ensure lasting luster and maximum resistance to corrosion. The bold handles are easy to grip and control. All fittings are simple to install and come with every necessary attachment. / Hastings Tile & Il Bagno Collection.

694 BATHROOM FIXTURES / This series of bathroom fixtures is imported from Italy. Made of vitreous china, it offers an elegant pedestal basin with gently rounded curves atop a smooth base. Five colors are available, and the fixtures are made to coordinate with Hastings’s other bathroom features. / Hastings Tile & Il Bagno Collection.

695 BAR SINK FAUCET / In this two-handle bar sink faucet, the clear acrylic crystal knobs are complemented by a high-rise spout with polished chrome finish. It features the water- and energy-saving Flow-Rator and a one-piece two-handle cartridge designed for long-lasting, trouble-free service. / Moen-Division of Stanadyne.

696 BATH GROUP / Vitreous china is the basic material for the fixtures of Serie Pegaso, including pedestal basin, water closet, bidet, bath shelf, soap holders, towel-bar brackets, tumbler holder, and toilet tissue holder. In white, blue, amethyst, ocher, and green. / Hastings Tile & Il Bagno Collection.

697 METERING FAUCET / Counter-top push-button requires less than two lb pressure to activate, meeting code requirements for handicapped users. Flow time is easily field-adjustable from two seconds to one minute; a preset temperature also saves energy. / Bradley Corp. GB*

698 SELF-RIMMING BOWL / This new bowl offers freedom of installation anywhere along the vanity top allowing users to tailor single- or multiple-bowl positions to meet various job needs. Corian bowls are available in semi-finished form in three colors. / E. I. Du Pont de Nemours & Co., Inc.

699 FIBERGLASS BATH / This bath/shower fixture includes two integral grab bars, a flat center back wall that can be cut around windows, and square front corners that accept standard shower door assemblies. There is a continuous ledge around the tub, and four back-wall ledges—all pitched. / Eljer Plumberware, Wallace Murray Corp.
700 FIBERGLASS SHOWER / This shower kit includes a one-piece seamless wall and shower floor, both made of press-molded fiberglass, plus hot and cold valves, showerhead, soapdish, drain, and shower curtain. It can be installed almost anywhere and can withstand the toughest everyday treatment. Available in three colors: white, blue and yellow. / The Swan Corp.

701 TUB PANELS / Three and five-panel bathtub wall-surround kits come with a molded-in utility bar and are made of durable, press-molded fiberglass with a baked-on polyurethane coating. They also feature molded-in soap dish and rounded corners for easy cleaning. Comes with necessary installation materials. / The Swan Corp. GB*

702 SELF-CLOSING FAUCET / The 90-75 in. metering faucet provides less than a half gallon of water per minute. Push button takes only two lb pressure to activate; the valve can be pre-set to flow from five to 15 seconds. / Bradley Corp. GB*

703 SHOWER FITTING / Swiss-made Arva Type 2 shower fitting has a swivel outlet equipped with an insulated handle; the showerhead may be pulled out up to 48 in. Shower comes with a V-valve for quick, accurate regulation of water flow and temperature. Handles and showerhead are offered in Sienna Brown and Azure Blue. / Contemporary Systems, Inc.

704 SHOWER STALL / A one-piece, five-feet unit, this Lasco fiberglass shower is formed in a mold lined with hand-set tile, producing a stall shower with a look of tile. Shower and a similar tub/shower unit meet ASTM slip-resistance and grab-bar requirements, and HUD and ANSI construction and fire standards. / Lasco Industries.

705 REINFORCED TUB / The "Dura-brace" bathtub has diagonal cross-members to reinforce apron strength and support the corners of the tiling flange. Bracing is said to eliminate handling damage and the need to weld braces to the sump. / Briggs, a Jim Walter Co. GB*

706 PRECAST MARBLE TUB / The "Alpine" tub features a gently sloping back configuration for comfortable soaking; tub interior measures 66" by 39 in. Optional hydro-massage equipment can be mounted completely under the tub. Made of Cortina Marble, the "Alpine" tub weighs about 180 lb. / Cortina Manufacturer's Assn. GB*

707 HIGH-RISE FAUCET / The waterfall faucet rises eight in. above its base, and extends seven in. over the sink. Two lavatory models of the faucet are now available: the widespread model shown here, and a four-in. centered. The arched spouts swing 72 deg for maximum maneuverability. / Delta Faucet Co.

709 CONDENSING UNIT / This new two-ton-capacity residential condenser has a seasonal energy efficiency ration of 13.0 The two-ton model and other units in the HS13 Landmark III line work with a number of evaporators in upflow, downflow, or horizontal applications. / Lennox Industries, Inc.

710 LIGHT COMMERCIAL AC / Single-package rooftop air conditioner and heat pump units are available in 7 1/2- and 10-ton cooling capacities. Marketed for a range of light commercial applications, the CHA/CHP11 line features a demand-oriented electronic control system for energy-saving performance. / Lennox Industries, Inc. GB*

711 COMPUTER ROOM AC / Space-maker II console-type packages fit into any small computer room, providing multiple direct-drive fans, high sensible cooling capacities, electronic humidifiers, and complete alarm functions. Options for the compact, self-contained units include hot gas re-heat and a free winter cooling system. / Hiross Inc.

* in 1981 Sweet's Catalog File (R): General Building (GB), Light Residential Construction (LR), Engineering (E); Interiors (I); Industrial Construction & Renovation (IC).
712 HEAT RECOVERY / This Roofpak shell and tube-type condenser rejects and recovers excess heat generated by all-season cooling processes, for use in perimeter heating, zone reheat, etc. Unit has a combination air and water cooled condensing section, and can be applied to almost any type of HVAC system. / McQuay-Perflex, Inc.

WATER SUPPLY & TREATMENT

715 FAUCET / This outdoor freezeless faucet is made with Lexan polycarbonate resin flanges and handles for high strength and impact resistance, as well as excellent weathering properties. / Woodford Manufacturing Co.

716 SOLAR HOT WATER / Conservationist storage tanks and solar heaters with a Phoenix electric element for auxiliary heat are now made with top connections for the solar hook-up. Placing solar fittings on top, with a factory-supplied tee, simplifies installation and reduces costs. / A.O. Smith Corp.

717 METAL FINISHING / The "Micro-black" surface, developed in Israel, is a new electroplated metal coating proven effective in severe climates where solar collectors are exposed to extremes of temperature, humidity, or corrosive pollutants. The coating is said to be less costly to apply than other electroplated selective surfaces. / American Heliothermal Corporation.

718 SOLAR PANELS / These lightweight, single-glazed panels are designed specifically for pools, spas and domestic hot-water systems. Side insulation improves efficiency and 1 1/2-in. side outlets save exterior plumbing and extra header pipe costs. / Raypak, Inc.

719 SOLAR HOT WATER / Domestic system consists of a 32-sq-ft flat-plate solar collector and the "TC3" transfer module, with the solar heat exchanger and all necessary pumps and controls. This low-cost "SM3" system adapts easily to existing hot water service equipment. / Lennox Industries Inc. GB*

720 HOT WATER SYSTEM / This solar water heating system is freeze protected, and the panel fluid loop is designed to minimize corrosion or mineral buildup in the collectors. The system can also be provided with storage tanks of 80- to 120-gal capacity. / SEP, Inc. GB, LRC, E*

721 SOLAR COLLECTOR / This solar collector has been specially designed for low-temperature applications such as pools, spas and hot tubs. With spiral groove construction, a copper flow tube is mechanically expanded within the wing, forcing copper into the grooves to ensure leak-tight bond. / SEP, Inc. GB, LRC, E*

ALUMINUM MOUNTING / The Sunfired "CU30-WW" solar collector has an aluminum extruded, split-hinge mounting system designed for quick and secure installation. It can be provided with outlets at a variety of points and with either bronze, black or clear aluminum framewall finish. The absorber plate consists of copper flow tubes mechanically expanded into an aluminum wing. / SEP, Inc. GB, LRC, E*

723 SOLAR-HEAT STORAGE / Installed behind a south-facing solar window, wall or roof, lightweight thermal energy storage pods will absorb, store, and release solar energy, while transmitting natural daylight. Two-in-thick pods are filled with a crystalline "phase change" material, sealed into a reinforced polymer container. / Solar Components Div., Kawall Corp.
COMMUNICATIONS

736 LOW FREQUENCY HORN / A front-loaded design with dual tuned ports, unit accommodates two 15-in. driver speakers, aligned vertically for unambiguous sound source perception. Horn is said to provide maximum power output with superior bass response. / Rauland-Borg Corp.

737 TIME CLOCK / A master clock for schools and institutions, microprocessor-based unit is user-programmable, with simple keyboard program entry for scheduling time of day, date, and zones where event is to occur. Features include power failure battery back-up, and an electronic "keystone" to prevent tampering. / Rauland-Borg Corp.

738 TWO-WAY COMMUNICATOR / For use in schools and other institutions, the Telecenter II microprocessor-based system provides instant, direct two-way conversation between personnel. Up to 200 staff stations may be incorporated; an emergency call feature has priority over all other calls. Options include zone paging, push-button dialing and dual-tone operation. / Rauland-Borg Corp.

739 MICROPHONE MIXER / The "Model 7510" automatic mixer comes standard as a four-input module, and is expandable to 24-input capacity. Unit is said to be particularly suited for public meeting areas, studio and sound reinforcement applications. Mixer combines digital and analog circuitry. / James B. Lansing Sound, Inc.

740 HOSPITAL COMMUNICATIONS / A fully computerized health care system, the "Responder" provides instant response to patient calls; read-out of patient status; a permanent record of patient calls; and locates personnel. Components include single or dual bedside stations; emergency stations; corridor and zone lights; data entry and staff register stations. / Rauland-Borg Corp.

741 CONFERENCE SYSTEM / Designed for meeting rooms, legislative chambers, courtrooms, etc., the Philips CV3000 system provides each participant with a separate microphone and associated loudspeaker. A "chairman's" unit has the capability to cut off all other microphones to make over-ruuling comments. Teleconference option is available. / Rauland-Borg Corp.

742 OFFICE INTERCOM / This system improves the internal office information flow and frees telephones to operate on outside calls. The "Compass" master system digitally displays the station number of the callers, plus the number of two more people trying to reach the master board. / Executive, Inc.

743 PBX SYSTEM / "Summit," a new digital PBX system, can handle up to 5,000 lines using distributed satellite processing technology. A fluorescent 16-character display on the console provides an overview of all communications activity throughout the system. / Executive, Inc.

744 CALL SYSTEM / The "Futura" system uses microcomputers at each patient station and nurse control station. This permits a significant reduction in wiring requirements and installation cost. All controls are contained in a seamless "touch pad" that comprises the face of the control station. / Executive, Inc.
745 TV PROJECTOR / This large screen television projector displays color or monochrome pictures up to 25 feet wide. It enlarges program material for display to large numbers of viewers. Television pictures can be displayed with high resolution and contrast over their full range of light output. / General Electric Company.

746 ENERGY MANAGEMENT / Microprocessor-based system controls lights, hvac equipment, etc. while it performs time management functions. All programming, cycling and load staggering instructions are entered through the system keyboard. The "2400 EMS" controls up to 256 discrete circuits. / Simplex Time Recorder Co.

747 MASTER CLOCK / The "2350" Master Time System provides microprocessor-based clock and signal synchronization, and can be used to control and monitor impulse, synchronous wired, electronic and Celestra business and industrial clock systems. / Simplex Time Recorder Co.

748 LOAD SUPERVISOR / Using the dial-up phone network, leased line or hard-wired system, the PTLoad supervisor can be used to remotely manage energy use in any number of facilities. Equipment includes the "Basic 8" load programmer for remote location; "210" video terminal, and "200" interpreter. / Pacific Technology, Inc.

749 BUILDING CONTROL SYSTEM / The basic element of the "Delta 5000" automated building control system is the Honeywell "Delta 1000"—an independent microprocessor-based central control and monitoring system. Each "Delta 1000" system has its own sensors, data-gathering panels and peripherals, and can be dedicated to a particular function. / Honeywell Inc., Commercial Construction Division.

750 GARAGE DOOR OPENER / Automatic opener operates by means of drive links enclosed by a sprocket-less drive track that permits the links to move only in a pull-push straight-line mode. It is controlled by a digital mini-computer. / Windsor Door Co.

751 BUILDING AUTOMATION / Buildings as small as 50,000 sq ft can benefit from the energy-savings payback offered by the IC/85/10 microprocessor-based system. The system features improved person-machine interface; it actually prompts the operator through all of the commands and energy-saving disciplines available. / Johnson Controls, Inc.

752 LIGHT DIMMER / Hunt Electronics' "A-600"—a UL-listed solid-state light dimmer—is low-end matched for full-range light dimming from 75-600 W. Total wattage is reduced by only 10 per cent when it is ganged with other dimmers. Also available in a three-way switch. / Hunt Electronics Co.

753 AUTOMATION SYSTEM / The MCC Powers "System 600" software is built around Digital Equipment Corporation's "RSX-11M" operating system. Working in conjunction with the "RSX-11M" is the MCC Powers Building Automation Software Kernel package, written in Fortran. Comes with a broad complement of Kernel features. / MCC Powers.

754 DIMMING SWITCH / The finned-plate heat sink used with the Tog-L-Dim R dimmer has been separated from the control unit for installation at a remote location. This means any number of Tog-L-Dim R's can be gang installed without derating in a standard wall box, and fit under a standard wall plate. / Power Controls Corp.

755 ELECTRICAL HEATING/COOLING

756 WALL HEATER / Constructed of impact-resistant 14-gauge extruded aluminum, the "Architectural Wall Heater Series" is available with brown duranodic, anodized clear, statuary bronze, black or gold standard finishes. Thermostats are tamper-proof. / Ern-craft Mfg. Co., Inc.

757 UNIT HEATER / A heavy-duty electric heater for primary or spot applications, the Taskmaster mounts horizontally or vertically. Air chute design and outlet louver diffuser provide maximum air throw and reduce noise. Optional built-in controls include summer fan switch. / Markel/Nutone Div.
757 OFFICE FAN / The Hunter office fan has a solid-state speed control and can be used with air conditioning set at higher thermostat level to cut cooling costs. Available in two blade sizes—24 in. and 30 in.—and five mounts—pedestal, ceiling, wall, bench and beam. / Comfort Conditioning Division of Robbins & Meyers, Inc.

758 HVAC CONTROL / The "SST "85.3 Optimiser" controls both heating and cooling functions in scheduled-occupancy buildings. It determines running equipment-startup time according to actual indoor and outdoor conditions. An internal battery maintains programming and timing up to 36 hours during power failures. / Robertshaw Controls Co.

759 LOW-ENERGY LAMP / This 24-volt lighting system draws only 2½ W per lamp with a life expectancy of 50 years. Mirror chrome finish standard on these "sparkle" lamps. / Neo-Ray Lighting Products.

760 LIGHTING STRIP / "C" lamps up to 100 W are spaced 12 in. on center on extruded aluminum lighting strips of 2-, 4- and 8-ft. lengths for ceiling, wall, column, and other mountings as "Stripper." / Omega.

761 MODULE LIGHT / The squared modules of "Cube" in acrylic for fluorescent lamps are framed in shallow metal housings with white or bronze finish in three-unit 1-by 4-ft. or four-unit 2-by 4-ft luminaires. / Lightolier.

762 INDIRECT LIGHT / A wrap-around frame gives "Lumiframe II" shadow-free indirect uplight and downlight using fluorescent lamp. White or bronze finish. / Lightolier.

763 PANEL LIGHT / The look of open sky is created with "Lumiform" with shallow fixtures that have white acrylic panel framed in white or oak-vinyl steel with fluorescent lamp. / Lightolier.

764 COURT LIGHTING / Daytime shadows are virtually eliminated by the lower mounting height of this luminaire. All aluminum die formed unibody construction with a sharp cutoff through the projected optical system. Complete with 400- or 1000-W metal halide lamp, piano hinged lens assembly and integral ballast. Tennis green finish. / Esco Lighting Products Inc.

766 SECURITY FIXTURE / White rooms, wet locations, and areas requiring sterile environments are the intended applications for the 3E series of indoor/outdoor security fixtures. Heavy-gauge, fully enclosed and gasketed, individual or continuous runs. / Neo-Ray.

767 OUTDOOR LIGHT / A new horizontal luminaire is designed for uniformity and low glare with high street-side efficiency. Die-cast aluminum upper and lower housings with baked enamel finish resist corrosive atmospheres. / ITT Outdoor Lighting.

768 REFLECTOR LIGHT / A modular system, the Illuminator III has medical and surgical applications. A gas spring provides smooth, self-contained counterebalancing action; aluminum adjustment handle removes for disinfecting. Vinyl-edged Alzak reflectors are 13 or 15 in. in diameter, available in six colors. / Medical Illumination, Inc.
769 SITE LIGHTING / The column-shaped Mono-Lite is 12¾ in. sq. in eight- and 10-ft heights. Cast and extruded aluminum luminaire is fully weatherproof, finished in black or bronze. Alzak reflector and cone distribute light evenly, using a number of HID sources. / McPhilen Lighting Div., Emerson Electric Co.

770 OAK STRIPLIGHTS / Offered in one-, two-, three-, four-, six-, and eight-light configurations, strip lights have a base of solid oak. UL-listed fixtures take G25 or G30 bulbs. / Victor Mfg. Co., Inc. GB, LRC*

771 STUDIO LIGHTING / Redesigned cyclorama lighting strips weigh less than previous models; a 12-light unit is 76 lb, compared to over 100 lb. Steel and aluminum lights have a one-piece formed reflector for uniform illumination of theatrical and studio backgrounds. / Berkey Colortran.

772 EMERGENCY LIGHT / Track-like styling lets the Dyna-QUAD emergency light hug the mounting surface for an unobtrusive appearance. Lampheads are fully adjustable and remote, finished in a combination of black, bronze, and oyster white. Six models offer a selection of remote power capabilities up to 56 W. / Electro Pwrpack Corp.

773 EXPOSED BULB / Pendant light uses clear or frosted 60 W G40 lamp, or chrome bowl lamp. The 10-in.-diameter flat metal reflector is an integral part of the fixture. Finish options include polished chrome and brass, satin bronze, white, gloss red, and matte black. / Habitat Inc.

774 HIGH-BAY HID / "Hi-Bay Prismatic" light features a low brightness metalized polycarbonate inner reflector, placed within an aluminum sleeve. Progressive prisms in the reflecting surface are said to offer an unusual low-brightness appearance with high efficiencies. / Thomas Industries, Inc.

775 POST LANTERN / Outdoor fixture is part of a new line of contemporary-style luminaires for area lighting, walks and entrances. Aluminum housing comes in either bronze or black finish; lens is shatter-resistant acrylic. Ground downlights and two-sided fixtures for surface mounting are also available. / Progress Lighting.

776 ALL-PURPOSE FIXTURE / The Cosmoline line includes 22 luminaries designed for universal application; outdoors, indoors, wet locations, vandal-proof. There are models for all light sources, with prismatic and white diffusers. Die-cast aluminum housings have minimal external hardware. / McPhilen Lighting Div., Emerson Electric Co.

777 LOW VOLTAGE ACCENT / Energy-saving light is pre-wired, with the 11.5-v transformer located in the lampholder for quick installation. Part of the Track-1 system, low-voltage accent generates less heat, making it particularly useful in museums, stores and residential areas. Fixture includes a swivel with a positioning lock. / Progress Lighting.

778 LAMP POSTS / Made of heavy-wall cast iron, Spring City posts can be adapted to accommodate the luminaire desired. Light sources may be incandescent, memory vapor, metal halide or HPS. The "Madison" post shown comes in single- or twin-arm versions, for embedded or anchor bolt installation. / Spring City Electrical Mfg. Co. GB, E*

779 FLOOR LAMP / "Sovrana-630" features a tungsten halogen light source of 100 to 1500 W cantilevered from a 30-in. column atop a 14-in. diameter base. Integral dimmer control. In black or white. / Lighting Associates, Inc.

780 FLOOR LAMP / "Dorma-629" is a floor lamp with tungsten halogen light source on integral dimmer control. Reflector, 16 in. wide, is mounted on a 94-in. column atop 14-in. diameter base. In black or white. / Lighting Associates, Inc.
POLE LIGHTING / Cast aluminum mini-body luminaire has wood-faced bracket arms and an efficient illumination pattern created through designed optics. Available with impact-resistant, high-temperature, non-solarizing acrylic lenses. / Esco Lighting Products Inc.

LOW-CEILING LIGHT / A low-voltage industrial area light for indoor and outdoor applications, "Model GC" has an unbreakable polycarbonate refractor permanently sealed to the housing. The refractor simply twistlocks to the ballast plate; a safety strap connection frees both hands for lamping. / Keene Corp., Lighting Div.

FLOOR LAMP / The "Obelisk" floor lamp is offered in polished aluminum, anodized bronze, leather, a range of pleated fabrics, and the "Camel" model shown here. All versions are available in stock. / Brayton Accessories Collection.

GLASS COLUMN LIGHT / The "Glasslight Collection" includes floor lamps as well as the table lamp shown—all with a 5-in-diameter clear glass column and topped with white pleated shade, or a polished brass or chrome shade. / Koch + Lowy Inc.

TASK/AMBIENT LIGHTING / These direct and indirect lighting elements, using either metal halide or hps lamps, provide efficient, comfortable lighting for open-plan offices. Three design groups include freestanding squared stem lights; pendant, wall- and partition-mounted units; and standing round stem lamps with symmetrical and asymmetrical lighting patterns. / Cardco Lighting.

QUARTZ FIXTURE / A "mini" light measuring just over 4 by 6½-in., the Lite-Pack quartz fixture may be used for general and accent lighting applications in museums, churches, residences, etc. The 150-W lamp reveals a full color spectrum; a filter blocks out damaging ultra-violet light. Lite-Pack is available with a number of mounting options. / Rambusch.

HANGING FIXTURE / This "8120" fixture has a shallow curve to its seven- by 20-in-diameter shape. Pendant light is offered in all of this manufacturer's standard finishes. / Robert Long, Inc.

CORD HUNG PENDANT / The "8220" pendant hood fixture has an overall diameter of 20- by 6-in. high. The black extrusion on the rim corresponds to the black cord that is supplied with each fixture. Stem or rod/loop suspension may be specified; hood comes in a variety of finishes. / Robert Long, Inc.

COLOR FIXTURES / Longlites extruded aluminum linear fixtures can be ordered in any color or finish—glossy or matte, painted or anodized. Metallic finishes include polished gold anodizing and polished aluminum. Custom finishes for all connecting pieces and end plates available. / Peerless Electric Co.

THREE-LAMP TROFFER / This troffer cuts energy consumption from 38 to 78 per cent while using a high-efficiency three-lamp fluorescent troffer. General Electric's "Watt-Miser II" lamps and "Maxi-Miser I" ballasts. The "Energy Master" also features multi-level switching for the different needs day and night. / Keene Corp., Lighting Division.

POLE LIGHTING / The "Carmel" series, with its clean rectilinear appearance and design, can use either metal halide or high-pressure sodium lamps. Sharp cut-off directs light where it is needed, and interchangeable reflectors allow for forward beam or right- or left-side throw. / Esco Lighting Products Inc.

FLUORESCENT WALL WASH / "Accent Lighting" system can be adjusted to job-site conditions with flexible row lengths and corners, and is available in a variety of lighting diffusers to fit most suspended ceilings. Fan corners follow the architectural lines and provide even corner illumination. Low brightness parabolic baffles are cantilevered to minimize wall irregularities. / Columbia Lighting.
793 OUTDOOR LIGHTING / This luminaire was specially designed to capture, control, and convey the output from the high-pressure sodium lamp. The “HPS Luminaire” features modern rectilinear design with crisp, clean lines. Available in 70- to 400-W units in die-cast aluminum housings. Hardware is corrosion-resistant. / ITT Outdoor Lighting.

794 ENERGY-SAVING LIGHTING / Columbia’s “Parabloome” luminaires were designed to optimize the four basic energy-saving components in a fluorescent lighting system: lamps, ballast, finish and fixture design. The optimum performance and low brightness appearance while operating temperatures remain low. Colza® baffle finish is standard. / Columbia Lighting.

795 BOARD ROOM LIGHTING / These new “Indalux” ambient luminaires blend with woods and wood veneers for a rich look. Durable chromed steel lighting is styled in natural wood finishes or oak, walnut, cherry or mahogany. Available in square solid or open side measuring 18 in. square by 72 in. / Spaulding, Subsidiary of Kidde, Inc.

796 WIDE-SPREAD LIGHTING / “Lite Duct,” a 6-in. extruded aluminum indirect fixture, has an exceptionally wide light spread due to a new optical assembly. This allows for even light distribution under low ceilings while using minimum wattage. Fixtures available in lengths from 4 to 24 ft, extendable to any length. / Peerless Electric Co.

797 GRID SYSTEM / Cast aluminum “L,” “T” and “X” connectors work with Lite Duct linear fixtures to create endless grid design possibilities. The connectors are available in 4-, 6-, and 9-in. diameters, in any color or finish. A cast ball at the joint is also available in another version. / Peerless Electric Co.

798 COURT LIGHTING / The “Wall Banger” provides consistent, non-glare court light with a wholly flush mounting surface. The lens is heat-tempered to absorb any ball punishment, andsealed tight to repel contaminants. Helarc welded and made of heavy-gage aluminum. / Elco Lighting Products Inc.

799 WALL MOUNT LUMINARES / The “Wal” fixture combines architecturally styled appearance with rugged, vandal-resistant construction; and is available for use with high-pressure sodium, mercury vapor or metal halide lamps. Also comes with two optical systems—a clear lens model and a prismatic lens model. Protected by a one-piece polycarbonate cover. / Crouse-Hinds Co., Lighting Products Div.

800 LUMINOUS CYLINDER / The “Contra/Cline” luminous cylinder is 16 in. in diameter by 15½ in. Unit also comes as a luminous tube. Available in four voltages and in two finishes for single, twin, triple or quad pole models or single wall mount. / Moldcast Lighting.

801 802 LIGHTING FIXTURE / The “Arabesque” Percine series offers exceptionally uniform lighting for maximum visibility. Extra-wide spacing capabilities result in high energy efficiency, and a sharp cutoff at 75 deg above vertical give the lamp glare-free lighting. / Moldcast Lighting.

803 GEOMETRIC LIGHTS / This member of the “Contra/Cline” series offers a sharp cutoff and glare control, excellent uniformity, and a choice of symmetric or asymmetric distribution. The 22 in.-diameter seamless polycarbonate sphere and cylindrical image-spreading lens. Cube enclosure also available. / Moldcast Lighting.

804 HID FLOODLIGHT / High-pressure sodium, metal halide, or mercury vapor HID lamps can be installed in “Minilite,” a compact floodlight with cast aluminum housing and three-piece diffuse reflector protected by a tempered glass lens. / Hubbell.
TOUCH LAMP / Touch any metal part of this table lamp and turn on tree levels of brightness. A fourth such turns the light off. Uses one-way bulbs with a special Touchtronic unit to create the three light intensities. 26½ in. high and available in oilshel brass or chrome or in a white, lack or brown lacquered finish. / Och + Lowy Inc.

FLOOR LAMP / This floor lamp is an elegant light column measuring 5 in. in diameter. The top section can be adjusted up or down to allow varying mounts of light to shine through the ass section. The glass is frosted to diffuse glare. Fully closed, it stands 44 in. high, and the maximum height is 54 in. Made of aluminum, "Sabra" is available in a polished aluminum, a polished "ass, or a white or black lacquered finish. / Koch + Lowy, Inc.

EMERGENCY LIGHTS / The SG6L series emergency lighting equipment is automatically and instantly provided by 5-v rechargeable battery system. Unit atures a constant reading state of large and a momentary test switch. / Sledyne Big Beam.

I-BEAM LIGHT / Contemporary site light with fluorescent efficiency is corrosion-proof, dirt-proof and vandal-proof. This lamp, with its extruded aluminum construction finished in bronze baked acrylic, is well suited for village and park-like settings. / Lightolier.

HOUSE NUMBER LIGHT / This unit is corrosion-proof, dirt-proof, and vandal-proof and provides easy graphic identification with widely diffused light. Die-cast aluminum housing is finished in baked black acrylic, and the handcrafted blown glass—available in clear, opal, or raindrop design—is impact-resistant. / Lightolier.

MOUNTED LIGHTING / Lamp features luminaire housing of 20-gal cold-rolled steel construction. Corners are continuously welded and ground smooth. Electrostatically baked acrylic finish is available in three standard colors. Fabric, wood, and custom color treatments. / Sterner Lighting Systems, Inc.

PARABOLIC LOUVERS / Designed for the open-plan environment, the "S300 Series" combines task ambient lighting with high performance SpanAcoustic panels. Using the standard 5 x 5 flat module, the series louvered fixture can be placed in many positions within the planning module to suit the task requirements of the designer. / Johns-Manville Sales Corp., Holophane Division CB

OUTDOOR LIGHTING / "Par-Power" spotlights and "ParPower" floodlights lock securely into universal holders with a twisting motion. Both are finished in polished aluminum or polished gold. Accessories available for two sizes including louvers and color filters. / Nutone/Sterling.

CLUSTER LIGHTS / The 1 Beam Cluster from Lightolier offers single-piece globes molded of impact-resistant polyethylene, with a screw-type gasketed fitter. The extruded aluminum beam is handsomely finished in bronze baked acrylic. / Lightolier.

FACETED SPHERE / Lightolier's outdoor-lighting collection features the "Faceted Sphere." Two multi-faceted clear hemispheres are framed by cast aluminum in baked bronze finish. Can be mounted on pole or wall, and available in mercury, high-pressure sodium, or incandescent models. / Lightolier.

FACETED OCTAGON / The "Faceted Octagon" site light is characterized by a framed enclosure of 25 weathered-brass facets. The clear acrylic panels are shatter-resistant and the lamp is available in clear, or clear with lamp cluster. Mercury and incandescent models. / Lightolier.

PENDANT LAMP / Italian architect Achille Castiglioni's design for the "Trisbi" pendant lamp provides direct, diffused, and reflected light by way of its polished chrome sphere reflector and diffuser of opal metacrilate, which hangs from the lamp's stem by steel wires. / Atelier International.
817 WALL LAMP / "Bollo," designed by Tobia Scarpa, is a sconce light whose metal housing in tan/black or black/red houses a 300-W halogen lamp and a curved diffuser. / Atelier International.

818 SODIUM LAMPS / General Electric's new family of 50-W Lucalox high-pressure sodium lamps have an average initial lumen rating of 4,000 lumens—80 lumens-per-watt—for the clear design and 3,800 lumens—76 lumens-per-watt—for the diffuse-coated design. This results from a new arc tube that is smaller in diameter than previous ones and a new ceramic seal design. / General Electric Co.

819 HALIDE LAMP / This new 175-W Multi-Vapor II lamp increases light output and efficiency while it produces a warm color that blends well with incandescents. It lasts twice as long as present company types of the same wattage and is expected to contribute to significant energy savings. / General Electric Co.

820 LIGHTING / This freestanding unit consists of a laminated, resin impregnated fiber tube with spun aluminum housing and spun steel base housing. The optical chamber is sealed to minimize lumen depreciation due to dust on lamp and reflector parts. Covering is Dacron fabric and comes in five standard colors. / Sterner Lighting Systems Inc.

821 BALLAST LIGHTING / This unit's luminaire and base housings are of 20 gage cold rolled steel construction. Support posts are of extruded aluminum with anodized finish and co-ordinated vinyl trim insert. Electrostatically applied baked acrylic finish available in three standard colors. / Sterner Lighting Systems Inc.

822 FLUORESCENT LAMP / A new type of bulb fits incandescent sockets and is said to provide a 70 per cent saving in energy and last five to ten times as long. It is available in 11W, 13W, 18W, and 25W. The new low-pressure mercury light source is similar in size and shape to conventional bulbs. / Norelco, North American Phillips Lighting Corp.

823 REMOTE SYSTEM / A remote control system uses radio signals to regulate fluorescent lighting levels and to reduce energy consumption. The central transmitter at a main lighting panel emits continuous, high-frequency signals, which travel along the existing circuitry to receivers that are mounted in the fixture ballast compartments. / GTE Lighting Products.

824 EXIT LIGHT SIGN / Offered in standard AC and self-contained emergency versions, the Excite exit is a slim-line design of molded Lexan, with rounded corners and molded-in downlight apertures. It is also available in vandal-proof and NEMA 4X models. / Dual-Lite Inc.

825 MOTORS & CONTROLS

825 STARTER KITS / Sylvania universal starter adapter kits for motor control applications can be used to add a starter in new installations, or to replace starters when changes occur in voltage or motor horsepower. Kits come in a plastic carrying case, and include one NEMA size 1 open type starter. / GTE Electrical Equipment.

826 LIGHTING CONTROL / The Contrack is a compact, microprocessor based control system for use in theatrical, television and other studio applications. It handles 96 dimmer channels and incorporates a color-coded CRT display. / Berkey Colortran.

827 GENERATORS / Based on a patented power excitation principle, all Fast-Response generators respond easily to high load demands in both standby and prime power applications. Models range from 30- to 260-kW capacity, all with a sustained short-circuit capability. / Kohler Co., Generator Div.

828 AC EMERGENCY POWER / Calcium lead battery system features independent 1 kVA modules for reliable operation. It provides smooth sine wave power with ±10 per cent harmonic distortion in three transfer time models. Each module is installed in its own slide-in, plug-in compartment. / Yorklite Electronic Products.
29 DIESEL GENERATOR / New "R" series" sets are available in voltage combinations ranging from 120/208 to 47/600. These 15 kW rotating field diesel generators are easily field-reconnectable in one- and three-phase voltages. Units are especially suitable for retail stores and offices. / Kohler Co.

RODUCTIVE SYSTEMS

30 FIRE ALARM / Engineered to ENPA and major code standards, the Life Alarm 2001 combines automatic alarm and heat/smoke sensing functions with instant emergency voice communication. The high-rise voice system uses portable two-way telephones that plug into wall jacks. / Impulse Time Recorder Co.

31 INFRARED SYSTEM / A long-range pulsed infrared photoelectric sensor system, the "IA-S02" may be used indoors or out, with transmitter and receiver up to 500 ft apart. Multi-transmitters can be used with one receiver; an alarm is triggered when an intruder breaks the beam between them. / Colorado Electro-Optics, Inc.

32 RECEPTACLES / This electrical receptacle features a one-piece ground strip with single contact, positive grounding for high-abuse in industrial installations as well as hospitals and health-care facilities. / Eagle Electric Manufacturing Co., Inc.

33 ALARM SYSTEM / "Flexalarm"—a monitoring and control unit—and "FlexAlert"—an emergency voice communications center—are designed with heat- and smoke-sensing sensors and an emergency voice communications center. "Flexalarm" permits special programming and selective evacuation as well. / Gamewell Corp. ICR*

34 FIRE ALARM / "Sensiscan 1000" is an expandable multi-zone fire alarm control panel designed for use in commercial, industrial and institutional applications. Activation of a compatible two-wire detector or any normally open fire alarm initiating device will sound audible devices, trip a municipal box and notify a remote station. / Fire-Lite Alarms, Inc.

35 FIRE MONITORING SYSTEM / The flexible "FMS 1000/AC" system uses existing AC wiring in a patented technique that eliminates the need for trunk wiring in signal communications. The modular system can be fitted to any size building to provide all fire alarm functions. / Robertshaw Controls Co., Control Systems Division.

36 ACCESS CONTROL / The Delta 1000 control system automatically checks a magenasically encoded card before granting admittance, and can show exactly who is in the building at any given time. To enter, an individual must hold a correctly programmed card and enter a memorized code in the keyboard. / Honeywell Inc.

37 SECURITY SYSTEM / The Cardkey Programmable Voiding Reader System" is said to be the first low-cost package to combine advanced access control capabilities with a capacity of up to 1000 cards. Applications include smaller manufacturers, offices, warehouses, parking lots, etc. / Cardkey Systems.

RACEWAYS

38 BRANCH CIRCUIT / THE "OD55" overhead distribution system is said to provide great convenience and flexibility in arranging and switch controlling 277V single- and dual-ballast lighting fixtures. Raceway coordinates with all popular ceiling-tile support systems. / The Wiremold Co.

39 POWER/LIGHT PLUG / The "seriesSeven" power base, which has dual 20-amp circuits, can be retrofitted to any existing panel in a "seriesSeven" office layout. A snap-together cable connector permits two-, three- or four-way panel connections, with space for communication cables and amphenol connectors. / IRD Corp.

SERVICE & DISTRIBUTION

840 LOAD CENTERS / For use in single- or multi-family dwellings, load center and circuit breaker is available with a factory-installed, bolted main breaker, or main links set up for straight-in wiring. The enamel-finished steel enclosure fits between 16-in.-oc studs. / GTE Electrical Equipment.

* 1981 Sweet's Catalog File (C): General Building (CB); Light Residential Construction (LR); Engineering (E); Interiors (I); Industrial Construction & Renovation (ICR).
841 ELECTRICAL WIRING / "Walker-tap pokethrough" allows service fittings to be installed at desired locations and wired from the ceiling of the floor below, through holes cut or drilled in concrete floors. Electrical and telephone wiring passes up through the tube assembly to the receptacle. / Walker Parkersburg Division on Textron Inc.

842 CABLE CLAMP / The "Cable-Lok" clamp provides strain relief for non-metallic sheathed cable, enabling installations to meet NEC requirements. UL-listed device snaps into place in any cable entry knockout of any Bell non-metallic box. Clamp can be reused / Bell Electrical Products, Square D Co.

WIRING DEVICES

843 ALUMINUM BOXES / Weatherproof three-gang boxes are offered in two versions: 1/2- and 1-in. threaded outlets. UL-listed boxes measure 6½ by 4½ by 2½-in.-deep. / Slater Electric, Inc.

844 WALLPLATES / Two-gang outlets are available in the "Sta-Kleen" line of crack-resistant plastic wallplates for outlet boxes. The smooth plate can be cleaned with a damp cloth. Wallplates and matching screws are offered in brown, ivory and white. / Slater Electric, Inc.

845 EXTENSION RING / Made of rigid plastic, 1/2-in. extension, rings allow more wiring room for ground fault interrupter installations in outlet boxes. Two long screws are furnished with the extension ring. / Slater Electric Inc.

846 TELEPHONE CABLE / An under-carpet telephone cable is available as "Teletape," a flat, coplanar cable containing 25 pair No. 26 AWG round copper conductors that can be terminated to standard telephone connectors. Nominal thickness is .035 in. / Brand Rex.

847 FLOOR SYSTEMS / The "Access Floor" system of power and lighting distribution features receptacle boxes and flexible conduit for raised-floor modular distribution grids. Capacity for future loads is built into the system. / 3M/Electro-Products Division, CB, ICR.

848 ALUMINUM BOXES / A number of one- and two-gang FS boxes, extenders, and cover plates have been added to the "Stonoco" line of indoor and outdoor electrical service products. Stainless steel hardware and "Polyglass" plugs for unused outlets are included; all items are UL-listed and CSA-approved. / Keene Corp.

849 POWER RECEPTACLE / Pre-wired aluminum poke-thru wiring device serves as a floor-mounted power receptacle and telephone outlet. Unit installs in one step with no tools required. Poke-thru wiring device is UL-listed up to four-hour fire rating, and meets NFPB Life Safety and other major codes. / Dual-Lite Inc.

850 WATER TIGHT PLUG / Nylon straight blade plugs and connectors called "TECH-SPAC" are said to meet or exceed UL Hospital Grade standards while keeping out water, mud, dust, and corrosion through an "O" ring between face and cover, sealing sleeve on connector, and cord seal around cord grip. / Bryant Division of Westinghouse.

851 TOUCH-CONTROL / A touch-activated and operated light dimmer is now offered in the "Decora" line of brushed metal devices. A single touch to the plate turns lights on; a continuous touch causes the light to cycle from dim to full bright and back again. / Leviton Mfg. Co., Inc.

852 POWER SYSTEM / A low profile, .043-in-thick "Undercarpet Power System" permits floor surface mounting of a three conductor assembly of Nos. 10, 12, or 14 AWG cables between bottom shield of PVC moisture barrier and top shield of protective steel. / AMP Inc.
NEW EDITION

PRATT & LAMBERT
Specification Manual
A complete reference guide for the architect and engineer

Write for it.

The number one paint specification manual is more complete, more helpful than ever. For information on how to obtain your copy, write on your letterhead to Pratt & Lambert, Dept. AR Box Twenty-Two, Buffalo, N.Y. 14240.
Year after year of harsh Indiana weather had taken its heavy toll on Richmond's Coca-Cola bottling plant. In places, the concrete had become so badly deteriorated that rusting tie rods were exposed.

But new buildings are very expensive these days, and inside, the building was still perfectly usable. So after it was determined to be structurally sound, Coke decided to restore their existing one.

General Contractor V.H. Juerling & Sons, Inc., began by sandblasting the entire structure, chipping away all fragmented and weakened concrete and replacing the rusted tie rods.

Then the application contractor, Ralph Wisenhunt Co., brought the surface back to its original form with Thorite. Thorite is a non-slumping, quick-setting patching material that restores even vertical concrete without expensive formwork.

Next, Thoro-seal Plaster Mix (blended with Acryl 60 to enhance bonding and curing) was troweled on and floated smooth. Thoro-seal Plaster Mix is harder and more wear-resistant than concrete alone, and bonds so tenaciously that it actually becomes part of the wall. Best of all, it's100% waterproof. A permanent barrier against the onslaught of weather.

More and more, people are looking to make the most of buildings they already own instead of commissioning new ones. More and more they want designs and materials that last. And more and more, they're coming to us.

We're Thoro System Products and for more than 65 years, all we've ever done is save people time and money by restoring and protecting their concrete and masonry. Better and more often than anybody else in the world.
